UA INNOVATION LABS

PERFORMANCE

Every Under Armour® product is doing something for you: it's making you better. Following are the core pieces of DNA that deliver on this promise. The building blocks of performance.

We've developed a tiered system of water and wind protection to equip athletes facing any and every wet weather situation imaginable. From drizzle to steady rain to hurricane, we will keep you dry so you can perform better.

 **STORM¹**

WATER-RESISTANT

 **STORM²**

HIGHLY WATER-RESISTANT
& WINDPROOF

 **STORM³**

WATERPROOF & WINDPROOF

CHARGED

Under Armour created Charged Cushioning to take the force out of surface impact and convert it into responsive comfort. It makes you feel good and, more importantly, it makes you better.

 **clutch^{fit}**

UA ClutchFit™ Technology provides a second skin of advantages that activates under pressure, locking you in with superior fit and feel..

**UNDER ARMOUR®
SCENT CONTROL**

Our revolutionary scent technology combines synthetic Zeolites with the anti-microbial power of Silver to trap and suppress the growth of odor, and keep you undetected.

PRIMALOFT® insulation is lightweight, water-resistant, and breathable, with the ability to be compressed without losing its superior warmth.

Waterproof and breathable GORE-TEX® products are made of the very toughest fabrics and is thoroughly tested to guarantee performance even after serious wear and tear.

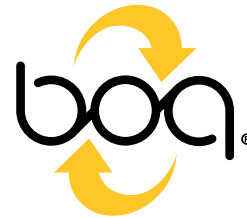

Ortholite insoles provide a cooler and drier shoe environment with long term cushioning and maximum comfort underfoot.

Cupron® EPA-registered anti-fungal fibers kill 99.9% of Trichophyton mentagrophytes (Athlete's Foot fungus) after 12 hours of contact with the sockliner.

Engineered for low to very low temperatures, The VIBRAM® IceTrek rubber compound provides unparalleled grip and traction on icy surfaces and cold terrain.

Boa® Closure System

The M3 dial, featuring a 1:1 gear ratio, offers quick lace uptake and powerful closure for mid-cut outdoor footwear. The NC77 lace, composed of a 7x7 stainless steel core with nylon coating, provides strength, flexibility & durability.

Developed for the user who frequently encounters slippery surfaces, VIBRAM® Megagrip offers an incomparable combination of grip and durability.

FAT TIRE

- 1 Strong sculpture on toe for optimal traction.
- 2 Alternate middle sculptures for a 360° traction.
- 3 Low distance rate between sculptures to guarantee wide contact surface during walking.
- 4 Multidirectional sculptures to improve traction and lateral stability.
- 5 Alternate sculptures for excellent slope-crossing traction.

VERGE

- 1 Alternate middle sculptures for a 360° traction.
- 2 Siped massive sculpture for better later stability, slope crossing, traction and adherence.
- 3 Flex groove on heel for adaptability during heel striking.
- 4 Low distance rate between sculptures to guarantee wide contact surface during walking.

UA FAT TIRE T

#1266210

\$64.99

7-13 WHOLE SIZES ONLY

- Inspired by Fat Bikes. These bikes have oversized tires which allows them to run at a lower PSI and Bounce over the Terrain. They can essentially ride through anything and go anywhere.
- HeatGear® lined synthetic strap offers custom fit and comfort.
- We took our bouncy Charged Cushioning and bottom loaded a softer high rebound foam / This allows the shoe to be responsive yet morph/adapt to the terrain.
- We partnered with Michelin for the optimum outdoor compound and traction pattern / This traction has excellent cross-slope grip and optimum all terrain traction.
