BOARD AND SKI TECH

PRESS-PASS

Tweaks the 5-Stage Rockerline specifically for park riding with more exaggerated transitions beneath the binding and toward the tip and tail. This produces an explosive Ollie in addition to providing an increased surface area to land, balance, and press-rails, kickers, and features in the park.

CONTINUOUS ROCKER

With an even curve from tip to tail, this balanced rockerline is extremely consistent, easy to control, and rolls up the wake for a smooth pop.

PROGRESSIVE ROCKER

We took our Continuous Rockerline and slightly kicked the tip and tail upward. This keeps the board riding fast across the water as we're able to increase rocker height without increasing the belly of the board. The result is more vertical pop than a Continuous Rocker with more predictability than a 3-Stage.

5-STAGE ROCKER

Taking cues from its 3-Stage brethren, the 5 Stage Rocker line maintains a flatter profile between the bindings but features more blended transitions toward the tip and tail. These blended transitions allow the board to effortlessly glide across the water with predictable but amplified pop off the wake.

3-STAGE ROCKER

Our most explosive rocker line, the 3-Stage Rocker is generally flatter between the bindings then dramatically angles upward toward the tip and tail. The more abrupt this angle, the more aggressive and vertical the board pops off the wake.

DELTA BASE TECHNOLOGY

Defined by the "chevron" shaped channels molded into the tip and tail of the board, the Delta Base reduces board drag for faster edging into and a cleaner release off the wake. These channels have the same effect as a stepped hull on a race boat, they create slight turbulence and disrupt the flow of water from sticking to the bottom of your board, allowing you to effortlessly charge the wake with more speed and control.

FLEX TECHNOLOGY

A perfected recipe with options. Choose from a wood core, foam core, or a hybrid construction of both wood and foam and you've got a board that explodes off the water, softens landings, and provides the perfect amount of nose and tail flex for locking onto rails and pressing all season long.

IMPACT BASE

Skipping the scientific explanation, skinning our bases with fully sintered high-density polyethylene Impact Base material means you've got a board that will hold up to seasons of shredding on rails, kickers, ledges, and whatever else you muster up.

FUSION CORE

2 wood stringers are sandwiched next to lightweight foam, creating a core that's 5 times more durable with more snap and pop off the wake than boards with traditional foam cores.

FEATHER CORE

Maximum float and minimum weight. Our new Feather Core is developed to reduce weight for more control in the air and to maintain its profile up the transition of the wake for maximum boost. Built for pure boat performance.

WOOD CORE

Designed for minimum weight, maximum durability, and an organic feel, our cores crafted from 100% Paulownia wood ensures your board will last for seasons of shredding at your local park or winch spot.

BIOLITE

New BioLite technology unleashes the power of a lighter weight fabric that is an eco-friendly alternative to Neoprene!

CONCAVE TUNNEL

Narrow tunnel with predictable tracking.

CARBON FIBER LAYUP

PVC core and aerospace grade carbon fiber layup.

6mm INSERTS

All O'Brien wakeboards are equipped with industry standard 6 millimeter inserts so if TSA loses your hardware or it falls off the dock... Borrow some from your buddy and keep shredding.

DURARAIL SIDEWALLS

An impact resistant urethane rail that surrounds the boards perimeter frames in and protects your core from jibs, jabs, rails, rocks, docks, or anything else you throw it's way.

MOLDED IN FINS

Quad molded in fins.

SURF STYLE

Hand-shaped epoxy surfboard construction, light weight / high buoyancy make these boards super responsive behind the boat. FCS compatible inserts allows any fcs style surf fin to fit the board.

SKIM STYLE

Compression molded, thinner profiles are less buoyant and sit lower in the water for more control

INFLATABLE SUP

Dual action pump included.

PARK BOARDS

BOARD TECH

WOOD CORE CONSTRUCTION

- ▶ Printed Topsheet
- ▶ Our lightest, strongest fiberglass top layer
- ▶  DuraRail board edges & fin insert reinforcements
- ▶  100% Hardwood Core
- ▶ Our lightest, strongest fiberglass bottom wrap
- ▶ Super durable sintered PTEX base

FUSION CORE CONSTRUCTION

- ▶ Printed Topsheet
- ▶ Our lightest, strongest fiberglass top layer
- ▶ DuraRail board edges & fin insert reinforcements 
- ▶ Fusion Core - PU core with hardwood stringers 
- ▶ Our lightest, strongest fiberglass bottom wrap
- ▶ Super durable sintered PTEX base

FEATHER CORE CONSTRUCTION

- ▶ Printed Topsheet
- ▶ Superlight fiberglass top layer
- ▶  Feather Core - poured PU core
- ▶ Superlight fiberglass bottom wrap
- ▶ Durable PBT bottom sheet

PARK

More flexible park boards are easier to press

FLEXIBLE 1 <---> 10 STIFF

Stiffer park boards provide a more solid platform on rails & more spring back off kickers

BOAT

More flexible boat boards tend to land softer and have a slightly slower release off the wake

FLEXIBLE 1 <---> 10 STIFF

Stiffer boat boards tend to snap off the wake with no energy loss as well as release more quickly.

FADE

PARK SERIES

PART NO. 2170136 / 2170138 / 2170140

SUGGESTED BINDINGS

GTX

PLAN B

► If you want a board that will make you a better park rider, the Fade is for you. Our exclusive Press Pass rocker line features flat spots both underfoot and at the tips of the board, providing extended pressing zones that help you lock into and press with authority. The flats at the tips, combined with subtle center channels boost explosive ollie power from the 100% hardwood core. 4 removable fins let you tune the ride and versatility – take it for a set behind the boat, the Fade will not disappoint!

S.O.B

PARK SERIES

PART NO. 2170072 / 2170074 / 2170076 / 2170078 / 2170080

Sean O'Brien

SEAN O'BRIEN
PRO MODEL

SUGGESTED BINDINGS

GTX

PLAN B

► The S.O.B is a pure park performer which features a soft, refined flex pattern. The versatility is a key feature, taken out of it's park element and faced with a boat wake, the soft flex pattern stores energy, explodes off the wake while it's flex dissipates energy upon landing, allowing less abuse on your body resulting in longer sets. This will enable a beginner to turn laps on the board but the S.O.B. was designed for maximum performance under advanced and pro riders. The subtle contouring along the rails helps hold an edge upon approach, and the tip and tail channels help the rider effortlessly lock into nose and tail presses.

