

EVERLAST

Indestructible

Signs Tags & Markers

The Only Sign System to be  **UL Tested to 30 years ... NO CHANGE!**

TECH
PRODUCTS, INC.

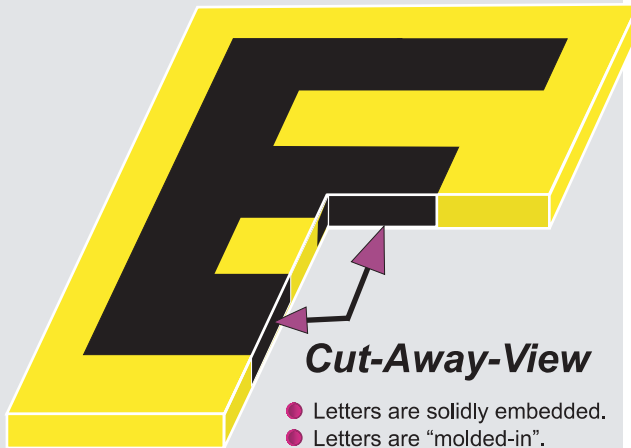

EVERLAST®

Patent#s 4835890, 5265364 & Others Pending
The Remarkable Difference!

Most signs, markers and tags have screen printed or hot stamped copy. The thickness of ink, paint or stamping foil is less than 0.002 in., offering little resistance to UV radiation, corrosion, abrasion or impact.

EVERLAST, in contrast, has copy that is deeply and solidly embedded at a thickness of the part... 0.230 inches. ... *A thickness more durable than 40 coats of paint!*

EVERLAST's "molded-in" copy is abrasion proof, unaffected by the most severe climatic conditions, and inert to environmental chemicals. **EVERLAST** withstands temperatures from -40 to 200 degrees Fahrenheit.

Cut-Away-View

- Letters are solidly embedded.
- Letters are "molded-in".
- Letters go Through-The-Sign.

More durable than over 40 coats of paint!

How to Specify EVERLAST®

Signs, tags or markers (as applicable) with injection molded characters, integral with locking grids. Color pigments and UV stabilizers molded throughout the thickness of the part. Characters are as thick as the part itself.

EVERLAST® Indestructible

8 Reasons To Buy EVERLAST®

- 1 The Only Solution to Long-Term-Legible Signs, Tags and Markers!**
Enormous savings! No Sign replacement costs. Huge Labor savings for the department that installs signs.
- 2 Guaranteed to cut your costs!**
*Think about it. It costs at least \$20 per hour in labor to replace a sign ... Not to mention the replacement cost of the new sign! **EVERLAST** eliminates the need to replace your signage.*
- 3 The Only Sign System to be tested by Underwriters Laboratories.** 
Test results remarkably showed ... 30 Years No Change!
- 4 FREE Holes, Corners, Color and Shape!**
*Because **EVERLAST** is injection molded, everything is done at once, holes, corners, colors and shape. Better quality, less cost!*
- 5 Legal Liability virtually eliminated!**
*Because **EVERLAST** will be legible for 30 plus years, people will always be able to read the sign... Liability and negligence issues are sharply reduced.*
- 6 EVERLAST Injection Molded with high-impact, deluxe polyolefins.**
*Not only does this mean "High Quality", it is also helpful to the environment. Unlike competitive plastic products that break down and emit toxins into the environment, **EVERLAST** does not breakdown or emit toxins.*
- 7 Withstands temperatures from -40 to 220 degrees Fahrenheit!**
***EVERLAST's** "molded-in" copy is abrasion proof, unaffected by the most severe climatic conditions, and inert to environmental chemicals. UV stabilizers are "molded-in" throughout the thickness of the sign.*
- 8 Will NEVER delaminate ... Fiberglass or other signs that have overlays, coatings or a core... will almost always delaminate in harsh environments.**
Don't be fooled by material that is sandwiched together like most fiberglass and coated signs. Water, mold, and other elements seep in, crack open the edges and make the sign look ... "cloudy".

"Why My Signs Are The Best You Can Buy!"

