Garage Equipment, Tools,
Training & Technology

One call for complete peace of mind – Workshop Solutions

Your business is your livelihood. We understand that and we care. At Workshop Solutions we provide you with all the equipment, service, repair and maintenance programmes, assistance with health & safety procedures and project planning skills you need all in one place. We are the equipment and service provider of choice to many motor manufacturer groups, independent garages and bodyshops nationwide. From a new compressor to an MOT bay, comprehensive building works to aftersales servicing and maintenance, Workshop Solutions manages the whole process, ensuring a smooth, hassle-free, one-stop service that is delivered on time and on budget.

The Latest Technology
from the Best Brands

We aim to provide you with the tools, equipment and service that match both your personal expectations and your business requirements.

Waste Management –
Keeping you fully
compliant and stress free

Our panel of finance
houses can spread
the cost tax-efficiently

Health & Safety –
Safeguarding your
people and your business

From preventative
maintenance plans
to emergency call-outs

Please contact our Equipment Service & Maintenance team on 01527 882 778 to arrange an initial free, no obligation consultation.

BEST PRICE
PROMISE

Welcome to the latest edition of Workshop Solutions magazine which, as you would expect, is packed with information on all the latest garage equipment from some of the UK's biggest equipment brands. But we're not just here to sell you Garage Equipment. As our name suggests, we're here to help provide solutions to some of the challenges facing your workshop.

AIRCON SERVICING

Summer is here and in this issue we concentrate on Aircon servicing. What better time to consider adding to the services you offer or, perhaps, up-grading the equipment you have?

Aircon servicing is a great add-on for any workshop, providing a new business stream and an important service for existing customers while giving you the kit you need to attract a whole new customer base.

The great thing about investing in Aircon through the Workshop Solutions team is the service you receive from the moment you make an enquiry. Our dedicated Air Conditioning team have a wealth of knowledge and experience of the various machines and can recommend the equipment best suited to your needs.

They will ensure that one of our experienced engineers is booked to carry out the installation and provide the basic training required so that you can operate the machine correctly from the off, thus helping to ensure rapid pay-back on your initial equipment outlay. You don't even need to remember when the annual service is due; when the time comes we'll contact you to arrange a convenient appointment.

ADDITIONAL SERVICES ADD ADDITIONAL PROFIT

There are masses of opportunities for you to grow your business and your profits and we have the equipment and the expertise to support your plans. Take wheel and tyre servicing and wheel alignment: No longer the exclusive domain of the fast-fits, customers are keen for a local, trusted service and with the introduction of the right equipment you could quickly add another profitable revenue stream to your business.

What about MOT testing, in-depth diagnostics, auto transmission fluid exchange, or key programming and cutting? These are all areas we can help you develop; and retaining more work puts you firmly in control. Arrange a visit with our Workshop Equipment Specialist team to explore your possibilities.

MAKE THE MOST OF THE OPPORTUNITY IN FRONT OF YOU

Do you inspect every vehicle before commencing work on it? Do you provide your customers with a pre-work report highlighting any other faults found? Pre-work inspections, together with customer reports are becoming increasingly common. They increase customer satisfaction, which in turn leads to higher profits. Modern pre-inspection diagnostic kit is now so competitively priced that it's worth considering equipping every workstation with its own unit.

*Finance example typically based on a 5 year lease purchase agreement. Finance subject to status, full terms and conditions available on request. Other finance options available. Providing on-site repair for Ecotechnics, Robinair and Brain Bee Air Conditioning Equipment

Autoclimate are now pleased to service and support the Robinair, Ecotechnics and Brain Bee range of air con machines.

All equipment supplied will be offered a professional installation along with onsite operator training to show correct and recommended use of the unit.

With a national network of experienced, fully qualified field engineers providing on-site maintenance and repair services, there has never been a better solution for one stop purchasing and support of equipment. Also available is annual servicing of machines according to manufacturer recommendations and where required the issuing of calibration certificate for audit purposes.

SUPPORT VIA TELEPHONE

Although the majority of equipment related issues are resolved remotely, if this is not possible, an engineer visit will be arranged, with best endeavours to be onsite within 3 working days*.

Our engineers carry the fastest moving servicing and repair parts on their van stock. If not available through our logistics network we will have the required parts on the customer's premises, ready for when the engineer attends the site – helping to minimise machine downtime as much as possible.

- Autoclimate – the UK's only approved Robinair, Ecotechnics and Brain Bee repairer
- Full UK coverage
- Response time – best endeavours within 3 working days
- All work controlled by hand-held tablets
- No return to base requirement* – all repairs carried out on site
- All engineers hold the latest refrigerant handling qualification City & Guilds 7543-001
- Engineers fully trained to work on all Robinair, Ecotechnics and Brain Bee equipment
- Engineers receive regular updates on latest products and safety standards
- Full compliance to legislative standards
- Calibration certificates available upon request e.g. to comply with Quality Management and PAS125 system audits
- Autoclimate only uses genuine OE parts for repair.

**Excluding Northern Ireland*

*Finance example typically based on a 5 year lease purchase agreement. Finance subject to status, full terms and conditions available on request. Other finance options available. All prices exclude VAT at 20%. Price, availability and specification may change without prior notice. Warranty subject to manufacturers terms and conditions of use. Errors and omissions excluded. Offers valid until 30th September 2016. Prices correct at time of going to press: July 2016.

BEST PRICE
PROMISE

The proportion of vehicles fitted with TPMS valves is already substantial and is only going to increase. Two thirds of vehicles registered in 2015 had TPMS. The call for TPMS service work is not limited to outright failure (although this is the most obvious example).

Everything you need to start TPMS service work can be found on this page. Place your order and increase your profit potential!

BOSCH TPA 200

355 77 8220

Quick & Easy TPMS Service Tool

- Rugged design makes it ideal for any workshop
- Displays critical sensor data: sensor ID, tyre pressure, battery status
- Quickly activates universal TPMS sensors
- Quickly programs universal TPMS sensors (Schrader, EZ-Sensor, etc.)
- Wireless data transfer (via Bluetooth)
- Long life rechargeable battery, charges with USB cable
- Print data from PC/Laptop (via TPA Startcenter)
- Online updates available (additional cost)
- Does not time out!
- Ideal addition to KTS

ONLY **£345.00**

BRAIN BEE TP-1000

355 77 0010

Expandable-function TPMS service tool for checking, managing and maintaining TPMS valves – includes updatable TPMS database

Start with the Standard Functions

- Check existing valves by VALVE ACTIVATION and VALVE PARAMETER READING VIA WIRELESS (P/T/V)
- Replace damaged or worn valves by UNIVERSAL VALVES PROGRAMMING via information database

And advance to the full capability

- Reset or reprogramme TPMS valves to the vehicle ECU SENSOR SET-UP (Requires additional EOBD module to connect to vehicle ECU)

ONLY **£495.00**

VDO TPMS & TPMS PRO PRINT

The fastest and most advanced VDO TPMS tool yet! This practical service device can be used to instantly activate, read and display sensor data for all four of a vehicle's TPMS sensors in less than 90 seconds.

