INTRODUCTORY.

THIS is an age of progress. New ideas and new appliances follow each other in rapid succession to meet the ever-increasing demand for novelties, which administer to creature comforts and gratification to fastidious tastes. "The Mixicologist" is intended to meet this demand.

It is with feelings of modesty and diffidence that I approach so important a subject, but my long experience, and my hearty desire to produce what I hope will become a standard, and thus to help my fellow workers, and also to elevate the tone of our profession, prompts the undertaking.

These, I trust, are sufficient reasons for my attempting to write the following. If to "tend bar" consisted only in filling up glasses thoughtlessly, and pushing them out to customers carelessly, it would not be proper to speak of it as a polite vocation and a fine art, and it would be useless to write on the subject. But I place it among the more elegant employments of life, and to be a successful bartender requires the exercise of those finer faculties that distinguish the cultured artist from the inexperienced, and which are so much appreciated by gentlemen customers.

Also, in this introductory, I feel it my duty to thank my friends for information received for this little book, among them being Mr. John H. Kuhn, steward of the Grand Hotel; Mr. Will V. Zimmer; Messrs. Brach and Sullivan, Louisville Hotel; and Mr. Frank Holicker, Burnet House, hoping it will be found useful, not only to the saloon, but to others. Recipes, etc., will be readily found by index.

Respectfully,

THE AUTHOR.

EXTRACTS FROM THE CINCINNATI PAPERS.

Mr. Chris. F. Lawlor, the well-known mixicologist, has written a book on the art of creating decoctions, intended to create and satisfy an artistic taste, and a palate that craves something new. He calls his book "The Mixicologist; or How to Mix All Kinds of Fancy Drinks; an Up-to-Date Recipe Book." It also contains many recipes on cooking. Mr. Lawlor was, until recently, the chief bartender at the Grand Hotel, and now at Burnet House.—*Times-Star, September, 1895.*

LAWLOR AS AN AUTHOR.

As a prince of mixicologists C. F. Lawlor, of the Burnet House, has a national reputation; it only remained for him to write a book to gain immortality. This he has done, and in the dedication the story of its contents is told. It has been prepared, as the author says, for those who patronize the best barrooms, wineroms, and clubrooms, so that they may know what is really good, and when and where they can get it. The recipes it contains are full, complete, and up to date.—*Enquirer, September, 1895.*

Half tablespoonful pure glycerine, one jigger of whiskey. This is a most excellent remedy for a cold or any disease of the throat or lungs. When possible, it should be taken a spoonful at a time at intervals of a half hour, letting it trickle down the throat. If the taste is not agreeable, a teaspoonful of wintergreen essence will make it palatable.

Wedding Punch.

 $\frac{1}{2}$ pint of boiling water.
6 grains of vanilla.
1 grain of ambergris.
1 pint of strong brandy.

Rub the vanilla and ambergris with the sugar in the brandy thoroughly; let it stand in a corked bottle for a few hours, shaking occasionally. Then add the lemon juice, pineapple juice and wine; filter through flannel, and lastly add the syrup.

Tea Punch.

(Use heated metal bowl.)

- Take $\frac{1}{2}$ pint of good brandy.
 $\frac{1}{2}$ pint of rum.
 $\frac{1}{4}$ pound of loaf-sugar, dissolved in water.
 1 ounce of best green tea.
 1 quart of boiling water.
 1 large lemon.

Infuse the tea in the water. Warm a silver or other metal bowl until quite hot; place in it the brandy, rum, sugar, and the juice of the lemon. The oil of the lemon peel should be first obtained by rubbing with a few lumps of the sugar. Set the contents of the bowl on fire; and while flaming, pour in the tea gradually, stirring with a ladle. It will continue to burn for some time, and should be ladled into glasses while in that condition. A heated metal bowl will cause the punch to burn longer than if a china bowl is used.

Punch a la Romaine.

(For a party of fifteen.)

- Take 1 bottle of rum.
 1 bottle of wine.
 10 lemons.
 2 sweet oranges.
 2 pounds of powdered sugar.
 10 eggs.

Dissolve the sugar in the juice of the lemons and oranges, adding the thin rind of one orange; strain

through a sieve into a bowl, and add by degrees the whites of the eggs beaten to a froth. Place the bowl on ice for a while, then stir in briskly the rum and the wine.

Duke of Norfolk Punch.

(For bottling.)

- Take 2 quarts of brandy.
 1 quart of white wine.
 1 quart of milk.
 1¼ pounds of sugar.
 6 lemons.
 3 oranges.

Pare off the peel of the oranges and lemons very thin; put the peel and all the juice into a vessel with a close-fitting lid. Pour on the brandy, wine and milk, and add the sugar after having dissolved in sufficient water. Mix well, and cover close for twenty-four hours. Strain until clear, and bottle.