Ken Nelson
B.S. Industrial Engineering ... MIT
CEO Tech Products, Inc.
Inventor and Patent Holder For **EVERLAST**®

After spending 34 years in the identification products business, I'd seen laminates, adhesives, and paints fade, wear and fail. I had an epiphany one day and came up with an idea for tags and signs that could withstand the elements and extremely harsh conditions, year after year. After much testing and refining, that brainstorm developed into **EVERLAST**, a product of which I am extremely proud because it delivers what it promises.

EVERLAST products are made of thick, high impact polyolefins with copy and pictograms that are permanently embedded and impervious to sun, wind, rain, fumes, acid and alkali solutions, salt water, temperature variations or humidity.

EVERLAST is the only sign and identification product to be subjected to the rigors of UL testing to prove its extreme durability. Over the past decade, hundreds of astute companies, utilities and government entities have saved thousands of dollars in signage replacement costs by specifying **EVERLAST** for their identification and accident prevention signs.

Isn't it time you learned more about **EVERLAST**? Please give us a call at 1-800-221-1311.

Compare Our 10 x 14 inch Signs!

- Solid, Injection Molded!.
- 1/4" Thick.
- The letters go Through-The-Sign.

**Looks Good ... Always!!
Legible ... Always!**

Our **EVERLAST** Sign

Competitor's Sign

EVERLAST®...The Only
Sign System to Undergo
 UL Testing

EVERLAST withstands 30 years of Tough Conditions with no change.
Underwriters Laboratories Inc.

Test Results Prove!

UL performed numerous durability tests on **EVERLAST** signs in compliance with UL and ASTM standards. **EVERLAST** signs were subjected to 30 years worth of UV exposure, salt spray, vibration, abrasion, temperature variation, fumes and more.

Test results ... no change in color or legibility. To receive a copy of the full UL report, please call us at 800-221-1311.

What This Means To You!

1. You won't have to go out into the field and replace signs!
2. You will save ... tons of money ... Thousands of dollars.!
3. You will reduce your legal liability.

Customers Praise **EVERLAST**®

Purchasing Agent "Great product. I only wish we had started buying your signs sooner. Everlast will save us a fortune in replacement costs."

Company President "Thank you **EVERLAST**! Liability is a major concern in these litigious times. It is comforting to know that we don't have to worry about your warning signs fading or chipping."

Director of Maintenance "We've never seen anything like it. Our maintenance crew is more than happy to install your signs, because they know they won't have to do the job again every few years."

Safety Engineer "I was about to reorder some **EVERLAST** safety signs because workers splattered them with paint. Your salesperson said, just rub the paint off with sandpaper, the signs will be fine. We tried it and it worked. Amazing. Everyone should be using **EVERLAST**."

Diesel Generation Manager "You may any time have people contact me about your product. As you know, we live in a very harsh environment and have been using your tags and signs for many years. They not only hold up to the UV rays of the sun, but the constant exposure to salt and winds. Thank you for making such a great product"

Randy Jordan, Manager of Diesel Generation, NCEMC North Carolina Electric Membership Corp.

Why Does Every Major Power & Telecom Company Use **EVERLAST**?

Answer: ... It is *The Only Sign System to be UL Tested!*

EVERLAST withstands 30 years of Tough
Conditions with no significant change.

Underwriters Laboratories Inc.

Test Results Prove!

UL performed numerous durability tests on **EVERLAST** signs in compliance with UL and ASTM standards. **EVERLAST** signs were subjected to 30 years worth of UV exposure, salt spray, vibration, abrasion, temperature variation, fumes and more.

Test results ... *no change in color or legibility*. To receive a copy of the full UL report, please call us at 800-221-1311.

What This Means ... To YOU!!

1. You won't have to go out into the field and replace tags!
2. You will save ... tons of money ... Thousands of dollars.!
3. You will reduce your legal liability.

Won't Wear Out!

EVERLAST ... Aerial Surveillance A-Frames

With 12" numbers and letters that won't wear out!

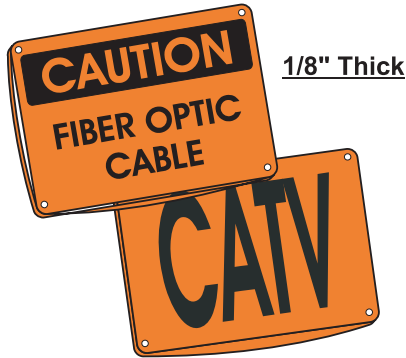

Our A-frames (dog houses) are made of strong, extruded aluminum parts. They have pre-punched holes and come with vandal proof nuts and bolts. They are shipped unassembled and therefore are less expensive, easier to ship and easier to carry. (Or, we can pre-assemble). Because these frames are attached to posts or stakes of various shapes & sizes, the attachment brackets will be made to fit the application.