- Program all popular universal TPMS sensors (Alligator sens.it, HUF IntelliSens, Schrader EX-Sensor, T-Pro) for all types of vehicle manufacturers worldwide and relearn via the OBD II link
- Innovative 4.3" and easy navigation colour display
- VDO TPMS Pro Print – equipped with a docking station and integrated infrared data printer, you can print our results quickly and easily. Suitable for wall-mounting for the workshop and mobile tyre fitters

HOFMANN MEGAPLAN MEGAMOUNT 503XL

583 77 0410

Fully Automatic and boasting a 'top end' specification, the Megamount 503XL is capable in any environment. The patented, adjustable turntable enables alloy rims up to 26" in diameter to be clamped from the outside, and the tall column and wide bead breaker opening ensures suitability for extra-wide rims up to 15".

A bead breaker 'stroke limiter' for shallow-welled BMW rims and quick-release, interchangeable demount head system, with standard/run-flat, plastic and 'raised spoke' heads, completes the luxury specification.

- 10" to 28" Clamping (26" external)
- 15" Rim Width Capability
- Quick-Release Demount Head System for Standard/RFT, Plastic and 'Raised Spoke'
- Includes 'Megafit 2XL' assist arm
- BMW/Run-Flat 'Stroke Limiter' as standard
- Double-acting bead breaker
- Fully-Automatic Operation

HOFMANN MEGAPLAN MEGASPIN 200V

583 05 0510

The Megaspin 200V has to offer one of the best price/performance ratios of any wheel balancer on today's market. Fully-automatic (3D) data input is achieved using the inner measuring/weight placement arm and Hofmann Megaplan's revolutionary IWA (Intelligent Width Assessment) software.

Values are displayed live on the full colour TFT display. The displayed graphics will guide the operator to the designated weight placement position, as well as delivering what is probably the simplest, fastest method of 'split weight' (hiding the weights behind the spokes) ever.

- 3D Fully-Automatic Data Input via IWA
- Colour TFT Display
- Can handle rims up to 30" diameter
- Simple, speedy operation
- 4 years PCB Warranty

HOFMANN MEGAPLAN MEGAMOUNT 503XL EVO 583 01 0210

Super-Automatic Operation and built-in 'Leverless' device make this machine incredible value for money. It boasts luxury features such as 'Stroke Limiter' for the bead breaker to adjust the amount of travel when breaking the bead on tyres fitted to shallow-welled BMW rims, and it provides a future-proof clamping range of 14" to 26".

A 'bespoke' design to incorporate value with 'upmarket' features, the 503 Evo's incredible price/performance ratio puts leverless technology within the reach of even the modest garage or tyre shop.

- Leverless Operation
- 10" to 28" Clamping (26" External)
- 15" Rim Width Capability
- Includes 'megafit 2XL' assist arm
- BMW Run-Flat 'Stroke Limiter' as standard
- Double acting bead breaker

Leverless Operation:

HOFMANN MEGAPLAN NG 90 NITROGEN GENERATOR 592 01 0070

There is no doubt about it, Nitrogen inflation is becoming more common as customers demand the service and anybody dealing with tyres will need to consider meeting the demand. In addition, certain new vehicles are coming out of the factory with nitrogen in the tyres as standard, setting the tone for nitrogen filling to become the 'norm' in the future.

THE BENEFITS

Longer Tyre Life – Improved wear due to maintaining the correct pressure for up to four times longer than filled with air
Increased Fuel Efficiency – Correct tyre pressures lessens the rolling resistance and maximises consumption
Increased Safety – Under-inflated tyres are the main reason for blow outs. Nitrogen filled tyres maintain pressures – that's why it's used in racing and aviation.
Nitrogen is a safe inert gas, non-flammable, non-corrosive.

Nitrogen inflation is a great add on opportunity for customers who buy performance tyres or for those concerned with economy. Charge or give it away as promotion to attract customers. More stable tyre pressures means less queuing at the petrol station!

The fully-automatic NG90 provides fast, simpler operation. Simply connect the hose up to the valve and set the required pressure, and then walk away and get on with another job. The NG90 will automatically purge the tyre and the switch to refill with nitrogen to the pressure selected.

- No need to buy gas – NG90 produces its own Nitrogen through a filtration process
- Fully portable – Can be used anywhere with a 13amp plug
- Automatic Operation – Connect and walk away, saves time
- Adjustable Display – Read measurements in Bar Or Psi

ONLY **£995.00**

*Finance example typically based on a 5 year lease purchase agreement. Finance subject to status, full terms and conditions available on request. Other finance options available. HOFMANN MEGAPLAN MEGAMOUNT EASY

583 77 0420

The Megamount Easy represents an alternative style of tyre changer, where manual effort is reduced to a minimum, and the emphasis is on larger rims fitted with low profile tyres.

An integral wheel lifter makes light work of the heaviest assemblies, and the centre post clamping with the simple and speedy 'Smart Lock' ensures there is no contact with the outer edge of the rim. The famous Hofmann Megaplan 'Evolution' leverless system is enhanced with the new 'Lever No Lever' design, which enables the operator to switch between leverless operation and traditional lever & demount head at the flick of a switch.

Unlike many other 'Next Generation' tyre changers on the market, the EASY was designed with one major focus; simplicity. In every element of the tyre fitting and removal process, the directive has been to ensure that operation remains simple, minimising the number of controls and functions – Easy by name, and EASY by nature.

- 10" to 30" Clamping Capability via Centre Post method with 'Smart Lock'
- Lever No Lever system enables dual leverless or traditional levered fitting as preferred
- Integral wheel lifter
- Dynamic bead breaking system via roller
- 'Next generation' tyre changer design

WEEKLY
FROM ONLY **£30.21⁺**
ONLY £5,995.00

HOFMANN MEGAPLAN MEGASPIN 420

584 77 0370

The most advanced technology the industry has seen in a wheel balancer. The combination of revolutionary new technology, incredible simplicity, and typical Hofmann Megaplan reliability make this, in our opinion, the best value wheel balancer on the market today.

Boasting 'No Checkspin' technology and 6 o'clock weight positioning, the Megaspin 420 only requires the operator to select the weight position(s) and lower the hood – it's that simple! Two laser points guide the operator to the chosen weight position, and the rim locks into position at each inner and outer 6 o'clock placement position.

There is no possibility for error, no chance of the machine throwing up an extra 5 or 10gms, and absolutely No Checkspin Required!

