Our mission is to help our customers build a simple, affordable, home automation system, where every piece of technology works together intelligently, to protect families, increase efficiency, and simplify lives.

"Nearly two-thirds of all break-ins occur with no sign of forced entry..."

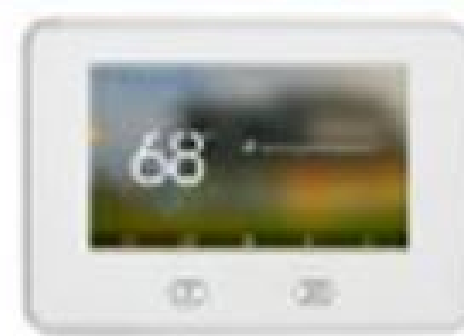

- 2 million burglaries a year
- 47% of the time, people are home
- 1 burglary every 14.2 seconds
- 87% are considered preventable if people had proper security

products.

- Designs and builds it's own products.
- Does not use third parties like Honeywell to build a panel for them.
- All parts are engineered to work together.
- New products work seamlessly with older generation Vivint products because software is backwards compatible.
- Vivint manages their own cloud, where videos from hardware are stored.

SkyControl Panel

- New, more powerful architecture for computation, display, storage & communications
- 7" capacitive touchscreen with gesture control
- Internal WiFi Access Point & Firewall for security and ease of installation

Doorbell Camera

- Get notified when someone come to the door
- Live streaming audio/video
- Unlock/lock doors with door lock unit
- Arm/disarm remotely with proper equipment
- View, save and share clips directly from phone

compensation.

All commissions are paid weekly. All bonus payments are paid monthly.

Activation Commissions

Package Type	Commission
Smart Protect	\$450.00 per activation
Smart Home	\$550.00 per activation

Hardware Commissions

Hardware commission is based on the invoice amount of equipment a consumer purchases. As the total of consumer's ticket price increases, the amount of additional commission increases. Below is a schedule of ticket prices and the amount of additional commission earned with each tier.

Ticket Total	Commission	Ticket Total	Commission
\$550.00	\$0.00	\$2,000.00	\$240.00
\$1,200.00	\$40.00	\$2,250.00	\$290.00
\$1,400.00	\$80.00	\$2,500.00	\$375.00
\$1,600.00	\$140.00	\$2,600.00	\$390.00
\$1,800.00	\$180.00		

Starting at \$2,600.00 ticket price: Add \$15.00 per \$100.00 increase in ticket price. \$2,600.00 level reflects the addition of \$15.00 to \$2,500.00 bonus level of \$375.00.
\$375.00 + \$15.00 = \$390.00

Commission levels are calculated after taxes and discounts have been removed. A dealership will have the ability to discount the total ticket amount by up to \$300.00. As stated above, any discount applied will reduce the total ticketed amount for the purposes of commission. A dealership will also receive a reduction in commission according to the table below for any discounts applied.

Discount Applied	Reduction In Commission
\$0.00 - \$100.00	\$0.00
\$101.00 - \$300.00	\$1.00 - \$200.00 dollar for dollar

Monthly Volume Bonus Levels

Monthly Installs	Bonus	Smart Protect	Smart Home
1 - 5	\$-	\$450.00	\$550.00
6 - 15	\$30.00	\$480.00	\$580.00
16+	\$70.00	\$520.00	\$620.00

Bonus levels are achieved by hitting activation benchmarks through any combination of packages. For example, if 5 Smart Protect packages and 1 Smart Home package are activated, 6 packages would be achieved, triggering a \$30.00 bonus payment to begin. \$30.00 bonus and \$70.00 bonus are separate amounts based on benchmarks achieved. They are not combined in any way.