A curious story about the origin of this drink is thus told by the *New York Herald*:

“There are some mixed drinks that are standbys, and are always popular, such as cocktails, punches, and juleps; but every little while there will be a new racket sprung on the public that will have a great run for a time, and then get knocked out by another. About a month ago white plush got its start in this way: There was a country buyer down from New England somewhere, and a party of dry goods men were trying to make it pleasant for him. So they took him into a swell barroom down town, and were going to open sour wine. Same old story, you know; get him full as a balloon and then work him for a big order. It turned out that this countryman was not such a flat as they thought him. Though he had been swigging barrels of hard cider and smuggled Canada whiskey for the last twenty years, he pleaded the temperance business on them; said he never drank, and he guessed he'd just take a glass of water if they'd git him one, as he was kinder thirsty walkin' round so much. Well, that was a set-back for the boys. They knew he had lots of money to spend, and he was one of those unapproachable ducks that have got to be warmed up before you can do anything with them.

“‘Oh, take something,’ they said; ‘take some milk.’

“‘Well, I guess a glass of milk would go sorter good,’ said he.

“Some one suggested kumyss, and told him what it was. As they did not have any kumyss in the place they gave him some milk and seltzer. That’s about the same thing. One of the boys gave the bartender a wink, and he put a dash of whiskey in it. The old man did not get on to it at all. He thought it was the seltzer that flavored it. The next round the seltzer was left out altogether and more whiskey put in. They kept on giving it to him until he got pretty well set up. It’s a very insidious and seductive drink. Pretty soon the countryman got funny and tipped his glass over on the table. As it spread around he said:

“‘Gosh, it looks like white plush, don’t it?’

“‘So it does,’ said the boys. ‘Give the gentleman another yard of white plush, here;’ and the name has stuck to it ever since.”

Take lemonade-glass two thirds full of ice, one desertspoonful of sugar, two dashes Schroeder's biters, lemon peel, bottle Trilby soda water; stir, and serve in same glass.

Apollinaris Lemonade.

(Use lemonade-glass.)

Mash one whole lemon, one large spoonful sugar, half fill with ice, fill up with the Apollinaris water; stir, and strain into thin glass, adding fruit.

Seltzer Lemonade.

In same manner as Apollinaris, using Seltzer or Imperial water, the last being a very fine water known as Wagner's Imperial.

Lemonade.

This drink, although simple in name, is very important in first class bars. One good-sized lemon, peeled, cut in half, one and one half large spoonfuls sugar, the lemon well pressed; fill glass two thirds full of ice, fill with water, and shake thoroughly, and strain carefully into thin glass, or serve with straws, adding fruit according to customer's wish. Can be made sour; and with Apollinaris or Seltzer according to order.

Soda Lemonade.

(Use large soda-glass.)

Take 1 tablespoonful of powdered white sugar.

Juice of half a lemon.

1 bottle of plain sodawater.

2 or 3 small lumps of ice.

Stir up well, and serve with straws or strain.

SELTZER LEMONADE may be made by substituting Seltzer water for the soda.

Egg Lemonade.

(Use large barglass.)

Take 1 large tablespoonful of pulverized white sugar.

Juice of half a lemon.

1 fresh egg.

2 or 3 small lumps of ice.

Shake up thoroughly, strain into a sodawater glass and fill up the glass with soda or seltzer water. Ornament with berries.

Orgeat Lemonade.

(Use large barglass.)

Take 1 tablespoonful of powdered white sugar.

$\frac{1}{2}$ wineglass of orgeat syrup.

The juice of half a lemon.

Fill the tumbler one third full of fine ice, balance water. Shake well, and ornament with berries in season. Serve.

Fine Lemonade for Parties.

(One gallon.)

Take the rind of 8 lemons.

Juice of 12 lemons.

2 pounds of loaf sugar.

1 gallon boiling water.

Rub the rinds of the eight lemons on the sugar until it has absorbed all the oil from them, and put it with the remainder of the sugar into a jug; add the lemon juice (but no pips), and pour over the whole the boiling water. When the sugar is dissolved strain the lemonade through a piece of muslin, and when cool it will be ready for use. The lemonade will be much improved by having the whites of four eggs beaten up with it. A larger or smaller quantity of this can be made by increasing or diminishing the ingredients used.

HINTS FOR YOUNG BAR- TENDERS.

1. An efficient bartender's first aim should be to please his customers, paying particular attention to meet the individual wishes of those whose tastes and desires he has already watched and ascertained; and, with those whose peculiarities he has had no opportunity of learning, he should politely inquire how they wish their beverage served, and use his best judgment in endeavoring to fill their desires to their entire satisfaction. In this way he will not fail to acquire popularity and success.

2. Ice must be washed clean before being used, and then never touched with the hand, but placed in the glass either with an ice-scoop or tongs.

3. Fancy drinks are usually ornamented with such fruits as are in season. When a beverage requires to be strained into a glass, the fruit is added after straining; but when this is not the case, the fruit is introduced into the glass at once. Fruit, of course, must not be handled, but picked with a silver spoon or fork.

4. In preparing any kind of a hot drink, the glass should always be first rinsed rapidly with hot water: if this is not done the drink can not be served sufficiently hot to suit a fastidious customer. Besides, the heating of the glass will prevent it

from breaking when the boiling water is suddenly introduced.

5. In preparing cold drinks great discrimination should be observed in the use of ice. As a general rule, shaved ice should be used when spirits form the principal ingredient of the drink, and no water is employed. When eggs, milk, wine, vermouth, Seltzer or other mineral waters are used in preparing a drink, it is better to use small lumps of ice, and these should always be removed from the glass before serving to the customer.