- Worlds' first balancer with 'No Checkspin' technology
- Easier 6 o'clock weight position
- Super Automatic Data Input via sonar (touch-free)
- Laser Guided weight placement
- Handles rims up to 30" diameter
- The simplest, fastest wheel balancer ever produced

LITE ALIGN 450 WALL MOUNTED

587 77 0020

Wall mounted car and light commercial four wheel laser aligner kit includes two front laser heads, two rear flag units, brake pedal depressor, steering clamp, turn discs, wall mount rack and 100mm rim buttons

MEASURES:

- Front and rear individual and total toe, to ensure correct tracking and stability on the road
- Thrust Line, to make sure the rear wheels are pointing in the straight ahead position in relation to the centre line of the vehicle
- Set back, to check front and rear wheels to ensure correct alignment across the vehicle
- Corrects steering wheel alignment. Rear flags enable the end user to adjust the alignment to achieve perfect steering wheel alignment first time.

KEY FEATURES:

- Unique tyre/wheel mounting system, resulting in more accurate measurement, reduced risk of heads becoming detached during adjustments
- Rechargeable battery operation, no cables
- Fits 12 to 22 inch wheels, cars and light commercials, XL kit available for larger wheels
- Optional digital Camber/Caster/SAI gauge available

WEEKLY FROM ONLY **£7.79⁺**
ONLY £1,545.00

Offers valid until 30th September 2016. Prices correct at time of going to press: July 2016.

HOFMANN MEGAPLAN ECOLINE 58/88 – FULLY COMPUTERISED WHEEL ALIGNMENT WITH A4 PRINTER

Bridging the gap between laser alignment and fully computerised systems with printout, which traditionally made the jump too big for many workshops.

Ecoline 58 and 88 are supplied with a comprehensive vehicle database from the recognised industry name, Autodata, and offers a before and after printout. The Ecoline series – is the logical choice for anybody wanting to move into advanced vehicle geometry without the cost traditionally associated with computerised systems.

Only one alignment a week turns this investment into profit!

ECOLINE 58/88 FEATURES

- Simple to use – faster readings, saves time increasing your profit
- Supplied with PC, 19" monitor – clear impressive graphics with onscreen instructions
- Onsite training – your machine, your premises Hofmann Megaplan's specialists
- Comprehensive Vehicle Database by Autodata – over 17,000 models from 80 manufacturers
- A4 Printer – Provides before and after readings for customers
- Traditional 4-Point Clamps (58 only) – handles up to 23" rims as standard
- Front Cameras and Rear Sensors – increases accuracy and repeatability
- Zigbee® wireless communication – offers stronger and more reliable signal over Bluetooth®

ECOLINE 88 ONLY FEATURES

- 3 Point 'Grab Clamps' – even faster mounting, saves more time
- Front & Rear Cameras – ideal for advanced geometry when speed is needed

JOHN BEAN PRISM ELITE

The Visualiner Prism Elite allows you to add alignment to your garages services without needing to hire an experienced alignment technician.

Plus, not only will you be able to pinpoint alignment problems, it generates reports that can be shared with customers, which is why your alignment business will start growing from day one.

If you already own a John Bean geogas 3000 or 5000 Emissions Analyser, you can add a Prism kit to this unit – saving you space in your workshop and allowing your MOT bay to carry out alignments.

Computerised wheel alignment with Pro 42 software.

- Accurate, flexible and easy to service
- Perform alignments quickly from virtually anywhere in the workshop
- Integrated help system
- Extensive manufacturers' specification database

JOHN BEAN ELS 3D ALIGNMENT SYSTEM WITH TILTING CAMERA

587 77 1730

The new John Bean 3D ELS alignment system has a tilted camera boom for flexible vehicle positioning, eliminating the need for a fixed position to carry out alignment checks and being able to position the camera at the touch of a button.

Running the Pro 32 software application, the ELS saves space in the workshop because everything is mounted on the support post.

The vehicle orientation directional indicator guides the technician when they are unable to see the screen, while interchangeable grippers on the wheel clamps assist work on different wheel types within a clamping range of 11" rims to 22" rims.

- AC 100 rim clamps, with a clamping range 11" – 22" rims
- Compact design everything mounted on the support post
- Tilting camera boom for working at different heights
- 3D technology for fast and accurate measurements
- Vehicle database included

WEEKLY
FROM ONLY **£32.73⁺**

HOFMANN MEGAPLAN MEGALINE SSENCE 400 & 600

Utilising the proven 'camera and target' principle, the Ssence 400 and 600 are fast, simple, and ideal for those customers looking to invest in the latest wheel alignment technology. The software has been designed to make life as easy for the operator as possible, minimising unnecessary manufacturer-specific procedures commonly found on other systems, and ensuring the whole alignment process is simple, quick and user-friendly.

A comprehensive vehicle database provided by an industry-leading name in vehicle data, Autodata, ensures up-to-the-minute specifications, and fully-automatic operation of the up/down movement of the cameras synchronised with the lift put this aligner firmly in the 'premium' spec category. To set the Ssence further apart, all orders up until 31st March 2016 will have the opportunity to purchase the 'MegaTab' handheld, remote display, worth £995, half price – that's just £495! With the MegaTab, the customer has the benefit of being able to view and operate the system anywhere around the vehicle or workshop, or show customers in reception exactly what is happening with their vehicle.

- Impressive, easily understood graphics and prompts
- Ssence 400 with Semi-Automatic movement of the camera bar and 19" monitor
- Ssence 600 with Fully-Automatic movement synchronised with the up/down movement of the lift and 32" monitor
- Includes Autodata database
- Includes premium mechanical turnplates
- Comprehensive, on-site training
- Half-price 'MegaTab' option on all orders until 30th June 2016

Megatab is a handheld Tablet manufactured by Samsung, supplied in a rubber case for maximum durability. It uses factory-supplied, dedicated software making it a genuine extension of the machine, not just a VPN.

- Remotely operate and view data even when working around the vehicle and the main display is obscured.
- Great tool for showing customers in the reception area exactly what is happening with their vehicle.

NO SPACE FOR A SEPARATE ALIGNMENT BAY?

Why not utilise your MOT bay when it's quiet with a 3D alignment upgrade. Generate more profit stream with relatively small-scale add-on to the MOT lift, along with a 3D alignment system. Workshop Solutions can offer more lift and alignment options than anyone else. Talk to us to explore your options

Upgrade an existing lift to 3D Alignment using the equipment below or a similar combination. There is even a kit to support 3D alignment on a 2 Post lift!

