

# Since 1982,

Osburn Associates Inc. has been providing quality products to the construction industry. We are committed to supplying the best products at a fair price. Our customer service is second to none with a mission to make the customer feel welcome and appreciated, while giving the best service possible. Your job becomes easier when you call our service professionals.

Decades of operation have taught us that attention to quality is not only good for the customer but also is good economically for Osburn Associates. Raw materials are hand selected with quality as the foremost criteria. We are confident that you will find our products excellent and the materials used and distributed to be first class.

#### PRICES

- Prices are subject to change without notice. Sales tax will be applied to orders without a Sales Tax Exemption Number on file.

#### PAYMENT TERMS

- Credit Card payments are accepted using Visa, Master Card, or Discover. Net 30 terms available to repeat customers who have filled out a credit application and approved by Osburn's in writing.

#### FREIGHT

- Shipping & handling charges will be added to all orders.

#### RETURNS

- All sales are final. Merchandise may not be returned without prior approval from our customer service department. Goods returned without prior authorization will be rejected at the receiving dock. Please contact our customer service department at 800-523-8917 for consideration and an RMA issued.

#### ERRORS

- Typographical errors will be corrected at time of order to include pricing and sizing.

#### NOTE

- Custom sizing or finishing available for most items, please call our customer service department for products not listed.

# Guide Signs / Extruded Panels

Whether you need shoulder mount or overhead, guide signs are an everyday product at Osburn Signs. From the aluminum panels and hardware, to the completed sign, we can help. Our customer service personnel will quote from your specifications. We provide the applicable drawings from your plans and make submittals for your approval. Completed guide signs are available for delivery either on racks or mounted on a specialized trailer. They can be staged or loaded, as you need them to save you time and effort when installing.

We also supply the panels in 12" and 6" by your needed length. They can be purchased plain "mill finished" or conversion coated to ASTM B449. Osburn also stocks the common mounting hardware such as post clips and stitch bolts.

# Street Name Signs >>>

Street name signs come in a variety of fashions. The primary color scheme is to have a green or blue background with white text but they are available in nearly any color with special logos or fonts. It is customary to order street name signs in 6 inch length increments. They are available in any grade of sheeting, on flat or extruded blades or as a face only.

# Way Finding & Specialty Signs

Osburn Associates can make nearly any specialty sign you may need. From navigational and way finding, pipeline, and fiber optic markers to nearly any commercial application sign. We can produce signs from your artwork or help you design your own.

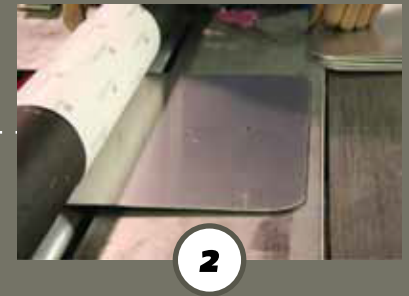

Call Office for pricing at 1-800-523-8917

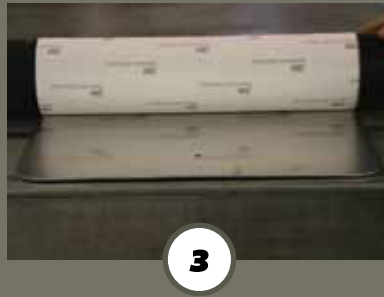

**1.** This is an example of how your faces will arrive.

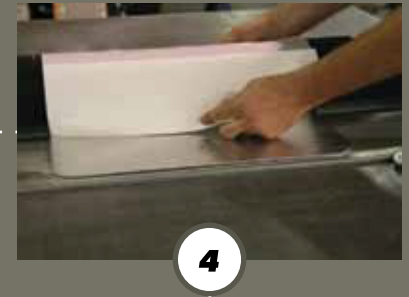

**2.** Place the sign blank and face underneath the squeeze roller with the proper margin on all sides, lower roller.

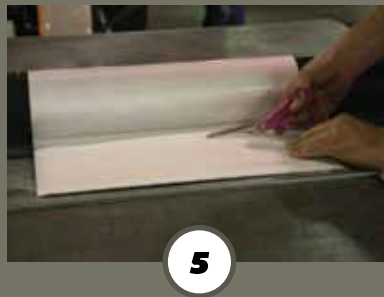

**3.** Advance 1/2 of the blank and face forward in the squeeze roller.

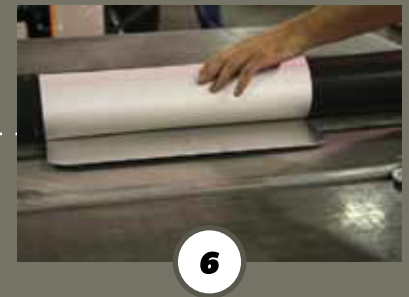

**4.** Peel back the face liner.

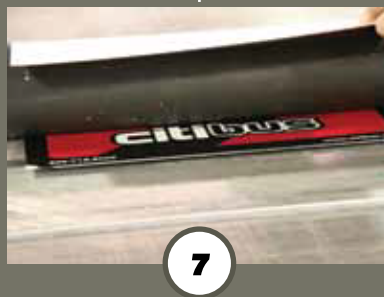

**5.** Trim off excess.

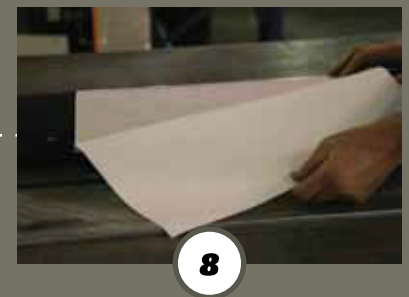

**6.** Pull the face tight against the top roller and begin to roll forwards applying the face to the blank.

**7.** Check to make sure your application is bubble free and properly placed.

**8.** Peel off other side and repeat steps 5 and 6.

**9.** When applied, lift top roller and remove.

# Sign Posts

## U-Channel Post System

Our sign posts are rolled from superior rail steel - the steel that runs the railroads. For strength - from steel that supports the great weight of trains. For resiliency - from steel that makes a smooth ride by flexing without permanently bending. Posts combining durability and flexibility to stand above the competition. Sign up with the specialists, and you'll find quality in every aspect of our steel posts - from production to delivery.