5. Sugar does not readily dissolve in spirits; therefore, when making any kind of hot drink, put sufficient boiling water in the glass to dissolve the sugar, before you add the spirits.

7. When making cold mixed drinks it is usually better to dissolve the sugar with a little cold water, before adding the spirits. This is not, however, necessary when a quantity of shaved ice is used. In making cocktails the use of syrup has almost entirely superseded white sugar.

8. When drinks are made with eggs or milk, or both, and hot wine or spirits is to be mixed with them, *the latter must always be poured on the former gradually*, and the mixture stirred briskly during the process; otherwise the eggs and milk will curdle. This is more particularly the case when large quantities of such mixtures are to be prepared. Such drinks as "English Rum Flip," "Hot Eggnog" and "Mulled Wine" are sure to be spoiled unless these precautions are observed.

SHALL IT BE WHISKEY OR BEER?

BEVERAGES COMPARED.

How to Tell Whether You Are Physi-
cally Better Suited to One
Than the Other.

Is it better for a man to drink whiskey or to stick to beer? Now, that is a very proper question for thousands of people, and it is very important that it should be answered correctly. If a man who ought to drink beer should confine himself to whiskey, the consequences might be disastrous; and the same would be true when a man whom nature has marked for a whiskey drinker devotes most of his bibulous energy to beer.

There is all the difference in the world between the two beverages, says a writer in the New York World. They are made, in the first place, of different materials. Beer being a sparkling beverage, is heavily charged in the process of fermentation with carbonic acid gas, while whiskey is quiet, and, in this respect, inoffensive. Beer contains very little alcohol in proportion to the whole quantity of fluid, sometimes but four percent, while whiskey contains from forty to fifty percent. Beer is therefore largely made up of water. Whiskey has very little water in its composition. Beer has a "bead," while whiskey has none. Beer is liable to spoil unless kept cold. Whiskey will keep at any temperature.

Adulterated beer is, without question, much more unhealthful than pure beer made of hops and malt, but when the healthfulness of any sort of beer is compared with whiskey, it is not so much the ingredients of the beer that enter into the question as the general character of the liquid, and the effect of great quantities of it on certain organs, especially the liver, the kidneys, and the bladder.

A man who habitually drinks beer takes a much greater quantity of liquid into his system than one who

drinks whiskey. It would therefore stand to reason, that if they were equally harmful, admitting that they are harmful, the beer-drinker would suffer the more. It is also important to bear in mind that there is a great difference in temperament between different individuals. A man who can drink beer in considerable quantities with little bad effect, might be easily upset by a moderate indulgence in whiskey, and so, on the other hand, there are many persons accustomed to whiskey who are injuriously affected immediately on drinking beer.

Since it would be difficult to obtain proper subjects for an experiment of this sort, it will probably answer the purpose to compare beer-drinking countries, districts, and nations, with those that drink little beer, but consume great quantities of whiskey. An opportunity for such a comparison is afforded in studying the health statistics of the north and south of England.

The percentage of deaths in the south of England is somewhat larger, but the most curious difference between the two sections is, that while the north is comparatively free from gout and rheumatism, those diseases are very prevalent in the south. Gout and rheumatism are found to prevail especially in manufacturing cities,

where much beer, porter, and ale are drunk. The same is true of the cities of Germany, whereas in Scotland and in Spain there is a happy absence of both maladies.

So striking has been the coincidence of the association of gouty disease with the habit of beer drinking that doctors have concluded there must be some pathological connection between them. It has also been found in individual cases that many patients who complain of gout have been beer-drinkers, and that they experience relief immediately on giving up this beverage.

Dr. S. Weir Mitchell declares that the safest drink is whiskey, provided there is not some objection peculiar to the individual. Probably most physicians will agree with the doctor's views generally, though they will all declare that whiskey, being strong in alcohol, should be used moderately.

The trouble with beer is that it puts a great tax on the liver and kidneys. The mere passing off of great quantities of liquid is unnatural, and when persisted in, so weakens these organs as to invite cirrhosis of the liver, Bright's disease, and other complaints.

Nevertheless, each man is a law unto himself, and

after first determining to be moderate, you should find out which beverage you are suited for. One good test is to examine the tongue in the morning after drinking. If it is coated after drinking beer, and not coated after drinking whiskey, leave beer alone. If it is coated after drinking whiskey, but not after drinking beer, leave whiskey alone. If it is coated after drinking both, leave both alone.

Yankees and Beer.

In the year 1789 the State Legislature of Massachusetts passed the following resolution :

"Inasmuch as the manufacture of strong beer, ale and other malt drinks promotes the purposes of agriculture, trade and commerce; since they promote the cultivation of such grains as are adapted to our soil and climate, and since they thereby at the same time produce a valuable article of export, and because malt liquors, on account of their wholesome qualities, strongly recommend themselves for general use; since they form important means for the preservation of the health of the citizens of this State, and protect and guard against the harmful effects of stronger liquors; therefore, be it Resolved that all brewers who make yearly more than one hundred barrels of beer shall be free from taxes and duties for five years."

This is such a great contrast between then and now that every sensible man must see how foolish the views of the present temperance fanatics are, compared with the views of their forefathers.

