OUR FLEXIBLE
PRODUCTION SITES CONTRIBUTE
TO YOUR SUCCESS

heutink • Educating the world
international

Act global. think local

Heutink International educates the world. All products we offer, are developed and designed from a global perspective. That is why our brands Educo, Jegro, Nienhuis Montessori are so well known in the entire world of education.

Sometimes customers prefer their own brand on one of our products and would like to have a modification to the product to fit the local market. Other customers even ask us to produce their own product idea.

With the capacity, knowledge and techniques available in our factories in the Netherlands, Sri Lanka and China we can fulfill any request. Due to a small MOQ of 50-100 pieces and a manufacturing lead time of 8-12 weeks, our factory in the Netherlands is ideally suited for a product start up or smaller market places. For MOQ's over 500 pieces we can use our factories overseas.

Our idea . your brand

All products of Heutink International are well known for their educational value. We have a team of experienced educational specialists that know exactly what is necessary to stimulate the development of each individual child.

We are willing to share this expertise and to produce our ideas with your brand. Adjustments can be made to meet local market circumstances.

Curious?

Ask Chris or Joanne for an offer and a prototype. And, if you wish, our educational experts can even make recommendations.

'We at Zabavne Uceni value the opportunity Heutink International offers us, to produce a proven successful product with our own brand name.

Private label products present towards our own customers a new commercial dimension and an improved position as far as being an educational expert in our business.'

K. Vaněk, Zabavne Uceni, Brno (Czech Republic)

Your idea . our production

Do you have an innovative product idea? And, are you looking for a reputable company to transform this idea into a great product? For these purposes Heutink International can be your flexible production partner. You will have access to the best quality at competitive prices. Moreover, your products will feature your own branding.

Our factory in the Netherlands has a short manufacturing lead time. After approval of the prototype, we can supply the product within 8-12 weeks. Another advantage is the small MOQ. Depending on the product, we can already produce quantities from 50 pieces per order. Smaller quantities allow you to toe the water in your market. In other words, a quick market introduction at little risk! And, when your product appears to be a success, we can give you a quotation from our factories overseas.

'We highly appreciate a supplier who is able to make materials specifically tailored to our needs. After we design a product together with our educational experts, Heutink International dedicates itself to the production of our product.'

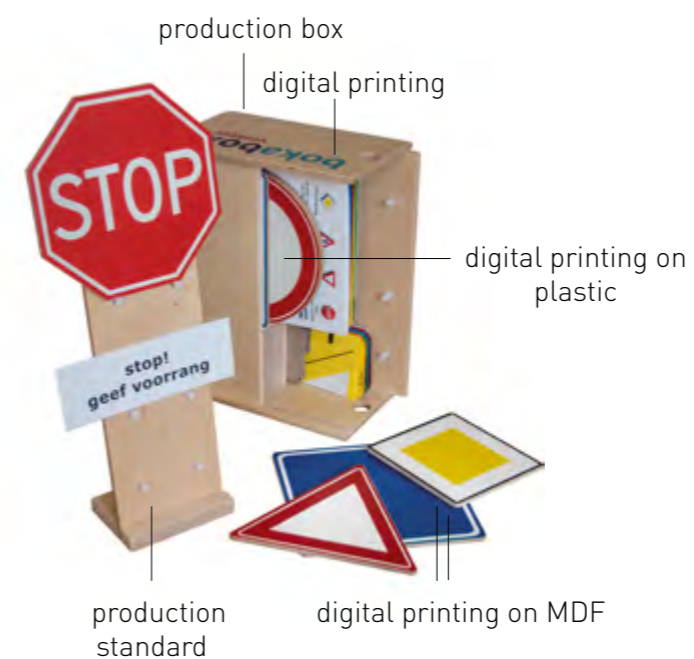

J.T. de Blois, Oppa Montessori, Orléans (France)

Production techniques

In our factories we have many production techniques and a lot of craftsmanship available for you. We are very experienced in all different areas of woodworking, lacquering, silkscreen printing, digital printing, stamp making and thermal vacuum forming.

As most of our products are made for children, they have to be safe. All the different raw materials we use in our factories have been tested and passed EN 71-3.

Wood.working

Heutink International produces wooden products in various types and sizes and pays a lot of attention to quality. We work with birch plywood, MDF and beech wood in combination with water-based lacquer. Of course other materials can be discussed as well.

Most of the Heutink International products are stored in wooden boxes. This ensures the durability of the product, something which is necessary in every classroom. Our wooden boxes can be produced in several ways. For example, with a hinged lid, with a separate lid, a sliding lid or partitions.

DRAWING SET

Drawing set of birch plywood with partitions and a hinged lid.
Dimensions box: 30 x 12.2 x 5.2 cm.

