ALLOY WHEEL BLAST CABINET

- Quick dry blasting application for damaged alloy wheels
- Provides quick paint preparation on wheels
- Effectively removes alloy corrosion
- Can be operating either via a suction or pressure fed system

SUCTION: Scotches prior to paint- ideal for quick, smart repairs

PRESSURE: Removes layers of paint and corrosion and strips wheels back to bare metal

- Various extraction and cyclone systems are available
- Compact cabinet contains dust
- Reduces manual labour
- Internal spigot complete with pivoting arm to hold the wheel in place during the blasting process

SUCTION FEED

WHEEL BLAST UNIT

OPT.WHEELBLASTER-A

- Scotches the wheel prior to final preparation in minutes
- Does not strip the wheel
- Blasts, washes and scotches all in one application
- No additional washing or drying machines needed
- Ideal for quick, same day repairs
- 100% dust-free wet blasting process
- Internal spigot holds the wheel in place
- Optional pneumatic wheel lift for ease of loading
- Price includes delivery, commissioning and operator training
- Optional closed loop system

WEEKLY
FROM ONLY **£65.49⁺**
ONLY **£12,995.00**

CLOSED LOOP SYSTEM

TRYAX TY30-VS VERTICAL DIAMOND CUT ALLOY WHEEL LATHE 597 77 8120

**SAVES TIME
MAXIMISES WHEEL THROUGHPUT**

THE TY30-VS is ushering in a new era for diamond cut alloy wheels. This CNC vertical alloy wheel lathe is characterised by its innovative purpose-built design. Built from the ground up both mechanically and electrically, the system offers an easy-to-use touchscreen interface coupled with the latest state-of-the-art real-time control software driving the latest in motion-control digital drive technology.

The CNC is equipped with 15" multi-touch screen and offers user-friendliness and precision coupled with reliability.

An ultra-fast digitiser option is capable of probing a typical 20" wheel in around 3 minutes.

- Cuts wheels from 14" to 30" in diameter.
- Fully automated and easy for staff to use.
- Intuitive, easy to use touchscreen interface.
- Automated self-plotting digitizer does all the hard work for you.
- Simple two stage process – 1 digitise wheel, 2 cut wheel.
- Compact design saves on valuable workshop space.

The WS400 & LS400 spray guns have pre-atomizing nozzle technology, which is able to deliver a consistent droplet size when spraying. This technology also offers a long straight and even fan pattern.

In addition the WS400 & LS400 spray gun range are equipped with stainless steel fluid passages ideal for any type of material, solvent borne or waterborne. The angle of the gravity cup has been pitched to make it easier to obtain the correct gun position when spraying larger more difficult areas such as roofs and bonnets.

The larger thread pattern on the air-cap makes it easier to remove when cleaning, also this range does not have a baffle fitted between fluid tip and gun body resulting in a more precise fit with less maintenance and replacement parts needed.

GTI PRO-LITE SPRAY GUNS

- Ergonomic gun body design
- Ultra high flow fluid tips provide superb versatility across a range of viscosities
- Revolutionary air valve design gives smoother feel for even greater air and paint control for ease of fade-outs and blend-ins
- Simplified, user friendly components provide easy cleaning and maintenance
- Precision engineered using lightweight and durable alloy components for a tough spray gun that is 25% lighter than the GTi Pro Digital
- Enhanced ergonomics combined with the GTi Pro's legendary fit and feel ensure incredible handling and balance
- A coaxial linear air valve eliminates the need for separate air and fluid control valves for a smooth, kick-free trigger action, easy cleaning and maintenance
- Four advanced atomisation technology air caps for perfect paint performance in all climatic conditions (T110, TE20, HV30, TE10)
- New for 2016 – GTi Pro Lite sprayguns are available in blue, black or gold

ONLY **£254.99**

SRI PRO-LITE SPRAY GUNS

- Designed for small repair work
- Lighter trigger control which allows more control for repair areas
- Lightweight design means improved spray gun handling
- Better fit and feel with more comfort and control
- Various air caps to suit the different and latest refinishing materials used when spraying (TE5, HV5, MC1)

ONLY **£205.99**

PRI PRO-LITE SPRAY GUNS

- Advanced technology 'Trans-Tech' compliant air cap for fast working speed
- Good transfer efficiency (paint to panel).
- Suitable for all paints including latest generation waterbase materials
- First class atomisation and material distribution
- Large spray pattern for fast and easy application
- Drop forged aluminium spray gun body, anodised Complete with airflow "cheater" valve
- Utilises new design air valve for smooth triggering control
- All new ergonomic spray gun body with improved "fit and feel"
- Five fluid tips to choose from (1.4, 1.6, 1.8, 2.0, 2.5)

ONLY **£179.99**

SATAJET 5000 B SPRAY GUNS

- Optimised nozzle concept for highest possible versatility concerning Inlet Pressure and spray distance
- Ergonomically shaped gun handle
- Pearlchrome™ surface for easy cleaning, corrosion resistant
- Easy to adjust control elements
- Safely positioned trigger sleeve – for easy, safe and quick insertion of the paint needle
- Swivel joint with new high performance seal
- Identical compact-size gun handle for non-DIGITAL and DIGITAL spray guns
- Optimised half-turn spray fan control

The “Super Saver“ SATAjet 5000 B HVLP achieves particularly high transfer rates, due to its low pressure technology.

The “Super Speed“ SATAjet 5000 B RP with its optimised high pressure technology for maximum application speed and minimum overspray.

Both versions are extremely versatile in application, meeting highest expectations concerning excellent finishes, while far exceeding 65% transfer efficiency rates in accordance with VOC legislation.

No adapter required – SATA RPS disposable cups fit directly on the SATAjet 5000 B – for reduced weight and cleaning effort

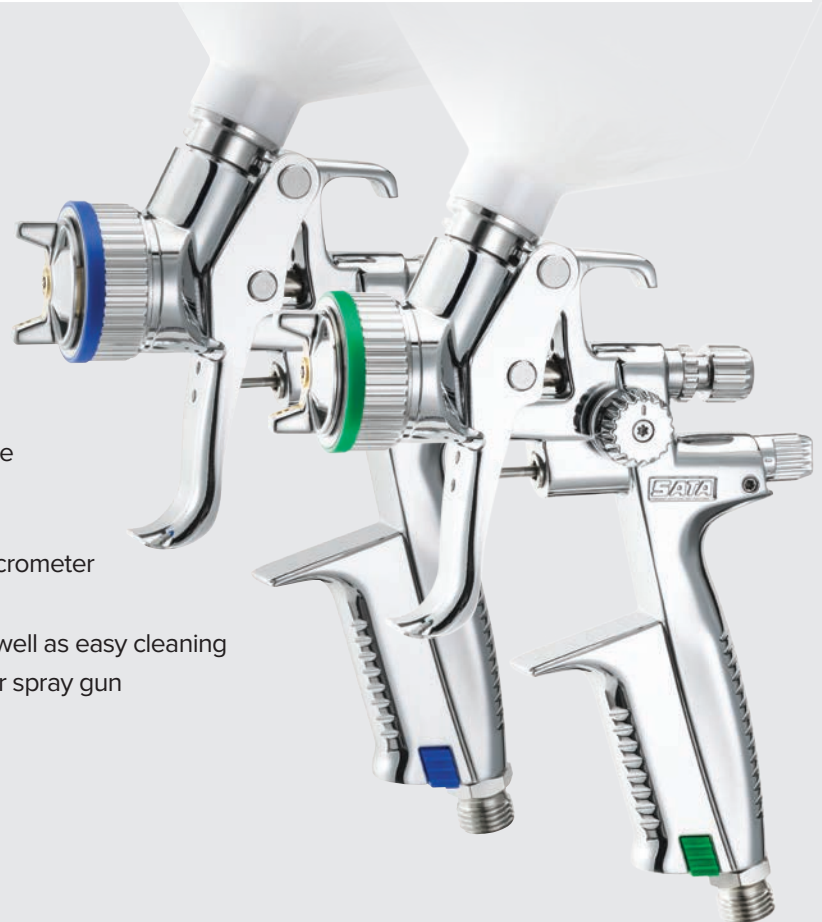

Pressure under control – the DIGITAL® option:
Integrated pressure gauge – to ensure perfect reproducibility