Reform Movements would have better prospects of success if they would direct their attention to induce the people to drink only pure beverages like the brew of The Christian Moerlein Brewing Co., brewers of fine beer exclusively, and not ordinary corn brew, which are only good to fill up. Fine beer, like Moerlein's, is drank moderately. If this class of beer was used exclusively there would be but little drunkenness, and prohibition law would be unnecessary.

WINE.

The word "wine," in its wildest sense, includes all alcoholic beverages derived from sacchariferous vegetable juices by spontaneous fermentation. In the narrower sense of its ordinary acceptance, it designates the fermented product of grape juice, with which alone the present article proposes to deal. Wine making is an easy art where there is a sufficient supply of perfectly ripe grapes. In Italy, Spain, Greece, and other countries of Southern Europe, nature takes care of this. In the more northern districts of France, and especially on the Rhine in Germany, the culture of the vine means hard work from one end of the year to the other, which only exceptionally finds its full reward. And yet it is in those naturally less favored districts that the most generous wines are produced. Southern wines excel in body and strength, but even the best of them lack the beautiful aroma or bouquet characteristic of high-class Rhine wine. The large proportion of sugar in southern grape juice would appear to be inimical to the development of that superior flavor. To secure the highest attainable degree of maturity in the grape, the vintage on the Rhine is postponed until the grapes almost begin to wither, and the white grapes on the sunny side of the

bunches exhibit a yellowish brown (instead of a green) color, and show signs of flacidity. In Spain, France, and Portugal it is a very common practice to dust over the grapes with plaster of paris, or to add the plaster to the must. The intention is to prevent putrefaction of the berries in the latter, to add to the chemical stability of the wine.

Effervescing or Sparkling Wines.

These wines are largely impregnated with carbonic acid, engendered by an after-fermentation in the closed bottle by means of added sugar.

The art originated in Champagne, where the best sparkling wines are produced, and whence it has spread to the Rhine, the Moselle, and other districts. A champagne which contains relatively little sugar is called "dry"; it is chiefly this kind which is imported into Great Britain, where champagne is used habitually principally as a dinner wine; in France a sweet wine is preferred. At the present day wine is practically a European product, although a certain quantity is made in the United States, at the Cape of Good Hope, and in Australia.

France shows to-day, and has during several isolated seasons the past twenty years, shown herself to be the most remarkable wine-producing country in the world's history, and this in face of the fact that the United States and Italy, with more territory suitable to grape-growing, and with won-

derful natural advantages--and why? because she has taken advantage of her fitness of soil to the vine; her meteorological conditions; her geographical positions as regards the European markets, and incidentally those of the world, and partly to the aptitude of its inhabitants, that France developed the position which it now holds.

Spain is second only in reputation to France among wine-growing countries; its white wine, known as sherry, first brought it into prominence. Sherry, so called from the town of Jerez (Xeras) de la Frontera, the headquarters of this industry. There are several different varieties of sherry, which may be divided into the Amontillado and Manzanilla classes. The Amontillado class may again be divided into *fina* and *olloroso* , the former being the more delicate. The generous, full flavored wines known as Port, are the produce of the district of Alto Douro, in the northeast of Portugal, and thence shipped to and from Oporto.

Home Industry.

In our own country the cultivation of the vine has made rapid progress of late years, and American wines are steadily taking the place of the foreign product. The soil and climate of the Pacific Coast seem best adapted to the growth of the vine, and wine-making is very likely to become one of the leading industries of California. The Mission grape (being the first) is supposed to have been imported

from Mexico by the Franciscan fathers about the year 1769. Subsequently varieties of French, German, and Spanish wines were introduced into the state. In Ohio upon the shores of Lake Erie and along the Ohio river the vine is extensively cultivated. The champagnes and clarets made in the neighborhood of Sandusky and Cleveland are produced in considerable quantities.

New York, Missouri, Illinois, and Pennsylvania are likewise large producing states, the largest wine manufacturing establishment being in New York State, Steuben County. The total annual production of wine in the United States now amounts to about 35,000,000 gallons.

HEALTH AND ALCOHOL.

The British Medical Association, moved by the outcry against the use of alcoholic drinks, and wishing for some definite and reliable information as to the influence of alcohol on the duration of life, appointed a commission not long ago to gather statistics in the premises. The observations made included 4234 cases of deaths in five classes of individuals, and here are the results in the average age attained by each case: Total abstainers, 51 years and 1 month; moderate drinkers, 63 years and $\frac{1}{2}$ month; occasional drinkers, 59 years and 2 months; habitual drinkers, 57 years and 2 months; drunkards, 53 years and $\frac{1}{2}$ month. It appears that moderate drinkers live longer than anybody else, and total abstainers are the shortest lived.

WHISKEY.

It is rank buncombe to assert that whiskey contains no fusel oil. It is this very element which marks it from other spirits. With the chemical action of age and atmosphere, the fusel oil is changed into aromatic volatile ethers, to which is due the tonic properties and bouquet peculiar to old whiskey. Young whiskey, however well made, is unwholesome to use. It is also very irritating to the delicate mucous membrane of the stomach, consequently indigestible, while the same whiskey with sufficient age is grateful and digestible. As a stimulant it is of the highest order; used in moderation, diluted with pure fresh water to about the strength of wine or beer, it is the most wholesome stimulant known. It avoids the saccharine of sweet wine, the acid of dry wine, the alkaline properties of beer, and the excessive strength of "straight whiskey."