BOX WITH CARD HOLDER

Box of birch plywood with holder for an assignment card. With hinged lid.
Dimensions box: 20.3 x 18.2 x 4.2 cm.

LETTER CARD BOX

Box of birch plywood with 28 partitions and stand, without lid.
Dimensions box: 27.5 x 25.5 x 11 cm.

MOST OF THE HEUTINK INTERNATIONAL PRODUCTS ARE STORED IN WOODEN BOXES

WITH OUR THERMAL
VACUUM FORMING MACHINE
WE CAN MAKE PLASTIC BOXES
WITH A TRANSPARENT LID

Thermal.vacuum forming

Wooden boxes are our trade mark. Sometimes however, a product does not require such a solid and durable storage. In those cases, a plastic box will probably do as well. With our thermal vacuum forming machine we can make plastic boxes with a transparent lid. We can shape the boxes according to your request and choose any required partition.

SPLIT(S)BOX PUPILS

Learn to partition numbers up to 10. As the number pictures are visualised repeatedly it develops mental arithmetics. Dimensions box: 7 x 4.5 x 1.6 cm

EURO SORTING TRAY

The box contains 160 coins and 130 banknotes. The money can be taken out easily, like a cash register. Dimensions box: 54.5 x 22.5 x 4.5 cm.

DICE WIPE-CLEAN

Customise the dice with whiteboard markers. Write names, numbers, shapes or colours on them. The dice can be cleaned easily.

Split(s)box

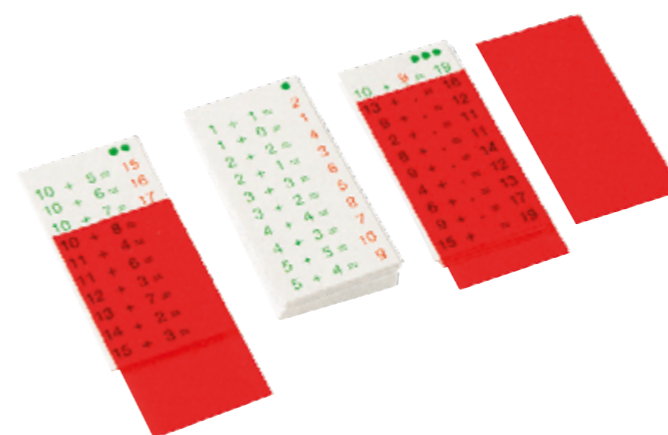

1552000

Digital/Silkscreen .printing

All products can be printed on our digital or silkscreen printer. Together, we can discuss the possibilities of both options, which depends on the number of colours, quantity, price and other product specifications. It is a fact that both techniques lead to a beautiful end result, that will offer the highest educational value.

ALL PRODUCTS CAN BE
PRINTED ON OUR DIGITAL
OR SILKSCREEN PRINTER

ADDITION BUDDY

Self-checking material to learn the additions up to 20. One side of the card features anchor sums, whereas the other side contains mixed sums. The sums have been printed in green and the answers in red.

OUR WATER-BASED
LACQUER GIVES THE
PRODUCT A NATURAL
FINISH AND ENSURES THAT
THE PRODUCT WILL LAST FOR
A LONG TIME

Spray.lacquering

Wood is a natural material with an open structure. If you do not treat this raw material with a proper finishing it is subject to humidity and dirt.

Our water-based lacquer gives the product a natural finish and ensures that the product will last for a long time. Water-based lacquer is environmentally friendly and will not cause any health problems for our workers and the children.

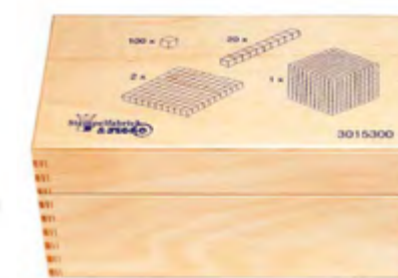

ABACUS 5 X 10 TEACHER

Teach place value, addition and subtraction.

NUMBER CLIPS UP TO 20

Explore the number structure 0-20 with these stand up plastic number clips.

BASE 10 SET

Wooden box for base 10 set.

Educational stamps

For over 65 years we have been producing educational stamps. The size of the handles is specifically designed for the hands of young children. All stamps are made of natural rubber and can be customized. You can either opt for a traditional wooden handle or a transparent plastic handle.

THE WOODEN HANDLE
GIVES THE STAMP
A VERY SOLID LOOK AND FEEL.
THE TRANSPARENT STAMP OFFERS
THE OPTION TO VISUALISE
THE IMAGE FROM ABOVE