PRODUCT	DESCRIPTION	PRICE
Pair of Mechanical Turnplates	For front or rear axle adjustment, or both. Sits on or within recesses on Lift platform.	£535
Portable Rear Slip Plates	For rear axle adjustment. Used in some systems rather than rear turnplates – 300mm square	£200
A Pair of Run up Ramps/Roll-back Kit	To allow the vehicle to roll on and off turnplates/slip plates if above the platform surface	£140
Pack 1 Kit for customers without alignment lift	Kit to convert a Service Lift to Alignment, consists of front 'housing' with drive-on ramps to accommodate turnplates, additional turnplates for rear, and rear 'housing' with drive on/ drive off ramps	£1,295
Pack 2 Kit for customers without alignment lift	Kit to convert a Service Lift to Alignment, consists of front 'housing' with drive-on ramps to accommodate turnplates including extended platform for 'roll-back, and with drive on/ drive off ramps	£2,795
Pack 3 Kit for customers without alignment lift	Kit to convert a Service Lift to Alignment, consists of front 'housing' with drive-on ramps to accommodate turnplates	£895
Alignment Tables	Kit to allow 4 wheel alignment on a 2 post lift. Consists of 4 tables. Max weight 3000kg across 4 tables	£895

For guidance only. The upgrade required depends on the existing equipment and the intended Alignment system. Ask our Workshop Equipment Specialist for a quote. 3D Alignment System also required.

ALIGNMENT LIFTS

The advantage of a purpose-built alignment lift is all components matching and optimised to each other. Choose your aligner and lift combination from the below and the preceding pages. The Avonmouth Training Centre is now up and running. We have achieved IMI Approval and are taking bookings for our own IMI Quality Assured Essential Electrics 2 days course. Once you have completed this Quality Assured course, you will be issued with a certificate from the IMI (Institute of the Motor Industry) which is an internationally recognised awarding body.

We are offering IMI Service and Maintenance Accreditation formally known as ATA Service and Maintenance. All we ask is that you work as a light vehicle technician and have 2 years' experience in the industry. Get qualified with nationally recognised qualifications. Win the trust of your customers and feature on the IMI professional register www.imiregister.org.uk

**ASK YOUR BRANCH
FOR A CALENDAR OF COURSE DATES**

Courses Now Available at Euro Academy Avonmouth Training Centre

Oscilloscope and Signal Analysis – competently operate an oscilloscope and use all its functions	2 days
Engine Management Spark Ignition – gain an in-depth understanding of the ignition process and analysis of ignition related faults.	2 days
Engine Management Diagnosis – acquire the skills and knowledge to test and diagnose engine management systems with confidence	2 days
Steering Geometry – correctly diagnose alignment faults and propose the appropriate corrective action	1 day
Refrigerant Handling Assessment (F Gas) – this is required for aircon servicing work	1 day
Essential Diesel Knowledge – achieve a good understanding of diesel technology	2 days
Airbag and Supplementary Safety Systems – gain knowledge of Airbag and SRS control systems and learn how to carry out accurate diagnosis on these safety critical systems	2 days
Common Rail System Diagnosis – gain an in-depth knowledge of Common Rail Diesel hydraulic and electronic system functions and learn the fault diagnosis process	2 days
Hybrid and Electrical Vehicle Systems – learn how to identify high- voltage components and how to safely carry out maintenance work in that environment*	2 days
IMI Service And Maintenance Assessment – gain an industry-wide professional recognition of your capability as a Service Technician	1 day
IMI Quality Assured Essential Motor Vehicle Electrics – gain an industry-wide professional recognition of your capability at electric systems fault-finding	2 days

* IMI accredited course – separate charge for IMI certificate applies

Changes to MOT tester refresher training

From April 2016, DVSA will replace the currently suspended MOT tester refresher course with MOT annual training and an assessment. DVSA won't deliver the new MOT annual training or assessments and testers will no longer need to attend a 5-year refresher course. Testers will have to complete the new MOT annual training and assessment in order to maintain their testing status. The new process will follow a continuing professional development (CPD) model with testers required to complete training and pass an assessment every year for the vehicle classes they test.

Euro Academy in association with the IMI are offering an online learning module and assessment which satisfies the DVSA requirements. This will be available from July and you are welcome to purchase your log in and password now. The log in and password will allow you access to a three hour program and assessment and is available for Motor Cycle class 1 and 2 testers as well as class 3,4,5 and 7 vehicle testers. All testers must complete their CPD by March 31st 2017 to remain qualified.

263 00 0010 IMI CPD ONLINE TRAINING AND ASSESSMENT ONLY **£56.99⁺**

*Finance example typically based on a 5 year lease purchase agreement. Finance subject to status, full terms and conditions available on request. Other finance options available. Offers valid until 30th September 2016. Prices correct at time of going to press: July 2016.

TECHNICAL TRAINING EVENTS

Workshop Solutions are your complete technical partner, bringing not just the latest products, but also the technical awareness and training opportunities to keep your business up to speed with developments in automotive repair.

Hosted by leading technical trainers, these 2 hour events are designed to give a thought-provoking insight to up-to-the-minute and future developments in repair techniques in all areas including Steering & Suspension, Exhaust & Emissions, Transmission & Clutch, and many more.

Are you making profits or making mistakes? As every area of auto technology is constantly developing, so are the diagnostics, repair techniques and equipment required.

Covering technology overviews, diagnostics advice, best practice fitment, repair and service techniques – with live demos.

- FREE to our Workshop Solutions customers and their employees
- Places are limited – book your place via your branch ASAP
- Refreshments provided

PAGID LIGHT BRAKE TRAINING

263 77 1440

Pagid Professional Academy is a comprehensive brake training programme, designed to equip workshop technicians with all the skills required for today's brake service. Delivered by accredited expert trainers, and approved by the IMI, it is the only training programme of its kind backed by a manufacturer and distributor.

What is it about? – A series of modules covering all types of vehicle braking beginning with the IMI QAA Award in Light Vehicle Brake Fitting.

What will you get out of it? – Background theory and practical hands-on skills covering brake discs, drums, hydraulics, servo, fluid and anti-lock brake systems.

Knowledge and Skills
(an ability to do what their customers cannot)
is an Automotive Workshop's core offer.
Without this they have nothing to sell.

The vehicle repair and service environment is highly competitive. Vehicle technology is becoming increasingly complex. On-going Technical Training is the way to overcome these challenges. Garages that have high levels of skill and knowledge will survive and prosper. The courses offered in partnership with Bosch and Pagid are focused on the specific needs of the independent aftermarket. A pathway of Diagnostic Technician and Master Technician courses lead to the nationally recognised Automotive Technician Accreditation (ATA) award.

