

# Workshop Solutions

One call for complete peace of mind

Bodyshop Equipment

Valid until 31st August 2017

## WHAT IS THE INTELLIGENT REPAIR PROGRAMME

"The Intelligent Repair Programme (IRP) is a combination of equipment, product, services and support from LKQ Coatings that offers today's bodyshops, dealership and work provides a single source supply solution for the cosmetic, rapid repair sector"

## WHY SHOULD BODYSHOPS CONSIDER IRP?

- Potential for bodyshops to provide a one-stop-shop covering all sizes of repair
- Quality driven programme
- Enhances customer journey
- Allows bodyshops to retain volume
- Increased service offering
- Additional income stream and allows possible up-sell opportunities
- Attractive higher margin than traditional repairs
- Increased customer satisfaction

## TYPES OF REPAIR

### EXTERIOR

- Stone Chip Repair
- Glass repair/polishing
- Paintless Dent Removal/Reduction
- Plastic Bumper Repair
- Cosmetic Paint Repair
- Alloy Wheel Repair
- Headlight Refurb
- Air Conditioning

### INTERIOR

- Dashboard
- Door Card
- Leather
- Trim
- Odour
- Fabric
- Carpet
- Upholstery

## INTELLIGENT REPAIR INTERIOR REPAIR TROLLEY SYSTEM TPS.408030D

Our Intelligent Repair Interior Repair Trolley is your complete solution to everyday interior and upholstery damage to motor vehicles, boats, caravans, planes etc.

The trolley comes complete with the relevant kits to enable you to repair rips, tears, scratches etc. on Leather, Vinyl, Fabric and Velour interiors. It also includes a Plastic Repair kit allowing you to repair plastic dashboards, door trim, exterior plastics and bumpers.

### LEATHER AND VINYL

Our Leather/Vinyl kit comes with all of the consumables and tooling required to easily carry out comprehensive repairs to rips and holes to Leather and Vinyl upholstery.

Included in the kit is a full water based colour system consisting of 16 tinting bases which can be mixed using a colour tinting guide to make an excellent match to most colours. When used with our optional colour scanner you can perfectly match over 2000 upholstery and trim colours.

### FABRIC/VELOUR

Our Fabric/Velour kit comes with all the tooling and consumables required to easily carry out comprehensive repairs to rips and tears to fabric and velour upholstery.

The kit comprises of 48 jars of various coloured fibres which, when mixed together, will match any fabric or velour interior. The kit also includes a colour system to replicate any pattern within the upholstery.

### PLASTIC

The plastic repair kit comprises of plastic repair gels to carry out repairs to scratches and holes in plastic components. Also included in the kit are 6 x aerosol plastic trim colours and our widely used Multi texture aerosol which includes 3 interchangeable nozzles to allow you to recreate coarse, medium and fine textures. Interior repairs can be overpainted using the leather, vinyl colour system to perfectly match any required colour.

\*Paint Scanner not included

WEEKLY FROM ONLY **£5.77\***  
ONLY **£1,145.00**

### PAINT SCANNER TPS.SCANNER

Mini hand held paint ID scanner can be used as an optional aid to the leather paint system included in interior trolley.

\*Optional Paint Scanner

ONLY **£725.00**

\*Finance example typically based on a 5 year lease purchase agreement. Finance subject to status, full terms and conditions available on request. Other finance options available. All prices exclude VAT at 20%. Price, availability and specification may change without prior notice. Warranty subject to manufacturers terms and conditions of use. Errors and omissions excluded. Offers valid until 31st August 2017. Prices correct at time of going to press: March 2017.

## DR. COLOURCHIP COMMERCIAL SYSTEMS

- Professionally repair paint chips in a fraction of the time
- An easy to follow 3-step process
- Unique formulation of high-quality automotive tints and chemicals allow user to blend away all excess paint in just minutes

Stonechip repairs are currently difficult due to the fact that bodyshops, dealers, etc. have to use waterbase colour followed by a second application of a clearcoat. Mechanical drying is then required i.e. Infra-red heaters which have to be used to cure the clearcoat which has to be activated. Once this is cured you then have to de-nib and polish the area. A very long winded process for a so called quick solution. We now have an exclusive solution which is very quick... Dr. ColourChip. The perfect solution for stonechip repairs.

## PRODUCT BENEFITS

- No colour mixing, paint codes or spraying – Everything is provided
- Unskilled labour – no experience, training takes less than 2 hours
- Average repairs take less than 15 minutes
- Average repairs and supply costs are minimal
- Simple, small, self-contained storage system – no other equipment needed
- Automatic colour updates
- Easy, same-day order-fulfillment

## SYSTEM CONTENTS

Commercial packages start with a selection of 30 colours which would cover an estimated 70% of serviced vehicles, with the rest being able to be blended using your system colours. Should any unusually coloured cars need repairing, business owners can simply place an order for a custom factory blend. We offer system sizes of 30, 50 & 80 colours!

## JUNAIR ALLOY WHEEL ANGLED PREP BENCH 597 77 0340

- Ergonomically designed angled work area for a comfortable working position
- Easy glide rollers for effortless product handling
- High efficiency cartridge filters provide Health and Safety compliance
- Extraction reduces workshop contamination
- Ventilation system works as a control measure for COSHH
- Robust Steel construction
- Requires only one standard 13A plug socket

WEEKLY FROM ONLY **£19.38<sup>+</sup>**  
ONLY **£3,845.00**

## JUNAIR WHEEL BAKE 597 77 1550

- Cures 2 wheels at a time
- Curing time 15 to 30 minutes depending on material used
- Clean in operation
- Designed for use with compliant coatings
- Suitable for wheels with or without tyre fitted
- Easy load roller system
- Automatic temperature and time control
- Electric heating – no gas required
- Safety stop button

WEEKLY FROM ONLY **£16.86<sup>+</sup>**  
ONLY **£3,345.00**

## 4 WHEEL PAINT AND PREPARATION TROLLEY 597 77 8180

- Easy assembly wheel preparation stand of good sturdy construction with a weighty base to give stability.
- Can accommodate 4 large alloy wheels (with tyres still mounted) without them impeding on each other.
- Four castor wheels make it mobile and easily manoeuvrable.

ONLY **£445.00**

## ALLOY WHEEL BLAST CABINET

- Quick dry blasting application for damaged alloy wheels
- Provides quick paint preparation on wheels
- Effectively removes alloy corrosion
- Can be operating either via a suction or pressure fed system

SUCTION: Scotches prior to paint- ideal for quick, smart repairs  
PRESSURE: Removes layers of paint and corrosion and strips wheels back to bare metal

- Various extraction and cyclone systems are available
- Compact cabinet contains dust
- Reduces manual labour
- Internal spigot complete with pivoting arm to hold the wheel in place during the blasting process

### SUCTION FEED 597 77 0950

WEEKLY FROM ONLY **£25.43<sup>+</sup>**  
ONLY **£5,045.00**

## TRYAX TY30-VS VERTICAL DIAMOND CUT ALLOY WHEEL LATHE 597 77 8120

**SAVES TIME  
MAXIMISES WHEEL THROUGHPUT**

THE TY30-VS is ushering in a new era for diamond cut alloy wheels. This CNC vertical alloy wheel lathe is characterised by its innovative purpose-built design. Built from the ground up both mechanically and electrically, the system offers an easy-to-use touchscreen interface coupled with the latest state-of-the-art real-time control software driving the latest in motion-control digital drive technology.

The CNC is equipped with 15" multi-touch screen and offers user-friendliness and precision coupled with reliability.

An ultra-fast digitiser option is capable of probing a typical 20" wheel in around 3 minutes.

- Cuts wheels from 14" to 30" in diameter.
- Fully automated and easy for staff to use.
- Intuitive, easy to use touchscreen interface.
- Automated self-plotting digitizer does all the hard work for you.
- Simple two stage process – 1 digitise wheel, 2 cut wheel.
- Compact design saves on valuable workshop space.

WEEKLY FROM ONLY **£277.20\***  
ONLY **£55,000.00**

## SEALED BEAM SHELTER

### SEALED BEAM CONSTRUCTION

Sealed beam construction gives shelters from Airshelta much greater strength in all weathers than flimsier shelter systems, and wide standing pads and water-filled side skirts provide strong anchoring. Once assembled, sealed beams give shelters the robustness required to withstand bad weather. Unlike fiddly and complicated metal pole systems, which can be heavy, complicated to put together and prone to having parts go missing, sealed beam systems from Airshelta only require a pump to inflate the rigid support structure in a matter of minutes, allowing teams to get on with their work as soon as possible.

### ROBUST AND VERSATILE

Airshelta's are robust and versatile, manufactured from high quality woven polyester with a laminate of flexible pvc on each side.

