INTRODUCTION

"Il ne faut jamais abuser de bonnes choses," says the Frenchman, and though he is undoubtedly right in stressing the "too much of a good thing" theme, it is essential to know exactly how the "good thing" may be acquired before you can start to abuse it.

And that is what this book is for! Not—as the title may suggest—to promote excessive drinking, but to show you how to prepare any drink—from an innocent lemon-squash to a high-power, mule-kicking cocktail.

It is possible that certain terms and measurements used in these recipes may be unfamiliar to a few readers, and so we offer these notes of explanation and advice.

First and foremost, it is essential that the ingredients, whether alcoholic or not, be of the finest grade. An inferior article may rob the drink of its true flavour and qualities.

All quantities should be carefully measured out although, of course, they may be varied on experiment to suit individual tastes.

To "shake" a drink naturally implies the use of a shaker.

To "stir" a drink means to mix with a spoon—usually a long barspoon.

Always use clean ice and handle with a scoop or tongs.

Except where sugar is actually recommended, use only syrup. It mixes better.

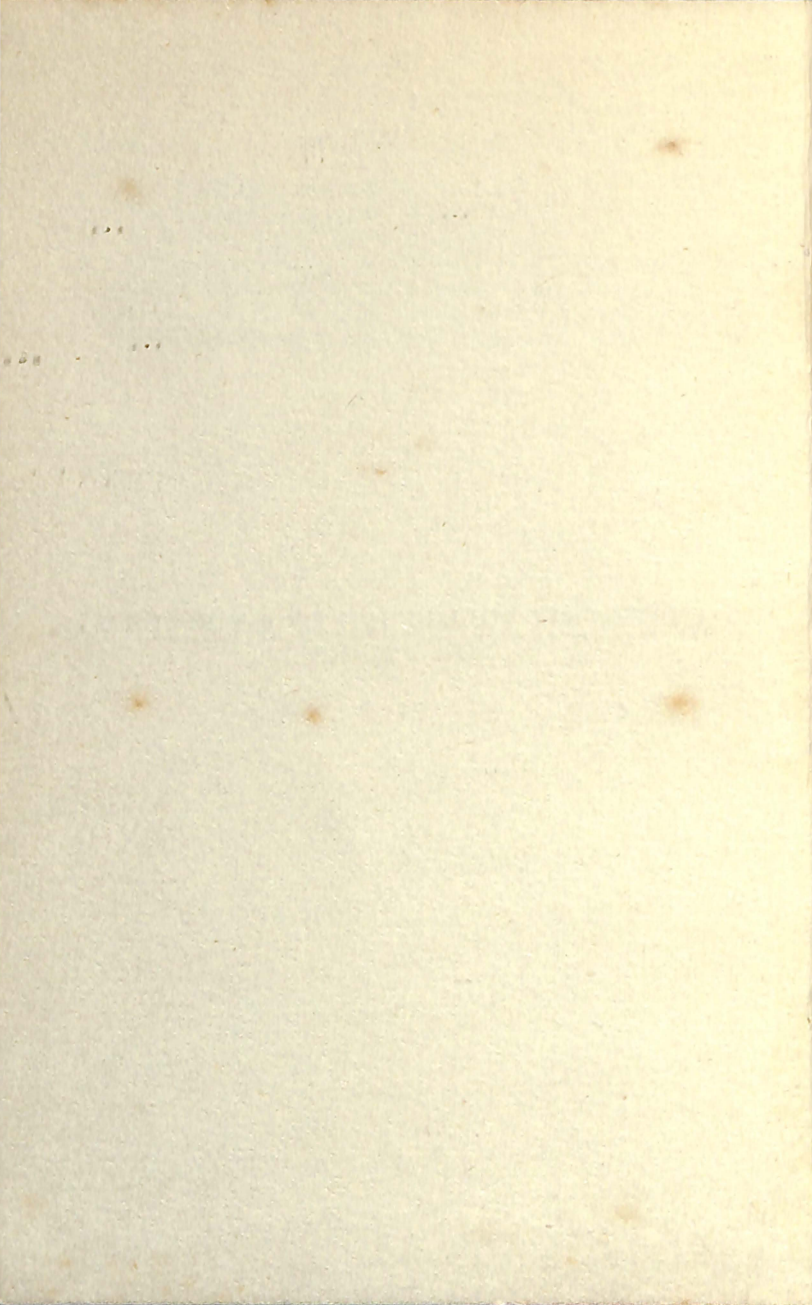

The average wine-glass holds 1 gill.

The average cocktail-glass holds $\frac{1}{2}$ gill.

A jigger is equal to one-third of a gill.