FLEXIBLE 1 • 2 • 3 • 4 • 5 • 6 • 7 • 8 • 9 • 10 STIFF

INDIE

PARK SERIES

PART NO. 2170024 / 2170026 / 2170028

SUGGESTED BINDINGS

GTX

PLAN B

► Featuring a park-specific design built around a 100% hardwood core, the Indie delivers the optimum park riding experience. Aggressive center channeling allows the board to self-center and lock on rails with ease making the board both track well and slide with very little friction. Like any good park board, the Indie was designed to be ridden finless with a series of channels around the perimeter of the base, giving just the right amount of traction while on the water without sacrificing performance on obstacles. Finished off with our ultra durable Impact base and TPU Dura-Rail edges, the Indie is sure to make your next trip to the park your best one.

WAKE BINDINGS

PRO RIDER: CORY TEUNISSEN

BINDING TECH

POWER ARCH

- Provides more arch support during normal riding conditions
- Minimizes the amount your foot rolls inward on hard landings, reducing stress on your knees.

LASTED CONSTRUCTION

Shaped to the contours of a foot to make a left and right specific binding.

OFF AXIS ROTATION SYSTEM

Equal heel & toe leverage while achieving perfect alignment.

LUX CHASSIS

Our lightest and most ridged classic ever. Maximum comfort, response and no heel/toe lift.

CANTED 2.5°

INDUSTRY FIRST CANTED CHASSIS

The chassis is canted 2.5 degrees inward generating a more natural alignment and leg position when riding.

- More support to the outside of the foot provides improved control.
- Reduces stress and fatigue on the knees and ankles for a more comfortable, longer ride.

BINDING SIZING

USA	4-6	6-8	8-10	9-11	11-13	12-14
UK	3.5-5.5	5.5-7.5	7.5-9.5	8.5-10.5	10.5-12.5	11.5-13.5

Mercer	8'	N/A	100	150	200

SKILL FACTOR:
 Beginners = 2
 Intermediate = 1.7
 Advanced = 1.3

CALCULATING BOARD VOLUME:
 (Your Weight in lbs. X .45) x Skill Factor = Target Volume

Example: You are a beginner and you weigh 195 lbs.
 (195 lbs. X .45) x 2 (Skill Factor) = 175.5
 Your board should have a minimum volume of 175.5 liters.

- The appropriate board size depends on weight, skill level, and volume of the board. The more you weigh, and the lower your skill level, the bigger the board you'll need.
- One liter of volume floats one kg weight.
- In order to factor in your skill level, multiply your Skill Lever Factor x Your Weight in kilograms to get your recommended volume in liters.
- 1 Lb. is approximately equal to .45 kg.
- When in doubt, lean to the next board size up.

PASSAGE

EXPEDITION SERIES

PART NO. 2171286

LACUNA

CRUISE SERIES

PART NO. 2171270 / 2171272 / 2171274

BEGINNER 1 • 2 • 3 • 4 • 5 • 6 • 7 • 8 • 9 • 10 EXPERIENCED

► Built for performance and stability in rough water, the Passage features a hybrid displacement hull that planes easily on flat water, while the front keel displaces waves, chop and rollers. High volume D-shaped rails and a single-to-double concave hull help the board track straight and clean. At 12' in length and 32" wide, this is a big board that maneuvers and glides with the efficiency of a much smaller board.

PASSAGE 12'

LENGTH	365.76cm / 144"
WIDTH	81.28cm / 32"
VOLUME	235 Liters

- FRONT BUNGEE SYSTEM
- TEXTURED BVA FOAM DECK PAD
- RECESSED CARRY HANDLE
- REAR LEASH PLUG

BREAKER 9.0

BEGINNER 1 • 2 • 3 • 4 • 5 • 6 • 7 • 8 • 9 • 10 EXPERIENCED

► The Lacuna features a balanced profile with full rails, a slight double concave hull and crisp bottom edge for efficient planing and performance. The 2 larger sizes provide more buoyancy and stability for the less experienced or heavier rider.

LACUNA 10'6"

LACUNA 11'

TOKIO

EXPEDITION SERIES

PART NO. 2171298

BEGINNER 1 • 2 • 3 • 4 • 5 • 6 • 7 • 8 • 9 • 10 EXPERIENCED

Shorter and wider than a typical SUP, the Tokio high-volume double concave hull brings a ton of stability and speed in a shorter package. At only 10' long, the Tokio is lighter, easier to maneuver and takes up a lot less room in the garage. The 32" width and 200 Liter volume makes it a stable platform for anything you want to do on the water.

TOKIO 10'

LENGTH	304.8cm / 120"
WIDTH	81.28cm / 32"

VAPOR

INFLATABLE SERIES

PART NO. 2171218 / 2171214

ZEPHYR

INFLATABLE SERIES

PART NO. 2171216

The Vapor features a time-tested forward profile, capped off with a squared off tail and removable fin—giving added stability and glide no matter what the conditions. The board rolls up easily and stores in our awesome ISUP Roller Case!

	VAPOR 10'6"	VAPOR 11'6"
LENGTH	320.04cm / 126"	365.76cm / 144"

O'Brien's ISUP fin system is strong, durable and reliable. The precision fin placement is critical for a stable, smooth ride while the tough PVC fin will hold up whether you stand on the board while on land, to running over rocks in shallow water.

Touring the back country has never been easier! Whether you are short on storage space, are packing deep into the woods, or just want the added durability of an inflatable, the Zephyr is for you. Featuring an aggressive profile and wide tail, the Zephyr cuts through the water with ease. Comes with the same fin configuration as the Vapor for no worries performance!

	ZEPHYR 10'6"
LENGTH	320.04cm / 126"

*VAPOR and ZEPHYR include Roller Case, and our Dual-Action Pump!

SUP CASE

Protect your SUP in this heavy duty case. Available in two sizes. 11' and 12'

ISUP ROLLER CASE

Transport your ISUP protected in this heavy duty Roller bag. Full length zipper makes for easy entry and inside straps hold that ISUP and paddle right where you want it. Large pocket to hold your pump.

10' SUP LEASH

- 10' Ankle Leash
- 8mm PU cord
- Double Swivel
- Neoprene strap
- Quick Release

BEGINNER 1 • 2 • 3 • 4 • 5 • 6 • 7 • 8 • 9 • 10 EXPERIENCED

▶ The G5 offers competition skiers the perfect speed for the absolute top performance. Seamless transitions lead to smooth, flowing arcs, creating effortless angle and more course space than has ever been achieved in a tournament level slalom. An innovative new sidecut and perfectly matched rocker combine to form a huge and extremely forgiving "sweet spot". The G5's unique bottom design blends an aggressive concave for grip with subtle forebody rails, providing committed initiation while maintaining predictability. The design is so incredibly well-balanced that there is less critical impact on binding placement and fin adjustment.