- **Steel** produced from hot-rolled rail steel 91 lbs. / yard and above. Certified to ASTM A-499 Grade 60. 60,000 psi minimum yield strength/ 90,000 psi minimum tensile strength.
- **Punch holes** 3/8" diameter, on 1" centers, starting 1" from the top of post. Custom punching, tapering, various hole sizes and welded anchor plates also available.
- **Finishes** baked-on green enamel, powder coat, or galvanized to ASTM specification 123, after fabrication is completed. Special colors available.
- **Packaging:** 50-piece nested bundles. Custom packaging upon request.

## Square Sign Post System - (Pre-punched)

- Corner welded for smooth telescoping action
- Square shape allows signs to be mounted on all four sides
- Square tubing for greater wind load capabilities and torsional stability
- Galvanized steel tubing for superior corrosion resistance
- 7/16" Pre-punched holes

NOTE: Steel conforms to ASTM A1011 Grade 50; Galvanizing meets ASTM A-653

## Square Sign Post System - (Quick-punched)

- Signs mount with drive rivets for easy installation and tamper resistance
- Smooth unbroken appearance
- In line zinc coating complies with AASHTO M-120
- FHWA approved beakaway installation
- 7/16" knockouts on all four sides

## Round Sign System

The Telespar round sign system with socket and wedge provides superior corrosion resistance and strength benefits, demonstrating 50ksi yield strength resulting from Allied's signature in line galvanizing process. This highly durable product enables you to reduce replacement and repair costs caused by standard wear and tear.

- Corrosion resistance through Allied's in-line galvanizing process
- Available with pre-punched holes
- Easy to re-use
- Difficult to vandalize
- Socket and wedge system for ease of installation

# Aluminum Blanks >>>

Osburn manufactures aluminum sign blanks to the standard Federal MUTCD specifications. Our process starts with a coil of aluminum that is then flattened, leveled and cut to length. We apply the radii and punch the appropriate mounting holes. It is then chemically treated to ASTM B449. After that, the blanks are packaged and ready for shipment.

We manufacture blanks from the standard Alloy 5052 H-38 in a thickness of .063" , .080" , .100" and .125". We feel this is the most specified and best performing alloy used for traffic signs and can provide certification with shipment. There are other alloys available but we do not think the diminished performance is worth the pennies of savings. We can custom punch and radius to your state or local specification we provided.

When ordering blanks, it is standard to request them horizontal dimension by vertical dimension. this helps to ensure that you get exactly what you need. Please remember triangle-shaped blanks are measured to each point in the federal manual before the radius is cut. This means that a 30" yield blank will not quite measure 30" after it has a radius applied.

**AVERY SUPREME WRAPPING FILM**

This dual-layer film incorporates color and clear protective layers, providing a smooth, paint-like finish that's both durable and dazzling. Avery's Easy Apply RS technology makes installations simpler by allowing for repositioning the film and reducing air bubbles. With 33 color options, Avery Supreme Wrapping Films offer more choices than ever before to meet your needs.

# 3M high performance reflective sheeting

3M offers a full line of reflective sheeting and accessories for the manufacture of high-quality regulatory, warning, guidance, work zone and non-critical traffic signs. 3M pioneered the development of retroreflective sheeting over 70 years ago and continues to be a leader in meeting the changing visual requirements of motorists of all ages in today's complex and demanding roadway environment.

Signs made with 3M's microprismatic reflective sheeting and system of matched components carry the 3M™ MCS™ Warranty for assurance of long-term performance and value.

## 3M™ Diamond Grade™ DG<sup>3</sup> Reflective Sheeting Series 4000

Optimal performance, durable, microprismatic lens reflective sheeting with pressure sensitive adhesive, available in standard traffic colors. Performs at all sight distances—short, medium and long—and where signs are positioned in disadvantaged locations, such as overhead or left shoulder. Signs are highly visible, even in visually complex nighttime roadway environments. **Exceeds ASTM D4956 Type XI specifications.**

- State-of-the-art “full cube” prismatic technology that optimizes performance in today's driving environment
- 100 percent efficient optical elements that return nearly 60 percent of available light—nearly double that of “truncated cube” prismatic materials
- Delivers superior performance for a wide range of observation angles from differently-sized vehicles and entrance angles

To learn more about 3M high performance reflective sheeting for traffic signs and other roadway safety applications, visit [www.3M.com/roadwaysafety](http://www.3M.com/roadwaysafety).