With these few words we take our leave, and if, on checking the drinks at the end of a cheery evening, you find you've sampled every recipe in this book, you can rest assured your party was a big success.

A LIFE-TIME COLLECTION OF 688 RECIPES
FOR DRINKS

 1 jigger Bourbon

Whisky Toddy

Crush $\frac{1}{2}$ lump of sugar with 1 jigger Bourbon
 a little water in old 1 lemon peel
 fashion glass Stir

COCKTAILS

HOW TO MIX THEM

NINTH LARGE EDITION

by

"ROBERT"

*of the American Bar, Casino Municipale, Nice,
and late of the Embassy Club, London*

EVERYBODY loves a cocktail; but not one in a thousand can mix one properly. With this book it is almost as simple as preparing the common-or-garden whisky and soda.

Although this is a complete bartender's guide to the making of cocktails, it is something more. It enables anyone to give a friend a cocktail in his own home, and a good cocktail too.

The materials required for a large number of popular cocktails are to be found in any ordinary home. The few utensils necessary are indicated, and the cost is small.

In addition to cocktails, "Robert" tells how to mix cobbler, crustas, coolers, egg-nogs, fizzes, flips, frappés, high-balls, juleps, pousse-café, punches, rickeys, sangarees, slings, smashes, and sours.

SUNDAES

ICES AND CREAM SODAS

HOW TO MAKE THEM

by

C. H. BOEGLIN

THE popularity of Sundaes, Ices and Ice Cream Sodas is steadily increasing. The habit of serving ice cream at dinner, in place of sweets, and at various other times and occasions, is growing.

This little book is a complete guide to the making of these delights. It is full of excellent recipes for summer beverages, ice cream sodas, ices, sundaes, frappés, parfaits, etc. There is valuable advice, too, on how to run a soda fountain.

