Malta

The Jewel in the Mediterranean

Surrounded by crystal clear sea and blessed with sun for most of the year it's no secret that Malta is a jewel in the middle of the Mediterranean. But Malta isn't just sun and fun! Its rich history dates back about 7,000 years and the earliest temples pre-date Stonehenge and the pyramids.

Malta's strategic location in the middle of the Mediterranean has always been coveted by all the major powers throughout the region. Past empires from the Phoenicians to the Romans, the Knights of Malta and more recently the British Empire have all left their own indelible mark on Malta giving it its rich history. You'll come across historical sites and architectural gems around every corner. The varied scenery and the wealth of things to do and places to visit during your stay here will keep you wishing you had time to fit in more.

Valletta – Malta's capital city

Immediately after the end of the Siege of Malta in 1565, the Order of the Knights of Malta built a new city, Valletta, on the Xiberras peninsula so as to strengthen their defenses and fortify the Order's position in Malta. The foundation stone of Valletta was laid by the Grandmaster of the Order, Jean Parisot de la Valette on 28 March 1566, in Our Lady of Victories Church. Considering that Valletta is one of Europe's smallest capital cities it has such a wealth of historical buildings with many churches, palaces and monuments. In fact, the city is so small that all the main sights can easily be reached on foot. Places worth special mention are St John's Co-Cathedral, The Grand Master's Palace, the Upper and Lower Barakka Gardens with views of the harbours flanking the peninsula of Valletta. Valletta is essentially baroque in character with a symmetrical grid-like road system. Valletta was awarded the prestigious title of European Capital of Culture 2018.

Our History

The history of Malta is a long and colourful one dating back to the dawn of civilisation.

The Maltese Islands went through a golden Neolithic period, the remains of which are the mysterious temples dedicated to the goddess of fertility. Later on, the Phoenicians, the Carthaginians, the Romans and the Byzantines, all left their traces on the Islands.

In 60 A.D. St. Paul was shipwrecked on the island while on his way to Rome and brought Christianity to Malta. The Arabs conquered the islands in 870 A.D. and left an important mark on the language of the Maltese. Until 1530 Malta was an extension of Sicily: The Normans, the Aragonese and other conquerors who ruled over Sicily also governed the Maltese Islands. It was Charles V who bequeathed Malta to the Sovereign Military Order of St. John of Jerusalem who ruled over Malta from 1530 to 1798. The Knights took Malta through a new golden age, making it a key player in the cultural scene of 17th and 18th century Europe. The artistic and cultural lives of the Maltese Islands were injected with the presence of artists such as Caravaggio, Mattia Preti and Favray who were commissioned by the Knights to embellish churches, palaces and auberges.

In 1798, Napoleon Bonaparte took over Malta from the Knights on his way to Egypt. The French presence on the islands was short lived, as the English, who were requested by the Maltese to help them against the French, blockaded the islands in 1800.

British rule in Malta lasted until 1964 when Malta became independent. The Maltese adapted the British system of administration, education and legislation.

Modern Malta became a Republic in 1974 and joined the European Union in May 2004.