FROM ONLY **£399.99**

SATAMINIJET 4400 B SPRAY GUNS

- Small size – big performance
- For small surfaces and areas of difficult access
- HVLP and RP nozzle sets
- Special SR nozzle sets for the smallest spot repairs (Spot repair)
- New ergonomically shaped handle
- Easy cleaning and maintenance
- Large cup connection QCC for all RPS cup sizes
- Highly flexible in terms of atomisation pressure and spray distance
- VOC-compliant atomisation technology – optionally available as HVLP low pressure or RP optimised high pressure technology
- Adam 2 Compatible: Innovative and versatile digital retrofit air micrometer
- Perfectly suitable for the use of RPS disposable cups
- QCC Quick Cup connection for quick and clean cup changes as well as easy cleaning
- CCS Colour Code System for the convenient identification of your spray gun
- Top quality is not enough - we guarantee it: for three years

FROM ONLY **£194.99**

DEVILBISS PROVISOR COMPLETE VISOR KIT WITH WAIST DEV.PROV-600

- Disperses breathing air gently around the lightweight visor at a positive pressure
- No misting or discomfort
- Provides excellent and much wider peripheral vision than sprayers will be used to
- Removable peak reduces glare from Spraybooth lighting
- Plenty of room to cater for sprayers who wear spectacles
- Replaceable clear visor covers available in packs of 10 and 50
- Gun supply hose swivels both radially and laterally, ensuring better spray dynamics without the hose restricting the sprayers movement.
- Anti-static and anti-kink head piece supply hose.
- Anti-static head piece.

ONLY **£195.99**

IWATA KIT FULL FACE AIRFED MASK SYSTEM CLASS 3 IWA.VIUAF2010KIT

- Provides protection against airborne dusts, mists, gases and vapours
- Offers respiratory protection to class 3 and hence offers a protection factor of up to 200
- Can be used in areas where the concentration of contaminant in the workplace air is up to 200 times the Occupational Exposure Limit

ONLY **£159.99**

SATA® VISION 2000 AIR FED FACE MASK SAT.69500

- Lightweight, comfortable breathing hood thoroughly protects the face, hair and neck from over spray
- Also suitable for persons wearing glasses and persons with short beards or moustaches
- Fresh air is supplied steadily through a silencer to the hood without drafts
- Air supply has a variable adjustment according to the users requirements
- Shut-off system prevents airflow from being completely shut off.
- Compact activated charcoal filter is worn on the belt in a protective cage and removes oil vapour and gases

ONLY **£338.99**

IWATA 3 STAGE FILTER REGULATOR IWA.TSFR13603

The TSFR13603 is a high quality 3-stage filter unit providing safe, breathable air for the spraybooth. 60cfm from the first filter provides enough air to run two spray guns, plus high quality breathable air for up to two air-fed masks.

- Technical Specifications
- Max operating pressure: 0 - 10 bar
- Max operating temperature: 80°C
- Max inlet flow: 15 bar
- Drain valve, semi automatic

Selecting the right compressor

When selecting the right air compressor, the tank size is important. A small tank will overwork the motor. It is equally if not more important to select an air compressor that provides enough cubic feet per minute (cfm) of airflow. CFM is going to determine how many tools you can run, and whether each tool will function at its best.

HPC COMPRESSORS

HPC Compressed Air Systems is recognised as a gold standard in the industry, supplying innovative products and system solutions to quality bodyshops, commercial vehicle workshops, garages and other automotive applications. A leader in the UK market for fifty years, HPC's "yellow-box" compressed air systems are renowned for their quality, reliability and efficiency.

HPC Screw Compressors provide quality compressed air at affordable prices:

- Quiet, energy efficient & reliable
- Minimal installation required
- FREE OF CHARGE - HPC 5 years 'NO QUIBBLE' warranty (Subject to an HPC Service agreement)

HPC refrigeration dryers provide dependable drying and ensure high efficiency performance. With their compact footprint they are exceptionally versatile and are ideal for locations where space is at a premium. Removing moisture from compressed air helps to prolong the life of pipe work and air tools whilst improving compressed air quality.

Ask your branch for expert advice on HPC compressors. With HPC, you can optimise the efficiency and quality of your compressed air system.

CALL FOR A QUOTE

Do you have unwanted water and particulates within your compressed air system?

- Is water effecting your application at point of use?
- Are you tools failing and rusting due to water ingress?
- Are you tired of replacing filter elements?

The Original Dropout® is a unique, scientifically engineered, patent protected multi-stage Compressed Air Filter that removes 99.9999% of Water and 99% solid particulates down to 1 Micron. This unique multi-stage compressed air filter performance is constant regardless of the flow rate.

JUST DRAIN PERIODICALLY AND CONTINUE USING AT THE SAME HIGH EFFICIENCY

- Dropout provides a low maintenance, robust solution for unwanted water and particulates within your compressed air system
- Dropout requires no mains power to operate and can accommodate for pulsed flows or stop/start with instantaneous recovery
- Install Dropout at point of use to guarantee water free, clean air
- ISO 12500 accredited so you can be confident Dropout is as good as advertised

Match your Dropout to your compressed air output – start enjoying the benefits

Spray Gun Repairs	For a variety of spray guns regardless of manufacturer carried out in fast response time	CALL
Waste Collection		CALL

The above prices do not include any parts that may be needed.

BREAKDOWN RESPONSE

Regardless of whether or not we have been maintaining your equipment on a service contract, you can take advantage of our prompt breakdown repair service. We understand the urgency of the situation and will dispatch most efficiently.

BREAKDOWN RESPONSE		FROM
Vehicle Lifts call out and repair	2 Post, 4 Post, Scissor Lift	£120.00
Air Conditioning Machine call out and repair	All Makes call out and repair	£75.00
Welding Equipment repair	Spot and Mig Welders, Plasma Cutters, Induction Heaters, TKR Riveters, Oxy/Acet Equipment, Dent Pullers	£30.00
Compressors call out and repair	All Makes call out and repair	£102.50

The above prices do not include any parts that may be needed.

CALIBRATION SERVICES

Once you give us your calibration contract, our database tracks when your MOT equipment is due – so your calibration will always be timely. Using only suitably accredited engineers, we aim to minimise equipment down-time.

CALIBRATION SERVICES		FROM
MOT Equipment Calibration	For both Car and Motorcycle equipment	CALL
Wheel Alignment	Alignment Systems calibrations	£200.00
Emission Analyser Calibration	Scheduled calibrations	£330.00
Tools Calibration	For a wide variety of tools including tyre gauge, torque wrench, pressure gauge, paint thickness & tracking sticks	£12.50*
Paint Scales Calibration	All Makes Paint Scales calibration	£75.00

The above prices do not include any parts that may be needed. Minimum charge for tool calibrations, prices above don't include admin or travel fee. Yearly calibration (2 gas, 1 smoke).

CERTIFICATION & TESTING

We will carry out your required inspections and issue the necessary certificates.