Diluted with fresh water a good old whiskey is superior to any wine or beer.

WHISKEY.

Whisky or whiskey, a spirit distilled for drinking, which originated, at least so far as regards the name, with the Celtic inhabitants of Ireland and Scotland, and its manufacture and use still continues to be closely associated with those two countries.

Distilled spirit first became popularly known as aqua vitæ, and it was originally used only as a powerful medicinal agent. It was not till about the middle of the 17th century that it came into use in Scotland as an intoxicating beverage. It is only the finer qualities of matured malt and grain whiskey that can be used as simple or unblended spirit. In the United States whiskey is distilled chiefly from corn and rye, wheat and barley malt being used, though only to a limited extent. Whiskey is greatly improved by age; it is not mellow, nor its flavor agreeable until it is several years old. Whiskey seems to be the most favored drink in America for purposes of stimulation, and in uncertain moments when one is undecided as to what to take it is generally regarded by steady drinkers as the purest and most reliable drink. They appear to know good whiskey by the taste of it.

BREWING

Is the art of preparing an exhilarating or intoxicating beverage by means of a process of fermentation. In the modern acceptation of the word, brewing is the operation of preparing beer and ales from any farinaceous grain, chiefly from barley, which is at first malted and ground, and its fermentable substance extracted by warm water. This infusion is evaporated by boiling, hops having been added to preserve it. The liquor is then fermented. The art was known and practiced by the Egyptians many hundred years before the Christian era, and afterward by the Greeks, Romans, and ancient Gauls, from whom it has been handed down to us. All countries, whether civilized or savage, have, in every age, prepared an intoxicating drink of some kind. Great care must be taken when buying for malting, for sometimes the grain is doctored by kiln-bleaching, or dried at too great a heat. Several samples, too, may be mixed, in which case they will not grow regularly, as heavier barley generally requires to be longer in steep; and the grains, broken by the drum of the threshing-machine being set too close, spoil a sample. Those cut into sections will not germinate, but in warm weather putrefy, as is evident from their blue-gray and moldy appearance

and offensive smell while germinating. A good buyer will, by the use of a skillful hand, estimate very closely the weight per bushel in bulk. His eye will tell him if the grain has been cut before being ripe, in which case there will be a variety in the color of the barley-corns, some being bright and some a dead, grayish yellow. In consequence of being sown in spring, and not undergoing the equalizing tendency of winter, barley is, of all grain, the most liable to ripen in a patchy manner, and not come to perfection simultaneously. The buyer has also to judge if it has been heated, or "mow-burnt," while lying in the field after being cut, or in the stack.

THE COOK IS KING.

We may live without poetry, music, and art;
We may live without conscience, we may live without heart;
We may live without friends, we may live without books,
But civilized man can not live without cooks.

We may live without books; what is knowledge but grieving?
We may live without hope; what is hope but deceiving?
We may live without love; what is passion but pining?
But where is the man that can live without dining?

COFFEE THAT IS GOOD.

To make good coffee is apparently not so simple as it may seem, if general results count for anything. The coffee served at some of the best restaurants testifies to this, and even the home-made morning cup of coffee is seldom perfectly satisfactory. A writer in the London Lancet deplores the fact that a good cup of coffee is so seldom found, and declares that there should be no difficulty in making it, and recommends that the simplest way is the best. There is no better stimulant in the morning than a delicious cup of coffee, and there is no better way of preparing it than according to the following recipe: Do n

buy the coffee already ground, for it loses its fine flavor more rapidly when in the ground form than when whole. Have a small coffeemill and grind it yourself.

A mixture of two or more kinds of coffee will give the most satisfactory result. Two thirds Java, with one third Mocha, will make a rich, smooth coffee. Now for the recipe: Put one cupful of roasted coffee into a small fryingpan, and stir it over the fire until hot, being careful not to burn it. Grind the coffee rather coarse and put it in a common coffeepot. Beat one egg well, and add three tablespoonfuls of cold water to it. Stir this mixture into the coffee. Pour one quart of boiling water on the coffee, and place the pot on the fire. Stir the coffee until it boils, being careful not to let it boil over; then place on the back of the stove, where it will just bubble, for ten minutes. Pour a little of the coffee into a cup, and return it to the pot. Do this several times. This is to free the nozzle of the particles of coffee and egg which may have lodged there. Place the coffeepot where it will keep warm, but not get so hot that the contents will bubble. After it has stood for five minutes, strain it into a hot coffeepot, and send to the table at once.

Fillets of Fish.

Cut any fish into slices one inch thick, wash and wipe dry; sprinkle a platter with chopped onion, lay the fillets on top of this, and dust with salt and pepper. Mix three tablespoonfuls of olive oil and one of vinegar thoroughly and moisten the fish and stand aside one or two hours. When ready to cook dip the fillets first in egg, then in bread-crumbs, and fry in hot fat. Garnish with lettuce or cress and quarters of lemons.