BEGINNER 1 • 2 • 3 • 4 • 5 • 6 • 7 • 8 • 9 • 10 EXPERIENCED

▶ The Conquer has a unique fore-body design with greater width for an aggressive but controlled, no-compromise finish to the turn. The Conquer features a flex pattern for skiers who place a premium on stability and cross-course angle. Our liveliest Conquer yet, the balanced, nimble feel engages the skier, delivering extreme cross-course angle and helping to set up for a controlled and outward cast in the pre-turn. Balanced, aggressive turns provide the skier with the opportunity for a secure and locked-in cut.

► The Synchro's wide body is designed to let you ski the course or take on open waters in equal style. If you want to slow down and work on technique this is the tool to use. The Synchro is designed to ski 30 to 34 MPH. Easier to get up on, turns on a dime, and maybe you can back off the speed a couple of MPH.

► Mirroring the same shape as the legendary Sixam 2.0, the Siege is incredibly responsive! With a tunnel concave, edge changes are effortless and the ski turns on a dime. A softer flex and increased rocker make this ski feel stable right out of the box.

► This wide-bodied ski makes light work of deep water starts. With a transitional tunnel-to-full concave bottom design, it is stable yet exceptionally responsive to quick turns and strong pulls. The Sequence is a ski that anyone can get up on that also makes short work of the slalom course!

► Give in to your Impulse on a ski that can keep up. The Impulse features a stable shape with a softer flex for the ladies! This ski turns on a dime and is extremely forgiving.

► The number one selling ski in the world and still one of the best skis ever for the skier that just wants to have fun. A wide fore-body and deep tunnel make the World Team a great ski to learn and progress.

▶ The Pro Tour is designed to be super stable and easy to get out of the water. With unmatched ease and control, the Pro Tour should be every skier's first slalom ski.

▶ The Pro Tour 64 is just the right size so that the whole family can feel comfortable learning to slalom. A flatter, faster rocker line reduces drag, allowing for hours of skiing with less fatigue.

▶ The Jr. Pro Tour is easy to ski and all around fun to ride. The Jr. Pro Tour is perfect for the smaller skier under 110 pounds.

BINDING TECH

LASTED CONSTRUCTION
Shaped to the contours of a foot to make a left and right specific binding.

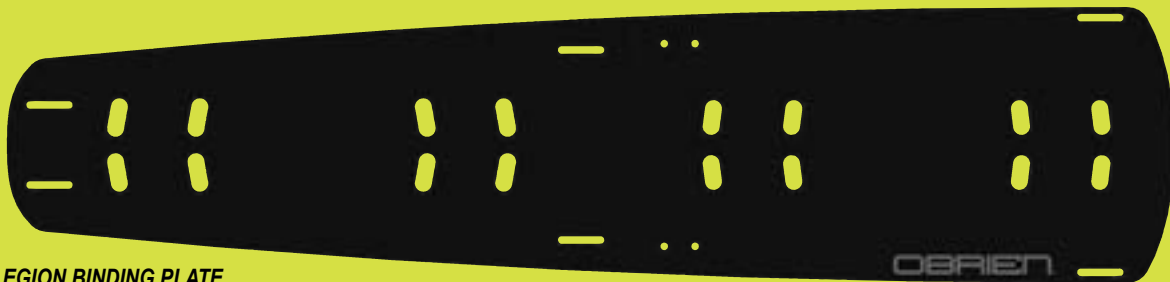

DUAL STRETCH ZONE
2 release zones allow the heel of the skier to lift past the ankle "pressure" zone, yet still providing extreme comfort, support and performance.

14 DEGREES OF ROTATION
Allows for small or large adjustment of the boot canting position. This allows the user to dial in the ski's characteristics with a whole new level of precision!

LOW PRO CHASSIS
In any type of dynamic motion, a low center of gravity is always the most important factor. A low CG means control in the turn, leverage in the pull, a faster reaction time, and highly sensitive feedback.

LEGION BINDING PLATE
Constructed of the highest quality G10 composite, the Legion plate provides excellent torsional rigidity while allowing the front and rear boots to flex more naturally with the ski.

BINDING SIZING

USA	4-6	6-8	8-10	9-11	11-13	12-14
UK	3.5-5.5	5.5-7.5	7.5-9.5	8.5-10.5	10.5-12.5	11.5-13.5
EUR	36-38	38-41	41-44	43-44.5	44.5-47	46-48
CM	10-15.4	15.4-20.3	20.3-25.4	22.9-27.9	27.9-33.1	30.5-34.9

LEGION

SIZES: 5-6 / 7-8 / 9-10 / 11-12 / 13-14

▶ The Legion is O'Brien's top-of-the-line high-performance slalom binding built for maximum comfort without sacrificing any performance. An advanced construction method eliminates pressure points along the side of the foot. This construction method also allows the upper to totally wrap the foot for the best possible fit. The Legion is a directional design, meaning there is a left and right specific boot. The plate is made of new G-10 material that flexes with the ski and is very low profile. The Legion mounting system allows the boot to be adjusted on the plate without removing it from the ski. The removable liner is heat moldable for a custom fit.

LEGION RTP

SIZES: 5-7 / 7-10 / 10-12 / 12-14

▶ Adding versatility to the Legion binding line, the Legion RTP offers classic toe loop performance with all the comforts of today. The soft lycra liner is extremely comfortable and fits like a glove. The semi-rigid side panels provide lateral support while the Velcro closures customize the fit to perfection.

**Must be used with the Legion RTP plate.*

HAIL

SIZES: 5-7 / 7-10 / 10-12 / 12-14

▶ The Hail is geared for the Advanced Recreational to Tournament Level slalom skier. The Hail is non-directional (unlike the Legion), so left and right foot forward skiers can share the same ski. It is built on the renowned Sector chassis, with an aluminum plate. The low-profile design gets your center gravity as close as possible to the water for faster turns.

SECTOR

SIZES: 5-7 / 7-10 / 10-12 / 12-14

▶ If you prefer the feel of open toe bindings, you can't do better than the Sector. Built on an aluminum plate, the Sector features a front lace system for ease of entry and exit. The low-profile design gets your center gravity as close as possible to the water for maximum performance. Built-in lateral stiffeners and the last-style footwear construction make this one of the best fitting boots on the market. Dual stretch zones make it extremely comfortable while providing for easy release. The open toe design makes it a more forgiving shoe size, so it's easier to share between similar-sized friends and family. 14° of rotation lets you tweak the binding settings to your heart's content.