### EXTREMES OF WEATHER

Airshelta's can withstand many extremes of weather, providing users with secure and protected spaces in which teams can work enclosed and shielded from the elements. Weatherproof flaps ensure that rain remains outside of the Airshelta, whilst in hot weather it offers air-conditioning.

### RAPID DEPLOYMENT

Is a key feature of the Airshelta system, reflecting the strength of the inflated beam method of assembly – a standard size Airshelta can be erected by just one man within 2 minutes.

## CARTAR FL-100 MOBILE LIFT

597 77 0260

The Cartar Mobile Lift offers a system for the flow and movement of damaged and immobile vehicles through your workshop. Free up work floor space – elevate the vehicle to a safe and comfortable working height, move the vehicle around whilst in the raised position. Ideal for Smart Repairs, Alloy Wheel Refurb, General Repair and Damaged Vehicle Inspection

- Working at a comfortable height – max height 800mm ideal for bumper work
- Great moving damaged vehicles – 100mm low entry makes it easy to position
- Ideal for Alloy Wheel Refurbishment – remove all 4 wheels of cars / vans up to 2.8 tonnes
- Powered by Compressed Air with no installation costs – requires 50-100psi
- Heat/Weather Resistant – Can be used inside or outside, and in paint booths
- Multiple Safety Features including automatic mechanical lock when in raised position

**WEEKLY FROM ONLY £16.10\***  
**ONLY £3,195.00**

See the Cartar in action!

## LIFTMASTER SPRINTER 3T MID-RISE SCISSOR LIFT

581 77 0030

With one meter lifting height, the Sprinter covers 90% of all activities in the workshop. Thanks to the mobile kit (supplied as standard), the lift is easily moveable around the workshop.

By picking up the vehicle at the sillboards, the Sprinter safely picks up most vehicles (including SUV vehicles), up to 3 Tons. Super ductile polymer pads (supplied as standard) protect the car's underbody.

Ideal for Wheel and Tyre work, Chassis and Underbody work; Bodypanel and Smart repair; Valeting and Detailing

- Almost 1 metre lifting height
- Electro-Hydraulic operation
- Fully mobile
- Lifting platforms adjust from 1400-2010mm
- Includes mobile kit

Capacity (kg)	3000
Lifting time approx. (sec.)	11
Lifting height (mm)	990
Drive over height (mm)	102
Runway length (mm)	1400-2010
Runway width (mm)	450

10 PC PNEUMATIC DIE GRIND KIT  
538 77 4751

ONLY **£19.99**

The use of dent pulling systems continues to grow. These systems have potential on almost every job, with some bodyshops operating 2 and 3 units as a result.

Dent pulling systems are recognised as a very cost effective method of repairing panel damage whilst maintaining excellent repair quality. Suitable for small dings and scrapes up to major panel work on steel and aluminium car and commercial vehicles.

It reduces the need for panel replacement and increases the amount of labour hours sold on each job. It speeds up the repair process, turns the repairs around more quickly, improves workshop throughput and reduces job cycle times.

- POWER CLAMP technology
- Back-lit LCD display
- Pre- and post-heating for interventions on HSS and galvanized metals
- Automatic recognition of the arm and inserted tool
- Regulation of approach, slope and welding times
- Regulation in pulsed welding
- Automatic/manual regulation of pressure between electrodes.
- Complete with water-cooled pneumatic clamp and trolley.

WEEKLY FROM ONLY **£34.02<sup>+</sup>**  
ONLY **£6,750.00**

## GYS PORTASPOT 230 PORTABLE SPOT WELDER 597 77 1370

This portable spot welding system is ideal for assembling thin mild steel sheets, such as metal furniture or for vehicle restoration. The Portaspot features an intuitive microprocessor controlled keypad which makes the product very easy to use.

Synergic adjustment - By selecting the thickness of the metal sheets to be joined, the PORTASPOT automatically sets the current and the optimum spot welding time (it is also possible to manually adjust the spot welding time).

- Insulated thermal handle
- 240V Single Phase
- Ideal for thin steel sheets 2mm + 2mm
- Continuous or pulse spot welding
- Clamping force 30daN – 120daN
- Thermal protection
- Delivered with PX1 arms as shown
- 10KG

ONLY **£749.00**

BEST PRICE PROMISE

## TELWIN INVERTERSPOTTER 14000 SMART AQUA 597 77 3470

Forget about type of material, manual settings and reference tables! The Made-in-Telwin technology, SMART AUTOSET allows the automatic detection of both material and thickness, all you need to do is weld!

Medium frequency, direct current (MFDC) inverter technology, microprocessor controlled resistance (spot) welding machine with pneumatic water-cooled clamp. The innovative SMART AUTOSET technology, thanks to the automatic recognition the materials and thickness, eliminates set-up times and guarantees optimal welding even if the types of steel to be processed are not known. It is particularly suitable for body shop applications and industrial use and gives excellent results also on high strength steel (HSS)/boron and galvanised metal sheets.

The multifunction digital panel can be used to select the automatic SMART AUTOSET mode as well as the EASY, PRO, MULTI semi-automatic mode and the manual mode; the programmes and reports there generated can be transferred to a USB and can be printed or viewed on a PC.

In comparison with traditional spot-welders, the POWER CLAMP technology (power circuits integrated in the clamp) allows for high spot-welding currents with low absorption rates, the use of longer (5m) and lighter cables for a better holding and a wider range of action and minimum magnetic fields around the cables. Automatic pressure monitoring ensures adjustment of the force applied to the clamp electrodes.

OEM APPROVALS – MERCEDES, FORD, VOLVO, NISSAN, FIAT, IVECO, OPEL, VW, JLR

## STANNERS MI100 CONTROL T WELDING SYSTEM 597 77 8320

Intelligent control technology allows a spot weld quality that is comparable to the quality achieved during the production process of new vehicles

MI100 Control T takes the worry out of welding with TrueAutoMode: the Industry's First Fully Automatic Spot Welding System TrueAutoMode automates the welding process to provide perfect, OEM-approved spot welds every time.

Measuring weld resistance approximately 1,000 times per second and automatically adjusting current level, weld time and clamp pressure as needed, the MI100 provides instant feedback to the technician if there's a bad weld and can log every weld. At the end of a job, the MI100 can print out a report that includes information on the settings,

messages and actual weld parameters of every weld, enabling easy documentation that welds were made correctly.

- Lightweight Transformer C gun and 5m cable means easy manoeuvring around the job
- 14,000 Amps and Water cooled unit means no job too big
- Optional Wifi download-with-barcode scanner for Jobsheets

The modular nature of the system means the system can be easily upgraded for future requirements. Quick and easy tool change; new OEM welding programs can be added through software updates via compact flash card.

OEM APPROVALS – FORD, HONDA, JLR, OPEL, MERCEDES, VW GROUP

## POWER-TEC NITROGEN PLASTIC WELDER WITH TROLLEY LAS92452

Compatible with almost every type of plastic used in the automotive industry, Allows the welding of filler material by heating with nitrogen. Heats plastic without combustion – therefore no fumes emitted. Comes complete with a set of plastic material, a scraper and a roller 230v, 50 Hz, 1600w

WEEKLY FROM ONLY **£17.39\***  
ONLY **£3,450.00**

## POWER-TEC SELF PIERCING RIVETING SYSTEM PLUS LAS92386

- Self-piercing rivets are used by major manufacturers including Audi, Jaguar, Land Rover, Daimler, BMW and more.
- As there is no heat generated in the process, the self-piercing riveter can be used on OHSS/Boron steels without weakening the steel.
- Less preparation timesaver. No damage to eco-coatings therefore better corrosion warranty.
- Safer than welding, as there are no sparks produced.

SUPPLIED WITH KIT

WEEKLY FROM ONLY **£14.09\***  
ONLY **£2,795.00**

## STANNER I4 INDUCTION HEATER 597 77 0150

High Quality Portable Induction Heater for heating of seized parts on vehicles of all sizes.

- Works on all steels, aluminium & copper
- Easy controls allow power control from 5 - 100%, from a 240V 13A plug
- Non contact heat source, heating only the required area protecting surrounding areas and/or parts
- Water cooled to give excellent duty cycle
- Trolley not included

WEEKLY FROM ONLY **£14.09\***  
ONLY **£2,795.00**

## PRESS-IT BUMPER KIT 597 77 7260

Kit containing different size drill bits, punches and mandrels, designed for punching holes into bumpers to mount parking sensors.

- The various drill bit sizes allow precise control over the whole size.
- The punches are designed not to flake paint from outside the whole diameter.
- The mandrels are designed to complete the parking sensor hole with millimetre precision.

ONLY **£495.00**

## RUPES VACUUM UNIT RUP.S145EPL-GB

Mobile units for extracting dust from sanding and various types of industrial work, fitted for connection to an electro-pneumatic and also suitable for fluid extraction.