CERTIFICATION & TESTING		FROM
LEV Exhaust Ventilation System Test & Certification		£75.00
Spraybooths Smoke Clearance Test & Certification		£56.25
Spraybooths Breathing Air Quality Test		£75.00

The above prices do not include any parts that may be needed.

*Minimum quantity applies

*Finance example typically based on a 5 year lease purchase agreement. Finance subject to status, full terms and conditions available on request. Other finance options available. All prices exclude VAT at 20%. Price, availability and specification may change without prior notice. Warranty subject to manufacturers terms and conditions of use. Errors and omissions excluded. Offers valid until 28th February 2017. Prices correct at time of going to press: August 2016.

The Junair name is synonymous with innovation in spraybooth development, providing solutions that deliver energy-savings, higher productivity, enhanced performance and, ultimately, increased profitability. The inherent design flexibility and in-house British manufacture allows any booth to be tailored to suit individual dimensions and performance requirements.

1 SERIES SPRAYBOOTH OVEN 597 77 8190

The Junair 1 Series spraybooth oven has been developed for customers who want an economical, low cost spraybooth oven, but also require a high quality construction, excellent performance and unrivalled reliability. There are many features on this spraybooth that are normally associated with higher cost equipment. There is a compact roof mounted air handling plant option for installations where space saving is critical. This is a semi downdraught spraybooth with rear extraction, requiring no floor excavation. The 1 Series spraybooth can be designed and built to any size to accommodate vans, light commercial vehicles and special vehicles.

WEEKLY
FROM ONLY **£144.64[†]**
FROM ONLY **£28,699.00**

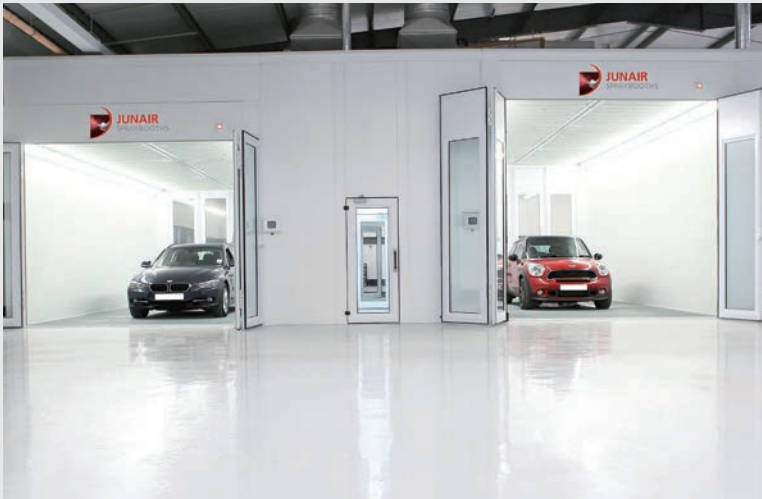

3 SERIES SPRAYBOOTH OVEN 597 77 8210

The 3 Series is the mid-range spraybooth which can be designed and built to your individual requirements, offering enhanced features to increase the quality of your paint finish. The quality of construction and component selection make this spraybooth top in its class. Fully glazed doors improve vision into and out of the cabin. The LEVAC floor, an option on the 3 Series spraybooth, delivers excellent downdraught performance on a fully extracted floor just 140mm high, requiring no floor excavation.

WEEKLY
FROM ONLY **£165.81[†]**
FROM ONLY **£32,899.00**

[†]Finance example typically based on a 5 year lease purchase agreement. Finance subject to status, full terms and conditions available on request. Other finance options available. All prices exclude VAT at 20%. Price, availability and specification may change without prior notice. Warranty subject to manufacturers terms and conditions of use. Errors and omissions excluded. Offers valid until 28th February 2017. Prices correct at time of going to press: August 2016.

5 SERIES SPRAYBOOTH OVEN 597 77 0550

The 5 Series spraybooth oven is the flagship model. Combining state of the art technology with an outstanding build quality to offer the most advanced spraybooth on the market. With energy saving and production enhancing equipment the 5 Series spraybooth oven delivers the highest quality paint finish at the lowest cost per unit. Three leaf door set for wide opening and a LEVAC or EVAC fully extracted and balanced floor are incorporated into the 5 Series spraybooth oven as standard. In combination with the full width and full length plenum, the downdraught airflow through this cabin is second to none.

WEEKLY FROM ONLY **£227.55[†]**
FROM ONLY **£45,149.00**

DUO SPRAYBOOTH OVEN 597 77 8220

The Junair Duo spraybooth oven has been developed to meet the increasing demand for additional priming facilities and 'fast track' work. The Duo spraybooth has the option of a LEVAC floor (LEVAC is a surface mounted design, unique to Junair, requiring no builders-work excavation), pit or rear extraction. The double width cabin shares a central air handling plant making this unit very cost effective. Two vehicles can be processed at the same time, sharing a common bake cycle which also dramatically reduces energy cost per unit. Small top coat repairs can also be completed in the Duo spraybooth making it an extremely versatile addition for high throughput Bodyshops and 'fast track' work.

WEEKLY FROM ONLY **£228.31[†]**
FROM ONLY **£45,299.00**

MULTIBOOTH OVEN 597 77 8230

The Junair MultiBooth has been designed and developed to offer a flexible solution for those undertaking small to medium cosmetic repairs in a clean, controlled and safe environment.

This flexible spraybooth solution allows you to prepare, spray and fully bake a vehicle in the same cabin, eliminating vehicle movements. Each bay is designed as a combination preparation bay and full low-bake spraybooth, simply move the sliding door to the required cabin to convert it into a fully operational spraybooth.

Contact your local branch for more information.

If lack of space to expand your business is holding you back, the opportunity for incremental business can be met by housing the additional equipment and operations in a Repair Qube.

Ideally suited to dedicated 'fast track', 'smart', or same-day repairs, the Repair Qube brings a new dimension to workshop Innovation, providing an instant portable repair facility that can be rapidly installed and even re-sited without too much fuss.

Repair Qube is the complete 'workshop in a box'. The pre-assembled modular units require a footprint of approximately six parking spaces and arrive equipped with load-bearing floors, two oversized repair bays, a room for ancillary equipment, reception and welfare areas, as well as parts/goods storage facilities.

It can operate as an independent site on an electrical generator or off mains electrical services, and can use directly connected or integrated LPG gas supplies.

A Repair Qube can be wrapped with any bespoke corporate identity. It can accommodate almost any equipment requirement, and complies with all legislation.

[CALL FOR A QUOTE](#)

Our Projects team have ample experience planning and installing the Repair Qube, and will be only too happy to assist you undertaking this exciting new capacity to your business. The team will assess, advise, carry out site survey work, discuss Return on Investment projections, assist on a fixed-fee basis with planning permission – and of course undertake the project implementation from beginning to completion.

Give us a call – and expand the limits of your ambitions.
One call for complete peace of mind

Repair Qube

Rowley Spraybooths have over forty years experience in the manufacture, installation and maintenance of Spraybooth ovens in the finishing/refinishing industry. All Rowley Spraybooth oven equipment is manufactured in the UK at their manufacturing facility located in Cannock, Staffordshire.

AERO-ECO SPRAYBOOTH OVEN 597 77 8240

Featuring dynamic air moving plant and an energy efficient control system the AERO-ECO Spraybooth oven is designed to deliver ultimate economy with ultra-low running costs. The AERO-ECO Spraybooth has a spacious cabin constructed from modular single 'skin' (or double 'skin') bright galvanised steel panels with good lighting and wide access component doors. Utilising rear chest extraction and compact air handling plant the AERO-ECO Spraybooth

provides the perfect painting environment for any type of work. The tunnel airflow design provides excellent paint over spray mist clearance during spraying operations and uniformity of air temperatures on spray and bake modes.