SECTOR RTP

SIZES: 5-7 / 7-10 / 10-12 / 12-14

▶ The Sector RTP offers built-in lateral stiffeners and lasted-style footwear construction.

FORCE

SIZES: XS-SM 4-7 / MD-LG 8-12 / XL-XXL 10-14

▶ Using the same chassis as the Sector Binding, the Force comes in a wide range of specific sizes at a lower price point. The Plastic (Nylon 6) plate is both lightweight and durable, and the integrated liner/heel makes it a snap to get on and off.

X-9

SIZES: Junior, XS/S, STD, XXL

The O'Brien X-9 Adjustable is the binding for "the rest of us". If you need a binding that your whole family can share, but you still want stellar performance, look no further. The X9 features a lightweight chassis/plate combination to get your foot as close to the ski as possible. The lower cut to the binding makes for an easier release and gives great flexibility. The front lace system makes this very easy to get into, and a cinch to snug up. An EVA footbed makes it comfy and secure. And a wide range of size adjustment makes this the perfect binding for family use. The X9 binding, while adjustable, is available in three sizes. XS (up to size 7), Standard (men's sizes 7-11), and XXL (men's sizes 12+). Best of all, this binding is value priced so you can experience awesome performance without breaking the bank.

FORCE/X9 RTP

SIZES: XS 4-7 / STD 7-11
Junior Size: 2-7 (Jr. Ski hole pattern only)

