# PLAYFUL LEARNING FOR LIFE

Educo makes learning playful,  
explorative, and challenging.

## Help Children Make Sense of Their World Through Play

Playful learning is a child's natural way of learning  
about themselves, their friends, and their communities.

It enriches cognitive skill-building, and helps our youngest learners develop creativity,  
problem-solving, communication, and social skills that are the foundation for further  
learning in school and daily life.

## Where Play-based Learning Meets Play-based Teaching

The building blocks of a strong readiness program start with play.

Young children delight in exploring the world we live in. They learn the most when they  
are engaged in play. Key concepts are mastered through discovering, creating and  
doing.

Educo's classroom solutions include hundreds of educational games  
and activities that:

- Develop emerging math and literacy skills.
- Connect children to daily life experiences.
- Focus on content area and motor skills.
- Offer self-assessment.
- Provide additional practice of classroom teaching.

## Teaching Cards

Every Educo item includes a teaching card  
with a range of activities for students at all  
levels. Teachers can differentiate instruction  
for students that need on-level, below-  
level, or advanced enrichment. Each teaching  
card offers clear guidelines for play-based  
instruction and assessment to help teachers  
achieve student benchmarks.

# MATHEMATICAL PLAY

Encourage children to develop their mathematical skills. Play with math materials and become a true mathematician.