Boiled Cauliflower.

Pick off the outer leaves, cut off the stem close to the bottom of the flowerets; wash in cold water; then soak with top downward in cold water for one hour. Tie it in a piece of cheese-cloth and put in salted boiling water, stem downward, and boil till tender. When done, remove carefully to dish and serve with cheese sauce.

ALL WORK ABSOLUTELY GUARANTEED.

LIQUORS TO SERVE WITH CERTAIN SPECIFIED FOODS.

Fashion, taste, and the instincts of the stomach, suggest the following:

Raw oysters—Sauterne, white Burgundies, or hock.

Soup—Sherry or Madeira.

Fish—Claret, Sauterne, or hock.

Roast (*relves*)—Burgundy or champagne, Roman or Kirsch punch.

Second course roast (game and poultry)—Old Champagnes, sparkling Moselles, clarets, red Burgundies, etc.

Entrees—Champagne.

Game and salads—Champagne.

Dessert—No liquors, or perhaps some fine Hungarian wine, or burnt brandy with black coffee.

With lunch in which cheese and rye or other bread, or cereal or starchy products predominate, the thing most used, and which most aids digestion, is beer, ale, porter, or stout.

Beer is not much drawn from the wood now, except in very small bars and at country crossroads. It is just as good drawn from the cellar through pipes plated inside with tin; but they must be kept

scrupulously clean, and every morning three or four glasses of beer should be drawn off and thrown away. Pipes should be cleansed every week with a strong solution of sal soda and hot water.

In opening still wines the top of the capsule should be cut, leaving the shining metal below to form an ornamental band. Wipe off the top with a napkin, and, if you serve it, pour with the right hand, holding the bottle in the center of the bulge, pressing lightly with the thumb and fingers. This is more graceful than grasping it impetuously by the neck. It is a custom, more in America than elsewhere, for gentlemen to pour out their own liquors, especially if in a party.

In opening Champagne and other effervescent drinks, including malt liquors, cut the band below the cork with the nippers, and the wires will come off easily by a twist of the hand. It will be necessary to use the corkscrew in case of malt liquors not confined by the patent rubber cork, and there is great danger of cutting the left hand in case of breakage, if, as is generally the case, the bottle is grasped by the neck. It should be held firmly with the left hand near the bottom of the bulge, and the cork should be drawn steadily with the right, and without shaking the bottle. There is no danger by this method.

CORDIALS.

Kirschwasser, a spirit from black cherries, in great demand throughout Europe, is becoming abundant in the United States, and equal to any in Europe. Kirsch is an excellent digestive and tonic for throat, lungs and entire system; used in sorbets, etc. A punch of kirsch, coffee, sugar and ice-water makes a delicious drink in warm weather.

Benedictine, distilled at Fecamp, Normandy, is a very famous old cordial, originally prepared exclusively by the Benedictine monks, but since the French Revolution it has been made by a secular company. It is known principally as a genital stimulant.

Chartreuse is a tonic cordial, very palatable, and highly esteemed for its stomachic and antifebrile virtues. It is prepared by the distillation of various aromatic plants, especially nettles, growing in the Alps, carnations, absinthium, and the young buds of the pine tree. There are three kinds, green, yellow, and white.

Maraschino originated with the Italians. For years the Pope sent this delicious liquor to all the grandees of the world. Queen Elizabeth of England was extravagantly fond of it, and, as if to honor it, drank it from a goblet of gold. The basis of Maraschino is black cherries, jasmine, roses, orange flowers, etc., fermented and distilled. It is recommended as an anodyne against nervousness. It is extensively used in the preparation of jellies, sorbets, pastry, etc.

Montana is prepared from the juices of plants, flowers, roots, etc., growing on the highest mountains of America, principally the Rockies and Alleghanies. It is a powerful digestive, suitable for everybody, but principally for the aged and debilitated. It should generally be taken after dinner.

Curacao, dub (sweet) and sec (dry), also triple sec, has for its basis the peel of the young bitter orange growing generally in the island of Curacao, a possession of Holland, off South America. It is a digestive, and is used as a preventive against fever. It is white or green in color.

Anisette is recommended for the cure of flatulency, colic, etc. The aroma and flavor of this delicious, ancient, and popular liquor is obtained from annis seed.

Absinthe (green or white), a bitter beverage used as an appetizer, and bitterly denounced and as warmly praised by different *critiques* the past century. The present method of preparation dates back only sixty years. Formally it was simply an infusion of herbs in white wine. In Normandy and in certain countries around the Alps it is still prepared in that crude way. The distillers of Besancon, Pontarlier, and Couvet hit on the idea of distilling the Absinthe herb (wormwood), adding annis, fennel, and corriander seeds, etc., *ad lib.*, these making an agreeable beverage. Absinthe so made soon had considerable success, which had the usual effect of bringing out the injurious trash made from oils, essences, etc. Absinthe, if properly made, is healthful—a wonderful appetizer and soother of the nerves—if not taken in excess. It is usually taken with half a glass of water to a small wineglass of Absinthe. The water is allowed to drip on the Absinthe so as to milk or pearl it. Taken pure it has the same properties as peppermint in cases of colic or cramps. To some tastes a cocktail is much improved by the addition of two or three drops of Absinthe.