SIMPLE TRAINER

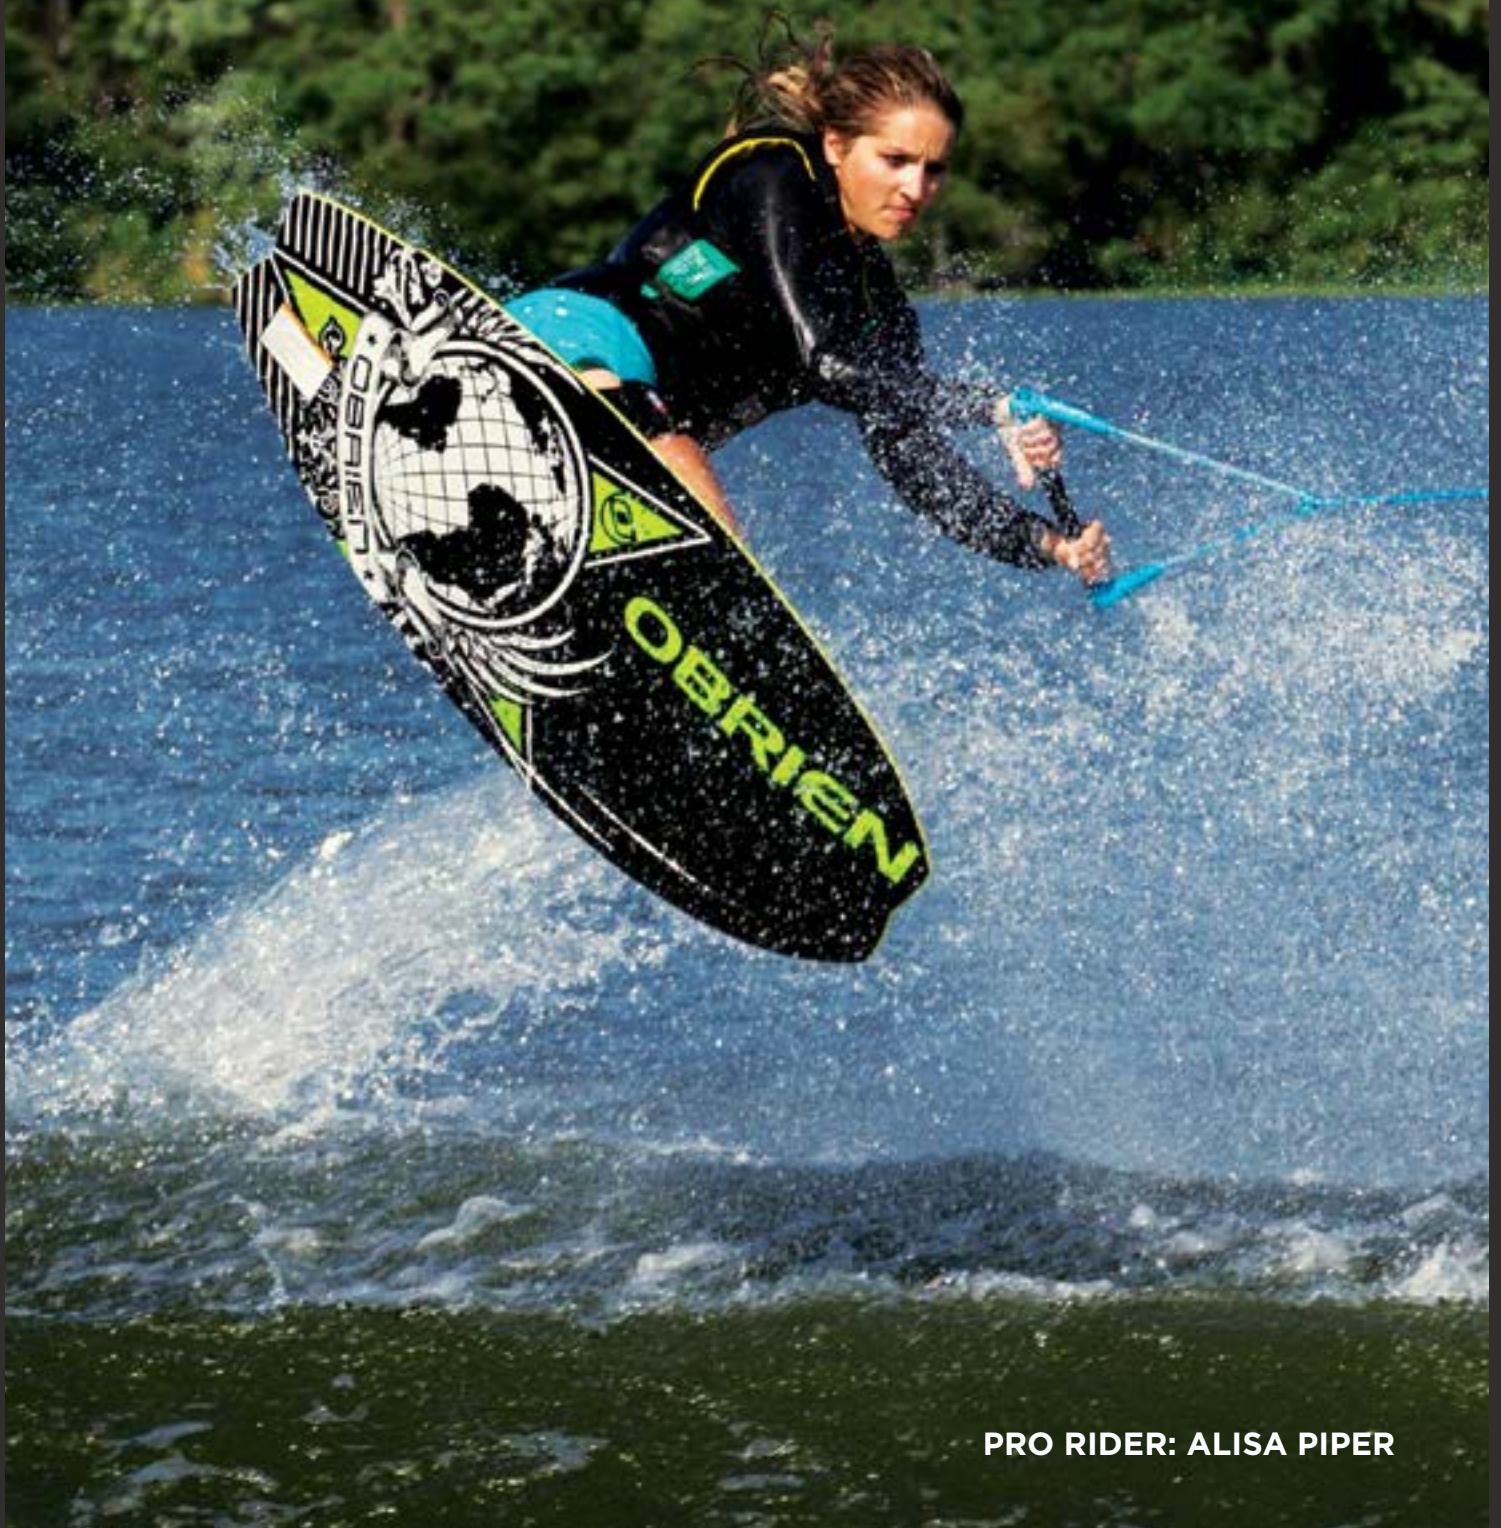

TRAINER SERIES

PART NO 2161146

- INFLATABLE COMBO TRAINER
- TRAINER ROPE W/ HANDLE
- WEIGHT RANGE UP TO 85 lbs.

Make skiing a family affair! The Simple Trainer will get your child involved in the sport you already love. It's soft and cushy and just plain friendly-looking. Additionally, the inflated seat on the back gives your child a great perch when the trainers aren't moving. The comfortable stirrups are on an inflated floor that absorbs the bumps. It comes complete with two ropes, one for the child and a tow rope for an adult to hold from the boat. This trainer will plane off with almost any movement at all (even running speeds on the beach) and the max speed is a very rider-friendly 8 mph. Best of all, when you're done using it, just let the air out and put it away. The Simple Trainer offers almost guaranteed success.

SOZO

PRO SERIES

PART NO. 2161228

Ted Bevelacqua

TED BEVELACQUA
PRO MODEL

ION

FLEX SERIES

PART NO. 2161226

► The O'Brien Sozo is ridden by nearly ALL the top kneeboarders in the world! It is truly in a class of its' own. The Sozo is explosive, lightweight and unbelievably maneuverable. The clean, fast template comfortably initiates turns, edges up the wake with ease and is extremely forgiving. It features O'Brien's Fusion Core (wood stringers within a foam core), which is CNC machined to exact specifications, giving the board a liveliness and lightness like no other. Its' unique Sandwich Construction insures the optimum flex pattern, storing energy and releasing it perfectly when you punch off the wake. The Sozo pad is state-of-the-art as well. This extraordinary pad softens landings like no pad ever ridden. It is extremely soft, supportive and can be adjusted perfectly on the board to the riders preferred position. All the pros agree, the Sozo kneeboard is the best board on the market, hands down. The Sozo Park Edition featuring an Impact Base bottom is now available.

LENGTH: 51.8"
WIDTH: 21.6"
STRAP: 3" Cinch
TIP ROCKER: 3.4"
TAIL ROCKER: 1.8"
BELLY: 0.5"

AVAILABLE

► Inspired by the industry-leading technology of the Sozo, the Ion is constructed using the same "sandwich" technology for a super light weight deck. An aggressive softer flex pattern helps increase control for lighter & younger riders. The Ion was specifically designed to work equally as well behind the boat, as on cable. With more flex and a continuous rocker, the Ion absorbs the landings very well, makes turning nearly automatic and gives more control on obstacles, sliders and kickers. The Ion is exceptionally fast, highly maneuverable and very forgiving. The Ion kneeboard is unquestionably a top performer.

LENGTH: 51.4"
WIDTH: 21.9"
STRAP: 3" Padded
TIP ROCKER: 3.4"
TAIL ROCKER: 1.8"
BELLY: 0.54"

RUSH 5150

FEATHERCORE SERIES

PART NO. 2171224

RICOCHET

FEATHERCORE SERIES

PART NO. 2171204

▶ The O'Brien Rush 5150 has simply been the most dominant kneeboard ever designed. The Rush 5150 is an outstanding choice for larger riders due to its' larger template outline (increased surface area) and its' stiffer flex profile. The 5150's wet surface is very fast, efficient and produces a HUGE amount of lift. Known for its' incredibly forgiving characteristics, the aggressive rocker line and variable bevels provide smooth predictable edge-to-edge transitions. The 5150's pad has ultra deep kneewells and dual density EVA construction for exceptional comfort and control. Equally at ease riding forwards or backwards, the versatile 5150 will take your riding to new levels.

- ▶ 2:1 ratio fully padded Cinch Strap for ultimate hold.
- ▶ Aggressive Rocker line.
- ▶ Hand turned bevels.
- ▶ Deep shock absorbing knee wells.

▶ The Ricochet is the perfect transition for anyone stepping up from a traditional plastic beginner kneeboard to a higher performance fiberglass board. Compression molded construction coupled with a molded-in hook makes learning and progressing a breeze. Built with the same quality materials as our flagship fiberglass kneeboards, the Ricochet brings high performance at a value price. With a larger template shape, variable beveled edges, twin tip and a pronounced V-Hull, this remarkable board design makes it very maneuverable, very forgiving and easy to ride. The Ricochet comes with a molded flex pad and a 3" padded strap making your ride comfortable and secure. The Ricochet is the perfect step into high-performance kneeboarding.