- Multifunction Intelligent Control
- Equipped with 2 large filters
- Electrostatic charge dispersion device.
- Large dust and liquid container

ONLY **£419.99**

## RUPES ANGLE POLISHER 200MM WITH ELECTRIC SPEED-CONTROL RUP.LH18ENS

- New front ergonomic grip for comfortable and safe handling
- Electrical parts insulated with special resins for greater protection and longer life of the tool
- Soft start

ONLY **£169.99**

## RUPES 3MM FLATBED ORBITAL SANDER WITH DUST EXTRACTION 70X198MM RUP.RE21ALN

- Universal application for sanding and preparing sheet metals and substrates
- Excellent working capacity in inaccessible areas, such as sections, beading and large-radius curved surfaces
- Preparation of substrates and fillers
- Ideal for working in small to medium-sized areas

ONLY **£188.99**

## RUPES 3MM RANDOM ORBITAL PALM SANDER WITH DUST EXTRACTION 75MM RUP.RA75A

- The special shape and size of the pad enables a great saving of time and consumables
- Tool body designed to provide optimum visibility of parts being worked on
- Supplied with soft pad to improve the performance of micro-fine abrasives

ONLY **£172.99**

## SKORPIO III 150MM 6MM ORBIT RANDOM ORBITAL SANDER CENTRAL VAC RUP.RH356A

- Quietest random orbital sander in its class
- A choice of orbit sizes to fit your particular application
- Body coated with an anti-slip rubber for better handling
- Throttle lever designed to support the operator's wrist during operation
- Fits perfectly into the tool body to eliminate "pinch points"
- Extremely low vibration
- Double row bearings insure greater life and smoother operation

ONLY **£153.99**

## INDASA MBX SYSTEM IND.NCNA145

The patented MBX technology has been developed specifically for the most effective removal of rust, underbody coatings, old paintwork and bonded sealants from vehicles undergoing repair. The MBX System achieves a finish previously only available by sand/shot blasting and the in-line design allows the operator to reach those hard to access areas. Centrifugal force within the belt housing creates a cushion of air to minimize vibration through the heat treated bristle belt.

Switching from the bristle belt to the rubber eraser wheel simply converts the tool for the removal of adhesive tapes and glue residues from panels without damaging paintwork.

- Robust heavy duty motor
- 3500rpm – variable speed regulator for operator control
- Lightweight and compact design
- Low vibration and noise – versatile and safe
- Hardened steel bristles – can be easily re-sharpened
- High performance polyamide fabric belt – tension resistant up to 440kgs
- 3 belt grades to suit application (11mm & 23mm width) – colour coded for ease of identification
- 31mm rubber eraser wheel
- The MBX machine is supplied with 3 bristle belts

## HI SPEED SANDER IND.NCNA142

- Lightweight & compact design
- 15,000rpm
- Air consumption 8cfm
- Low vibration (4.7m/sec<sup>2</sup>) & noise (94dba)
- Supplied c/w 50mm quickfix backing pad (50mm)
- Ideal for metal finishing applications
- Welds & heavy stock removal – Indasa minidisc
- Blending & finishing – Indasa flexidisc

ONLY **£279.95**

## SPOT WELD REMOVER IND.NCNA133

- Pistol grip design
- 1600rpm free speed
- Air consumption 6cfm
- Fully rotatable (360°) G-clamp
- Supplied c/w 8mm drill bit
- 2 step trigger for speed control
- Drill depth adjustment

ONLY **£279.95**

Part no	Item	Grade	Colour
IND.DCA54	23mm bristle belt	Fine	Green
IND.DCA55	23mm bristle belt	Medium	Yellow

## 3M™ MINI FILE BELT SANDER MMM.33573

- Allows technicians to access hard-to-reach areas
- Great for spot weld removal, deburring, cleaning, and finishing
- Adjustable arm for user comfort and multiple application
- Replaces the need for expensive drills and bits

ONLY **£244.95**

## 3M™ ACCUSPRAY™ PRESSURISED HGP SPRAY GUN MMM.16587

Designed for the application of multiple high viscosity coatings including:

- Underbody Coatings
- Stone Chip protection
- Polyester and other heavy bodied primers
- Marine Gel Coats & Adhesives

ONLY **£139.95**

## 3M™ PPS™ COLOUR CHECK LIGHT II MMM.16550

A valuable tool for checking and approving quality at each stage of the repair process.

- Designed to make the colour matching and refinish process faster and easier
- Reduce labour paint and material costs
- Increase productivity
- Improve customer satisfaction
- Portable, handheld and chargeable

ONLY **£354.95**

## 3M™ SPEEDGLAS™ 100 WELDING SHIELDS MMM.751620 – Blaze MMM.751220 – Trojan Warrior

- Exceptionally light in weight
- Powerful in performance
- Excellent optical quality
- Reliable light-to-dark switching (Dark shade 8-12)
- Market-leading graphic options
- Used for most arc welding processes, such as stick (MMA), MIG/MAG, and many TIG applications

ONLY **£121.00**

## 3M™ SPEEDGLAS™ SL SUPER LIGHT WELDING SHIELD MMM.701120

- 25% lighter than any other Speedglas model
- Five adjustable dark shades 8-12
- Light shade 3
- Four sensitivity settings
- Grab & Go – auto ON function
- Total weight 360 grams

ONLY **£189.00**

## DUST EXTRACTOR 1230 M AFC 230V (AUTO CLEANING) + HOSE MIR.KIT1704ALMUL

- Professional dust extractor
- High performance motor and turbine
- 250 mbar vacuum and 4500 l/min air flow. The
- AutoStart function increases lifetime of the motor and reduces noise
- Flat top with space for storage and large wheels for better maneuverability
- Auto-filter cleaning for convenience and consistent performance
- Hose and cable storage for more comfortable transportation
- Fleece dust bag and hose also included
- Dust extractor should always be used with Mirka antistatic hoses

ONLY **£466.99**

## MIRKA GLASS POLISHING SOLUTION KIT MIR.KITGLASS125P

A complete solution for polishing a variety of glass surfaces including vehicle windows, building façades, interior doors and stairs. Designed for removing scratches on tempered or normal glass through a simple step-by-step process. Complete kit enables user to easily follow process from cleaning to sanding and polishing.

ONLY **£419.99**

## MIRKA RANDOM ORBITAL SANDER 650CV DEROS MIR.MID6502011UK

Mirka DEROS 650CV direct electric random orbital sander is equipped with a 150 mm (6") pad and has a 5.0 mm oscillation. Mirka DEROS 650CV is the first ever electric sanding machine with a brushless motor and no external power supply. The mains voltage is 220V-240V. It is also the lightest electric machine on the market and suitable for general sanding purposes on almost all kind of surfaces.

ONLY **£285.99**

## MIRKA PALM SANDER ROS 650 CV 150MM – 5MM ORBIT MIR.899300011

- Smooth, light and powerful 150mm pneumatic random orbit sander
- Fitted with the central vacuum port for dust free sanding
- 5.0mm orbit, suitable for use on all types of surface
- Speeds can be regulated between 4-12,000rpm
- Can produce a very high standard of finish
- 2+1 Extended warranty on sanders, registration required

ONLY **£110.99**

## MIRKA PROS 650CV 150MM 5MM ORBIT PALM SANDER MIR.899565011

- Developed in-house by Mirka's industry leading design team
- Packed with clever features and attention to detail
- Efficient and effective sanding tool perfect for professional operators
- Five millimetre orbit specially developed to produce maximum dust extraction, even at low suction power
- Wider dust suction outlet in the machine housing substantially improves dust suction efficiency

ONLY **£180.99**

## DEVILBISS PROVISOR COMPLETE VISOR KIT – UPDATED DEV.PROV-650

- New removable and washable anti-static shroud
- Covers wearers head, neck, shoulders and top of chest
- Front visor now longer wider and stronger for improved peripheral vision
- Improved durability of head suspension
- Rubber breathing tube now made from harder more durable rubber compound
- Avoids kinking and stretching
- New replaceable lint free leatherette sweat band
- More durable "seatbelt" style material waistbelt

ONLY **£260.99**

## IWATA KIT FULL FACE AIRFED MASK SYSTEM CLASS 3 IWA.VIUAF2010KIT

- Provides protection against airborne dusts, mists, gases and vapours
- Offers respiratory protection to class 3 and hence offers a protection factor of up to 200
- Can be used in areas where the concentration of contaminant in the workplace air is up to 200 times the Occupational Exposure Limit

ONLY **£169.99**

## SATA® VISION 2000 AIR FED FACE MASK SAT.69500

- Lightweight, comfortable breathing hood thoroughly protects the face, hair and neck from over spray
- Also suitable for persons wearing glasses and persons with short beards or moustaches
- Fresh air is supplied steadily through a silencer to the hood without drafts
- Air supply has a variable adjustment according to the users requirements
- Shut-off system prevents airflow from being completely shut off.
- Compact activated charcoal filter is worn on the belt in a protective cage and removes oil vapour and gases

ONLY **£359.99**

## PRO AIR 3 – FILTER REGULATOR COALESCER WITH ACTIVATED CARBON FILTER DEV.PROAIR-3

- High air flows for conventional and compliant spray guns
- Provides air filtered to 0.01 microns suitable for air-fed respiratory outfits
- Activated carbon filter removes oil carry over to 0.003 ppm
- Maximum airflow of 3500 l/min (124cfm)
- Suitable for use in booth/oven up to 100°C (212°F)
- Three ball valve controlled outlets
- Rolling diaphragm gives rapid response and sensitive air pressure control

ONLY **£539.99**

\*Finance example typically based on a 5 year lease purchase agreement. Finance subject to status, full terms and conditions available on request. Other finance options available. **DID YOU KNOW...?  
DYNACOAT WAS LAUNCHED IN 1998  
AND IS NOW SOLD IN 75 COUNTRIES**

- ✓ Simple to use.
- ✓ Best colour matching.
- ✓ Good value for money.

