## MAGNATEC STOP-START 4 LITRE

#### HOW DOES IT WORK?

Castrol MAGNATEC STOP-START contains intelligent molecules that cling and form a self-healing layer, so it's always ready to protect at each of the critical stages of stop-start driving. Even if molecules are removed in the process of fighting wear, others rush in to restore the protective layer.

Molecules are removed in the process of fighting wear.

The protective layer heals itself as other molecules rush in to restore the surface.