WEEKLY FROM ONLY **£62.97***
FROM ONLY **£12,495.00**

AERO-MAXI SPRAYBOOTH OVEN 597 77 8250

The AERO-MAXI Spraybooth oven range is a high specification Spraybooth oven that provides the highest quality environment for all types of paint application and low bake curing operations. The larger AERO-MAXI Spraybooth oven cabin is constructed using modular double 'skin' fully insulated panels to give good thermal retention, rigidity and sound dampening. Utilizing a rear chest extraction expensive underground extraction pit works are not required and this allows the

installation to be easily relocated. This tunnel airflow design provides excellent paint over spray mist clearance during spraying operations and uniformity of air temperatures on spray and bake modes. The high air flow and integral flash off mode makes the AERO-MAXI Spraybooth oven ideally suited for use with water based paint systems.

WEEKLY FROM ONLY **£78.09***
FROM ONLY **£15,495.00**

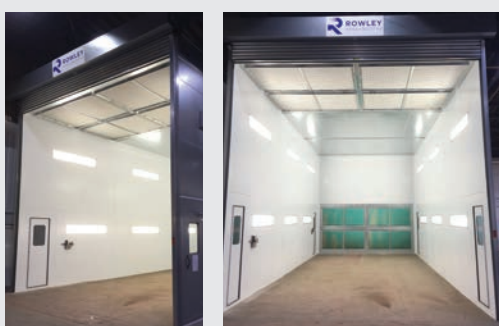

AERO-MIDI SPRAYBOOTH OVEN 597 77 8260

The spacious AERO-MIDI cabin is constructed using modular double 'skin' insulated panels to give good thermal retention, rigidity and sound dampening. Utilizing a rear chest extraction expensive underground extraction pit works are not required and this allows the installation to be easily relocated. This tunnel airflow design provides excellent paint over spray mist clearance during spraying operations and uniformity of air temperatures on spray and

bake modes. The air flow also makes the AERO-MIDI ideal for use with water based paint systems.

WEEKLY FROM ONLY **£95.73***
FROM ONLY **£18,995.00**

AERO-INDUSTRIAL/COMMERCIAL SPRAYBOOTH OVEN 597 77 8270

The Industrial and Commercial Spraybooth oven range can be designed to meet customer's specific requirements for Spraybooth ovens. The flexible modular design allows the cabin size and air flow

requirements to be made to suit the products being painted.

Choosing the Right Spraybooth

Installing a spraybooth is a huge investment and potentially very disruptive; so choosing the right booth can be as much about the right partners as the right equipment. So, what is important in choosing your biggest investment? Here are some points to consider.

PLANNING/ DESIGN

Where is the best position for the new Booth? Where the old one is [more downtime] or a different position [maybe better efficiency]? In some cases the booth can only go where the old booth was to retain the flow of work through the bodyshop – in other cases a fresh pair of experienced eyes might offer a novel and more efficient layout alternative.

Where are the services [gas & electric] in relation to the booth position – these can be expensive to connect so an accurate survey is important to avoid unpleasant surprises.

Are there any options or design developments that either improve performance or save me money?

Our Projects team carry out free site surveys and designs and will work with you to deliver the best product in the best position to suit your current and anticipated future needs.

CAPACITY

How big does the Booth need to be to handle all your current work, and to accommodate future growth?

Do you anticipate taking on vans? If so, you may need to consider a high-top booth.

For high-volume bodyshops, booth capacity can make the difference between an acceptable through-put or significant growth. For example, many bodyshops now use extended length booths that can take more than one vehicle or one vehicle and all the off-car panels, bumper etc which reduces the unit energy costs AND increases productivity.

Our Projects Team have the creative design flair that can make all the difference getting the most potential capacity from your booth.

OPERATIONAL

How much will it cost?

Cost has two elements: capital cost and running cost. Together these are often called “Whole life costs”

Over 5 years, Based on 25 jobs per week		
Capital Booth Cost	£20,000	£30,000
Running cost per Spray and Bake cycle	£12	£5
'Whole Life' Cost	£95,000	£61,250
Saving		£33,750

Example excludes VAT

In this example, the higher capital cost booth incorporates superior energy saving technology and as a result, is less than 2/3 whole life cost against the ‘cheaper’ booth. Our Projects team will advise on the best package for you including taking into account running costs and available energy saving packages. Make sure to ask our team whether and how your running costs can be improved by 65%.

AFTERSALES

What is the warranty, support and service back-up being offered?

This becomes more important over time. What is the service delivery promise given? You do not want to leave it until you need them to find out that your wait times are below your expectation. Where is the product made? Will the place of manufacture impact the availability of spares and consumables in the long term?

You can rely on the judgment of our Projects Team, gained over many years' experience, to give reliable and unbiased advice on where to set your expectations.

RUPES VACUUM UNIT

RUP.S145EPL-GB

Mobile units for extracting dust from sanding and various types of industrial work, fitted for connection to an electro-pneumatic and also suitable for fluid extraction.

- Multifunction Intelligent Control
- Equipped with 2 large filters
- Electrostatic charge dispersion device.
- Large dust and liquid container

ONLY **£409.99**

RUPES ANGLE POLISHER 200MM WITH ELECTRIC SPEED-CONTROL

RUP.LH18ENS

- New front ergonomic grip for comfortable and safe handling
- Electrical parts insulated with special resins for greater protection and longer life of the tool
- Soft start

ONLY **£170.99**

RUPES 3MM FLATBED ORBITAL SANDER WITH DUST EXTRACTION 70X198MM

RUP.RE21AL

- Universal application for sanding and preparing sheet metals and substrates
- Excellent working capacity in inaccessible areas, such as sections, beading and large-radius curved surfaces
- Preparation of substrates and fillers
- Ideal for working in small to medium-sized areas

ONLY **£170.99**

RUPES 3MM RANDOM ORBITAL PALM SANDER WITH DUST EXTRACTION 75MM

RUP.RA75A

- The special shape and size of the pad enables a great saving of time and consumables
- Tool body designed to provide optimum visibility of parts being worked on
- Supplied with soft pad to improve the performance of micro-fine abrasives

ONLY **£165.99**

RUPES SKORPIO 6MM RANDOM ORBITAL SANDER

RUP.RH256A

- 6mm orbit is suitable for finishing applications
- Best efficiency (time/result) in plaster smothering and paint removal without diminishing the final quality
- The random orbital movement makes it an easy tool to use while offering excellent performance

ONLY **£105.99**

*Finance example typically based on a 5 year lease purchase agreement. Finance subject to status, full terms and conditions available on request. Other finance options available. All prices exclude VAT at 20%. Price, availability and specification may change without prior notice. Warranty subject to manufacturers terms and conditions of use. Errors and omissions excluded. Offers valid until 28th February 2017. Prices correct at time of going to press: August 2016.

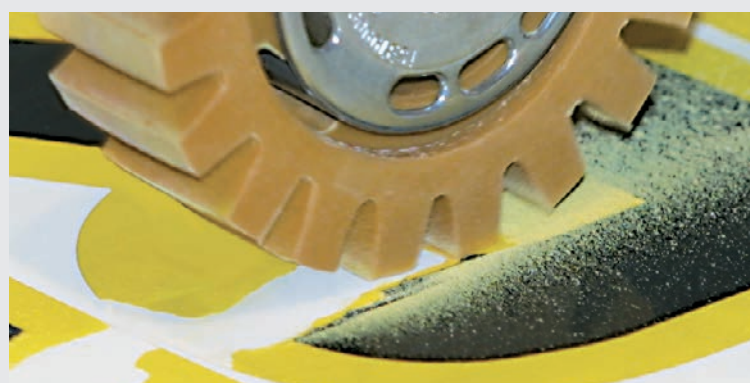

INDASA MBX SYSTEM

IND.NCNA145

The patented MBX technology has been developed specifically for the most effective removal of rust, underbody coatings, old paintwork and bonded sealants from vehicles undergoing repair. The MBX System achieves a finish previously only available by sand/shot blasting and the in-line design allows the operator to reach those hard to access areas. Centrifugal force within the belt housing creates a cushion of air to minimize vibration through the heat treated bristle belt.