The Wine Cellar.

The Mavrodaphne Greek Wine, which is having a fine sale in this country, is a wine strictly pure, very old Tokay of light character, containing thirteen percent of alcohol, and is called the "genuine medical Tokay, a natural remedy." It is a favorite with the ladies. The agents for the United States are J. D. Buchtel & Co., 24 East Fifty-ninth Street, New York City, and it is sold for \$15 a case. Mr. Buchtel has the honor to have had conferred upon him the silver cross of the Knights of the Royal Order of the Savior by George I., king of the Hellenes. This mark of his appreciation was for his endeavors to introduce into this country and to bring into general use the Greek wines.

Mr. G. S. Nichols, 43 Beaver Street, New York City, has been appointed sole agent for the Piper-Heidsieck champagne for United States and Canada.

Mean and adulterated drinks supply the temperance fanatics with their most powerful arguments, and if it were possible to abolish the manufacture and sale of these abominable concoctions there would be less need

for restriction of the traffic. When such whiskeys as Old Crow and Mellwood Bourbon and Normandy Ryé are put upon the market, and which for years have proved all that is claimed for them—a bland, ripe, and delicious whiskey, that has few equals, the favorite with *bon vivant* and medical practitioner alike—then it is a friend, supplying thousands with the means of maintaining health and strength and enjoyment.

Fernet-Branca is a drink that is greatly used by the natives of Italy. It is said that it will prevent indigestion and cure it without having recourse to remedies which weaken the digestive organs. It is said that during the visitation of cholera in Italy in 1865, 1873, 1884-85, this drink accomplished surprising cures. Messrs. L. Gandolfi & Co., 427 West Broadway, are the United States agents for this drink.

The mistaken treatment of diluting claret with ice water develops all its rough flavor and crude properties.

The O-neh-da Vineyard, Rochester, N. Y., was organized and is conducted by Monseigneur McQuaid, bishop of that city. The property, it is said, belongs to the Rochester Seminary, of which he is the head. Several years ago the bishop spent several weeks in the white wine district near Bordeaux, studying the making of sauternes.

Mr. H. S. Persse, Galway, Ireland, is the largest holder of ten-year-old whiskey in Ireland, and his whiskey is acknowledged to be as fine as any made in Ireland. Messrs. Raoul-Duval, Stevens & Hall, 63 Pine Street, New York City, are the United States representatives for Mr. Persse.

The John Dewar & Sons Scotch Whiskey will be represented in this country by John Osborn & Co., New York City.

If the whiskey dealers allow the whiskey sold over the bars to deteriorate, while the other alcoholic beverages sold far cheaper improve in quality, they must expect to lose business very rapidly.

The delicious flavor, exquisite aroma, and delicate bouquet of Burgundy wines all combine to keep this wine popular at the dinner-table.

Probably the most expensive wine ever offered for sale at public auction was the "1814 pipe" of Madeira, which was sold in Paris as part of the effects of the late Duchesse de Raguse, and the sale caused the greatest excitement. The pipe was picked up near Antwerp in 1814. It had lain under water, penned down in the wreck of a ship that had been lost at the mouth of the

CUPS AND THEIR CUSTOMS.

Let your utensils be clean, and your ingredients of first-rate quality, and, unless you have someone very trustworthy and reliable, take the matter in hand yourself; for nothing is so annoying to the host, or so unpalatable to the guests, as a badly compounded cup. In order that the magnitude of this important business may be fully understood and properly estimated, we will transfer some of the excellent aphoristic remarks of the illustrious Billy Dawson (though we have not the least idea who he was), whose illustrisity consisted in being the only man who could brew punch. This is his testimony: "The man who sees, does, or thinks of anything while he is making Punch, may as well look for the Northwest Passage on Mutton Hill. A man can never make good Punch unless he is satisfied, nay, positive, that no man breathing can make better. I can and do make good Punch, because I do nothing else; and this is my way of doing it. I retire to a solitary corner, with my ingredients ready sorted; they are as follows, and I mix them in the order they are here written: Sugar, twelve tolerable lumps; hot water, one pint; lemons, two, the juice and peel; old Jamaica rum, two gills; brandy, one gill; porter or stout, half a gill; arrack, a slight dash. I allow myself five minutes to make a bowl on the foregoing proportions, carefully stirring the mixture as I furnish the ingredients until it actually foams; and then, Kangaroos! how beautiful it is!!" If, however, for convenience, you place the matter in the hands of your domestic, I would advise

you to caution her on the importance of the office, and this could not be better effected than by using the words of the witty Dr. King :

“O Peggy, Peggy, when thou go'st to brew,
Consider well what you're about to do ;
Be very wise—very sedately think
That what you're going to make is—drink ;
Consider who must drink that drink, and then
What 'tis to have the praise of honest men ;
Then future ages shall of Peggy tell,
The nymph who spiced the brewages so well.”