Three reasons why the Dynacoat paint system has all your refinishing needs covered.

## DYNACOAT FOR RESULTS THAT SHINE

Introduced to the LKQ Coatings offering early last year, Dynacoat is a complete repair range designed for professional use with the pressures of today's bodyshop in mind. Essentially aimed at the professional 'Free to Choose' market, painters can be confident of a good finish with all products delivering fast, accurate and reliable results.

**EXCLUSIVE TO LKQ COATINGS**

Supported by AkzoNobel's worldwide product and colour tools expertise plus LKQ's technical know-how, Dynacoat assists you with all of your day-to-day bodyshop challenges from a tricky spot repair to an entire respray.

### PRIMER 4100 4 LITRE (GREY) DYC.518590

Delivers excellent hiding power with impressive coverage and flow characteristics making it perfect for most substrates. Dynacoat 4100 Filler Primer is ideal for filling larger areas and surface even outs; can be baked, air-dried and wet or dry sanded offering maximum flexibility.

### WATER-BASED DEGREASER 5 LITRE DYC.375737

Designed to remove most organic surface contamination including:

- Salt residue
- Sweat from hands
- Tree resin
- Waterborne contaminants

### CLEARCOAT 6000 5 LITRE DYC.541191

Best in class with superior gloss finish everytime

- 2-3 minute flash off time between coats
- Flexible thinner and hardener options for all application environments
- Ability to dry as quick as 10 mins (60c)
- Air dry capabilities of 1hr 15 mins (21c)

### CLEARCOAT 9000 5 LITRE DYC.518636

A VOC compliant 2k clearcoat designed for all day-to-day bodyshop needs

- Smooth and easy application
- Simple mix ratio
- Fast drying properties
- Leading spraying and polishing properties

Contact your local LKQ Coatings branch to find out more.

Offers valid until 31st August 2017. Prices correct at time of going to press: March 2017.

## INTELLIGENT ATOMISATION – THE GLOBAL INITIATIVE FOR PROFESSIONAL REFINISHERS

For more than a century, DeVilbiss has led the world in the development of advanced atomisation, particularly in the field of automotive refinishing.

With the development of Intelligent Atomisation, DeVilbiss has led the way with a system of total flexibility in air cap, fluid tip and needle set ups for the GTi Pro range. This brings unparalleled performance to professional refinishers with spray gun set ups designed to ensure perfect atomisation, superb spray patterns and excellent flake orientation, for pinpoint accurate colour matching that conform to the ambient temperature of your bodyshop, the humidity levels and even your spraying technique.

You may not be aware of the fact that the weather outside of the spray booth can be a significant factor in the quality of the finish you'll achieve when spraying. Optimising spray gun performance in a variety of climatic conditions, from cold and damp to warm and dry is easy with Intelligent Atomisation.

All types of automotive refinish materials are influenced to some extent by temperature and humidity, but it is common knowledge that waterborne basecoats are far more sensitive to climatic changes than solvent basecoats.

Variations in humidity will not only adversely affect waterborne performance but can also result in significant colour drift as well.

DeVilbiss Intelligent Atomisation technology provides the flexibility that enables the professional refinisher to make performance changes with his existing i-system Pro spray gun, simply by changing the air cap. If fine tuning is required, the fluid tip can also be changed with no need to change the needle.

This quick, simple and economical change means that the replacement air cap provides the change in air flow required to provide a wetter or drier spray pattern, depending on air cap selected. The higher the air flow, the drier the spray pattern, the lower the flow, the wetter it is.

Intelligent Atomisation is unique to DeVilbiss and ensures every professional refinisher has the flexibility and performance to optimise efficiency, in every type of bodyshop, regardless of the weather, the material being used or where in the world you're situated.

\*Finance example typically based on a 5 year lease purchase agreement. Finance subject to status, full terms and conditions available on request. Other finance options available. ## GTI PRO-LITE SPRAY GUNS

- Precision engineered using lightweight and durable alloy components for a tough spray gun that is 25% lighter than the GTi Pro Digital
- Enhanced ergonomics combined with the GTi Pro's legendary fit and feel ensure incredible handling and balance
- A coaxial linear air valve eliminates the need for separate air and fluid control valves for a smooth, kick-free trigger action, easy cleaning and maintenance
- Four air caps to choose from that affect the way the gun sprays (T110, TE20, HV30, TE10)
- Available in Black, Blue or Gold

ONLY **£265.99**

## GTI PRO SPRAY GUNS

- Ergonomic gun body design
- Ultra high flow fluid tips provide superb versatility across a range of viscosities
- Revolutionary air valve design gives smoother feel for even greater air and paint control for ease of fade-outs and blend-ins
- Simplified, user friendly components provide easy cleaning and maintenance
- Four air caps to choose from that affect the way the gun sprays (T110, TE20, HV30, TE10)
- Available in Black, Blue or Gold

ONLY **£265.99**

## SRI PRO-LITE SPRAY GUNS

- Designed for small repair work
- Lighter trigger control which allows more control for repair areas
- Lightweight design means improved spray gun handling
- Better fit and feel with more comfort and control
- Various aircaps to suit the different and latest refinishing materials used when spraying (TE5, HV5, MC1)

ONLY **£205.99**

Contact your local LKQ Coatings branch to find out more.

## PRI PRO-LITE SPRAY GUNS

- Advanced technology 'Trans-Tech' compliant air cap for fast working speed
- Good transfer efficiency (paint to panel).
- Suitable for all paints including latest generation waterbase materials
- First class atomisation and material distribution
- Large spray pattern for fast and easy application
- Drop forged aluminium spray gun body, anodised Complete with airflow "cheater" valve
- Utilises new design air valve for smooth triggering control
- All new ergonomic spray gun body with improved "fit and feel"
- Five fluid tips to choose from (1.4, 1.6, 1.8, 2.0, 2.5)

ONLY **£185.99**

The WS400 & LS400 spray guns have pre-atomizing nozzle technology, which is able to deliver a consistent droplet size when spraying. This technology also offers a long straight and even fan pattern.

In addition the WS400 & LS400 spray gun range are equipped with stainless steel fluid passages ideal for any type of material, solvent borne or waterborne. The angle of the gravity cup has been pitched to make it easier to obtain the correct gun position when spraying larger more difficult areas such as roofs and bonnets.

The larger thread pattern on the air-cap makes it easier to remove when cleaning, also this range does not have a baffle fitted between fluid tip and gun body resulting in a more precise fit with less maintenance and replacement parts needed.

# Spray Guns – Sata

**NO HASSLE WARRANTY**  
**BEST PRICE PROMISE**

## SATAJET 5000 B SPRAY GUNS

- Optimised nozzle concept for highest possible versatility concerning Inlet Pressure and spray distance
- Ergonomically shaped gun handle
- Pearlchrome™ surface for easy cleaning, corrosion resistant
- Easy to adjust control elements
- Safely positioned trigger sleeve – for easy, safe and quick insertion of the paint needle
- Swivel joint with new high performance seal
- Identical compact-size gun handle for non-DIGITAL and DIGITAL spray guns
- Optimised half-turn spray fan control

The “Super Saver“ SATAjet 5000 B HVLP achieves particularly high transfer rates, due to its low pressure technology.

The “Super Speed“ SATAjet 5000 B RP with its optimised high pressure technology for maximum application speed and minimum overspray.

Both versions are extremely versatile in application, meeting highest expectations concerning excellent finishes, while far exceeding 65% transfer efficiency rates in accordance with VOC legislation.