- Fix cars right first time every time
- Take on more complex jobs and retain your customer's business
- Save time – gain confidence from increased skill and knowledge
- Keep up with the evolving technologies

COURSES ARE HELD AT THE BOSCH TRAINING CENTRE IN UXBRIDGE AND OTHER LOCATIONS NATIONWIDE. A TYPICAL COURSE CONSISTS OF:

INDUCTION	introduction to training staff and subject, aims of course and course outline. Lunch, tea/coffee and biscuits at appropriate times.
OVERVIEW	Fundamentals and theoretical underpinning of the subject area.
PRACTICAL	Implementation of theory using training vehicles and select high tech test equipment. Delegates are encouraged to bring their own test equipment if it is available.
CONCLUSION	Discussions, summary and conclusions.
TEST	To receive that all-important Certificate of Completion

FROM ONLY **£145.00** PER DAY

Bosch Car Centres contact local branch for discount deals.

LAUNCH X431 PRO

355 77 3950

Tablet-style car diagnostics device based on and specifically designed for Android operating systems, allowing users to download any Android software and work with a familiar user interface.

With Bluetooth communications to the DBScar connector and a mobile terminal. Covers a wide range of car models including European, Asian, American and Chinese models. It also has a range of powerful test functions and provides extremely accurate test data.

- Service Light resets
- Injector programming
- Diesel particulate filter regen/replacement
- 7" Screen Size
- Dual Core Processor
- 512MB RAM memory

1 Year software upgrade option

WEEKLY
FROM ONLY **£6.02⁺**
ONLY **£1,195.00**

HELLA GUTMANN MEGA MACS PC

355 77 5520

Turns any Windows PC into a powerful diagnostic device with the same capabilities as the popular mega macs 42 SE. In conjunction with your Windows netbook, PC or tablet it's a flexible, highly portable and user-friendly all-round diagnostic solution for professional workshops, packed with features including Pass Thru® technology and complete with detailed ECU and system data for over 38,000 vehicle models.

- PC version of the popular mega macs 42 SE model
- Suitable for your Windows netbook, PC or Tablet
- Comprehensive in-depth vehicle coverage
- Equipped with PassThru® technology

WEEKLY
FROM ONLY **£8.54⁺**
ONLY **£1,695.00**

VDO CONTYSIS SCAN

355 77 0470

The all-round diagnostics tool with enhanced performance & functionalities other tools ignore. Exceptional coverage for more than 40 vehicle manufacturers, including vehicles from 1996.

- In-depth system coverage
- Ergonomically designed handset will enhance not hamper you around the workshop
- Fast boot up in 8 seconds – no lock outs
- High contrast display even in poor lighting conditions
- Includes portable carry case, 3 year warranty and 1 year of software updates (option to extend)

WEEKLY
FROM ONLY **£5.01⁺**
ONLY **£995.00**

G-SCAN 2

The best-selling diagnostic tool in Japan for Asian vehicle diagnostics.

- Built-in Wi-Fi – easy updating via wireless internet, and easy communication with other wireless machines in the workshop e.g. the office printer.
- Extremely fast Processor speed – very quick start-up times and operation
- Intuitive Software – easy to use, easy to make the most use out of

LAUNCH X431 EUROPAD 2 355 77 4640

Like the rest of the Launch family, the Europad 2 boasts vast vehicle coverage, and easy-to-use software that feels instantly familiar, being android-based. As might be expected by the top model in the range, the Europad 2 is capable of running the full range of Launch accessories: Multimeter Scope Box, 4 Channel Oscilloscope, Sensor Simulator and Videoscope Inspection camera.

- Built to IP65 water proof specifications, drop-tested, dust-proof design
- Featuring an open Android™ operating system for a true tablet experience – install third party apps and software!
- Can operate the HD Truck diagnostic module
- Can operate the J-Box Pass Thru device

3 years software upgrade option

WEEKLY
FROM ONLY **£12.07⁺** WITH ONE YEAR
ONLY **£2,395.00** SOFTWARE UPDATES

Pass-Thru is coming

Some diagnostics products offer Pass-Thru capability in the device. What added functionality does Pass-Thru provide?

Also known as SAE J2534, Pass-thru is the OEM Standardised protocol for connecting a vehicle to its OEM server by an interface, the correct spec. laptop, and a battery support unit. A high-bandwidth internet connection is also required.

Originally used just for reprogramming ECUs with software updates, many day-to-day diagnostic, service and repair procedures may nowadays require the use of Pass-Thru.

Thus, on vehicles registered between 2004 and 2010, there is minimal requirement to employ Pass-Thru. With 2010 to 2014 vehicles however, there are instances where component replacements may require Pass-Thru in order to authenticate the new unit. And with Euro 6 vehicles registered from September 2014 onward, in some cases, Pass-thru may be required even for such simple tasks such as resetting a service light.

In the future, OEMs may choose to restrict Pass-Thru access to qualified personnel, in which case a recognised qualification will be required.

For more details on Pass-Thru, enquire with your branch on the next scheduled seminar. Our team of Workshop Equipment Specialists can advise and demonstrate on suitable equipment for you.

J-BOX 2 PASS THRU DEVICE 355 77 1450

J-Box 2, a thoroughly capable Pass Thru device that can be used for repairs and general maintenance on the majority of vehicle marques.

Easy to install on your PC, this device will help reprogramme control modules in-house, ensuring you can keep custom in your garage without needing to send them away to a dealership. It works with J2534 applications but can also work with J2534-1 and J2534-2 if required.

With support for over 36 OEM's and interfaces to OBDII and a PC, the Launch J-Box provides everything you need. The including software provides how-to videos for each manufacturer and regular news of current known issues.

WEEKLY
FROM ONLY **£6.53⁺**

HD TRUCK MODULE

355 77 5120

This Android powered heavy-duty truck module communicates wirelessly with the Pro 3 or Europad 2 host terminal to achieve fault diagnosis for various truck models. Advantages include wide model coverage, powerful test function, additional special functions and accurate test data.

Provides a credible entry to truck diagnostics at a fraction of the cost of more specialist kits.

Coverage includes:

Man, Scania, Benz, Iveco, Daf, Hyundai, Volvo, Renault, Mitsubishi

Includes full cable kit

Works with Europad 2 only

WEEKLY
FROM ONLY **£5.01***
ONLY **£995.00**

VCDS DIAGNOSTIC SOFTWARE + CABLE

355 77 1060

VCDS is a Windows-based software that turns your PC into a sophisticated diagnostic tool, capable of diagnosing VW, Audi, Seat and Skoda vehicles.

VCDS is a world-renowned software package that enables you to carry out all the functions of dealer testers and more expensive aftermarket tools.

- Covers latest CANBUS vehicles
- Virtually OEM-level software
- Coding – adaptation features
- Easy to use
- Low-cost solution
- Service reset

ONLY **£315.00**

DURAMETRIC PORSCHE

355 77 0780

Reads and resets the different modules on Porsche vehicles. It plugs into your Windows PC's USB port and once plugged into the car, is capable of communicating with the different control units in the car. Includes no time-limit free software updates.