## 3M™ Diamond Grade™ DG<sup>3</sup> Fluorescent Reflective Sheeting 4081, 4083 and 4084

Optimal performance, durable, microprismatic lens reflective sheeting with pressure sensitive adhesive available in fluorescent yellow, yellow-green and orange. Highly visible under daytime and nighttime driving conditions including low visibility periods such as dawn, dusk and overcast days. Performs at wide entrance and observation angles. **Exceeds ASTM D4956 Type XI specifications.**

- Fluorescent yellow meets all color specifications for yellow traffic control signs and devices
- Fluorescent yellow-green color approved in U.S. for signs warning of the presence of non-motorized traffic including school zone, pedestrian and bicycle crossing signs
- Fluorescent orange provides added visibility from dawn to dusk, as well as at night, in unfamiliar work zones
- Highly visible in the 200- to 600-foot viewing range; ideal for signs that must be seen at relatively short viewing distances

## 3M™ Diamond Grade™ VIP Reflective Sheeting Series 3990

Highly reflective, durable, microprismatic lens sheeting with pressure sensitive adhesive, available in standard traffic colors. Signs are highly visible, even in visually complex nighttime roadway environments. **Exceeds ASTM D4956 Type IX specifications.**

- Microprismatic lens optics have higher sign brightness than sheeting made with glass bead optics
- Highly visible in the 200- to 600-foot viewing range; ideal for signs that must be seen at relatively short viewing distances

## 3M™ Diamond Grade™ VIP Fluorescent Reflective Sheeting 3981 and 3983

Highly reflective, durable, microprismatic lens sheeting with pressure sensitive adhesive, available in fluorescent yellow and yellow-green. Highly visible in daytime, twilight and inclement weather, as well as at night. Performs at wide entrance and observation angles. **Exceeds ASTM D4956 Type IX specifications.**

- Fluorescent yellow meets all color specifications for yellow traffic control signs and devices
- Fluorescent yellow-green color approved in U.S. for signs warning of the presence of non-motorized traffic including school zone, pedestrian and bicycle crossing signs
- Highly visible in the 200- to 600-foot viewing range; ideal for signs that must be seen at relatively short viewing distances

## 3M™ Diamond Grade™ Fluorescent Work Zone Sheeting 3924S

Fluorescent orange microprismatic reflective sheeting with pressure sensitive adhesive for production of high quality work zone signs. Highly visible in daytime, twilight, inclement weather and at night. **Exceeds ASTM D4956 Type VIII specifications.**

- Highly visible at wide angles to approaching traffic and at long sight distances
- Approved in the U.S. Manual on Uniform Traffic Control Devices for all construction/maintenance work zone signs and devices
- Distinctive seal pattern assists work zone site inspection
- Suitable for rigid substrates

To learn more about 3M high performance reflective sheeting for traffic signs and other roadway safety applications, visit [www.3M.com/roadwaysafety](http://www.3M.com/roadwaysafety).

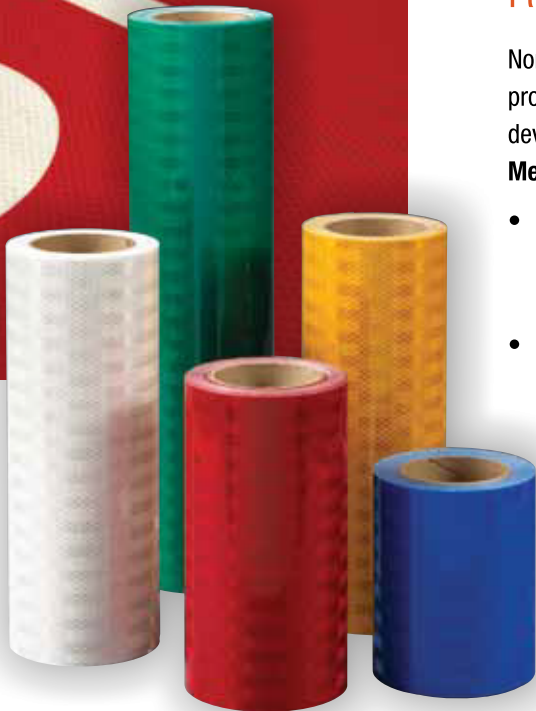

## 3M™ High Intensity Prismatic Reflective Sheeting Series 3930

Non-metalized microprismatic lens reflective sheeting designed for production of durable, reflective traffic control signs, work zone devices and delineators that are exposed vertically in service.

**Meets ASTM D4956 Type III and Type IV specifications.**

- Applied to properly prepared sign substrates, provides long-term reflectivity and durability with an improved optical package to increase nighttime safety
- High level of retroreflectivity for multiple traffic control situations

## 3M™ Engineer Grade Prismatic Reflective Sheeting Series 3430

Non-metalized microprismatic lens reflective sheeting designed for production of reflective, non-critical traffic control and commercial signs, and applications that are exposed vertically in service. Provides brighter daytime and nighttime appearance than conventional beaded engineer grade sheeting. **Exceeds ASTM D4956 Type I specifications.**

- Unique prismatic construction provides a higher level of retroreflectivity than beaded engineer grade sheeting

## 3M™ Engineer Grade Reflective Sheeting Series 3200

Enclosed lens reflective sheeting with pressure sensitive adhesive for directional and route signage, and off-road signage for parking lots, handicap parking, etc. **Meets ASTM D4956 Type I specifications.**

## 3M™ ElectroCut™ Film Series 1170

Transparent, acrylic, colored film with pressure sensitive adhesive for application over reflective sheeting to produce durable sign backgrounds, copy or logos. Designed for use in electronic cutting apparatus.

- Developed to provide optimal cutting, weeding, lifting and transfer features when used with electronic cutting machines
- Available in both pre-punched and non-punched roll goods in a variety of widths and colors
- Dimensionally stable and intended for application over 3M™ Reflective Sheeting
- An essential part of 3M's system of matched components covered by the 3M™ MCS™ Warranty

To learn more about 3M high performance reflective sheeting for traffic signs and other roadway safety applications, visit [www.3M.com/roadwaysafety](http://www.3M.com/roadwaysafety).