No adapter required – SATA RPS disposable cups fit directly on the SATAjet 5000 B – for reduced weight and cleaning effort

Pressure under control – the DIGITAL®option:  
Integrated pressure gauge – to ensure perfect reproducibility

FROM ONLY **£409.99**

## SATAMINIJET 4400 B SPRAY GUNS

- Small size – big performance
- For small surfaces and areas of difficult access
- HVLP and RP nozzle sets
- Special SR nozzle sets for the smallest spot repairs (Spot repair)
- New ergonomically shaped handle
- Easy cleaning and maintenance
- Large cup connection QCC for all RPS cup sizes
- Highly flexible in terms of atomisation pressure and spray distance
- VOC-compliant atomisation technology – optionally available as HVLP low pressure or RP optimised high pressure technology
- Adam 2 Compatible: Innovative and versatile digital retrofit air micrometer
- Perfectly suitable for the use of RPS disposable cups
- QCC Quick Cup connection for quick and clean cup changes as well as easy cleaning
- CCS Colour Code System for the convenient identification of your spray gun
- Top quality is not enough - we guarantee it: for three years

FROM ONLY **£199.99**

Contact your local LKQ Coatings branch to find out more.

\*Finance example typically based on a 5 year lease purchase agreement. Finance subject to status, full terms and conditions available on request. Other finance options available. All prices exclude VAT at 20%. Price, availability and specification may change without prior notice. Warranty subject to manufacturers terms and conditions of use. Errors and omissions excluded. Offers valid until 31st August 2017. Prices correct at time of going to press: March 2017.

# Spray Gun Cleaning

**NO HASSLE WARRANTY**  
**BEST PRICE PROMISE**

## DEVILBISS GUN CLEANER DEV.DEV-FHAZ1006

- Pro Clean is faster, cleaner and more efficient than conventional gun wash machines.
- Pro Clean can be used for waterborne and solvent applications.
- Significantly reduces solvent use and wastage dramatically reducing gun cleaning costs.
- Fresh solvent is used every time ensuring no contamination and rapid colour changes.
- The compact unit can be wall mounted to maximise floor space in the mix room.
- 500ml colour coded waterborne and solvent aerosols are easily placed in the machine.
- One 500 ml can will clean up to 32 spray guns.

ONLY **£825.99** \*Aerosols sold separately.

## PROCLEAN SOLVENT AEROSOL DEV.FHFZ1013

## PROCLEAN H2O AEROSOL DEV.FHFZ1004

ONLY **£10.99** EACH

## SATA CLEAN RCS – THE TURBO CLEANER SAT.145581

- The closed cleaning system for manual paint spray guns is VOC compliant.
- Thorough cleaning of all material passages of the paint spray gun
- Low solvent consumption - only 0.1 liter pure cleaning solvent per gun – due to two separate cleaning solvent containers – one for the washing, and one for the rinsing cycle
- Cart for easy refilling of the containers i.e. for replacing the cleaning agent
- Replaceable filter inside the washing container keeps coarse residue from the washing process out of the cleaning fluid containers
- High performance, durable, low-wear double diaphragm pump assuring long life time of the gun washer
- Brush with cleaning fluid feed for manual pre-cleaning of gun and cup; a pedal activates the flow of the cleaning fluid towards the brush

ONLY **£959.99**

\*Finance example typically based on a 5 year lease purchase agreement. Finance subject to status, full terms and conditions available on request. Other finance options available. All prices exclude VAT at 20%. Price, availability and specification may change without prior notice. Warranty subject to manufacturers terms and conditions of use. Errors and omissions excluded. Offers valid until 31st August 2017. Prices correct at time of going to press: March 2017.

# Spray Gun Cleaning

**NO HASSLE WARRANTY** **BEST PRICE PROMISE**

## LOW AND ZERO VOC FLUIDS IS THE ONLY GAME IN TOWN

Using low or zero VOC products, will become a part of everyone's life in time. Not only because of their obvious health and environmental effects, but also because of the economic logic.

The lower evaporation rates mean a barrel of low or zero VOC will go further and last longer than a traditional even a water based solvent. Not only that, but there are tremendous savings to be made from not needing the extraction systems associated with providing a safe environment in which to use thinners. And then there's the costs associated with disposal of the thinners. Disposal costs of the Low to Zero VOC fluids are a tiny fraction in comparison.

In fact the only decision you really have to make is whether to follow the machine design route, or the liquid technology route to get your VOCs down.

## SUMO GUN CLEANING MACHINE

The S.U.M.O is a new generation of universal paint gun cleaner suitable for solvent or water-based paint. Uniquely equipped with a special solvent-saver valve, the SUMO demonstrably reduces VOC loss.

- Clean up to 4 guns at once
- Made from high quality stainless steel
- Two separate compartments
- ATEX approved
- Two chambers work independently and so can be configured differently if required
- Choose from automatic cleaning by timer, automatic clear rinse, manual cleaning using flow through brush and fresh rinse jet.
- Unit size: 900x630x1010 WxLxH (with base cabinet)

Quality Cleaning = Quality Spraying

### EXTENDED WORKING LIFE

This unit provides one of the most effective cleaning processes available on the market today, ensuring your guns are cleaned effectively and helping to extend their working life. The S.U.M.O model will help to bring down repair and replacement costs in the long run, which helps free up money around the shop.

## UNIC PROTEC LV

597 77 8820

Low VOC spray gun cleaner to be used with Protec wash LV or Protec wash LV+.

Main features include:

- One machine one fluid
- Solvent and water based
- No evaporation
- No air extraction
- Non-flammable cleaning fluid
- Automatic wash
- Manual wash
- Fully pneumatic
- ATEX compliant and mixing room safe

WEEKLY FROM ONLY **£16.10<sup>+</sup>**  
ONLY **£3,195.00**

**WORKS WITH NEW LIQUID TECHNOLOGY TO DELIVER LOWER VOCs**

## UNIC PROTECEARTH CLEANING FLUID

- One Fluid for Solvent and Water
- LOW VOC or Zero VOC (\*coming soon)
- Efficient up to 600 washes per 20 litres
- Patent Pending
- Non-flammable
- Non-hazardous to health
- Biodegradable
- Do not require rinsing (protecwash LV)
- Non-corrosive to spray guns
- Safe for shipment
- Drain safe at source
- Drain safe after use (\*coming soon)
- No air extraction needed

## UNIC LITTLE BLUE FILTER

597 77 8440

The average gunwash cycle from 25 litres of cleaning fluid, is 85-100 washes. Capable of being retrofitted to any Unic Gun Cleaning machine, the Little Blue Filter increases your cycle to up to 400 washes!

- Reduces solvent or water based cleaner consumption by up to 75%
- Reduces VOC emissions by up to 75%
- Reduces fluid purchase costs by up to 75%
- Can be fitted to any Unic Spray Gun Cleaner
- Cleaner solvent means cleaner spray guns
- Cleaner solvent less machine maintenance
- Improves cleaning performance

## Is your Battery Service Equipment up to the challenge of modern vehicles?

Batteries are changing, and there are risks to vehicle electronic systems from working incorrectly with them.

### BAT 490 VERSATILE HIGH-FREQUENCY CHARGER 355 77 2520

Two charging modes for 12V/24V lead-acid batteries i.e: standard program for simple and rapid charging, expert program with flexible charge parameters

- Variable charge current intensity in the expert mode (0-90 A)
- Shorter charging times due to optimized charging process
- Infinitely variable, regulated charging current
- Charging at vehicle electrical system
- Floating-mode operation and backup mode
- Trickle charging to safe guard the battery
- Protection against polarity inversion, overcharge and short circuits

ONLY **£710.00**

### GYS FLASH 100:12HF 355 77 8370

Advanced Battery Support Unit/Battery Charger

- Provides instantaneous current up to 100A to support the vehicle during key/on engine off diagnostic work
- Adjustable voltage from 12-14.8V (can support BMW)
- Advanced charger for AGM/GEL/Lead acid batteries
- Made in France

ONLY **£549.00**

### TB1600 592 77 2240

Compact 12V battery pack suitable for the smaller dealership and workshop.

- Four LED battery status display information at a glance
- Toughened impact-resistant polymer case for rough handling
- 2 metre lead set allows the charger to be set on the ground or in the passenger footwell
- Anti-surge protection

ONLY **£265.00**

### TB 1224 HDD 592 77 2320

Tough 12V/24V jump-starter designed for frequent starting of commercial vehicles. The 1224 HDD is intended for heavy or regular 24V starting and 12V van starting. This unit is for fleet users, operating diesels typically up to 15 litres.

- Twin internal 3 stage 2.3amp chargers
- Robust powder coated steel case for the toughest conditions
- Reverse polarity audio warning
- Anti-surge protection

ONLY **£725.00**

### MR26 592 77 2250

High powered 12V Starter Pack for frequent, everyday professional use. Suitable for starting all sizes petrol engines including 4x4. All 12V Diesel 1.8-3.5 depending on vehicle type.