Vehicle coverage includes 928, 944, 968, 911, Boxster, Cayman, Panamera, Cayenne from 1989 to 2012 and on.

Functions: reset service reminders, reads diagnostic trouble codes, displays actual values, shows ECU information, clears diagnostic trouble codes, turns off check engine light, turns off airbag light.

Systems: DME, alarm, airbag, seat memory, ABS, heating & A/C, Tiptronic and much more...

ONLY **£699.00**

VAUXCOM DIAGNOSTIC SOFTWARE & COMMUNICATION CABLE

355 77 1050

PC/Laptop based software replicates almost all the functions of the dealer tool for a fraction of the cost.

Vaux-COM is a Windows based piece of software that turns your Laptop or PC into a sophisticated diagnostic tool, capable of diagnosing GM/Opel vehicles from 1994 to 2014, including Vectra C, Astra H and Insignia.

Covers almost all Vauxhall and Opel cars and light vans and allows you to diagnose almost all modules including the Engine Management, Airbag, ABS, Immobiliser, Instruments and many more.

VAUX-COM can diagnose almost all Vauxhall/Opel systems, and works on almost all models including the latest CAN-BUS and Global A Platform cars.

Models from 1997 to 2014 including Astra H, Corsa D, Vectra C, Captiva and Movano.

ONLY **£695.00**

*Finance example typically based on a 5 year lease purchase agreement. Finance subject to status, full terms and conditions available on request. Other finance options available. FROM ONLY **£17.61⁺**
ONLY **£3,495.00**

HELLA GUTMANN CSC MACHINE

597 77 5760

Calibration tool for camera based driver assist systems. Safety systems such as adaptive lighting, automatic distance control and lane departure warning are becoming a common feature of many mid-size and compact cars. The sensors and cameras required by these systems have to be precisely calibrated. A slight shift in the position of the radar head or the camera in relation to the geometric axle can cause the system to deliver incorrect results, or even fail completely. The CSC (Camera and Sensor Calibration) tool enables effective and accurate calibration of a wide range of camera-based driver assist systems.

The CSC Tool is an all-in-one solution for calibrating advanced driver assistance systems suitable for the whole range of vehicle manufacturers. Therefore, in connection with a diagnostic tool from Hella Gutmann Solutions, you are able to calibrate, for example, the front camera for the lane departure warning system, the radar sensor for the ACC (Adaptive Cruise Control) or the camera for adaptive headlights.

WEEKLY
FROM ONLY **£28.48⁺**
FROM ONLY **£5,650.00**

(basic machine price only. Does not include price for radar kits required)

CSC RADAR 1 KIT

597 77 7890

WEEKLY
FROM ONLY **£8.37⁺**
FROM ONLY **£1,660.00**

CSC RADAR 2 KIT

597 77 7880

WEEKLY
FROM ONLY **£6.27⁺**
FROM ONLY **£1,245.00**

- Compatible with a wide range of vehicles and camera-based driver assist systems
- A flexible, modular system which can be tailored to individual workshop requirements
- Provides accurate results with no need for a fully-equipped axle alignment station, levelled workshop floor or platform lift
- Full integration with Mega Macs diagnostic tools

*Finance example typically based on a 5 year lease purchase agreement. Finance subject to status, full terms and conditions available on request. Other finance options available. All prices exclude VAT at 20%. Price, availability and specification may change without prior notice. Warranty subject to manufacturers terms and conditions of use. Errors and omissions excluded. Offers valid until 30th September 2016. Prices correct at time of going to press: July 2016.

ESI[tronic] 2.0

ESI[tronic] 2.0 software is used in conjunction with the KTS range of diagnostic tools for vehicle fault diagnosis and service function procedures. The range of features available through the software is truly vast.

- System Overview diagnostic check (recommended procedure on all vehicles before commencing any work) will conduct a scan on all the vehicle's ECUs and return any fault codes present. These can be saved for a 'before and after' printout for the customer. This standard feature on most diagnostic software is carried to the height of professionalism on ESI with capability to record the whole repair process followed by the technician during diagnostic fault finding work including procedures followed, results of direct measurements, time taken... Customer invoices can look no more professional than with this report attached.
- The Service Information System (SIS) trouble-shooting function is the 'crown jewels' of ESI 2.0. It consists of both a database with extensive Bosch technical content and a direct connection to the multi-meter and diagnostic tester within the KTS unit. By using this system correctly it will reliably guide you, step-by-step, from detecting the symptoms of a problem and any associated diagnostic trouble codes, to the cause of the fault and then on to the rectification of the problem on the vehicle. Not only that, but at each stage, functional information appears, explaining the particular system you're working with and how it works and what it is responsible for – helping you better understand the

system as you go along. As you carry out the test plan on a given component, the relevant accompanying diagram, waveform profile etc. will always be there – how to set up the test; how to interpret the result; where to move on to next. The amount of data available in ESI 2.0 is dependent upon the subscription level held by the user. The two main ESI subscription type are the 'Diagnostics package' which has the full features of Serial Diagnosis (SD) and Service Information System (SIS) trouble-shooting. The 'Master package' comes with vast amounts of inspection and maintenance data, comfort systems circuit diagrams and technical service bulletins. The subscription level that's right for you depends on the depth of diagnostic work

you undertake, but the aim is always the same – to help you through the job from beginning to end and obtain the correct diagnosis of a fault on the vehicle which should lead to a first-time fix. The usefulness and capabilities of the Bosch ESI 2.0 trouble-shooting instructions extend to displaying live data 'groups' in a graph, e.g. accelerator pedal position, air mass meter flow, EGR valve actuation and boost pressure on a Common Rail diesel engine during acceleration. It is easier to identify a problem when you can clearly see the relationship between components in operation together. That is the strength of ESI – lots of data and lots of features to get to understanding the problem and bringing about the successful repair.

Offers valid until 30th September 2016. Prices correct at time of going to press: July 2016.

THE MAIN ESI PACKAGE ARE:

SD DIAGNOSTICS

Enables users to:

- Read Fault codes
- Erase Fault codes
- Collect Actual Data Values
- Actuate Components
- Carry out Function Tests
- Carry out service functions such as service lights, dpf, handbrakes, batteries and windscreens
- Carry out some coding

SIS TROUBLE SHOOTING

Identifying a fault code is just the tip of the iceberg in a vehicle repair process. Trouble shooting is the solution to guide you to the root cause of the problem. It can guide the user from the fault code, real time data or symptoms through a number of tests to the root cause of the problem. It integrates the multimeter and scope (fitted to the KTS) to the guided diagnostics. SIS gives the user all of this in addition to the base SD package.