Respecting the size of the cup no fixed rule can be laid down, because it must mainly depend upon the number who have to partake of it ; and be it remembered that, as cups are not intended to be quaffed *ad libitum*, as did Bicias, of whom Cornelius A—— says—

“To Bicias shee it gave, and sayd,
'Drink of this cup of myne.'
He quickly quafte it, and left not
Of licoure any sygne,”—

let *quality* prevail over *quantity*, and try to hit a happy medium between the cup of Nestor, which was so large that a young man could not carry it, and the country half-pint of our own day, which we have heard of as being so small that a string has to be tied to it to prevent it slipping down with the cider.

In order to appreciate the delicacy of a well-compounded cup, we would venture to suggest this laconic rule, “When you drink—think.” Many a good bottle has passed the first round, in the midst of conversation, without its merits being discovered.” For Claret Cup see page 25.

RECIPE FOR A HUNTING-FLASK.

As to the best compound for a hunting-flask it will seldom be found that any two men perfectly agree; yet, as a rule, the man who carries the largest, and is most liberal with it to his friends, will be generally esteemed the best concocter. Some there are who prefer to all others a flask of gin into which a dozen cloves have been inserted, while others, younger in age and more fantastic in taste, swear by equal parts of gin and noyeau, or of sherry and maraschino. For our own part we must admit a strong predilection for a pull at a flask containing a well-made cold punch or a dry curacoa. Then again, if we take the opinion of our huntsman, who (of course) is a *spicy* fellow, and ought to be up in such matters, he recommends a piece of dry ginger always kept in the waistcoat pocket, and does not care a *fig* for anything else. So much for difference of taste; but as we have promised a recipe, the one we venture to insert is specially dedicated to the lovers of usquebaugh, or "the crathur." It was a favorite of no less a man than Robert Burns, and one we believe not generally known; we therefore hope it will find favor with our readers, as a wind-up to our brewings.

RECIPE.

To a quart of whiskey add the rinds of two lemons, an ounce of bruised ginger, and a pound of ripe white currants stripped from their stalks. Put these ingredients into a covered vessel and let them stand for a few days, then strain carefully, and add one pound of powdered loaf sugar. This may be bottled two days after the sugar has been added.

THE MODEL BARTENDER.

He should be a man of good character, straight personal habits, good temper, cheerful, obliging, wide-awake, quick, graceful, attentive, sympathetic, yet too smart to be "worked," neither grum nor too talkative, of neat appearance and well dressed. He should study the tastes of the patrons. For instance, in mixing a cocktail most clerks make the mistake of putting in too much bitters, in which case the drink is spoiled, or rather, is unpalatable to the customer. Most men like but very little bitters. You should, in order to become proficient and popular, study all the points in the mixing of all drinks. There can be too much syrup or sugar, lemon juice or other ingredient used, in the same way as too much bitters in a cocktail. This is a profession that every man can not master. There are men who would not make a first-class bar-clerk in a lifetime. A clerk should not encourage "hangers-on," loungers, or men under the influence of drink. In fact, he should never sell or give to a man in his cups, for this feature casts the greatest odium on our business, which could be made as legitimate as any if in the hands of proper persons.

PREPARATION FOR CUSTOMERS

The first thing to be done in the morning upon opening a saloon is to look after ventilation. There is generally a very odious smell about a place that has been tightly closed during the night, and it is as unwholesome as it is disagreeable. It should be gotten rid of as soon as possible. See that you have enough fine ice prepared to serve your morning customers with drinks, and if the man on watch the night before has failed to fill his bottles, you must perform this duty at once, and place them on ice so that your customers may not have to use warm liquors. You must keep filling them up all day to supply the drain on them, and to avoid serving warm liquors. Polish up your glasses between drinks, and always be ready for customers. See to it that the place is neat and tidy; the window-panes, showcases and nickel-plating clear as crystal, and bright as new minted coins; the linen towels white as snow; the lunch fresh and inviting. A progressive clerk, and the proprietor too, for that matter, will visit other places to see what laudable innovations are being made, what new inducements are being offered. Make your own domains correspondingly or surpassingly attractive, and give the boys a right royal welcome.

DON'TS FOR YOUNG BAR- TENDERS.

Don't bring yourself into prominence before a crowd at the bar. Be polite and approachable, but let them advance to you.

Don't join in any conversation, but if it is general you may seem interested.

Don't volunteer any opinions unless your patrons express a desire, or at least a willingness to hear you.

Don't express your sentiments at all if at variance with the majority, unless very important interests are at stake.

Don't be too positive about things. You may be in error.

Don't look fiercely at people, or talk loud and harshly, but cultivate a smiling countenance and quiet, but firm tone of speech.

Don't occupy too much space, but give your colleagues behind the bar a chance.

Don't fail to put things in their places, so that you and your coworkers will know where they are when you want them.

Don't fail to get pay for all drinks.

Don't be in too great a hurry to find out what a party of gentlemen want as they approach the bar. Don't let them feel that you begrudge the space they

occupy while they talk. Sometimes placing glasses of water before them will break the ice on the subject.

Don't use a wet glass if there is a dry one to be had.

Don't forget to serve your effervescent drinks last in waiting on a party.

TO THE PUBLIC.

Don't fail to dine at Burdick's.

Don't fail to have your laundering done by Snow Flake Laundry.

Don't forget Oskamp, Nolting & Co.'s great jewelry house.

Don't forget popular Dan Murphy.

Don't fail to stop at the Burnet House.