Aerial Surveillance A-Frames only.

Horizontally or Vertically Mounted

6 Line Holder
PHF610

PHF206 Two Line Holder

Use the same Tags and Holders ... Vertically or Horizontally!

Each card has 25 of the same character.

FastTags... Miniature Markers

The marking system with ... Endless Applications!

No matter what it is you have to identify, **FASTTAGS** can do it. These **3D-Tags** with highly-raised characters **remain legible** ... even in low light, oily or dusty environments... even if they are painted over! They are available with orange or yellow background colors. The raised characters are hot stamped with the highest quality UV stable foil.

The same tags and holders can be used both vertically or horizontally. This eliminates the need for dual inventories. The holders can be mounted using cable ties, nails, screws or adhesive.

Comes in packs of 10 Cards ... 25 letters per card.

The tags are available with yellow or orange background colors, are non conductive and non corroding. Assembling the polymer tags into the holder is a breeze, no more fumbling and frustration.

Utility Markers

Cable & Pipeline Markers

Sizes: 3.75" x 66" 3.75" x 72"
Colors: Orange, Yellow, White, Red and Blue

The line marker is made from high impact fiberglass. Specially formulated for UV protection. The uniquely designed symmetrical three rib profile will flex upon impact and return to its original upright position.

We can also provide a line marker that uses a specially formulated UV plastic. This lightweight, curve-shaped marker is designed for areas with heavy traffic and/or large mowers.

Copy and graphics can be custom made and added to sign before delivery.

Call For Pricing ... 1-800-221-1311

Flexi-Guide Posts

Flexi-Guide ... Flexible Highway Delineator Posts

These "Driveable", impact resistant, posts are available with a number of standard and special options, including reflective sheeting, message decals, custom colors and lengths and various anchors.

TECHFlex-D (Double Curve) & TECHFlex-S (Single Curve) standard colors are White, Yellow & Grey. Posts and delineators are packaged in boxes of 25 pieces; 500 pieces per pallet. All TECHFlex-S posts meet U.S. DOT specifications.

Made with high performance plastic using engineering thermoplastics these markers meet the challenges of various soils, climate and traffic control requirements.

Call For Pricing ... 1-800-221-1311

Aluminum Post Reflectors ...Attach to Sign Posts!

3 1/8" Wide x 30" High. These 0.080" thick aluminum reflectors increase sign visibility day and night. Use on standard U-Channel, square or round sign posts. Installs easily with nuts and bolts. Promotes safety ... All the time!

Comes in red (Engineer Grade) reflective or fluorescent/yellow green (Diamond Grade)..one side.

**Safety
First!**

Tech's Conspicuity Tape **Reflective!**

2" Wide x 150' Long Rolls. Alternating 11" bands of red and 7" bands of white prismatic reflective. Sub surface printing protects the color from UV and solvents for superior durability. Bright red color provides excellent visibility even during daylight hours. Exceeds NHTSA requirements for marking vehicles.

**7 Year
Warranty!**

ANSI Compliant Hard Hats

Fully Adjustable! ...Squeeze Lock Suspension

Comes with Front replacement sweatband. Six point, deluxe, nylon strap suspensions. Meets ANSI Z89, 1-1997 type 1, Class E, G & C specs.

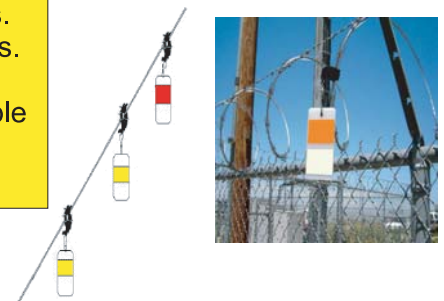

Tech's...Bird B-Gone

Bird Flight Diverter

Protects Birds from Collisions with wires.