- Anti-surge protection ensures against overloading sensitive electronics
- Internal 3 stage 2.3amp charger
- Detachable 2m heavy duty cable set for easier handling and long-term replacement
- Reverse polarity audio warning
- Shatterproof case for rugged handling

ONLY **£365.00**

## NO SPACE FOR A SEPARATE ALIGNMENT BAY?

Why not utilise your MOT bay when it's quiet with a 3D alignment upgrade. Generate more profit with a relatively small-scale add-on to the MOT lift, along with a 3D alignment system. Workshop Solutions can offer more lift and alignment options than anyone else. Talk to us to explore your options today.

Upgrade an existing lift to 3D Alignment using the equipment below or a similar combination. There is even a kit to support 3D alignment on a 2 Post lift!

PRODUCT	DESCRIPTION	PRICE
Pair of Mechanical Turnplates	For front or rear axle adjustment, or both. Sits on or within recesses on Lift platform.	<b>£550</b>
Portable Rear Slip Plates	For rear axle adjustment. Used in some systems rather than rear turnplates – 300mm square	<b>£140</b>
A Pair of Run up Ramps/Roll-back Kit	To allow the vehicle to roll on and off turnplates/slip plates if above the platform surface	<b>£140</b>
Pack 1 Kit for customers without alignment lift	Kit to convert a Service Lift to Alignment, consists of front 'housing' with drive-on ramps to accommodate turnplates, additional turplates for rear, and rear 'housing' with drive on/ drive off ramps	<b>£1,295</b>
Pack 2 Kit for customers without alignment lift	Kit to convert a Service Lift to Alignment, consists of front 'housing' with drive-on ramps to accommodate turnplates including extended platform for 'roll-back, and with drive on/ drive off ramps	<b>£2,795</b>
Pack 3 Kit for customers without alignment lift	Kit to convert a Service Lift to Alignment, consists of front 'housing' with drive-on ramps to accommodate turnplates	<b>£895</b>
Alignment Tables	Kit to allow 4 wheel alignment on a 2 post lift. Consists of 4 tables. Max weight 3000kg across 4 tables	<b>£895</b>

For guidance only. The upgrade required depends on the existing equipment and the intended Alignment system. Ask our Workshop Equipment Specialist for a quote. 3D Alignment System also required.

## ALIGNMENT LIFTS

The advantage of a purpose-built alignment lift is all components matching and optimised to each other. Choose your aligner and lift combination from the below and the preceding pages. Workshop Solutions can offer more aligner-and-lift combinations than anyone else. Talk to us to explore your options

BEST PRICE PROMISE

## JOHN BEAN ELS 3D ALIGNMENT SYSTEM WITH TILTING CAMERA 587 77 1730

The new John Bean 3D ELS alignment system has a tilted camera boom for flexible vehicle positioning, eliminating the need for a fixed position to carry out alignment checks and being able to position the camera at the touch of a button.

Running the Pro 32 software application, the ELS saves space in the workshop because everything is mounted on the support post.

The vehicle orientation directional indicator guides the technician when they are unable to see the screen, while interchangeable grippers on the wheel clamps assist work on different wheel types within a clamping range of 11" rims to 22" rims.

- AC 100 rim clamps, with a clamping range 11" – 22" rims
- Compact design everything mounted on the support post
- Tilting camera boom for working at different heights
- 3D technology for fast and accurate measurements
- Vehicle database included

WEEKLY FROM ONLY **£33.74\***  
ONLY **£6,695.00**

SPACE SAVING DESIGN

NEW

## JOHN BEAN V2200 & V2300

Offer advanced alignment service to your customers without needing specialised wheel alignment technicians.

Computerised 3D car wheel alignment with Pro 42 software for general repair shops. Lifiable two-camera beam and 22" TFT flatscreen monitor. Cordless communication between targets and HD camera system.

### V2200

- Comprehensive and up-to-date manufacturers' specifications
- Versatile wheel clamps provide a solid and worry-free attachment with a patented positioning procedure.
- Take a full four-wheel alignment reading in minutes.

### V2300

Features as for V2200 plus

- Measurement of toe, camber, caster, maximum steering angle, rolling radius and cross diagonal
- EZ Access for measurement with demounted wheels

# ADAS calibration

NO HASSLE WARRANTY  
BEST PRICE PROMISE

Workshops have a responsibility and duty of care to address the ADAS systems within their repair process.

Following a repair of even the simplest of operations such as a bumper removal/replacement or axle geometry adjustment will shift the position of the radar head or the camera in relation to the vehicle's geometric axis. This can cause the system to fail, or more worryingly deliver incorrect results. The sensors correct calibration is part of a complex driver assist system and is imperative it is returned to a fully functioning state.

Numerous repairs impact on ADAS sensors and the smarter workshops should invest in their own calibration equipment to future proof and safeguard their business, allowing them to offer a complete repair and calibration service.

What are the features you should consider in an ADAS Calibration System?

## SPEED AND EASE OF USE

- How quick and easy will the calibrations system be to set up and operate?
- Will it require a dedicated workstation or alignment lift set-up?
- These will have an effect on turnaround times and Return on Investment. Our Equipment Specialists will be happy to arrange a demo.

## DATA GAPS AND TECHNICAL SUPPORT

- Who else is using the system, what is their experience.
- How long has the system been released on the market.
- Do Insurance companies accept this equipment?
- What percentage of the UK vehicle car parc is covered with the system?
- Is training and technical support offered?

## ACCURACY

The most accurate ADAS calibration system will use the vehicle central axis line from the rear axle using wheel clamps and laser measures. This gives confidence that the subsequent calibration is aligned to the thrust axis of the vehicle. A less accurate system will start with the assumption that the sensor is square to the vehicle central axis.

Understand how the system works and make sure you're happy it will achieve a level of accuracy that you trust. Our Equipment Specialists can guide and advise.

## HOW COMPREHENSIVE IS THE SYSTEM

- Does the calibration system do both radars and cameras?
- Does it cover the range of vehicles that you need? Mercedes, BMW and Volkswagen Group have been manufacturing cars with camera and radar technology for over 5 years. ADAS now also features in Ford, Volvo, Nissan, Mazda, Honda, Subaru, Vauxhall, Mitsubishi, Land Rover, Jaguar, Toyota and Lexus models.

Our Workshop Solutions Equipment Specialists are available to arrange a demo, and help deliver your ideal ADAS calibration solution – give us a call.

## HELLA CSC

The Hella Gutmann CSC (Camera and Sensor Calibration) Tool enables effective and accurate calibration of a wide range of camera-based driver assist systems.

Whilst the CSC tool provides out-of-the-box coverage for calibrating VAG and Mercedes-Benz ADAS cameras, additional target panels are available separately for extending vehicle coverage to ten manufacturers.

Furthermore, over and above ADAS camera calibration, the Hella CSC tool is unique in offering ADAS radar calibration as well. Making this the most comprehensive ADAS calibration system available.

- Compatible with a wide range of vehicles and camera-based driver assist systems
- A flexible, modular system which can be tailored to individual workshop requirements
- Provides accurate results with no need for a fully-equipped axle alignment station, levelled workshop floor or platform lift
- Full integration with mega macs diagnostic tools – works with mega macs PC, mega macs 42SE, mega macs 56, mega macs 66.

**IDEAL FOR ALL MAKES GARAGES, GLASS REPLACEMENT BUSINESSES AND BODY SHOPS, AND COMPATIBLE WITH A WIDE RANGE OF VEHICLE MODELS AND CAMERA-BASED DRIVER ASSIST SYSTEMS**

## HELLA DIAGNOSTICS AT A GLANCE

### Communication

- Clear and concise Vehicle identification through number plate recognition, manual input or VIN search.
- All Hella Diagnostic units are DOIP capable

### Interface

- Wireless and compact VCI, also Pass-Thru function using relevant OE Platforms and software, total flexibility.

### Data Retrieval

- Up to 12 selectable channels of live data with graphing option, waveform save function for road test facility, freeze data function, this is also printable.

### Data Interpretation

- Clear and detailed description of fault codes, including component function and possible causes of fault.
- Real-Time Repair Concept allowing technical support direct to the device and data to be directly sent to our technical team. Onboard technical data including ECU pin out data, wiring diagrams, component location and vehicle technical data, to assist with fast efficient fault diagnosis.

### Coding and Special Functions

- Extensive activations covering most vehicle systems, enables quick identification of a failed component In depth coverage of Basic settings and Adaptions, a must when components are replaced.

### Job Recording

- Car history function; stores the last 500 vehicles tested and can be recalled simply by date or vehicle registration, full A4 printable vehicle report, with date and time stamp, business name and registration number for a professional customer report.

## HELLA GUTMANN MEGA MACS PC

355 77 5520 + 356 77 6750

Turns any Windows PC into a powerful diagnostic device with the same capabilities as the popular mega macs 42 SE. In conjunction with your Windows netbook, PC or tablet it's a flexible, highly portable and user-friendly all-round diagnostic solution for professional workshops, packed with features including Pass Thru® technology and complete with detailed ECU and system data for over 38,000 vehicle models.