THE COCKTAIL KEY

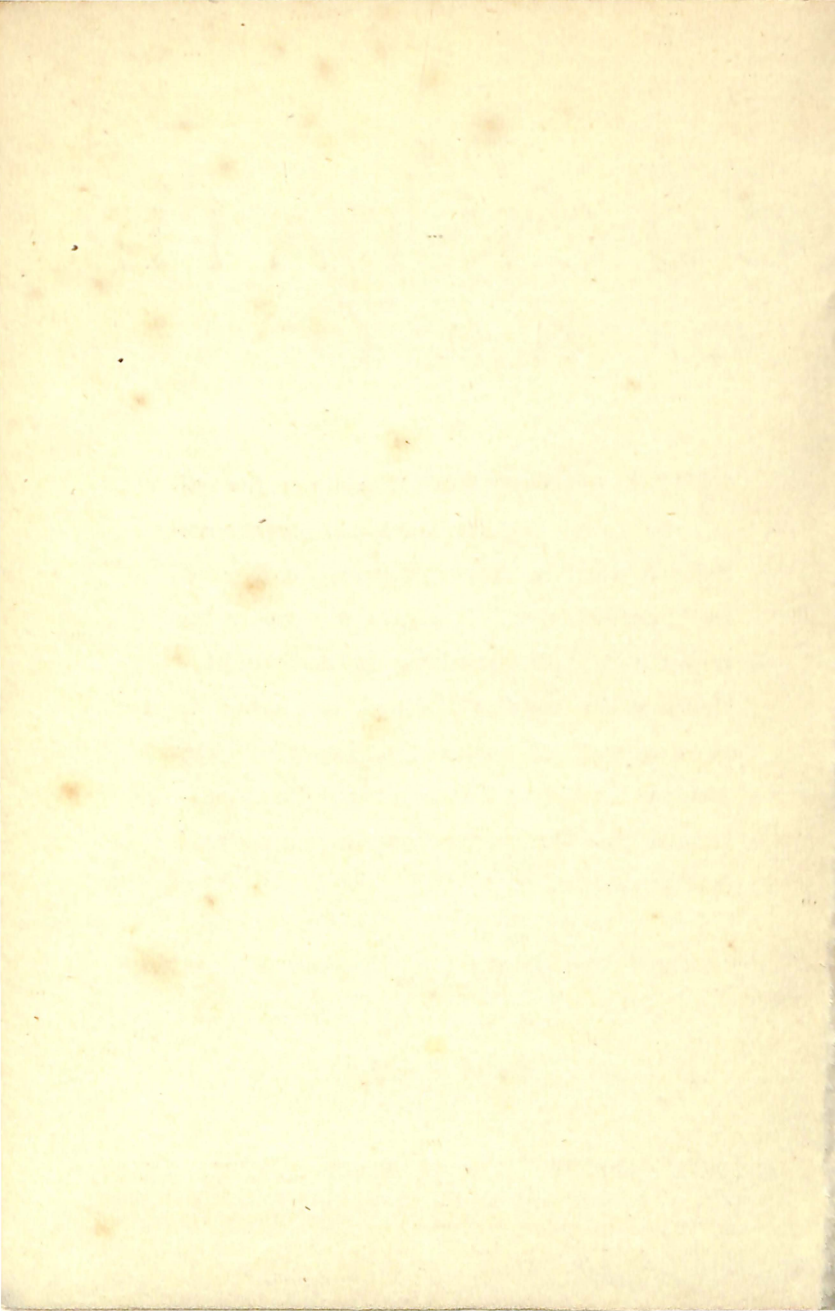

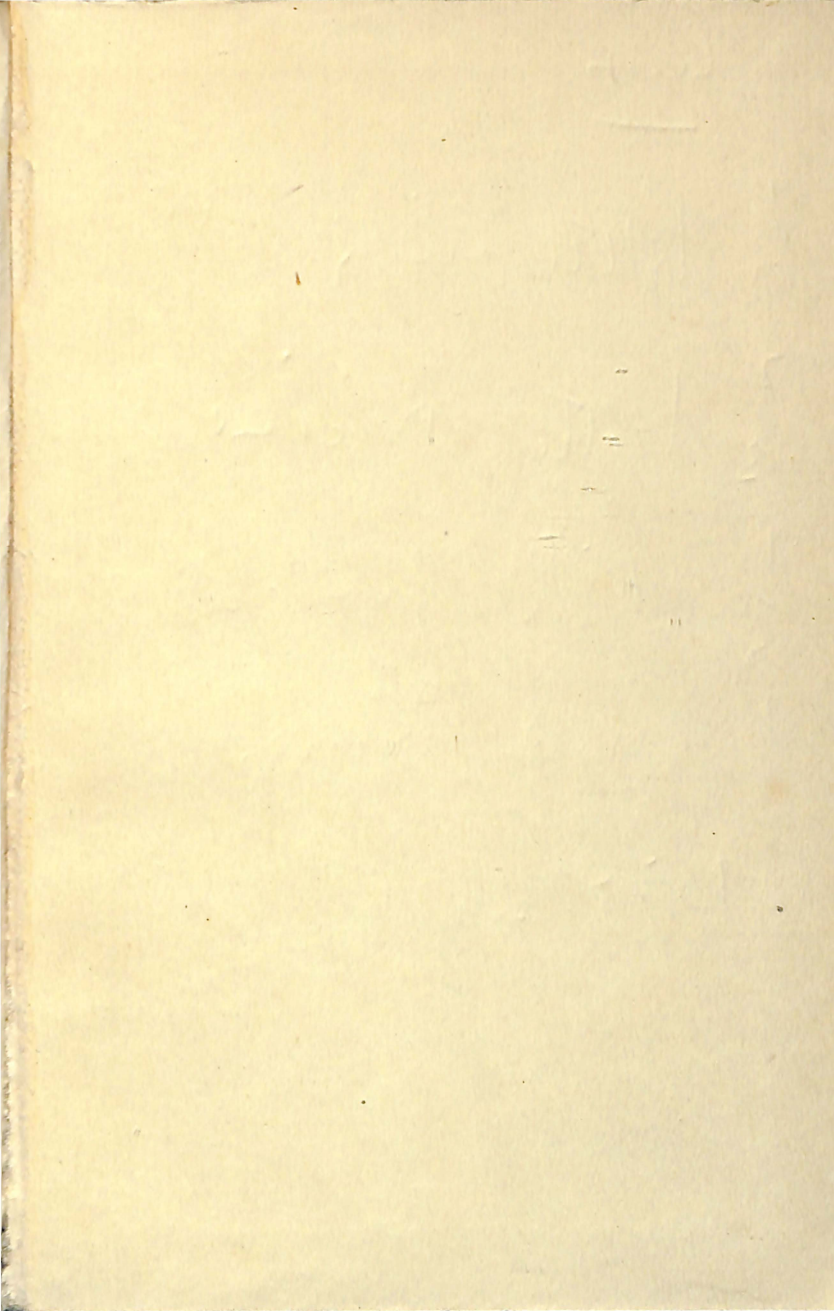

THIS tabulated key of recipes for all the most popular cocktails represents the last word in quick reference, and easy-to-follow schemes. It shows at a glance the ingredients and quantities recommended—there is no hunting through an index or turning over of pages—this ingenious key is opened at the right time in the right place—always. Just the thing to fix up in your cocktail bar or cabinet.