- ▶ Integrated hook
- ▶ Padded Adjustable Strap

BLACK MAGIC

ROTO SERIES

PART NO. 2171212

Aquatic Hook

Retractable Fins

VOODOO

ROTO SERIES

PART NO. 2151208

Aquatic Hook

Aquatic Hook

▶ The famous cable-actuated retractable fin system and the aquatic hook make the Black Magic the perfect board for successfully teaching kids and newbie riders the finer points of deep-water starts. The size of the Black Magic means adults and kids can ride it with ease. The smooth bottom contour makes it super stable and extremely comfortable. The 3-inch padded strap makes for a secure fit. Probably the best "family" kneeboard on the market, the Black Magic does it all.

- ▶ Retractable fins.
- ▶ Aquatic hook.
- ▶ Padded, adjustable strap.
- ▶ Durable plastic base.

▶ Quad molded fins at each corner provide extra tracking, and the curved underside makes edge transitions smooth and quick. The 3/4" thick pad provides plush comfort for your knees and ankles, while the 3-inch padded strap secures you for maximum control. The VooDoo combines hard-charging runs at the wake with a forgiving ride.

- ▶ Padded adjustable strap.
- ▶ Integrated hook.
- ▶ 3/4" EVA pad.
- ▶ Variable beveled edge.
- ▶ Quad molded fins.

▶ Wakeboard-styled quad, cupped molded fins make edging and carving a breeze, while allowing release for spin-type tricks. The water-ski influenced edge bevel helps the board sit low in the water for stability and allows quick edge to edge transitions .

- ▶ Padded adjustable strap.
- ▶ Integrated hook.
- ▶ 3/4" EVA pad.
- ▶ Variable beveled edge.
- ▶ Quad molded fins.

ROPES & HANDLES

PRO RIDER: SEAN O'BRIEN

PRO WAKE W/ FLIGHT LINE

▶ Features a rigid injection molded frame. Supremely comfortable 15-inch plush fabric grip. 5.5-inch anti-roll control arms. 80' zero-stretch flat profile Silicone coated Flight Line with (3) 5' sections for 65', 70', 75' & 80' line-lengths.

TEAM T-BAR W/ ARMOR LINE

▶ Features a rigid injection molded frame. Comfortable 15-inch micro-fiber suede grip. T-Bar for ultimate wrap tricks. 5.5-inch anti-roll control arms. 80' zero-stretch Silicone coated Armor Line with 3 5' sections for 65', 70', 75' & 80' line-lengths.

TEAM HANDLE W/ ARMOR LINE

▶ Same features as the Team T-Bar Handle, but without the T-Bar, and in red rather than blue.

TEAM HANDLE W/ REACTOR LINE

▶ Features a rigid injection molded frame. Comfortable 15-inch micro-fiber suede grip.. 70' Reactor mainline with Multi-filament polypropylene cover. 70' total line length with 3 5' sections for 55', 60', 65' & 70' lengths.

PROP HANDLE W/ REACTOR LINE

▶ 15-inch machined EVA floating handle with exclusive “prop” design. 70’ Reactor mainline with Multi-filament polypropylene cover. 70’ total line length with 3 5’ sections for 55’, 60’, 65’ & 70’ lengths.

PROP HANDLE W/ FLAT SPECTRA LINE

▶ 15-inch machined EVA floating handle with exclusive “prop” design. 70’ Flat Spectra line. 70’ total line length with 3 5’ sections for 55’, 60’, 65’ & 70’ lengths.

PROP HANDLE W/ THIN LINE

▶ 15-inch machined EVA floating handle with exclusive “prop” design. Thin 70’ Spectra line. 70’ total line length with 3 5’ sections for 55’, 60’, 65’ & 70’ lengths.

4-SECTION POLY-E WAKE COMBO

▶ The ultimate first wake rope, great for wakeboarding and kneeboarding. Comfortable 15-inch EVA prop grip 55’ low-stretch poly-e mainline with 3 5’ sections for 55’, 60’, 65’ & 70’ line-lengths. Available in Green, Blue or Red

PRO SURF ROPE

▶ 9" wide handle with exclusive "prop" design. 25' total line-length, with 3 5' sections for 10', 15', 20' and 25' wakesurf lengths.

RELAX SURF ROPE

▶ 9" wide handle, 25' total line-length, with 3 5' sections for 10', 15', 20' and 25' lengths

OBRIEN PRO HANDLE

▶ 13" wide x 1.08" diameter Pro Waterski handle with 4-rope construction for an extremely durable braid. USA Waterski approved 1/4" Polypro bridle section.

OBRIEN 10-SECTION MAINLINE

▶ 10 section 75' Pro Waterski mainline with 4-rope construction for an extremely durable braid. Made of USA Waterski approved 1/4" Polypro rope. 10 sections allow for USA Waterski sanctioned line 75' to 45 off .

OBRIEN PRO HANDLE W/ 10-SECTION MAINLINE

▶ 13" wide handle with 4-rope construction mainline for an extremely durable braid. USA Waterski approved 1/4" Polypro rope. 10 sections allow for USA Waterski sanctioned line 75' to 45 off .

8-SECTION SKI COMBO

▶ Our value-priced, hard-core ski rope. With 8 sections, this rope can be shortened to nearly any “real-world” line-length you’ll need. Begins at a total rope length of 75’, but with 8 sections for skiing at 15’, 22’, 28’, 32’, 35’, 38’, and 40’ off (or line lengths of 75’, 60’, 53’, 47’, 43’, 40’, 37’ and 35’). A 12” wide aluminum-core EVA handle on a 5’ detachable bridle section. The rope is made of top-quality 16-strand, 40 filament polypropylene rope. If slalom is your thing, this is your rope.

5-SECTION COMBO

▶ Take your skiing pretty seriously? Then you’ll want to check out this rope. Begins at a total rope length of 75’, but with 5 sections for skiing at 15’, 22’, 28’, or 32’ off (or line lengths of 75’, 60’, 53’, 47’, or 43’). A 12” wide aluminum-core EVA handle on a 5’ detachable bridle section. The rope is made of top-quality 16-strand, 40 filament polypropylene rope. One of the most versatile ropes in our line.

2-SECTION COMBO

▶ This is our least expensive “all-purpose” rope. A 12” wide aluminum-core Sure-Grip handle on a 5’ detachable bridle section is combined with a 70’ mainline (for 75’ total rope length) with a takeoff loop at 28’ off (for a 47’ length). 75’ is the standard length for skiing, while 47’ is a good length for wakeboarding or kneeboarding, making this a do-it-all rope. The rope is made of top-quality 16-strand, 40 filament polypropylene rope.