## 3M™ Premium Protective Overlay Film 1160

Durable, high performance, solvent-resistant, transparent film with pressure sensitive adhesive; applied as a protective overlay to signs made from 3M reflective sheeting. Common types of defacement from vandalism can be cleaned from this film.

- Developed especially for use on 3M™ Diamond Grade™ Reflective Sheeting
- Acts as a barrier to staining by many types of graffiti including spray paint, permanent markers, lipstick, etc.
- Enables removal of promotional stickers used to deface signs
- Guaranteed for the same number of years as the 3M reflective sheeting to which it is applied

# 3M Pavement Markings

3M offers a full portfolio of high-performance pavement markings for all types of roadway applications. 3M has been a trusted manufacturer and innovator of pavement markings for nearly 40 years.

## 3M™ Stamark™ High Performance Tape Series 380I ES

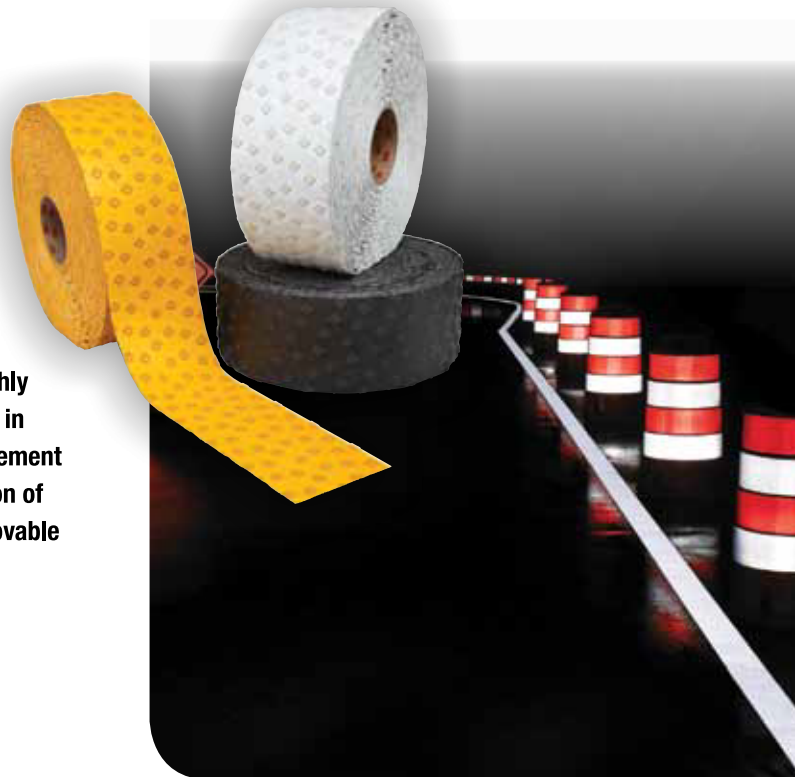

**This high performance, extended season tape is backed by decades of proven roadway performance and is ideal for interstate highways, dark rural roads and urban streets, where nighttime reflectivity is critical.**

- Exceptionally durable, diamond pattern optics ensure long-lasting visibility
- Available in both white and lead chromate-free yellow and with a durable black border that increases contrast with concrete and other light-colored pavements

## 3M™ Stamark™ Wet Reflective Removable Tape Series 710

**3M™ Removable Pavement Marking Tapes are designed for highly reflective temporary applications intended for longitudinal lines in highway construction work zones and for masking existing pavement marking lines. The tapes are designed to perform for the duration of the normal construction season. Removable tapes utilize a removable pressure sensitive adhesive.**

- Available in white, yellow and black
- White/Black and Yellow/Black contrast marking
- Available in symbols and legends
- Patterned profile

To learn more about 3M high performance reflective sheeting for traffic signs and other roadway safety applications, visit [www.3M.com/roadwaysafety](http://www.3M.com/roadwaysafety).

Avery Dennison makes highway and street signs brighter and safer with some of the most innovative technologies available in reflective sheeting today. Since 1924, we have been an industry leader, dedicated to growing and evolving to keep up with the ever-changing needs of a demanding market.

## Safety Solutions.... Superior Peace of Mind.

Other brands of prismatic sheeting that are rotationally sensitive may exhibit uneven visual appearance. With Avery Dennison, you won't experience this problem.

Today, we remain one of the preferred suppliers to professional sign shops worldwide, serving the traffic and safety market with one of the industry's most comprehensive range of reflective sheeting and conspicuity tape.

Our products are all engineered with omni-directional performance allowing for maximum reflectivity from every angle. The benefit is clear – a full spectrum of colors and performance that meets or exceeds local specifications.

### The Omni-Directional Advantage.

Avery Dennison's long history in prismatic technology allows for a unique approach to the way we design and manufacture our sheeting. We call it Omni-Directional performance. It is inherent in all Avery Dennison reflective products, delivering advantages to both drivers and converters.

Conventional signmaking methods are influenced by the rotational sensitivity of the sign sheeting. Material that is rotationally sensitive must be manufactured in a very specific, correctly oriented way to ensure consistent nighttime reflectivity and optimum sign design. This often results in wasted material and creative limitations.

Avery Dennison's Omni-Directional sheeting is not rotationally sensitive, so there are no special requirements for manufacturing or material mounting. Signmakers can place the material anywhere on the sign – in any direction – and still maintain consistent nighttime performance and more design freedom.

