## MIX IN PROTEIN SHAKES

# *Extraordinary Protein Bar for People Living with Diabetes and managing a healthy weight.*[1]

NuGo Slim is a delicious, low sugar, high protein bar with the lowest published glycemic index to help minimize blood sugar spikes and avoid crashes.

## *The basics of the Glycemic Index*

Glycemic Index (GI) measures how quickly food is digested in the body. A low GI score indicates that a food digests slowly over time, rather than causing an immediate spike in blood sugar. For people managing diabetes or pre-diabetes, low GI foods are especially important for helping the body maintain steady blood glucose levels.

Foods with a GI score of 70 are considered to be "high glycemic," while foods with a GI score of 55 are "low glycemic." Scores significantly lower than 55 are increasingly beneficial in controlling blood glucose levels.[2]

## *The truth about Maltitol.*

Maltitol is a sugar alcohol used as an alternative sweetener. Foods that contain Maltitol are frequently labeled as "low-calorie" or "sugar-free" and can be geared toward people managing diabetes.

With a GI score of 52, similar to table sugar, Maltitol syrup is not ideal for maintaining balanced blood glucose. The human body is not equipped to digest Maltitol. Eating foods made with Maltitol often cause stomach pain while feeling bloated and gassy.[3]

# *Maltitol can turn "low-sugar" into "high-alert."*

## *NuGo Slim bars allow you to easily, & deliciously, support your goal of steady blood glucose control and weight management.*

**With an incredibly low glycemic score of just 24**,[4] our bars may allow you to easily — and deliciously — support your goal of steady blood glucose control and weight management.

Coated in luscious Real Dark Chocolate and sweetened with chicory root fiber, which has a GI score of virtually 0, NuGo Slim bars deliver the taste you'll love.

Free of artificial sweeteners and the sugar alcohol Maltitol, NuGo Slim bars come in five amazing, high-protein, low-sugar flavors, ranging from Raspberry Truffle to Brownie Crunch.

Take an active role in managing your weight and try delicious NuGo Slim today! ◆

## What are Stuffy Nose Strips?

Stuffy Nose Strips are the Next Generation of Nasal Strips!

Invented by a Doctor who treats Sleep Apnea, Stuffy Nose Strips are based on a Proven Medical Technique known as the ***Cottle Maneuver.*** This technique is used by ENT's and Plastic Surgeons to open the Nasal Valves/Nasal Passages.

Stuffy Nose Strips ***Go on the Cheeks***, not over sore noses, and work by gently pulling the skin to the left and right of the nostrils (Nasal Labial Folds) to pull open the airways.

These innovative External Nasal Dilators provide a Natural Drug-free approach to increasing airflow and provide instant relief of Nasal Congestion due to Allergies, Colds/Flus, Sinus Issues, Deviated Septums and Snoring.

## Why Stuffy Nose Strips?

- No Sticky Residue or Painful Removal
- Do not come off at Night
- Natural Drug-Free Approach for Nasal Congestion
- Unlike Breathe Right and other Nasal Strips our Strips Go on the Cheeks not Over Sore and Irritated Noses
- Addresses Deviated Septums in a more efficacious manner versus other brands that attempt to lift nostrils upwards vs pulling left or right in the opposite direction of the deviation.

## What are Performance Strips?

Featured on HBO Hit Series Hard Knocks Performance Strips are worn by NFL and College Football players and recommended by Trainers.

Utilizing the same Technology as Stuffy Nose Strips Performance Strips are larger black Strips that ***Go on the Cheeks*** to open airways while blocking and protecting the eyes from the glare to offer a Drug-Free Performance Enhancing experience.

For Athletes of all Sports, Performance Strips are also used by Runners, Cyclists, Cross fitters, Mud Racers.