1-SECTION COMBO

▶ Just need a good quality ski rope? This is our simplest answer, but still made with the quality for which O’Brien is famous. A 12” wide aluminum-core Sure-Grip handle on a 5’ detachable bridle section. The 70’ mainline rope (for a total rope length of 75’) is made of top-quality 16-strand, 40 filament polypropylene rope.

Available in: Orange/Blue, Silver/Blue

1-SECTION DEEP-V COMBO

▶ A fantastic rope for teaching or assisting anyone struggling to do a deep-water slalom start. The bridle section is vinyl coated to protect the rope from ski abrasion. Just rest your ski inside the DEEP-V, and let the “V” hold the ski straight. Makes deep water starts vastly easier. Once you’re up, the rope simply pulls out from underneath the ski and performs just like a regular ski rope. Crossbar in bridle section keeps ski tip in perfect starting position and protects against crunched knuckles. A 70 foot mainline with a 5 foot detachable DEEP-V bridle section and a 12-inch wide aluminum-core handle. 16 strand, 40 filament polypropylene rope construction.

2-PERSON TUBE ROPE

▶ This is our “regular” tube rope, best for 1 and 2 person tubes, up to 340 pounds maximum total rider weight. 60’ length, with an average 2,375 lbs. break strength

- Available in Green, Red, or Purple.

4-PERSON TUBE ROPE

▶ This is our most popular tube rope, rated for up to 4 riders, 680 pounds maximum total rider weight. 60’ length, with an average break strength of 4,100 pounds.

- Available in Green, Red, or Purple.

6-PERSON TUBE ROPE

▶ This is the mack daddy of tube ropes! Like our other tube ropes, this one is 60’ in length. But this one is a monstrous 3/4” in diameter, rated for 1,020 pounds (6 riders) maximum total rider weight. 6,100 pounds average break strength.

- Available in Green, Red, or Purple.

PONTOON BRIDLE

▶ This high-impact plastic float / pulley system that allows for easy attachment of ski rope. Snap hooks attach quickly to existing boat hardware. 1800lbs max. pulling weight.

- Available in 16’ and 12’ size for Pontoon boats.

BOAT/DOCK BUNGEE

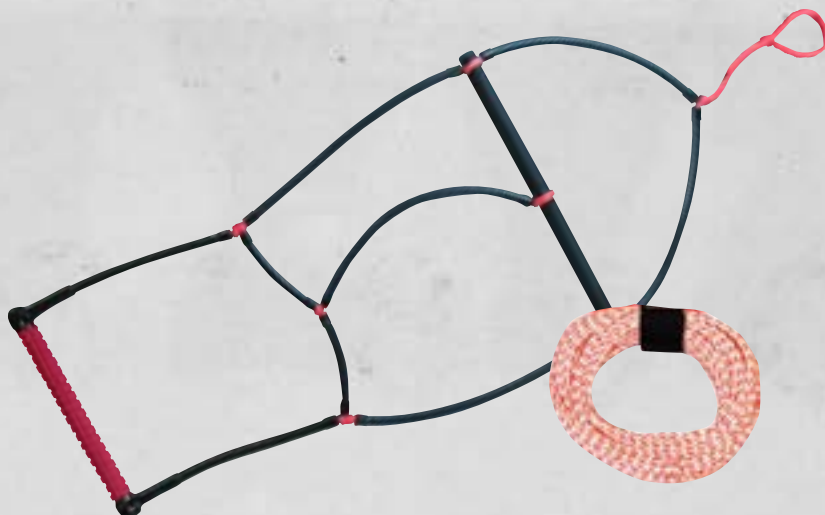

▶ The O’Brien Boat/Dock Bungee is perfect for most boats 4000lbs. and under. The heavy duty stretch line helps keep your boat safe while also absorbing the shock on your cleats. There are foam floats at each end and two loops for a quick connection.

- Available in 4’ or 6’.

8’ SKI TOW HARNESS

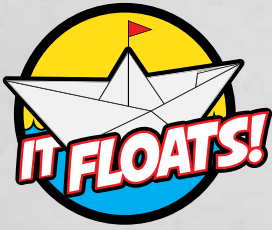

▶ If your boat does not have a center tow pylon or a center towing hook (most older I/O’s, outboards, and pontoon boats), then you probably need a ski tow harness to equalize the pull of a skier/tuber/wakeboarder, etc. This is our least expensive option, and does its job quite nicely. 8” width, with two high-strength coated steel snap-hooks. A vinyl float to keep the rope out of the propeller. 12 Strand x 84 Filament Polypro Rope,

COMBO TRAINER ROPE

▶ The O’Brien Combo Trainer Rope is perfect for teaching both adults and children the perfect form to get up on a pair of combo skis. This special handle is designed to keep both skis parallel while being pulled out of the water. The handle will slide off of the skis once the skier is out of the water and then the skier can ski away like a champion.

- 70’ mainline w/ 5’ combo trainer handle.
- 16 strand, 40 filament poly rope.
- Cross bar to keep your combos in perfect position.
- Detachable mainline.

FLOATING ROPES

Same features as the standard rope, but with the added benefit of rope with internal flotation! Rope features an internal layer of foam that keeps it on the surface for easier visibility.

8-SECTION FLOATING SKI COMBO

▶ With 8 sections, this floating rope can be shortened to nearly any line-length you'll need. Begins at a total rope length of 75', but with 8 sections for skiing at 15', 22', 28', 32', 35', 38', and 40' off (or line lengths of 75', 60', 53', 47', 43', 40', 37' and 35'). A 12" wide aluminum-core EVA handle on a 5' detachable bridle section. The rope is made of top-quality 16-strand, 40 filament polypropylene rope.

4-SECTION FLOATING POLY-E WAKE COMBO

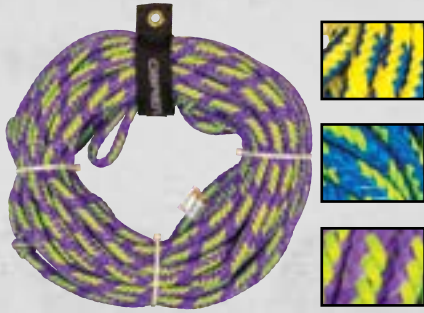

▶ The ultimate first wake rope, great for wakeboarding and kneeboarding. Comfortable 15-inch EVA prop grip 55' low-stretch poly-e mainline with 3 5' sections for 55', 60', 65' & 70' line-lengths. Available in Green, Blue or Red

5-SECTION FLOATING SKI COMBO

▶ This floating ski rope begins at a total rope length of 75', but with 5 sections for skiing at 15', 22', 28', or 32' off (or line lengths of 75', 60', 53', 47', or 43'). A 12" wide aluminum-core EVA handle on a 5' detachable bridle section. The rope is made of top-quality 16-strand, 40 filament polypropylene rope. One of the most versatile floating ropes in our line.

