## **Northway Golf Center's 2016 Featured Equipment Catalog**

*"The 8 models on the cover alone offer over 5,000 driver combinations... How in the world do I find what's right for me?"*

A golfer's search for that "magical" driver that behaves the way they want seems perpetual, and is a big reason these 8 golf equipment manufacturers devote R & D funds toward designing, developing, and manufacturing their newest drivers. Thanks to the incredible flexibility these new clubs offer in terms of loft, lie, face angle settings and weight adjustability there literally is something for everyone, and for you. The process of selecting the best new driver, fairways or hybrids and irons for your game doesn't have to be difficult or confusing. Our award winning equipment experts will make it educational and fun for you to sift through the choices and make this season of golf your best.

### **Why get Fitted—what's in it for me?**

It's been said that typical golfers benefit even more from personalized custom fitting through their bag than PGA Tour players, who are so talented they can make even a mis-matched club perform adequately. While the statement "it's a game of good misses" is not untrue, and today's technology is incredibly forgiving our goal is to have you center the hit as often as possible. And if your clubs are a mis-match you'll find yourself making subtle compensations in alignment, tempo, swingpath and balance that only a fraction of golfers are capable of executing consistently.

Modern Launch monitors are incredibly accurate and support being fitted outside. There are several benefits to being fitted in an indoor studio. The temperature is constant, there's no wind, and the turf/impact area is always pure and level. Many ball flight and swing analyzers of today feature realistic displays of a driving range or "cyber" holes that make the experience realistic and the control conditions ideal. Our Launch monitor platform technology provides precise data on club head speed, club path, angle of attack, landing angle, impact position, launch angle, ball speed, spin rate trajectory, exact distance and much more.

However, the modern launch monitor is only as effective as its operator, and this is an area where our facilities truly shine. Store staff associates are constantly being trained and updated on the latest fitting devices and golf equipment so that your clubs, ball, distance measuring devices, bags, and even your shoes are right for you. Since 1974 the staff at Northway Golf Center has been dedicated to being the Champions of your game. We're golfers too, love hearing about your game, and wish you a warm welcome.

# Mizuno

## MP-5 Iron

The MP-5 is the ultimate geometric blend of a Mizuno classic muscle back and a players' cavity design. The Channel Back design is a new way of distributing the weight in the club head to allow for an increased level of forgiveness while still maintaining the feel, look, and control of a traditional muscle back. With intense Tour Player hit tests and feedback, the new Channel Back delivers a new level of forgiveness in a true players' package.

**Available in Right Hand**

**Our Price: \$999.99**

(8 Piece Set)

## MP-25 Iron

A stunning tour inspired design, utilizing Mizuno's innovative Grain Flow Forged 1025 Boron. The MP-25 irons strike the perfect balance between giving the player added distance without sacrificing one ounce of feel and ball control. To help activate the 1025 Boron material, Mizuno's team of designers created the Micro-slot which helps the face flex for more distance.

**Available in Right Hand**

**Our Price: \$999.99**

(8 Piece Set)

## S5 Wedge

The S5 wedges deliver elite feel and shot control in a new enticing Silhouette profile. The Silhouette profile is a softer version of the popular Teardrop shape so that when players open and close the wedge, the profile always appears aligned to the target. The S5 wedge is available in 25 loft and bounce offerings so all possible distance gaps are covered. High bounce versions carry a visible 15% sole grind and the low bounce offerings carry a 25% sole grind. These grinds aid in helping the high bounce versions to play higher and the low bounce versions to play lower.

Available from 49° - 62° RH In White Satin or Blue ion, LH White Satin only

**Our Price: \$129.99**

## 2016 B330 Family

Bridgestone's 2016 B330 Family features Bridgestone's new TOUR Core that is 6% larger and utilizes a steeper gradient in softness from the inner part of the core to the outer region, to generate faster ball speed and less spin off the driver than ever before. In fact, Bridgestone's proprietary gradational compression technology in its core allows the company to accomplish in one layer what other ball makers accomplish in two or three layers, leading to a smoother energy transfer and more power.

## 2016 eSeries Family

The e-Series models continue to deliver the exceptional flight performance golfers trust and expect and the introduction of Bridgestone's proprietary, breakthrough WEB Dimple Technology brings added distance across the line. WEB Dimple Technology covers will be featured across the 2015 e-Series family. Bridgestone's newest, proprietary design utilizes a cutting-edge "spidering" pattern that affords 10% more dimple-surface-coverage than the previous e-Series models. This new pentagonal, WEB pattern combined with the aerodynamics of our Dual Dimple design reduces drag, resulting in a more penetrating ball flight and greater distance.

# Wilson Staff

## C200 Irons

The Wilson Staff C200 irons push innovation to unforeseen limits. Designed for the Crossover player seeking a midsize head shape and moderate offset, the C200 yields distances not available from traditional irons, while still offering best-in-class feel.

At the core of its design is the proprietary FLX Face Technology, which minimizes the contact points between the body and the thin face. These minimized contact points, combined with a series of Power Holes around the entire perimeter of the face maximize face flex upon impact, resulting in increased ball speed and distance. These Power Holes, or literal holes that surround the head completely and provide the space for the face to flex, are filled with TEO31 Urethane to provide improved sound and outstanding feel.