- Fast Installation (Hot Stick available for power and telephone lines).
- Fully tested and developed by biologists to be the most effective diverter.
- Uses materials that glow at night up to 10 hours.
- Spins in the wind ... Alerting birds of obstructions.
- Rugged spring loaded clamp prevents slippage.
- Unique "Moon Shine" system reflects UV + visible light even in low light/fog conditions.

ANSI CLASS
2

Class II garments. Where traffic speeds exceed 25 mph. Suitable for railway workers, school crossing guards, parking and toll gate personnel, airport ground crews and law enforcement personnel directing traffic.

ANSI CLASS
3

Class III garments provide the highest level of visibility. Where traffic speed exceeds 50 mph. The standard recommends these garments for all roadway construction personnel and vehicle operators, utility workers, survey crews, emergency responders, railway workers and accident site investigators

TECH
PRODUCTS, INC.

EVERLAST ...
6" Number & Letter ... Tower Markers

Our aerial observation tags and markers are superior to everything on the market bot for their ling lasting, high visibility and low cost to maintain. The **EVERLAST** system is designed and proven to last in the harshest environmental conditions and the transmission tower has to be among the worst of these conditions. The manpower and time lost replacing fading markers and tags is huge. Do not put up unproven tags that will fade in 10 or 20 years. Use **EVERLAST** and never worry about your transmission tower tags again.

Call for pricing!...800-221-1311.

**Aluminum & Stainless Steel
Danger & Caution Signs**

Embossed Materials & Thickness	Legibility
Aluminum .025", .040", .050", .063"	Lifetime
Stainless Steel .030" .060"	Lifetime

- **Brilliant, baked enamel colors**
- **Highly raised copy & deep relief!**
- **1/2" square to 6 feet!**

TECH-3D Embossed Danger, Warning and Caution Signs comply with OSHA & ANSI regulations for potential hazards. They remain legible for the life of your product. The 3-dimensional legibility is unaffected by dirt, oil, grease ... Or even over-painting.

Note 1: For harsh outdoor environments and *lifetime color and legibility* see our **EVERLAST Indestructible, Injection-Molded Signs** on the following pages.

Note 2: For areas where long term legibility is not a prime consideration, we also offer Accident Prevention Signs in screen printed flat metal, Lexan, Mylar, Vinyl or foil.

**3" & 6" Numbers & Letters
Horizontally or Vertically Mounted**

Embossed ... Metal Numbers & Letters

Deep Embossed, black characters on yellow aluminum. The highly raised characters are ideal for underground applications where silt, oil or dirt may cover the markers. Can be used for both Horizontal or Vertical mounting

ITEM ID#	1000	500	250	100
SI3YExx (A-Z, 0-9) 3" Embossed Metal				Call for Pricing!
SI6YExx (A-Z, 0-9) 6" Embossed Metal				Call for Pricing!

Aluminum ... Channel Holders

Hold 1, 2, 3, 4, 5, 6, 7, 8 or 9 of our 3" tall characters. Excellent for long lasting, quick change signs... especially in outdoor environments. Holders can be attached using nails, bolts, rivets, magnets or metal banding.

Aluminum Channel Holders... For 3" Metal Tags for Horizontal or Vertical Mounting

ITEM ID#	Qty	Holds 2	Holds 3	Holds 4	Holds 5	Holds 6	Holds 7
CH30xyM	up to 99 100 - 249 250 - 499						

x ... Use to designate quantity to hold.
y ... Use to designate either Horizontal (y=H) or Vertical (y=V)

Aluminum Channel Holders... For 6" Metal Tags for Horizontal or Vertical Mounting

ITEM ID#	Qty	Holds 2	Holds 3	Holds 4	Holds 5	Holds 6	Holds 7
CH60xyM	up to 99 100 - 249 250 - 499						

Pole Tags
Anodized Aluminum

Materials & Thickness	Legibility
Anodized Aluminum .032"	Lifetime

- ✔ 1.5 x 8 inch. Anodized aluminum pole tags. These tags are one piece and sequentially numbered.
- ✔ The numbers and letters are "deep engraved" for long term, permanent legibility.
- ✔ Optional bar codes can be engraved at bottom of tag or attached using pressure sensitive labels.
- ✔ The pole tags fit snugly into Tech's aluminum tag holders.
- ✔ **Mount Horizontally or Vertically!**