This unique approach ensures the reflectivity values required to meet both specifications and drivers needs. It also delivers cost and time savings to converters, allowing them to maximize sheeting use – without sacrificing style.

Our robust portfolio of prismatic and glass bead pressure-sensitive reflective and overlay films are designed to optimize reflectivity, legibility and visibility. Our wide selection ensures high value and safety advantages, and that you'll always have the right product for any job.

## Prismatic Sheeting

### T-11000 OmniCube™ Series

With full-cube prisms that are 100% efficient, OmniCube reflective sheeting returns approximately 60% of available light back to the driver, unlike competitive prismatic sheeting that returns only 40%. The full cubes and angles are precisely aligned in multiple orientations to deliver consistent performance. This intelligent cube technology efficiently returns light to drivers of all vehicles, including heavy trucks, SUV's, automobiles with the newest headlight designs, and motorcycles.

### T-9000 OmniView™ Series

This prismatic grade reflective sheeting is the ideal choice for all permanent traffic sign applications in urban and rural areas. It is designed to provide superior short, medium and long distance reflectivity.

### T-7000 MVP Series

This durable micro-prismatic retroreflective material incorporates unique prismatic construction for high reflectivity. The T-7000 MVP series meets applicable requirements for Type VIII retroreflective sheeting as required by ASTM D 4956.

### T-6000 High Intensity Series

Offering exceptional value in a 10-year outdoor durable material, the T-6000 series provides brighter colors and higher reflectivity than glass bead sheetings. It is ideal for a variety of signmaking, traffic sign and work zone applications.

## Glass Bead Sheeting

### T-5000 High Intensity Series

T-5000 High Intensity Series is an encapsulated lens glass bead, high-intensity sheeting. It is designed to satisfy minimum levels of retroreflectivity for a variety of permanent traffic control signs in compliance with FHWA standards. With a 10-year outdoor durable material that exceeds the reflectivity requirements of ASTM D-4956 Type III, these films are a reliable, durable option for many traffic control signage applications.

### T-1000 Engineer Grade Series

This engineer grade retroreflective sheeting is a high quality, durable, enclosed lens material designed for many non-critical traffic signage and commercial applications. It offers exceptional value and meets applicable requirements for Type I retroreflective sheeting required in ASTM D 4956 standards.

### M-0500 Commercial Grade Series

The M-0500 Series offers excellent value in commercial grade glass bead sheeting. It is a high quality, enclosed lens pressure sensitive retroreflective material that provides excellent value for non-specification applications where lower levels of retroreflectivity are adequate for visibility.

An effective barrier to protect the sign graphic from damage caused by spray paint, lipstick, magic marker, and stickers.

## Overlamine Film

### OL-1000 Premium Anti-Graffiti Overlay Film

This premium quality anti-graffiti overlay film is coated with a transparent pressure sensitive adhesive and acts as an effective barrier to damage caused by spray paint, lipstick, magic marker and stickers. The film allows easy cleaning with the use of mild solvents. It matches the durability of the underlying reflective material of the finished sign. Designed for application over finished traffic signs, OL-1000 can also be ordered with paper premask.

### OL-1000 Premium Anti-Graffiti Overlay Film

<b>Face</b>	Transparent
<b>Adhesive</b>	Permanent
<b>Liner</b>	Friction Coated film
<b>Durability</b>	Same as retroreflective film it is applied to
<b>Conversion</b>	Flat Bed Sign-Cut, Drum Roller Sign-Cut, Steel Rule Sign-Cut

### OL-2000 Transparent Overlay Series

OL-2000 Series films are designed for computer sign cutting and application on the surface of Avery Dennison T-series reflective sheetings. They are coated with a transparent pressure-sensitive adhesive and provide color formulations and resulting sign reflectivity that comply with ASTM D-4956 standards. OL-2000 films are an economical alternative to screen printing on small production runs.

### OL-2000 Transparent Overlay Series

<b>Face</b>	Transparent

## Screen Printing Inks

### 4930 Series Inks

4930 Series inks are one-part solvent based screen print inks for use on beaded high intensity and prismatic sheetings, including Avery Dennison T-5000, T-6000, T-7000, T-9000, T-11000, W-5000, W-6000, W-7000, T-9000 and W-11000. These inks match the durability of the underlying reflective material and meet ASTM D4956 for color.

### 7TS Series Inks

These one-part solvent-based screen print inks are ideal for the following beaded sheetings: Avery Dennison Series M-0500, T-1000, and W-1000.

### UVTS Sericol Series Inks

UV Sericol Series is formulated one-part curable UV screen print inks designed for use on the following beaded sheetings: Series M-0500, T-1000, and W-1000.

### UVTS Nazdar Series Inks

These one-part curable UV-formulated screen print inks are designed for use on the following beaded, high-intensity and prismatic sheetings: Avery Dennison Series T-5000, T-6000, T-7000, and T-11000.

**Our Ink Systems are designed to match the reflective sheeting type you are using.**

**Available in transparent and custom colors.**

# Work Zone

When conditions require temporary traffic control devices to warn drivers of a work zone and keep workers safe, Avery Dennison offers a wide range of work zone reflective sign sheeting and pre-striped reflective barricade products for optimal visibility in hazardous work areas.

## Fluorescent Orange Work Zone Signage

Avery Dennison Fluorescent Orange is available in OmniCube, OmniView and T-7500 MVP.

Fluorescent Orange is a bright highly visible fluorescent color that provides daytime conspicuity from dawn to dusk. This color has become the standard in North America and other parts of the world for providing safer Work Zones.

