*Written quotation required on a like for like basis. The competitor's product must be identical, brand new, offered on the same terms and be in stock or available for immediate delivery. Does not include products sold as part of a multi-buy promotion, bundle or sold on auction websites. Exclusions may apply. Valid whilst stocks last offer ends 31st March 2017.

PICO MASTER KIT

EVERYTHING FOR THE AUTOMOTIVE DIAGNOSTIC EXPERT

- ▶ Eliminate guesswork and test individual components before they are replaced. Stop playing "parts darts" where more and more parts are replaced until the fault goes away.
- ▶ Find intermittent wiring and connector faults.
- ▶ Solve issues when a vehicle has a problem but no code has been set or when multiple / misleading codes have been set.
- ▶ Solve charging and starting problems.
- ▶ Solve problems with actuators such as motors and injectors that are not monitored by the ECU.
- ▶ Identify mechanical problems such as compression and slipped / incorrectly fitted timing belts

- ▶ Rugged Features – IP53 and MIL-STD 810G certified.
- ▶ Built with high-quality magnesium alloy to withstand rough treatment.
- ▶ Advanced Touchscreen Display
- ▶ 8G RAM
- ▶ Supplied with Windows 10

WEEKLY FROM ONLY

£8.04⁺

ONLY **£1,595.00**

Diagnostic modules or 'Vehicle Control Interfaces' contain diagnostic hardware housed in the unit that connects to the vehicle OBD port. They form a connection between the vehicle ECU and software held on an external tablet, laptop or computer, enabling data to be drawn from the vehicle, or instructions to flow to the vehicle. The advantage of a diagnostic module is it gives you flexibility in choosing the different elements towards building up your diagnostics kit.

SPECIALIST PASS-THRU DIAGNOSTIC MODULES

G-SCAN 2 DIAGNOSTICS AT A GLANCE

Communication

The G-Scan2 is the market-leading diagnostic tool for Asian cars, vans and trucks, being the ONLY current diagnostic tool with 100% genuine OEM developed software for Hyundai and Kia models, and near OEM coverage for all other Asian marques. It also provides competitive coverage for many European and American vehicles – an area which is constantly being developed.

The sales and popularity of hybrid and electric vehicles has increased significantly over the last decade, with Asian manufacturers at the forefront. From the Toyota Prius and Nissan Leaf, to the latest Mitsubishi Outlander PHEV, plus new hybrid models due to arrive from Hyundai and Kia – the G-Scan2 has them covered.

With super-fast triple processors, a rapid boot-up time, a bright/clear HD touchscreen, built-in Wi-Fi.

Data Retrieval

The G-Scan2 Lite and Asian models include a built-in 4-channel oscilloscope with multi-meter and lead kit. The scope also has a floating-ground on 2-channel mode allowing voltage differentials with different grounds to be displayed – perfect for sensor testing.

Data Interpretation

The oscilloscope software has pre-sets and sample waveforms with guides and explanations to aid component fault-checking and diagnosis, as well as a signal simulator function which allows the technician to substitute sensor signals.

Coding and Special Functions

Whether you need to code/re-code a component, carry out a DPF regen or calibrate a new sensor, you know you're covered with the G-Scan2.