Switching from the bristle belt to the rubber eraser wheel simply converts the tool for the removal of adhesive tapes and glue residues from panels without damaging paintwork.

- Robust heavy duty motor
- 3500rpm – variable speed regulator for operator control
- Lightweight and compact design
- Low vibration and noise – versatile and safe
- Hardened steel bristles – can be easily re-sharpened
- High performance polyamide fabric belt – tension resistant up to 440kgs
- 3 belt grades to suit application (11mm & 23mm width) – colour coded for ease of identification
- 31mm rubber eraser wheel
- The MBX machine is supplied with 3 bristle belts
- Item code: NCNA-145

Part no	Item	Grade	Colour
IND.DCA54	23mm bristle belt	Fine	Green
IND.DCA55	23mm bristle belt	Medium	Yellow
IND.DCA56	23mm bristle belt	Coarse	Black
IND.DCA58	23mm belt housing		
IND.DCA61	Eraser wheel		
IND.DCA94	11mm bristle belt	Fine	Green

3M™ BELT SANDER

MMM.28366

- Great for deburring, cleaning, blending and finishing in tight or hard-to-reach areas.
- Lightweight, durable construction and 0.6HP motor helps provide an excellent power to weight ratio.
- Tool can be used with both sizes of belts giving you two tools in one – 12.7mm & 20mm belt
- Both belt head and handle rotate a full 360° to easily access hard-to-reach areas.
- Innovative belt cover allows easy access for quick belt change.
- 3M™ Greptile™ grip gives a comfortable and secure grip.
- Warm composite housing minimises vibration for less operator fatigue.
- Comes complete with one standard arm (MMM.28368), 3M™ Air Tool Lubricant (MMM.20451) and both a steel and rubber drive wheel.

ONLY **£244.95**

3M™ ORBITAL SANDER

MMM.28508

Features an alloy steel curved-throttle lever with built-in wrist support. 3M™ Hookit™ clean sanding disc pad included. Precision balanced for smooth operation. Easily attaches to your existing central vacuum system for efficient dust evacuation.

- 6" (150mm) in Central Vacuum
- 3/16" (5mm) in Orbit

ONLY **£119.95**

3M™ ORBITAL SANDER

MMM.28509

Features an alloy steel curved-throttle lever with built-in wrist support. 3M™ Hookit™ clean sanding disc pad included. Precision balanced for smooth operation. Easily attaches to your existing central vacuum system for efficient dust evacuation.

- 6" (150mm) in Central Vacuum
- 3/32" (2.5mm) in Orbit

ONLY **£119.95**

3M™ ACCUSPRAY™ PRESSURISED HGP SPRAY GUN

MMM.16587

Designed for the application of multiple high viscosity coatings including:

- Underbody Coatings
- Stone Chip protection
- Polyester and other heavy bodied primers
- Marine Gel Coats & Adhesives

ONLY **£139.95**

3M™ PPS™ COLOUR CHECK LIGHT II

MMM.16550

A valuable tool for checking and approving quality at each stage of the repair process.

- Designed to make the colour matching and refinish process faster and easier
- Reduce labour paint and material costs
- Increase productivity
- Improve customer satisfaction
- Portable, handheld and chargeable

ONLY **£354.95**

*Finance example typically based on a 5 year lease purchase agreement. Finance subject to status, full terms and conditions available on request. Other finance options available. Gun & Parts Cleaning – Safe Solvents

**NO HASSLE
WARRANTY**

**BEST PRICE
PROMISE**

The full range of Safe Solvents Parts and Spray Gun Washing Machines and Solvents is now available from Workshop Solutions.

Safe Solvents® advanced technology cleaning fluids perform as well as traditional solvents, but without the hydrocarbons, fire risk, environmental damage, or price. Safe Solvents® solutions separate from oil (like normal solvent) and can be sent down the drain without worry. Safe Solvents® fluids require no specialist service contracts or waste collection – they're just simple and effective.

Old traditional solvents are a thing of the past when it comes to spray gun cleaning or parts washing.

Welcome to the new era, say goodbye to your waste collection contract.

SAFE SOLVENTS® 25L ADVANCED GUN WASH FLUID 597 77 8150

- Suitable for ALL paint types
- Non-flammable
- Fast, effective gun cleaning
- Store & Use anywhere
- No hydrocarbons
- Safe for drains (Usage & Disposal Terms apply)

ONLY **£94.00**

SAFE SOLVENTS® 25L ADVANCED PARTS WASHING FLUID 592 77 4720

- Non-Flammable
- Contains no hydrocarbons
- No toxic smell
- Requires no specialist storage or transportation arrangements
- Safe for drains (small waste license required)
- Separates from oil

ONLY **£79.00**

Induction heating speeds up and simplifies the removal of bonded components (windcreens, plastic trim, bonded badges, stickers, etc), or stuck and seized metal parts such as nuts, bolts, track rod ends, bearings and gears

POWER-TEC SMART INDUCTOR 5000 LAS92363

Automatic or manual setting, quick and easy to operate, using the principle of electromagnetic induction, the innovative microprocessor-controlled self adjusting system transfers an intense quantity of heat locally with no damage to the surrounding area, whether rubber, plastic or painted surfaces.

- The flameless technology and zero set-up times assures a speedy job and excellent results.
- The Smart Inductor heats only metal objects.
- It will not burn or melt plastic or paint.
- Very safe to use. The inductor heads do not get hot to the touch.
- Digital readout and pedal control for complete control and freedom of movement

WEEKLY FROM ONLY **£13.60⁺**
ONLY **£2,699.00**

POWER-TEC HEAT INDUCTOR 3 KW LAS92405

Inductor with five accessories

- The complete tool for the bodyshop and workshop removes trim/stickers/corroded nuts mends plastic bumpers and other plastic parts
- Supplied with 5 accessories: glass remover/nut and bolt heater/heating glove/plastic stapler/plastic welding tool
- Safety and instruction leaflet provided
- 3kW
- Made in the EU

WEEKLY FROM ONLY **£10.07⁺**
ONLY **£1,999.00**

STANNER I4 INDUCTION HEATER 597 77 0150

High Quality Portable Induction Heater for heating of seized parts on vehicles of all sizes.

- Works on all steels, aluminium & copper
- Easy controls allow power control from 5 - 100%, from a 240V 13A plug
- Non contact heat source, heating only the required area protecting surrounding areas and/or parts
- Water cooled to give excellent duty cycle

WEEKLY FROM ONLY **£15.11⁺**
ONLY **£2,999.00**

PRESS-IT BUMPER KIT 597 77 7260

Kit containing different size drill bits, punches and mandrels, designed for punching holes into bumpers to mount parking sensors.

- The various drill bit sizes allow precise control over the whole size.
- The punches are designed not to flake paint from outside the whole diameter.
- The mandrels are designed to complete the parking sensor hole with millimetre precision.

ONLY **£535.00**

STANNERS AS1T WELDER

597 77 0180

Dual Process Microprocessor controlled, MIG-MAG, Inverter TIG-DC LIFT and MMA welding machine.

Ideal for Vehicle Body Repair on the new UHSS/AHSS Steels and Particularly Aluminium.

