LION
BATTERIES

AUTOMOTIVE BATTERIES

We are proud to introduce to you the extensive Lion battery range which covers not only the automotive market, but also batteries specifically designed for a number of applications including commercial, motorcycle, marine, leisure, mobility and golf.

Lion Automotive batteries are designed for maximum starting power, completely maintenance free and meet the highest quality standards.

Manufactured using the latest calcium technology to withstand higher temperatures with improved shelf life and overall performance.

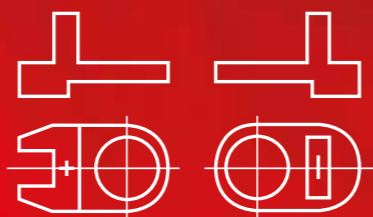

All Lion batteries are sourced only from factories that have a long respected history in battery manufacturing.

LION BATTERIES

MOTORCYCLE BATTERIES

The LION Motorcycle battery range brings together a great combination of leading technology, robust design and engineering. All Lion Motorcycle batteries are designed for increased power and longer life.

The Lion motorcycle range also covers quads, jet-ski and off-road bikes, from conventional types to the latest AGM technology including AGM factory sealed which are 100% maintenance free.

The 10 most popular references alone cover 55-60% of the market, including many popular 400-900cc models from Ducati, Honda, Suzuki and Yamaha.

LION
BATTERIES

COMMERCIAL BATTERIES

The Lion Commercial battery range covers a huge range of heavy goods vehicle (HGV) and agricultural applications, including sleeper cabs, tail lifts and refrigeration units.

Commercial batteries must be resilient to the great stresses placed upon them, so Lion offers a two year warranty for complete peace of mind.

AGM TECHNOLOGY BATTERIES

AGM is the leading technology on the market for the most exacting requirements. AGM batteries are engineered to cope with the excess heat created by regenerative braking and the continuous on/off action of the Stop-Start system. Importantly they power the electrics when the engine is in "sleep mode", at traffic lights or stuck in jams.

- Longer service life
 - Greater deep cycle resistance
 - Excellent charge acceptance
 - Improved starting performance
 - Leak-proof and maintenance-free
- The distinctive yellow colour helps to differentiate them from standard batteries.

Euro Car Parts Part No	UK Reference	AH / CCA	Dimensions	Terminal Layout	Terminal Type
444 77 0091	009 AGM	45AH / 325CCA	L236 x W125 x H224	1	JIS

444 77 7001	019 AGM	95AH / 850CCA	L353 x W175 x H190	0	Standard Round

LION BATTERIES

EFB TECHNOLOGY BATTERIES

EFB technology satisfies requirements that lie somewhere between conventional starter batteries and AGM technology.

Like AGM, EFB batteries power the electrics when the engine is in "sleep mode". They ensure that sufficient energy is always available, even when a large number of

energy consumers are operating during the stop phase.

- Longer service life
- Double the cycle resistance of standard
- Reliable starting in extreme temperatures
- Outstanding charge acceptance
- Maintenance-free

Euro Car Parts Part No	UK Reference	AH / CCA	Dimensions	Terminal Layout	Terminal Type