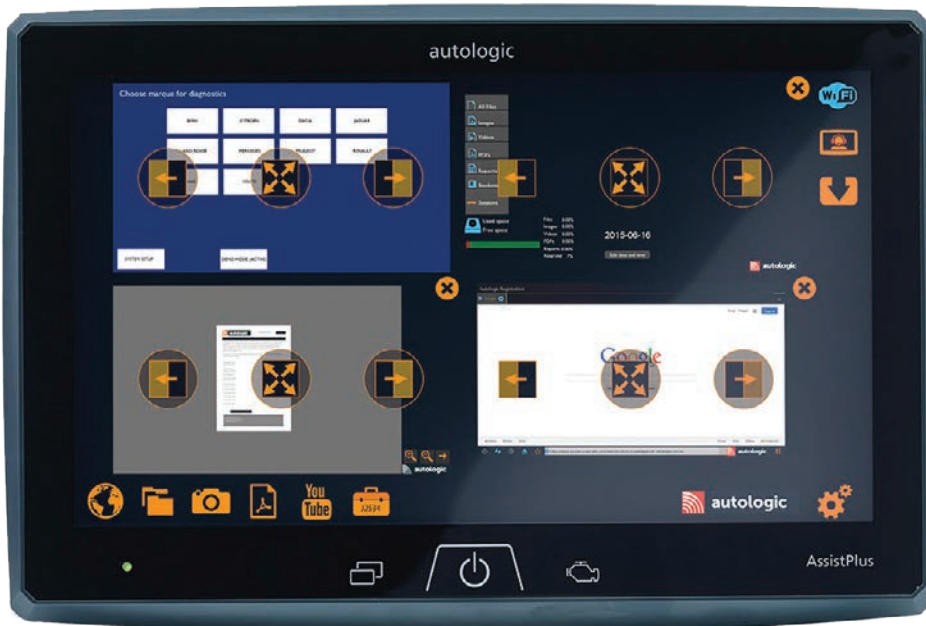

Job Recording

Data logging and record function allows the G-Scan2 to record up to 1 hour of live data for later playback and analysis. This can be reviewed as waveforms or as numerical figures and viewed on the G-Scan screen or on a PC using the PC Utility program. The PC utility is a very user-friendly interface which gives you access to the regular downloadable software updates, as well as saved screenshots and files from your G-Scan. It also allows you to create vehicle diagnostic reports which can be customised, saved or printed and given to the vehicle owner.

AUTOLOGIC ASSIST

REAL-TIME ASSISTANCE

- ▶ Autologic Assist is the industry's first fully integrated diagnosis support system combining dealer-trained technician expertise with state-of-the-art technology and access to online databases of third party vehicle information.
- ▶ Assistplus Is The Cloud-Connected Diagnostics Device
- ▶ Assist support is the real-time access to Autologic's 50+ European dealer-trained master technicians, plus the simultaneous integration of data resources that joins expert knowledge and service.

SUPPORTING YOUR BUSINESS

Assist Support is integral to your 3 year contract and consists of 3 key elements to get you from fault to fix, fast:

VEHICLE DIAGNOSTIC SUPPORT

Autologic's award winning Fault 2 Fix Team provides you with real-time vehicle diagnostic support. You have access to 100+ European dealer-trained master technicians, with the experience to address the ever-increasing complexity involved in diagnosing and repairing European cars, to get you from fault to fix, fast.

SOFTWARE SUPPORT

We want you to enjoy an efficient fault to fix experience, so in the unlikely event that your AssistPlus device is not working to its full potential, we provide comprehensive software support.

PASS-THRU SUPPORT

Pass-Thru is the only secure, accurate, safe and compliant process to programme ECUs. OEM registration and initial set-up can be a daunting process, so we provide the option of Pass-Thru Support within your contract as a single cost of 30 AssistCredits. Your Assist advisor will brief you on what is required to get you up and running.

The proportion of vehicles fitted with TPMS valves is already substantial and is only going to increase. Two thirds of vehicles registered in 2015 had TPMS. The call for TPMS service work is not limited to outright failure (although this is the most obvious example). The opportunity for TPMS service work also comes in whenever a tyre is changed, as it is recommended to service the valve by replacing the core, the cap, the nut, the washer and the gasket.

Everything you need to start TPMS service work can be found on this page. Place your order and increase your profit potential!

BOSCH TPA 200

EURO ACADEMY TECHNICAL HELPLINE

**ANY
CUSTOMER**

**ANY
DIAGNOSTIC DEVICE**

**ANY
VEHICLE MANUFACTURER**

Ever had a problem you can't fix? The increasing complexity of new systems and engine options now including petrol, diesel, electric or hybrid, computers controlling almost every aspect of their operation- from suspension, braking, fuel and air flow, to emissions, traction and parking assistance.

How are the independent workshops going to be able to compete? With no information available to help the only option is to call in a specialist or turn the job away to a main dealer.

EURO ACADEMY MEMBERSHIP NOW OFFERS YOU ACCESS TO SUPERB TECHNICAL INFORMATION AND ASSISTANCE IN 3 DIFFERENT WAYS:

TECHNICAL HELPLINE

ONLINE FAULT LIBRARY

TRAINING FACILITY

Euro Academy Technical helpline is like having a master technician standing next to you. Unlike some of our competitors

► **NO LIMIT** to the amount of time you can spend on a call

► **NO LIMIT** to the number of times you can call us

► **EXPERIENCED** based fault diagnostics from 1000's of customers Our team of master technicians have years of practical experience along with access to the latest technical information on any vehicle, regardless of the manufacturer.

So whether you're looking for repair manuals, circuit diagrams, parts catalogues or component locations for any vehicle in your workshop, simply pick up the phone and let us help. One simple call to our technical helpline could save you hours of searching for an elusive component failure.

YOUR MEMBERSHIP

Becoming a Euro Academy member is an investment in your business, and one which will increase revenue and profits while saving time and money. Memberships are available by annual subscription paid monthly, and start from as little as £79.00 for level 1 subscribers.