All three processes can be set up at once for ease of use.

- Easy to use 1 touch "LCD Synergy Display".
- Three welding guns (processes)
- CuSi3 MIG Braze welding.
- Dip Transfer Aluminium Welding.
- Mild steel
- Compact design.
- Dual Bottle carrier
- Smooth welding arc characteristics for very thin materials.
- 230V supply

WEEKLY FROM ONLY **£6.02⁺**
ONLY **£1,195.00**

TECHNOMIG TREO 223 SYNERGIC

597 77 8340

Dual Process Microprocessor controlled, MIG-MAG, Inverter TIG-DC LIFT and MMA welding machine

Ideal for Vehicle Body Repair on the new UHSS/AHSS Steels and Particularly Aluminium.

All three processes can be set up at once for ease of use.

- Easy to use 1 touch "LCD Synergy Display".
- Three welding guns (processes)
- CuSi3 MIG Braze welding.
- Dip Transfer Aluminium Welding.
- Mild steel
- Compact design.
- Dual Bottle carrier
- Smooth welding arc characteristics for very thin materials.
- 230V supply

ONLY **£1,645.00**

STANNERS AS3T WELDER

597 77 0120

- 200amp mig, fitted with 3 Euro torch adaptors to allow 3-Torches to be fitted to the machine at one time. No need to keep changing wires & liners etc; just pull the torch trigger you desire
- Synergic controlled for easy setup for material thickness
- Delivered as standard with wire for steel, aluminium & mig brazing

WEEKLY FROM ONLY **£11.47⁺**
ONLY **£2,275.00**

ELECTROMIG 230 WAVE 400V

597 77 8350

Microprocessor controlled, multiprocess MIG-MAG (continuous and pulse), FLUX/BRAZING/MMA/TIG DC-Liftinverter welder

Capable of customisation to suit customer-specific requirements, this machine's operation is traceable and analysable. Thus it offers maximum operational flexibility for use in a wide variety of application sectors - from maintenance, to installation and interventions at body shops. Can be used on steel, stainless steel, aluminium, and brazed materials.

Supplied with with MIG-MAG torch, cable and earth clamp

- Saving data via USB Full Control Synergic Settings
- Programmes for all types of welding
- CuSi3 MIG Braze welding
- Pulsed Aluminum Welding
- Double Pulsed welding (Excellent for Aluminum)

WEEKLY FROM ONLY **£9.30⁺**
ONLY **£1,845.00**

*Finance example typically based on a 5 year lease purchase agreement. Finance subject to status, full terms and conditions available on request. Other finance options available. Offers valid until 28th February 2017. Prices correct at time of going to press: August 2016.

STANNERS MI100 CONTROL T WELDING SYSTEM

597 77 8320

Intelligent control technology allows a spot weld quality that is comparable to the quality achieved during the production process of new vehicles

MI100 Control T takes the worry out of welding with TrueAutoMode: the Industry's First Fully Automatic Spot Welding System TrueAutoMode automates the welding process to provide perfect, OEM-approved spot welds every time.

Measuring weld resistance approximately 1,000 times per second and automatically adjusting current level, weld time and clamp pressure as needed, the MI100 provides instant feedback to the technician if there's a bad weld and can log every weld. At the end of a job, the MI100 can print out a report that includes information on the settings,

messages and actual weld parameters of every weld, enabling easy documentation that welds were made correctly.

- Lightweight Transformer C gun and 5m cable means easy manoeuvring around the job
- 14,000 Amps and Water cooled unit means no job too big
- Optional Wifi download-with-barcode scanner for Jobsheets

The modular nature of the system means the system can be easily upgraded for future requirements. Quick and easy tool change; new OEM welding programs can be added through software updates via compact flash card.

OEM-LIKE WELDING

WEEKLY FROM ONLY **£61.97⁺**
ONLY **£12,295.00**

CALL FOR A DEMO

STANNERS EXPERT SPOT WELDER

597 77 0720

Perfect for a bodyshop that doesn't need traceability on the welds.

The unique modular nature of the system secures the investment in the equipment.

This machine can be upgraded in the future to a MI 100 Control T.

- Easy to use operator panel
- High Performance transformer pliers and that means a good weld
- 5m lightweight welding cable for increased reach
- Capable of welding high strength steels such as Boron
- Upgradeable to MI-100 Control T
- Various Arms Sets available
- Exceeds spec of BSI0125

WEEKLY FROM ONLY **£47.35⁺**
ONLY **£9,395.00**

*Finance example typically based on a 5 year lease purchase agreement. Finance subject to status, full terms and conditions available on request. Other finance options available. All prices exclude VAT at 20%. Price, availability and specification may change without prior notice. Warranty subject to manufacturers terms and conditions of use. Errors and omissions excluded. Offers valid until 28th February 2017. Prices correct at time of going to press: August 2016.

Due to the high costs associated with replacing plastic panels (bumpers, inner wings, headlamp assemblies, engine covers, motorcycle bodywork etc), plastic welding equipment has been developed to offer an alternative solution. Save turnaround time, improve customer satisfaction, and increase billable labour time.

STANNERS PLASTOFUSED PLASTIC WELDER

597 77 8330

- German engineered quality and ideal for repairing broken plastic parts including cracks in bumpers or welding on broken mounting brackets etc.
- Works on many types of plastic (PP-EPDM, PP, ABS, PA), available in white or black.
- The system uses hot air to melt the plastic, the electronics controls gives a precise control of the temperature & airflow to prevent damaging the parts.

WEEKLY FROM ONLY **£8.54⁺**
ONLY **£1,695.00**

POWER-TEC NITROGEN PLASTIC WELDER

Compatible with almost every type of plastic used in the automotive industry, Allows the welding of filler material by heating with nitrogen. Heats plastic without combustion – therefore no fumes emitted. Comes complete with a set of plastic material, a scraper and a roller
230v, 50 Hz, 1600w

LAS92447
WEEKLY FROM ONLY **£10.07⁺**

STANNERS TKR XT2 RIVETER

597 77 5830

A Pneumatic/Hydraulic Universal Tool, Specifically Developed for all Common Riveting Operations in Thin Sheet Metal.

- More & More Manufacturers are switching to bonding & riveting
- As there is no heat generated with rivets they can join UHSS/ BORON steels without weakening the steel
- Better for corrosion warranty as ecoatings are not removed or burnt away
- There is less surface preparation i.e. no removal of transport primer needed
- Unlike spot welding, Riveting does not cause sparks avoiding the risk of damage to interiors and glass

**OEM
APPROVED**

WEEKLY FROM ONLY **£31.22⁺**
ONLY **£6,195.00**

POWER-TEC SELF PIERCING RIVETING SYSTEM PLUS

LAS92386

- Self-piercing rivets are used by major manufacturers including Audi, Jaguar, Land Rover, Daimler, BMW and more.
- As there is no heat generated in the process, the self-piercing riveter can be used on OHSS/Boron steels without weakening the steel.
- Less preparation timesaver. No damage to eco-coatings therefore better corrosion warranty.
- Safer than welding, as there are no sparks produced.

**SUPPLIED
WITH KIT**

WEEKLY FROM ONLY **£12.59⁺**
ONLY **£2,499.00**

*Finance example typically based on a 5 year lease purchase agreement. Finance subject to status, full terms and conditions available on request. Other finance options available. Offers valid until 28th February 2017. Prices correct at time of going to press: August 2016.