MP MASTER PACK

Trouble shooting takes users

to the root cause, but users will need:

- Wiring diagrams for body electrics
- Technical bulletins
- Installation information
- Mechanical and service information
- Torque settings
- Locations and pin information on components

DIAGNOSTIC MODULE

Wireless and convenient diagnostic test and control module for ESI software for everyday workshop applications. Mobile communication with wireless "Bluetooth transfer".

USB interface, the KTS can be hooked up to any standard laptops / PCs Universal application for cars and commercial vehicles via universal OBD plug for 14V and 28V electrical systems.

BOSCH KTS 570

DCU 220

355 77 4690

DCU 220 (Diagnostic Control Unit) combines the features of a notebook with those of a tablet PC for flexible and comfortable working, especially under workshop conditions. When used as a tablet PC, the touchscreen is fast and easy, when a keyboard

is needed, the DCU 220 lends itself to being used as a notebook for any kind of usual computer work, such as the quick and easy entry of customer data. DCU 220 controls Bosch test and diagnostic systems, e.g. FSA 500 or the modules from the KTS series.

COMBINED TABLET / LAPTOP DIAGNOSTIC CENTRE:

CAREFULLY THOUGHT OUT DETAILS MAKE OPERATION EASIER

Easy switch from tablet to notebook mode – continue to work as you change

- Sturdy housing with 11.6" touchscreen monitor – view more data in one go
- Integrated camera: Document and use to show customers or order parts photographed

MOBILE WORK OVER EXTENDED PERIODS

- Inclusion of two identical lithium-ion batteries
- If required, batteries can be replaced without interruption (hot swap function)

MODULAR CONCEPT WITH THE DIAGNOSTIC CONTROL UNIT

For qualified diagnostics, professional repair and maintenance, Bosch offers the following modular system components: the DCU 220 convertible PC and the KTS 570, the KTS 540, KTS Truck or the FSA 500. These can be freely combined to form a suitable solution for every workshop. Ask for more information.

AUTODATA

Autodata is the ultimate online tool to provide quick and easy access to technical information to efficiently carry out complex diagnostics and repair procedures, as well as day-to-day servicing and maintenance operations. Genuine manufacturer data, delivered in an easy-to-use consistent format covering 80 vehicle manufacturers and 29,000 models worldwide.

- Full service and maintenance procedures
- Data embedded directly into service schedules
- Interactive coloured wiring diagrams
- Fast and easy diagnostics and troubleshooting
- Interactive component location
- Comprehensive technical data and specifications

BOSCH FSA500

355 77 3180

Sometimes you cannot see live data through serial diagnosis or you may be suspicious of the values being shown, this is where a scope is invaluable.

A good example of this is a throttle potentiometer. Damage or wear on the track may not show up though serial diagnostics but will affect the performance of the car.

Before replacing the part, a quick test with the scope would prove if the part is faulty or if the problem is elsewhere in the car.

The FSA500 can save you time, make you money and build your reputation!

Extensive sensor equipment Concise and clearly arranged menu structure through test steps with vehicle-specific reference values around 50 preset component tests. Practical display of actual values from the ECU diagnostics in the FSA software in conjunction with the KTS module – **NEW FEATURE!**

If lack of space to expand your business is holding you back, the opportunity for incremental business can be met by housing the additional equipment and operations in a Repair Qube.

Example layout of a Repair Qube

Ideally suited to dedicated 'fast track', 'smart', or same-day repairs, the Repair Qube brings a new dimension to workshop Innovation, providing an instant portable repair facility that can be rapidly installed and even re-sited without too much fuss.

Repair Qube is the complete 'workshop in a box'. The pre-assembled modular units require a footprint of approximately six parking spaces and arrive equipped with load-bearing floors, two oversized repair bays, a room for ancillary equipment, reception and welfare areas, as well as parts/goods storage facilities.

It can operate as an independent site on an electrical generator or off mains electrical services, and can use directly connected or integrated LPG gas supplies.

A Repair Qube can be wrapped with any bespoke corporate identity. It can accommodate almost any equipment requirement, and complies with all legislation.

Our Projects team have ample experience planning and installing the Repair Qube, and will be only too happy to assist you undertaking this exciting new capacity to your business. The team will assess, advise, carry out site survey work, discuss Return on Investment projections, assist on a fixed-fee basis with planning permission – and of course undertake the project implementation from beginning to completion.

**Give us a call – and expand the limits of your ambitions.
One call for complete peace of mind**

OUR SPECIALIST EQUIPMENT SERVICE AND MAINTENANCE TEAM PROVIDES ALL INSTALLATION, SERVICING AND MOT CALIBRATION REQUIREMENTS INCLUDING PLANNED MAINTENANCE AND SCHEDULING

PLANNED MAINTENANCE

A preventative maintenance contract can provide a significant reduction in repair costs, ensuring total peace of mind for both the equipment owner and operator. Alternatively, services can be secured on 'as required' basis.

PLANNED MAINTENANCE		FROM
Vehicle Lift Maintenance & Repairs	2 Post, 4 Post, Scissor Lift Servicing and Repair	£43.75*
JACKING BEAM REPAIR		CALL
Air & Oil Pipework	Supply and installation including galvanised steel tube, Transair and John Guest aluminium	CALL
Spraybooth Servicing	Complete spraybooth service including certification and testing	£287.50
Compressor Servicing	Service support for compressed air systems excluding parts	£102.50*
Air Conditioning Machine Servicing	Service support and maintenance facility including repairs, training and F-gas assessments	£205.00
WELDING EQUIPMENT SERVICING		£30.00
Spray Gun Repairs	For a variety of spray guns regardless of manufacturer carried out in fast response time	CALL
Waste Collection		CALL

The above prices do not include any parts that may be needed.

BREAKDOWN RESPONSE

Regardless of whether or not we have been maintaining your equipment on a service contract, you can take advantage of our prompt breakdown repair service. We understand the urgency of the situation and will dispatch most efficiently.

BREAKDOWN RESPONSE		FROM
Vehicle Lifts call out and repair	2 Post, 4 Post, Scissor Lift	£120.00
Air Conditioning Machine call out and repair	All Makes call out and repair	£75.00
Welding Equipment repair	Spot and Mig Welders, Plasma Cutters, Induction Heaters, TKR Riveters, Oxy/Acet Equipment, Dent Pullers	£30.00
Compressors call out and repair	All Makes call out and repair	£102.50

The above prices do not include any parts that may be needed.

CALIBRATION SERVICES

Once you give us your calibration contract, our database tracks when your MOT equipment is due – so your calibration will always be timely. Using only suitably accredited engineers, we aim to minimise equipment down-time.