- Suitable for your Windows netbook, PC or Tablet
- Comprehensive in-depth vehicle coverage
- Equipped with PassThru® technology

WEEKLY FROM ONLY **£8.44<sup>†</sup>** ONLY **£1,675.00**

## HELLA GUTMANN MEGA MACS 66

355 77 0000

Setting new standards in the field of diagnostics, the Mega Macs 66 includes several specialist features for faster, more accurate fault-finding and repair.

Centred around a large, full colour touch screen with an intuitive user interface, the Mega Macs 66 places interactive circuit diagrams, recommended procedures and error solutions directly on the screen

- Diagnostics of all components, with instructions
- Interactive coloured circuit diagrams with depiction of actual values and parameters in real-time.
- Vehicle-specific repair assistance, based on fault codes in real-time.
- Sets new standards in speed and accuracy of diagnosis

WEEKLY FROM ONLY **£23.94<sup>†</sup>** ONLY **£4,750.00**

## HELLA GUTMANN MEGA MACS 56

355 77 4720

The stakes have just been raised with the launch of the new Mega Macs 56 – an affordable, mid-range diagnostic tool with features normally found only on much pricier models.

- 800mhz processor – finds faults fast.
- 10.4" high-resolution full colour touchscreen enables on-screen information to be easily read in low light conditions.
- Wi-Fi and Bluetooth connectivity enable wireless printing. Downloads technical data quickly and easily even whilst in use.
- PassThru® ready
- HGS Technical Data technical data included
- Optional extra – measurements package comprising 2 channel oscilloscope and multimeter

## VDO AUTODIAGNOS CHECK II

355 77 9840

Plug & Play service tool with embedded vehicle manufacturer OE data & vehicle auto ID.

With auto vehicle identification across all major manufacturers and access to OE data, this tool offers complete coverage and enables maximum efficiency and accuracy.

- PLUG & PLAY – Everyday service work is now radically simplified
- Auto vehicle identification for maximum efficiency and accuracy
- Displays measured values
- No diagnostic knowledge required, making it ideal for any workshop and employee
- Guides you through the service process
- Covers all major car manufacturers
- Access to OE data
- Covers all essential service applications
- Large coloured 5" screen
- Robust housing
- Fast launch and reset
- No time out
- 1 year warranty
- 1 year of software updates

**NEW**

**OE DATA**

**LARGE 5" SCREEN**

WEEKLY FROM ONLY **£6.02\***  
ONLY **£1,195.00**

## LAUNCH CRP229

355 77 7570

All the information pertinent to a vehicle's health in an accessible, reader-friendly format. Quickly read/erase fault codes and reset service lights, also carry out specific special functions.

- Intuitive design & a user-friendly layout
- Wi-Fi enabled & compatible with mobile tethering
- Provides diagnostic information for 42 different vehicle manufacturers
- A year of free updates
- No lock-out periods
- 2 years warranty
- Touch screen

ONLY **£499.00** Service function diagnostic machine with 1 year warranty.

\*Cannot be used in conjunction with another offer. Offer valid until 31st August 2017

## LAUNCH X431 PRO

355 77 3950

- Full system diagnosis
- Data stream storage and re-display
- Service light resets
- Coding, reset and programming functions
- Diesel particulate filters regen/replacement
- Online technical support and advice
- Electronic parking brake reset
- Key/immobiliser coding
- VIN recognition, auto search
- Live data recording & multiple graphing
- Special functions for specific manufacturers

## ECK 1800 HFO AUTOMATIC AIRCON MACHINE FOR HFO1234YF

251 77 0850

- Fully automatic cycle
- Refrigerant management giving usage report and archive
- Automatic leak check during vacuum phase
- Database for quick gas selection also allows to add new vehicle models

WEEKLY FROM ONLY **£8.24\***  
ONLY **£1,635.00**

## ROBINAIR AC595PRO-UK AUTOMATIC AIRCON MACHINE FOR R134A

251 77 0710

The AC595PRO is an automatic refrigerant management station. It automatically controls the recovery, recycling, vacuum and recharging process for oil, dye and refrigerant. As an entry-level machine, the AC595PRO is simple and time efficient to use.

WEEKLY FROM ONLY **£9.68\***  
ONLY **£1,919.95**

## ECK 3500-UP AUTOMATIC AIRCON MACHINE FOR R134A

251 77 0840

- 5" Colour display with icons for easy use
- Automatic taps, no more manual valves
- Automatic leak check during vacuum phase
- Non-refillable containers, offers the advantage of eliminating contact with humidity

WEEKLY FROM ONLY **£11.11\***  
ONLY **£2,205.00**

## ECK 3500 HFO AUTOMATIC AIRCON MACHINE FOR HFO1234YF

251 77 0880

- Refrigerant management giving usage report and archive
- USB port for easy data access
- Database for quick gas selection also allows to add new vehicle models
- Compatible with hybrid and electric vehicles with electric compressors
- Nitrogen leak testing (nitrogen bottle & regulator not included)

WEEKLY FROM ONLY **£11.74\***  
ONLY **£2,329.95**

ONLY **£4,545.00**

Selecting the right compressor

When selecting the right air compressor, the tank size is important. A small tank will overwork the motor. It is equally if not more important to select an air compressor that provides enough cubic feet per minute (cfm) of airflow. CFM is going to determine how many tools you can run, and whether each tool will function at its best.

PREVOST ALUMINIUM/PLASTIC PIPEWORK

If your air pipework is not a ringmain design, some of your compressor's best work is probably being lost to pressure drops between the compressor and the workstation. You may also be losing valuable air through leaks. Galvanised pipework inevitably corrodes, and air under pressure will always find the weak spots.

With our free design service, Workshop Solutions can supply and install a Prevost 'ringmain' aluminium and plastic pipework system which will deliver consistent pressure throughout the workshop, and never corrode.

- Leak-free networks
- Optimum flow rate – no pressure drop
- Lasting installations using corrosion-free aluminium
- Quick and easy maintenance
- Networks extendable as needed

**SAVE ENERGY, GET MAXIMUM EFFICIENCY FROM YOUR COMPRESSOR**

## PROFILE – WASH & WAX SHAMPOO CONCENTRATE CCT.94525

Superlative silicone free wash & wax shampoo for luxury fast-lane cleaning of cars, coaches, caravans which quickly removes road dirt and traffic film to leave surfaces clean, bright, and streak free in one easy action

ONLY **£49.95**

## TRIFFIC TRAFFIC – CONCENTRATED CLEANER/ DEGREASER & TRAFFIC FILM REMOVER CCT.10625NEW

- Removes the complete range of stubborn and tenacious road traffic film and dirt.
- Kind to paintwork, trim and vehicle signwriting.
- Leaves paintwork clean, bright reflective and with water beading surface enhancers.

ONLY **£19.95**

## SUPER ALLOY – WHEEL CLEANER (ACID) CCT.11305

High strength, top performance alloy & steel wheel cleaner. A super-active acid based cleaner, highly effective in the rapid removal of brake dust and residues associated with Alloy/Steel wheels and plastic wheel trims.

ONLY **£17.95**

## CONQUEST – ACID FREE WHEEL CLEANER CCT.11205

For all motor vehicle wheels: lacquered alloys, painted and plastic wheel trims, to quickly yet safely remove black ingrained brake dust.

ONLY **£17.95**

## DRIVE – SILICONE FREE TYRE DRESSING CCT.96305

- Water resistant.
- Excellent Coverage and easy to use.
- Fast Drying for rapid vehicle turnaround, non tack finish.
- Non-aggressive blend will not mark surrounding paintwork or plastics on wheel trims.

ONLY **£21.95**

## SQUEAKY GLASS CLEANER CCT.235075

- Leaves glass and plastic surfaces sparklingly clear and squeaky clean
- No Come Backs, no white streaks – no coloured rainbow haze
- Just aim, spray and polish off

ONLY **£3.95**

## HYDRA GLIDE AQUAPLANER CCT.87202

Medical grade silicone blade, which delivers fast efficient removal of water

ONLY **£6.95**

## MINI SPRAY CCT.84901

Multi-purpose adjustable hand sprayer with chemically resistant trigger

ONLY **£2.25**

## AUTO DRI CCT.87001

Synthetic leather with perforations for even more absorbency

ONLY **£6.95**

Installing a spraybooth is a huge investment and potentially very disruptive; so choosing the right booth can be as much about the right partners as the right equipment. So, what is important in choosing your biggest investment? Here are some points to consider.

### PLANNING/ DESIGN

Where is the best position for the new Booth? Where the old one is [more downtime] or a different position [maybe better efficiency]? In some cases the booth can only go where the old booth was to retain the flow of work through the bodyshop – in other cases a fresh pair of experienced eyes might offer a novel and more efficient layout alternative.

Where are the services [gas & electric] in relation to the booth position – these can be expensive to connect so an accurate survey is important to avoid unpleasant surprises.