Dent Repair Pullers

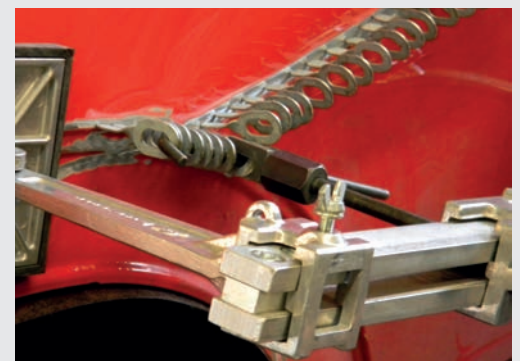

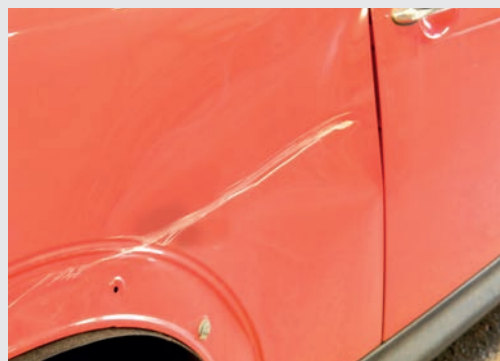

NO HASSLE
WARRANTY

BEST PRICE
PROMISE

POWER-TEC MIRACLE DENT REPAIR SYSTEM

The Miracle Panel Repair System offers the possibility of higher profits selling labour hours rather than simply replacing panels. Insurance companies will often prefer dent repair to replacement because the vehicle remains original.

- Increased labour with in each repair job thus reducing the need for panel replacement
- Speeds up the repair process and turns the repair around more quickly
- Improves the workshop throughput and reduces the job cycle times.
- Minimises strip and refit
- Start job immediately without waiting for panels
- Handles steel
- Repairs trucks, light commercials and cars
- Keeps vehicle original
- Increase courtesy car utilisation
- Cleaner working environment
- Reduces waste and saves the environment
- Borderline write-offs become economical repairs
- Upgrades always available

2 Post Lifts

NO HASSLE WARRANTY

BEST PRICE PROMISE

L4000 M/E 2 POST 4 TON HYDRAULIC LIFT

This value lift has a lot to offer. Symmetric arms offer wide flexibility of chassis as well as being able to accommodate vehicles driving on or reversing on. Electro-magnetic safety locks conveniently release at the push of a button. (A manual lock release version of this lift is also available)

Hydraulic hoses and balance cables are all fully concealed, providing a clean appearance.

The double hydraulic cylinders and high strength chain drive provide smooth lifting and lowering.

The two sets of arms always travel synchronously thanks to high strength balancing cables.

An emergency lowering valve can be manually operated to lower the lift safely in the event of a power failure.

Meanwhile, a flow-control valve prevents the possibility of a rapid uncontrolled descent

Door rubbers on the posts protect the car doors from direct contact, and sill protector rubbers on the upper arms perform the same function protecting the undersides of longer chassis vehicles

- Minimum pad height 110 mm
- Drive-thru width 2486 mm
- Maximum Lifting Height 1950 mm
- Lifting time 40-50 sec
- Lowering time 20-40 sec

Liftmaster LMH Series

The LMH lifts are unique in that the design dispenses with cables or any other separate balancing mechanism between the two posts, and instead operates a Patented 'Hyperflow' system of completely hydraulic balancing. The result is faster, smoother and millimetre precise operation that is simply not possible by other means.

With the power to control the tiniest up or down movements with no slips or jerky movement; it's no wonder that this lift is a firm favourite amongst technicians!

- Single hydraulic master and slave cylinder design provides smooth and fast lifting
- The all-hydraulic system requires no electrical and pneumatic component
- Synchronising cables are not required as the hydraulic system ensures fast and safe synchronisation at any level
- The load is secured at any working height without mechanical ratchet
- Speed: 20 sec. up, 14 sec. down
- Quiet, powerful, oil submerged motor gives fast lifting and lowering times
- Low maintenance and almost wear-free cylinders
- Asymmetric arms for maximum door clearance
- Self bleeding hydraulic system
- Low lifting height
- Available in single phase or three phase
- Supplied in blue unless otherwise stated

OPTIONAL

- Height adapters to facilitate picking up of passenger cars and vans, with brand-specific pick-up points

LITE ALIGN 450 WALL MOUNTED 587 77 0020

Wall mounted car and light commercial four wheel laser aligner kit includes two front laser heads, two rear flag units, brake pedal depressor, steering clamp, turn discs, wall mount rack and 100mm rim buttons

MEASURES:

- Front and rear individual and total toe, to ensure correct tracking and stability on the road
- Thrust Line, to make sure the rear wheels are pointing in the straight ahead position in relation to the centre line of the vehicle
- Set back, to check front and rear wheels to ensure correct alignment across the vehicle
- Corrects steering wheel alignment. Rear flags enable the end user to adjust the alignment to achieve perfect steering wheel alignment first time.

KEY FEATURES:

- Unique tyre/wheel mounting system, resulting in more accurate measurement, reduced risk of heads becoming detached during adjustments
- Rechargeable battery operation, no cables
- Fits 12 to 22 inch wheels, cars and light commercials, XL kit available for larger wheels
- Optional digital Camber/Caster/SAI gauge available

WEEKLY FROM ONLY **£7.79⁺**
ONLY **£1,545.00**

LITE ALIGN 450 WALL MOUNTED WITH MAGNETIC CASTER CAMBER GAUGE 587 77 0640

Wall mounted car and light commercial four wheel laser aligner with magnetic caster camber gauge. Includes two front laser heads, two rear flag units, brake pedal depressor, steering clamp, turn discs, wall mount rack and 100mm rim buttons.

WEEKLY FROM ONLY **£9.55⁺**
ONLY **£1,895.00**

HOFMANN MEGAPLAN ECOLINE 58/88 – FULLY COMPUTERISED WHEEL ALIGNMENT WITH A4 PRINTER

Bridging the gap between laser alignment and fully computerised systems with printout, which traditionally made the jump too big for many workshops.

Ecoline 58 and 88 are supplied with a comprehensive vehicle database from the recognised industry name, Autodata, and offers a before and after printout. The Ecoline series – is the logical choice for anybody wanting to move into advanced vehicle geometry without the cost traditionally associated with computerised systems.

Only one alignment a week turns this investment into profit!

ECOLINE 58/88 FEATURES

- Simple to use – faster readings, saves time increasing your profit
- Supplied with PC, 19" monitor – clear impressive graphics with onscreen instructions
- Onsite training – your machine, your premises Hofmann Megaplan's specialists
- Comprehensive Vehicle Database by Autodata – over 17,000 models from 80 manufacturers
- A4 Printer – Provides before and after readings for customers
- Traditional 4-Point Clamps (58 only) – handles up to 23" rims as standard
- Front Cameras and Rear Sensors – increases accuracy and repeatability
- Zigbee® wireless communication – offers stronger and more reliable signal over Bluetooth®

ECOLINE 88 ONLY FEATURES

- 3 Point 'Grab Clamps' – even faster mounting, saves more time
- Front & Rear Cameras – ideal for advanced geometry when speed is needed

Wheel Alignment

NO HASSLE WARRANTY

BEST PRICE PROMISE

JOHN BEAN ELS 3D ALIGNMENT SYSTEM WITH TILTING CAMERA

587 77 1730

The new John Bean 3D ELS alignment system has a tilted camera boom for flexible vehicle positioning, eliminating the need for a fixed position to carry out alignment checks and being able to position the camera at the touch of a button.

Running the Pro 32 software application, the ELS saves space in the workshop because everything is mounted on the support post.

The vehicle orientation directional indicator guides the technician when they are unable to see the screen, while interchangeable grippers on the wheel clamps assist work on different wheel types within a clamping range of 11" rims to 22" rims.