CALIBRATION SERVICES		FROM
MOT Equipment Calibration	For both Car and Motorcycle equipment	CALL
Wheel Alignment	Alignment Systems calibrations	£200.00
Emission Analyser Calibration	Scheduled calibrations	£330.00
Tools Calibration	For a wide variety of tools including tyre gauge, torque wrench, pressure gauge, paint thickness & tracking sticks	£12.50*
Paint Scales Calibration	All Makes Paint Scales calibration	£75.00

The above prices do not include any parts that may be needed. Minimum charge for tool calibrations, prices above don't include admin or travel fee. Yearly calibration (2 gas, 1 smoke).

CERTIFICATION & TESTING

We will carry out your required inspections and issue the necessary certificates.

CERTIFICATION & TESTING		FROM
LEV Exhaust Ventilation System Test & Certification		£75.00
Spraybooths Smoke Clearance Test & Certification		£56.25
Spraybooths Breathing Air Quality Test		£75.00

The above prices do not include any parts that may be needed.

*Minimum quantity applies

*Finance example typically based on a 5 year lease purchase agreement. Finance subject to status, full terms and conditions available on request. Other finance options available. All prices exclude VAT at 20%. Price, availability and specification may change without prior notice. Warranty subject to manufacturers terms and conditions of use. Errors and omissions excluded. Offers valid until 30th September 2016. Prices correct at time of going to press: July 2016.

WEEKLY
FROM ONLY **£25.68⁺**
ONLY **£5,095.00**

We now offer Calibration and Servicing Contracts on Bosch and Crypton Emission Analysers

Our own national team of engineers are now authorised to carry out the mandatory six-month calibrations on Bosch and Crypton emissions analysers.* Once on contract, there is no need to remember when the calibration is due; the engineer will turn up on schedule. Whilst there, the emissions analyser will be checked over and you will be advised and quoted for any serviceable or replacement items needed to maintain the machine in top working condition.

WHAT IS INCLUDED?

- Gas/Smoke Calibration in line with MOT compliance
- Routine consumables used at time of calibration, if required (i.e. filters)
- Quotes to replace Serviceable items e.g. probes and oxygen sensors, printers and batteries
- Quotes to carry out VOSA software updates (when applicable)

Calibration contracts on other makes (John Bean, Premier Diagnostics, Bradbury) are also available via third party. Ask your branch for details on setting up a calibration contract, and have one less thing to worry about.

*Applies to current models. For older models, please check for confirmation

TECALEMIT SF/8909/H – AZUR 3 TON 2 POST LIFT WITH BASE FRAME 576 77 0230

The SF 8909 is a Tecalemit's long standing 2 post mechanical lift of proven quality and reliability. Suitable for lifting a broad range of cars and car derived vans, the SF 8909 offers and outstanding value for money. The operating nuts carry a special 5 year warranty and the recently updated arm design now accommodates many vehicles with body styling kits and lower skirts covering the sill area.

- Suitable for lifting most passenger cars and car derived vans
- Automatic arm locking
- 5 Year warranty on self-lubricating Nylatron operating and safety nuts
- Low minimum lifting pad height of just 90mm
- Foot/toe protection device using an audible buzzer
- Heavy duty base-frame

WEEKLY
FROM ONLY **£10.71⁺**
ONLY £2,125.00

TECALEMIT SF/9207 – SENTINEL 4 TON HYDRAULIC 2 POST LIFT WITH BASE FRAME AND 3 STAGE ARMS 577 77 0370

The SF 9207 is mounted on a heavy duty steel base frame which ensures a stable lifting platform and the minimum lifting pad height of only 100mm ensures that even vehicles with low ground clearance can be accommodated on the lift.

The lift has 3 stage arms enabling the lift to be used on a wider range of vehicles.

- Electro-hydraulic operation
- Asymmetric lifting arms 3 stages for lifting a wide range of vehicles
- Rapid lifting time
- Structural base frame
- Electronically controlled safety latches

L4000 M/E 2 POST 4 TON HYDRAULIC LIFT

This value lift has a lot to offer. Symmetric 3 stage arms offer wide flexibility of chassis as well as being able to accommodate vehicles driving on or reversing on. Electro-magnetic safety locks conveniently release at the push of a button. (A manual lock release version of this lift is also available)

Hydraulic hoses and balance cables are all fully concealed, providing a clean appearance.

The double hydraulic cylinders and high strength chain drive provide smooth lifting and lowering.

The two sets of arms always travel synchronously thanks to high strength balancing cables.

An emergency lowering valve can be manually operated to lower the lift safely in the event of a power failure.

Meanwhile, a flow-control valve prevents the possibility of a rapid uncontrolled descent

Door rubbers on the posts protect the car doors from direct contact, and sill protector rubbers on the upper arms perform the same function protecting the undersides of longer chassis vehicles

- Minimum pad height 110 mm
- Drive-thru width 2486 mm
- Maximum Lifting Height 1950 mm
- Lifting time 40-50 sec
- Lowering time 20-40 sec

Do you have unwanted water and particulates within your compressed air system?

- Is water affecting your application at point of use?
- Are your tools failing and rusting due to water ingress?
- Are you tired of replacing filter elements?

The Original Dropout® is a unique, scientifically engineered, patent protected multi-stage Compressed Air Filter that removes 99.9999% of Water and 99% solid particulates down to 1 Micron. This unique multi-stage compressed air filter performance is constant regardless of the flow rate.

**JUST DRAIN PERIODICALLY AND CONTINUE USING
AT THE SAME HIGH EFFICIENCY**

- Dropout provides a low maintenance, robust solution for unwanted water and particulates within your compressed air system
- Dropout requires no mains power to operate and can accommodate for pulsed flows or stop/start with instantaneous recovery
- Install Dropout at point of use to guarantee water free, clean air
- ISO 12500 accredited so you can be confident Dropout is as good as advertised

Match your Dropout to your compressed air output – start enjoying the benefits

Selecting the right compressor

When selecting the right air compressor, the tank size is important. A small tank will overwork the motor. It is equally if not more important to select an air compressor that provides enough cubic feet per minute (cfm) of airflow. CFM is going to determine how many tools you can run, and whether each tool will function at its best.

BR 40/10 C HEAVY-DUTY FLOOR SCRUBBER DRIER 546 77 108D

Kärcher's BR 40/10 heavy duty scrubber drier makes cleaning small to medium hard floors easy, delivering outstanding results and helping to keep your workshop safe and compliant with VOSA regulations. Featuring twin counter-rotating brushes and twin rubber squeegees, the BR 40/10 cleans and dries hard floors in a single pass. By turning the vacuum system off, the machine can be used for deep cleaning of heavily soiled areas.

Working width – 400mm
Fresh/dirty tank – 10Ltr
Power – 2170W (240V)
Area – 400m² p/h