### Are there any options or design developments that either improve performance or save me money?

Our Projects team carry out free site surveys and designs and will work with you to deliver the best product in the best position to suit your current and anticipated future needs.

### CAPACITY

How big does the Booth need to be to handle all your current work, and to accommodate future growth?

Do you anticipate taking on vans? If so, you may need to consider a high-top booth.

For high-volume bodyshops, booth capacity can make the difference between an acceptable through-put or significant growth. For example, many bodyshops now use extended length booths that can take more than one vehicle or one vehicle and all the off-car panels, bumper etc. which reduces the unit energy costs AND increases productivity.

Our Projects Team have the creative design flair that can make all the difference getting the most potential capacity from your booth.

### OPERATIONAL

#### How much will it cost?

Cost has two elements: capital cost and running cost. Together these are often called “Whole life costs”

OVER 5 YEARS, BASED ON 25 JOBS PER WEEK		
Capital Booth Cost	<b>£20,000</b>	<b>£30,000</b>
Running cost per Spray and Bake cycle	<b>£12</b>	<b>£5</b>
'Whole Life' Cost	<b>£95,000</b>	<b>£61,250</b>
<b>Saving</b>		<b>£33,750</b>

Example excludes VAT

In this example, the higher capital cost booth incorporates superior energy saving technology and as a result, is less than 2/3 whole life cost against the ‘cheaper’ booth. Our Projects team will advise on the best package for you including taking into account running costs and available energy saving packages. Make sure to ask our team whether and how your running costs can be improved by 65%.

### AFTERSALES

What is the warranty, support and service back-up being offered? This becomes more important over time. What is the service delivery promise given? You do not want to leave it until you need them to find out that your wait times are below your expectation. Where is the product made? Will the place of manufacture impact the availability of spares and consumables in the long term?

You can rely on the judgment of our Projects Team, gained over many years' experience, to give reliable and unbiased advice on where to set your expectations.

The Junair name is synonymous with innovation in spraybooth development, providing solutions that deliver energy-savings, higher productivity, enhanced performance and, ultimately, increased profitability. The inherent design flexibility and in-house British manufacture allows any booth to be tailored to suit individual dimensions and performance requirements.

**1 SERIES SPRAYBOOTH OVEN**  
597 77 8190

The Junair 1 Series spraybooth oven has been developed for customers who want an economical, low cost spraybooth oven, but also require a high quality construction, excellent performance and unrivalled reliability. There are many features on this spraybooth that are normally associated with higher cost equipment. There is a compact roof mounted air handling plant option for installations where space saving is critical. This is a semi draught spraybooth with rear extraction, requiring no floor excavation. The 1 Series spraybooth can be designed and built to any size to accommodate vans, light commercial vehicles and special vehicles.

WEEKLY FROM ONLY **£144.64\***

**3 SERIES SPRAYBOOTH OVEN**  
597 77 8210

WEEKLY FROM ONLY **£165.81\***

**DUO SPRAYBOOTH OVEN**  
597 77 8220

The Junair Duo spraybooth oven has been developed to meet the increasing demand for additional priming facilities and 'fast track' work. The Duo spraybooth has the option of a LEVAC floor (LEVAC is a surface mounted design, unique to Junair, requiring no builders-work excavation), pit or rear extraction. The double width cabin shares a central air handling plant making this unit very cost effective. Two vehicles can be processed at the same time, sharing a common bake cycle which also dramatically reduces energy cost per unit. Small top coat repairs can also be completed in the Duo spraybooth making it an extremely versatile addition for high throughput Bodyshops and 'fast track' work.

WEEKLY FROM ONLY **£228.31\***

**5 SERIES SPRAYBOOTH OVEN**  
597 77 0550

WEEKLY FROM ONLY **£227.55\***

**MULTIBOOTH OVEN**  
597 77 8230

The Junair MultiBooth has been designed and developed to offer a flexible solution for those undertaking small to medium cosmetic repairs in a clean, controlled and safe environment.

This flexible spraybooth solution allows you to prepare, spray and fully bake a vehicle in the same cabin, eliminating vehicle movements. Each bay is designed as a combination preparation bay and full low-bake spraybooth, simply move the sliding door to the required cabin to convert it into a fully operational spraybooth.

Contact your local branch for more information.

Rowley Spraybooths have over forty years experience in the manufacture, installation and maintenance of Spraybooth ovens in the finishing/refinishing industry. All Rowley Spraybooth oven equipment is manufactured in the UK at their manufacturing facility located in Cannock, Staffordshire.

**AERO-ECO SPRAYBOOTH OVEN**  
597 77 8240

Featuring dynamic air moving plant and an energy efficient control system the AERO-ECO Spraybooth oven is designed to deliver ultimate economy with ultra-low running costs. The AERO-ECO Spraybooth has a spacious cabin constructed from modular single 'skin' (or double 'skin') bright galvanised steel panels with good lighting and wide access component doors. Utilising rear chest extraction and compact air handling plant the AERO-ECO Spraybooth

provides the perfect painting environment for any type of work. The tunnel airflow design provides excellent paint over spray mist clearance during spraying operations and uniformity of air temperatures on spray and bake modes.

WEEKLY FROM ONLY **£62.97\***  
FROM ONLY **£12,495.00**

**AERO-MIDI SPRAYBOOTH OVEN**  
597 77 8260

The spacious AERO-MIDI cabin is constructed using modular double 'skin' insulated panels to give good thermal retention, rigidity and sound dampening. Utilizing a rear chest extraction expensive underground extraction pit works are not required and this allows the installation to be easily relocated. This tunnel airflow design provides excellent paint over spray mist clearance during spraying operations and uniformity of air temperatures on spray and

bake modes. The air flow also makes the AERO-MIDI ideal for use with water based paint systems.

FROM ONLY **£15,495.00**

**AERO-MAXI SPRAYBOOTH OVEN**  
597 77 8250

The AERO-MAXI Spraybooth oven range is a high specification Spraybooth oven that provides the highest quality environment for all types of paint application and low bake curing operations. The larger AERO-MAXI Spraybooth oven cabin is constructed using modular double 'skin' fully insulated panels to give good thermal retention, rigidity and sound dampening. Utilizing a rear chest extraction expensive underground extraction pit works are not required and this allows the

installation to be easily relocated. This tunnel airflow design provides excellent paint over spray mist clearance during spraying operations and uniformity of air temperatures on spray and bake modes. The high air flow and integral flash off mode makes the AERO-MAXI Spraybooth oven ideally suited for use with water based paint systems.

WEEKLY FROM ONLY **£95.73\***  
FROM ONLY **£18,995.00**

**AERO-INDUSTRIAL/COMMERCIAL SPRAYBOOTH OVEN**  
597 77 8270

The Industrial and Commercial Spraybooth oven range can be designed to meet customer's specific requirements for Spraybooth ovens. The flexible modular design allows the cabin size and air flow

requirements to be made to suit the products being painted.

## L4000 M/E 2 POST 4 TON HYDRAULIC LIFT

This value lift has a lot to offer. Symmetric arms offer wide flexibility of chassis as well as being able to accommodate vehicles driving on or reversing on. Electro-magnetic safety locks conveniently release at the push of a button. (A manual lock release version of this lift is also available)

- Hydraulic hoses and balance cables are all fully concealed, providing a clean appearance.
- The double hydraulic cylinders and high strength chain drive provide smooth lifting and lowering.
- The two sets of arms always travel synchronously thanks to high strength balancing cables.

• An emergency lowering valve can be manually operated to lower the lift safely in the event of a power failure.

- Meanwhile, a flow-control valve prevents the possibility of a rapid uncontrolled descent
- Door rubbers on the posts protect the car doors from direct contact, and sill protector rubbers on the upper arms perform the same function protecting the undersides of longer chassis vehicles

- Minimum pad height 110mm
- Drive-thru width 2486mm
- Maximum Lifting Height 1950mm
- Lifting time 40-50sec
- Lowering time 20-40sec

1 or 3 phase 4t 110mm WARRANTY 1yr

## BENDPAK XPR SERIES

NEW UPDATED MODELS

Low-profile, dropped-end frame c/w NEW screw contact pads

Squeeze under even the lowest compact and sport vehicles. The new adjustable screw pads ensure that the vehicle is lifted safely at all times

### Triple-telescoping front arms and two-stage rear arms

Increases overall arm positioning for lifting a variety of different wheel base vehicles. Overall arm sweep and minimum arm reach are also extended to precisely lift vehicles that have unibody construction, OEM recommended pick-up points and wide and / or narrow wheelbase configurations.

### Maintenance-free load bearings

Rather than using roller bearings that need to be constantly lubricated, every XPR-Series Lift carriage uses high-tech UHMW (ultra-high molecular weight polyethylene) load bearings that never need lubrication and are designed to last the entire life of the lift.