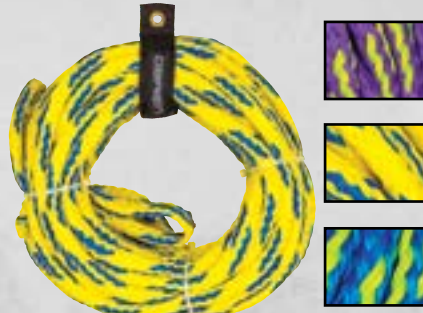

2-PERSON FLOATING TUBE ROPE

▶ This floating tube rope is best for 1 and 2 person tubes, up to 340 pounds maximum total rider weight. 60' length, with an average 2,375 lbs. break strength

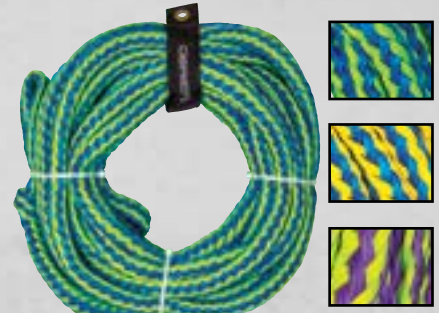

- Available in Yellow, Blue, or Purple.

4-PERSON FLOATING TUBE ROPE

▶ This is our most popular floating tube rope, rated for up to 4 riders, 680 pounds maximum total rider weight. 60' length, with an average break strength of 4,100 pounds.

- Available in Blue, Yellow, or Purple.

6-PERSON FLOATING TUBE ROPE

▶ This floating tube rope is 60' in length and 3/4" in diameter, rated for 1,020 pounds (6 riders) maximum total rider weight. 6,100 pounds average break strength.

- Available in Yellow, Blue, or Purple.

2-SECTION FLOATING COMBO

▶ This is our least expensive "all-purpose" rope. A 12" wide aluminum-core Sure-Grip handle on a 5' detachable bridge section is combined with a 70' mainline (for 75' total rope length) with a takeoff loop at 28' off (for a 47' length). 75' is the standard length for skiing, while 47' is a good length for wakeboarding or kneeboarding, making this a do-it-all rope. The rope is made of top-quality 16-strand, 40 filament polypropylene rope.

1-SECTION FLOATING DEEP-V COMBO

▶ A fantastic rope for teaching or assisting anyone struggling to do a deep-water slalom start. The bridge section is vinyl coated to protect the rope from ski abrasion. Just rest your ski inside the DEEP-V, and let the V hold the ski straight. Makes deep water starts vastly easier. Once you're up, the rope simply pulls out from underneath the ski and performs just like a regular ski rope. Crossbar in bridge section keeps ski tip in perfect starting position and protects against crunched knuckles. A 70 foot mainline with a 5 foot detachable DEEP-V bridge section and a 12-inch wide aluminum-core handle. 16 strand, 40 filament polypropylene rope construction.

8' FLOATING SKI TOW HARNESS

▶ If your boat does not have a center tow pylon or a center towing hook (most older I/O's, outboards, and pontoon boats), then you probably need a ski tow harness to equalize the pull of a skier/tuber/wakeboarder, etc. This is our least expensive option, and it does its job quite nicely. 8' width, with two high-strength coated steel snap-hooks. A vinyl float to keep the rope out of the propeller. 12 Strand x 84 Filament Polypro Rope,

GLOVES & CASES

MEN & LADIES' GLOVE SIZING

	Selecting the Correct Glove Size Place your hand on a flat surface and measure the widest part of the hand as shown in the illustration (not including the thumb). If your hand is between sizes, go up to the next full size.	
	2XS - 2 1/2"	XS - 2 3/4"
M - 3 1/2"	L - 3 3/4"	XL - 4 1/8"

*Note: Use the sizing chart below for Lady Finger gloves.

PRO SKIN 3/4

SIZES: XS / SM / MD / LG / XL / XXL

- ▶ 3/4 Finger cut
- ▶ Amara construction provides wear resistance
- ▶ Amara palm combines durability with excellent grip
- ▶ Pre-curved fingers for less fatigue
- ▶ Wide wrist strap for a secure fit
- ▶ Backhand tab assures a custom fit

COMPETITOR X GRIP

SIZES: XS / SM / MD / LG / XL / XXL

- ▶ Full-fingered design
- ▶ Sticky fingers palm for enhanced grip
- ▶ Amara panels for wear resistance
- ▶ Neoprene backhand with cinch for a comfortable fit
- ▶ Pre-curved fingers for less fatigue
- ▶ Wide wrist strap holds glove secure
- ▶ Backhand cinch adjusts for a custom fit

SKI SKIN 3/4

SIZES: XS / SM / MD / LG / XL / XXL

- ▶ 3/4 finger cut
- ▶ Amara panels for wear resistance
- ▶ Stretch mesh nylon backhand
- ▶ Sturdy wrist strap for a secure fit

PRO SKIN

SIZES: XS / SM / MD / LG / XL / XXL

- ▶ Full-fingered design
- ▶ Amara construction provides wear resistance
- ▶ Pre-curved fingers for less fatigue
- ▶ Wide wrist strap holds glove secure
- ▶ Backhand tab assures a custom fit

SKI SKIN

SIZES: XS / SM / MD / LG / XL / XXL

- ▶ Full-fingered design
- ▶ Amara panels for wear resistance
- ▶ Stretch mesh nylon backhand
- ▶ Sturdy wrist strap for a secure fit

QUAKER BACKPACK

- ▶ New slim design
- ▶ Felt lined sunglasses pocket
- ▶ Shock absorbing shoulder straps
- ▶ Felt lined computer side pocket
- ▶ Fits most 17" wide screens
- ▶ Felt lined ipad sleeve

TEAM SLALOM ROLLER

- ▶ Convenient, fully vented bag makes for an easy trip to and from the airport to the boat. Rolling wheels makes your trips easy. Velcro straps fit up to 69" (175cm) of ski securely.

WAKEBOARD TRAVELER