- AC 100 rim clamps, with a clamping range 11" – 22" rims
- Compact design everything mounted on the support post
- Tilting camera boom for working at different heights
- 3D technology for fast and accurate measurements
- Vehicle database included

WEEKLY FROM ONLY **£32.73⁺**
ONLY **£6,495.00**

SPACE SAVING DESIGN

JOHN BEAN V2200 & V2300

Offer advanced alignment service to your customers without needing specialised wheel alignment technicians.

Computerised 3D car wheel alignment with Pro 42 software for general repair shops. Liftable two-camera beam and 22" TFT flatscreen monitor. Cordless communication between targets and HD camera system.

V2200

- Comprehensive and up-to-date manufacturers' specifications
- Versatile wheel clamps provide a solid and worry-free attachment with a patented positioning procedure.
- Take a full four-wheel alignment reading in minutes.

V2300

Features as for V2200 plus

- Measurement of toe, camber, caster, maximum steering angle, rolling radius and cross diagonal
- EZ Access for measurement with demounted wheels

JOHN BEAN BOXER BB2200 TYRE CHANGER AND BB4100 WHEEL BALANCER 583 05 0290

Tilt Back Tyre Changer and Digital Wheel Balancer newly released to provide great value for money to garages wanting to expand into tyre and wheel servicing.

TYRE CHANGER

- 20" turntable
- Pneumatic assist arm

WHEEL BALANCER

- 1D SAPE for input of wheel offset
- Maximum wheel diameter – 34"

WEEKLY FROM ONLY **£14.84⁺**
ONLY £2,945.00

HOFMANN MEGAPLAN ECOMOUNT 11XL CHANGER AND MEGASPIN 120 BALANCER 583 01 0190

Semi-automatic, side swing tyre changer with assist arm designed for anybody looking for an entry-level machine without compromising on reliability and long term support, and the first 'handspin' balancer ever to include fully-automatic (3D) data input.

CHANGER

- 10" to 24" Clamping (22" external)
- 13" rim width capability
- Semi-Automatic Operation
- Space-saving, swing arm design

BALANCER

- Can handle rims up to 30" diameter
- Automatic (3D) data input via IWA
- Dual 12v/240v operation
- 4 years PCB Warranty

UPGRADE THE CHANGER TO ECOMOUNT 22PLUS FOR ONLY £ 300.00 +VAT!

WEEKLY FROM ONLY **£13.58⁺**
ONLY £2,695.00

JOHN BEAR T5305 SINGLE SPEED TYRE CHANGER WITH ASSIST ARM AND B100 WHEEL BALANCER 583 01 0170

New package including tilt back tyre changer for all conventional tyres on the market, including helper arm and 10-20" clamping range and digital wheel balancer capable of measuring wheel offset and wheel diameter in one process (2 dimensions of semi-automatic parameter entry – 2D SAPE)

T5305 FEATURES

- Pneumatic lifting column – fast and safe wheel lifting
- Turntable has two cylinders for improved gripping of the rim
- Assist arm includes drop centre pressing tool and rim centre pushing tool – accuracy and ease of use as standard

B100 FEATURES

- Includes patented VPI system for high accuracy and repeatability
- Split weight mode – hide weights behind wheel spokes for more appealing cosmetic finish
- Tyre-matching mode – optimise tyre to rim so using fewer weights

Offers valid until 28th February 2017. Prices correct at time of going to press: August 2016.

HELLA GUTMANN CSC MACHINE

597 77 5760

Calibration tool for camera based driver assist systems. Safety systems such as adaptive lighting, automatic distance control and lane departure warning are becoming a common feature of many mid-size and compact cars. The sensors and cameras required by these systems have to be precisely calibrated. A slight shift in the position of the radar head or the camera in relation to the geometric axle can cause the system to deliver incorrect results, or even fail completely. The CSC (Camera and Sensor Calibration) tool enables effective and accurate calibration of a wide range of camera-based driver assist systems.

The CSC Tool is an all-in-one solution for calibrating advanced driver assistance systems suitable for the whole range of vehicle manufacturers. Therefore, in connection with a diagnostic tool from Hella Gutmann Solutions, you are able to calibrate, for example, the front camera for the lane departure warning system, the radar sensor for the ACC (Adaptive Cruise Control) or the camera for adaptive headlights.

WEEKLY FROM ONLY **£28.48⁺**
FROM ONLY **£5,650.00**

(Basic machine price only. Does not include price for radar kits required)

CSC RADAR 1 KIT

597 77 7890

SMOKE PRO BODY PRO COLLISION REPAIR LEAK DETECTOR

355 77 8680

The Body Pro™ is the solution to quickly solve time-consuming, impossible-to-diagnose, wind & water leaks that are a drain on profitability for body collision repair technicians.

The special patent pending adaptors, engineered just for collision repair, produce a fluffy, highly dense vapour with long hang time, that makes air disturbance leaks easy to see.

Use Body Pro to quickly test for:

- Wind/water leaks
- Body panel and door leaks
- Head/tail lamp leaks
- Testing radiators before installation
- Sunroof leaks
- Vacuum leak

ONLY **£465.00**

*Finance example typically based on a 5 year lease purchase agreement. Finance subject to status, full terms and conditions available on request. Other finance options available. All prices exclude VAT at 20%. Price, availability and specification may change without prior notice. Warranty subject to manufacturers terms and conditions of use. Errors and omissions excluded. Offers valid until 28th February 2017. Prices correct at time of going to press: August 2016.

DOES YOUR BATTERY CHARGER MATCH UP TO THE GYS 1,2,3 TEST?

MINIMUM REQUIREMENTS OF A BATTERY CHARGER

1. Must be safe to charge the battery without removing it from the vehicle
 - Protection for vehicle systems
2. Must be able to charge all the latest battery types
 - AGM / EFB / Silver / Calcium / GEL / VRLA
3. Must be able to safely charge the battery without requiring the technician to identify the battery type
 - This is a real world problem – it can be very difficult and time consuming to do this and due to the difficulty inevitable will result in potentially dangerous mistakes

THE 1, 2, 3 TEST

Consider whether battery equipment that cannot pass this test should be in use in your workshop?

NEW!

Designed for charging new generation EFB technology STOP-START batteries!

GYS STARTIUM 680E – CHARGER STARTER

355 77 8430

1. Has comprehensive protection functions
2. Has charge capability for each battery type
3. Has 'Universal Mode' for when battery type is unknown

ADDITIONAL FEATURES

- Alternator test
- Automatic start
- Battery desulphation

SPECIFICATION

- Peak power 550A
- 12V/24V
- Made in France

**DESIGNED FOR EFB
STOP/START BATTERIES**

ONLY **£475.00**

GYS DIAG STARTIUM 60:24

**DID YOU KNOW...?
DYNACOAT WAS LAUNCHED IN 1998
AND IS NOW SOLD IN 75 COUNTRIES**

- ✓ Simple to use.
- ✓ Best colour matching.
- ✓ Good value for money.

Three reasons why the Dynacoat paint system has all your refinishing needs covered.

DYNACOAT FOR RESULTS THAT SHINE

Introduced to the LKQ Coatings offering early last year, Dynacoat is a complete repair range designed for professional use with the pressures of today's bodyshop in mind. Essentially aimed at the professional 'Free to Choose' market, painters can be confident of a good finish with all products delivering fast, accurate and reliable results.

EXCLUSIVE TO LKQ COATINGS

Supported by AkzoNobel's worldwide product and colour tools expertise plus LKQ's technical know-how, Dynacoat assists you with all of your day-to-day bodyshop challenges from a tricky spot repair to an entire respray.

PRIMER 4100 4 LITRE (GREY) DYC.518590