### Fluorescent Orange Work Zone

Product	Specs ASTM D-4956	Substrate
W-11514	Type XI	Aluminum/Wood
W-9514	Type IX	Aluminum/Wood
W-7514	Type VIII	Aluminum/Wood
W-7114	Type VIII	Plastic

### Orange Work Zone

Product	Specs ASTM D-4956	Substrate
W-6504	Type IV	Aluminum/Wood
W-5504	Type III	Aluminum/Wood
W-1504	Type I	Aluminum/Wood

## Barricade Applications

Pre-striped Engineer Grade Reflective sheeting for barricades is a high quality, enclosed lens retroreflective material. Meets applicable requirements for engineer grade sheeting applications.

Pre-Striped Barricade is also available in High Intensity Prismatic W-6000 series, and OmniCube W-11100 series for use on various traffic control devices.

## Barrel Applications

Work Zone Reboundable products are available in High Intensity Grade, WR-6100 series and Prismatic Grade, WR-7100 series. These products are designed for high levels of reflectivity, printability, flexibility and abrasion resistance that is required in plastic work zone traffic control devices.

### Barrel Applications

## Internal Sign Illumination

Internal sign illumination is often critical in many traffic and safety applications, including airport runways, overhead street name signs, or emergency exit signs. When back-lit signs can mean the difference between life and death, Avery Dennison offers translucent retro-reflective sheeting that delivers high visibility and legibility, as well as optimal light transmission.

### 6600 Translucent Series

The 6600 Translucent Series is a family of prismatic pressure sensitive retroreflective sheeting that transmits uniformly diffused light when used in internally illuminated signs. These materials provide reflective backup protection in the event of internal lamp or power failure. Designed for use on airport runway signs, 6600 Translucent Series materials exceed FAA specification AC 150/5345-44J and are available with either front faced or back faced adhesive.

### Product Specifications

# Conspicuity & Fleet

Research has documented that vehicle conspicuity tape improves vehicle safety through accident avoidance and reduction in accident severity. Increased safety results in reduced liability payments and additional savings for your fleet.

## V-5720 Conspicuity Tape

The original red and white stripe reflective contour tape developed for North America in the 1990s to improve nighttime vehicle recognition. V-5720 is a highly durable single layer construction offering easy repositionable application. V-5720 may be ordered in the following colors: red/white pattern (6" x 6" & 11" x 7"), solid red and solid white. It is available in the traditional 2" wide rolls as well as strips and kiss cut finishes. It is now offered in 10-year durability for new vehicles, as well as 5-year durability for replacement applications! In addition, customize your fleet's conspicuity tape with our custom logo options.

## V-5720 Conspicuity Tape

Product	Durability	Applications	Specifications	Approval Mark	Colors		
					White	Red	Red & White
V-5720	10 years	Trucks and Trailers	FMVSS 108	DOT-C2	—	—	V-5720-10 (6" x 6" & 11" x 7")
	5 years	Trucks and Trailers	FMVSS 108	DOT-C2	—	—	V-5720-5 (6" x 6" & 11" x 7")

## Conspicuity Tape for Buses & Slow Moving Vehicles

### V-9700 Series Conspicuity Reflective Tape

V-9700 Series is designed for slow moving vehicles, such as school buses, farm vehicles and heavy equipment. It provides easy nighttime vehicle recognition and increased road safety using a high quality, durable, microprismatic retroreflective material with a pressure sensitive adhesive. The single layered construction does not require edge sealing. V-9700 tape meets a wide variety of applicable industry standards such as FMVSS, ASTM, and ANSI/SAE.

## Delineator Tape for Railcar

### V-9700-RR Series Conspicuity Tape

V-9700-RR Series is designed for railcars and locomotives, providing easy night-time detection and recognition. Like its V-9700 Series counterpart, it is a high quality, durable, microprismatic retroreflective material with a pressure sensitive adhesive. V-9700RR increases the visibility of your rolling stock. It is offered in both yellow and white and carries the required FRA-224 certification. Available in 4" wide rolls, as well as strips, and kiss cut finishes. V-9700RR comes with an aggressive adhesive for low temperature applications.

## Delineator Marking Media

### S-9700 Delineator Series

S-9700 Series offers the highest level of prismatic reflectivity for marking obstructions within or adjacent to the road, making them more distinguishable to drivers. Available in two color options – red and yellow – S-9700 Series sheeting is ideal for distinguishing potential roadside hazards such as ramps, islands and other obstructions. It can also be used for guideposts, such as fire hydrants and snow plow markers.

## Prismatic Sheeting and Tape

# Minimum Retroreflectivity Compliance Kit

Ensure your signs are MUTCD compliant with Minimum Retroreflectivity Compliance Kits.

## EACH KIT INCLUDES:

### Calibration Sign Standards

Calibration Sign standards in all required colors with retroreflectivity levels engineered to match the values specified in MUTCD Table 2A-3. For use by your maintenance personnel to easily calibrate their vision prior to conducting nighttime sign inspections. As they conduct the inspection, they mark signs as pass / fail / marginal on their inspection log. If they encounter a marginal sign, they move on to the Comparison Panel Standards procedure for further review to reach a pass / fail conclusion.

### Comparison Panel Standards

Smaller panels in all required colors with retroreflectivity levels engineered to match the values specified in MUTCD Table 2A-3. Easy to use during nighttime inspections, these panels replace the need to invest in costly portable reflectometers and their respective maintenance. Simply clip the comparison panels to the sign being evaluated and view from a distance of approximately 25 feet with the provided light source.

If the sign is brighter than the comparison panel, the sign exceeds the MUTCD minimum values and may be kept in service. If the comparison panel is brighter, it indicates the sign should be scheduled for replacement.

Use of the visual assessment method using these kits is simple, effective, and fully compliant with FHWA recommendations for sign evaluation. These kits offer the most cost effective way for an agency to comply with the new MUTCD regulation on sign retroreflectivity. Retroreflective values for both the Calibration Sign Standards and Comparison Panel Standards are certified by Avery Dennison.

US Patent #8,205,994

**Osburn's offers only the best, at the most cost effective prices!**

- 100% Premium PVC Material - Cutting edge injection molding technology.
- The Revolution series is quality manufactured using premium grade PVC injection molding technology, resulting in the most durable traffic cones available in the U.S. market. Patented processes give you the best of both worlds - high quality products, at a competitive price. Call us now and start saving!

# Drums & Channelizers

## ECONOCADE II TRAFFIC DRUM

Produced with sheeting color sequence Orange/White/Orange/White (from top to bottom), unless specified otherwise.

Plasticade Drum pallet quality - 36 units  
 Tire Rings bundle quantity - 35 units, Truckload quantity 1785  
 Truckload, Barrels Only palletized quantity - 864 units  
 Truckload, Barrels Only floor loaded quantity - 1188 units  
 Palletized Drums and Tire Rings quantity - 576 units each  
 Floor Loaded Drums and Tire Rings quantity - 704 units each  
 \* Please specify if pallets are required

Signs with Standard MUTCD and Custom Messages Available

- High performance reflective
- Standard reflective
- Vinyl non-reflective
- Mesh non-reflective

Stands for Roll-Up and Rigid Construction Signs

- Crash design breakaway base
- Quick release system for all modular attachments and accessories
- Compact and lightweight
- Bright orange, UV stabilized, powder coated legs, for safety, durability & visibility
- Pull pin and kick release for fast setup by hand or foot
- Simple nut & bolt construction allows for fast repairs using basic hand tools
- Readily available replacement parts or assemblies
- 3 height adjustments on legs for use on uneven terrain
- Skid resistant rubber feet

## V30 Safety Vest

- ANSI Class 2.
- Lime mesh polyester material.
- 2" reflective silver stripes.
- Hook and loop closure.
- Sizes: Medium through 5XL.

## V31 Safety Vest

- ANSI Class 2.
- Lime mesh polyester material.
- 2" reflective silver stripes.
- Zipper closure.
- Sizes: Medium through 5XL.

## V100 Safety Vest

- ANSI Class 2.
- Lime mesh polyester material.
- 2" reflective silver stripes.
- Outside zipper pocket and large 5" x 7" inner pocket.
- Two horizontal reflective stripes.
- Hook and loop closure.
- Sizes: Medium through 5XL.

## V150 Safety Vest

- ANSI Class 3.
- Lime mesh polyester material.
- 2" reflective silver stripes.
- Zipper closure.
- Sizes: Medium through 5XL.

## V155 Safety Vest

- ANSI Class 3.
- Lime mesh polyester material. 2" reflective silver w/ orange triple trim contrasting stripes.
- Expandable radio pocket, outside zipper pocket, large 5"x7" inside pocket, and pencil pocket.
- Zipper closure.
- Sizes: Medium through 7XL.

## V1300 Safety Vest

- ANSI Class 2.
- Lime mesh polyester material.
- 2" reflective silver w/ orange triple trim contrasting stripes.
- Expandable radio pocket, outside zipper pocket, large 5" x 7" inside pocket, and pencil pocket.
- Zipper closure.
- Sizes: Medium through 5XL.

Available in  
Solid Lime Green

## J3201 Bomber Jacket

- Meets ANSI 107-2010 Class 3 standards.
- Dual orange over lime color for maximum visibility.
- Weather resistant polyurethane coated fabric.
- Permanent fleece liner, fleece lined side pockets.
- Zip out drawstring hood.
- 2" retro reflective silver stripes.
- Inside breast and pencil pocket, radio pocket.
- Zipper plus hook and loop closure.
- Sizes: Medium through 5XL

## SS150 Hooded Sweatshirt

- Meets ANSI 107-2010 Class 3 requirements.
- Pull-over style, made from 100% polyester fabric.
- Polyester lined sleeves for easy pull-on and pull-off.
- Black lower front color prevents dirt and grime from showing.
- Hood is sewn flat at the crown providing comfort when worn with hard hat.
- Front pouch pocket.
- Heavy duty stitching with rib knit cuffing.
- 2" reflective silver stripes in Class 3 configuration
- Sizes: Medium - 5XL

# Determination of Color - Test Procedure Changes

ANSI / ISEA 107-1999

(Old Procedure)

## 8.2 Determination of Color

The color shall be measured in accordance with the procedures defined in ASTM E1164-94 with polychromatic illumination D65 and 45/0 (or 0/45) geometry and 2° standard observer. The specimen shall have black underlay with a reflectance of less than 0.04.

ANSI / ISEA 107- 2004

(Current Procedure)

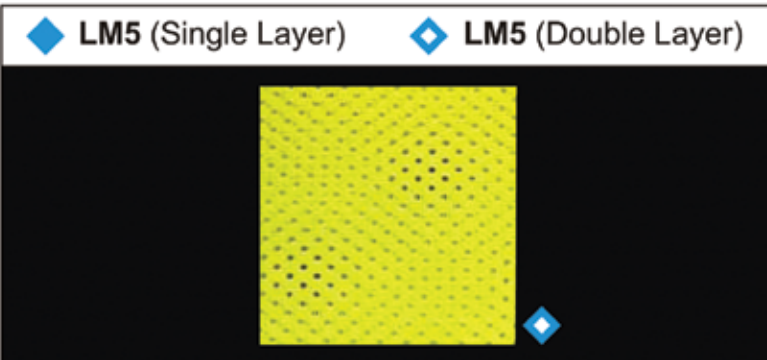

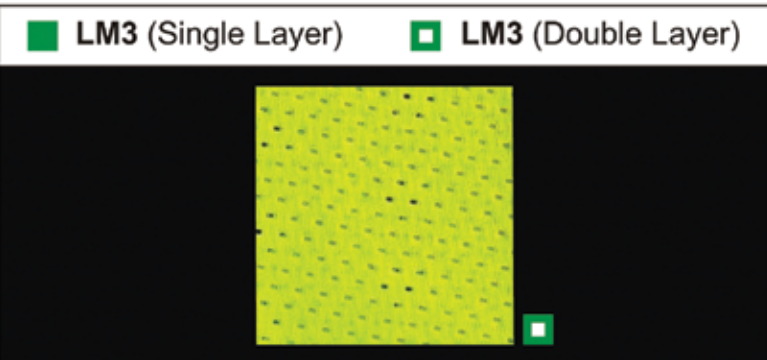

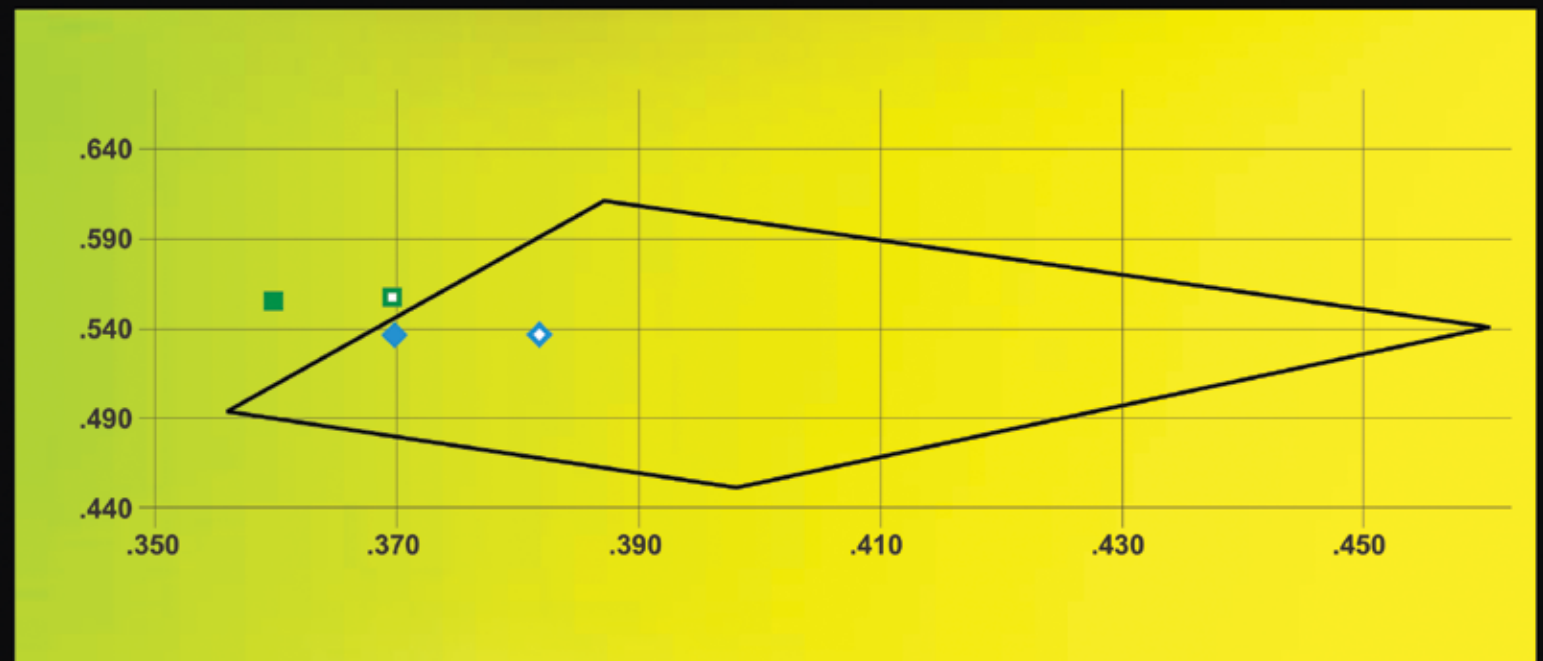

## 9.2 Determination of Color

The color shall be measured in accordance with the procedures defined in ASTM E1164-02 *Colorimetry - Standard Practice for Obtaining Spectrophotometric Data for Object-Color Evaluation* and the **specimens shall not consist of more than two layers of the same material**, with the following conditions:

- 1) Set the spectrophotometer at a wavelength range of 400-700 nm and at intervals of 10 nm as stated in paragraph 7.3.1.2 of ASTM E1164; and
- 2) Use D65 illumination and 45/0 (or 0/45) geometry with 2° standard observer and a black underlay with a reflectance of less than 0.04.

## ANSI / ISEA 107 - 2004 Standard, Fluorescent Yellow-Green Mesh

Note: Due to differences in printers, printed colors may not match those seen on a computer display.
