

Cotton Roll Towels

Professionally laundered for a softer, more hygienic hand drying experience

 **AbsorbTech**®
Cleaner, safer solutions for industry

Cotton Roll Towels

Clean. Absorbent. Cotton.

Hand drying is a vital part of hand hygiene. After washing, Cotton Roll Towels remove more than twice the bacteria from your hands than paper. Warm air dryers often add bacteria.

Cotton Roll Towels are professionally laundered for a softer, more hygienic hand drying experience.

Only towels should be used in locations where hygiene is paramount. Warm air dryers should not be considered because of their poorer hygiene performance.

- University of Westminster, London

“ We became more environmentally friendly by switching from paper to cotton rolls. Great service and product! ”

Jessica Ramsey, Marini Manufacturing

More effective

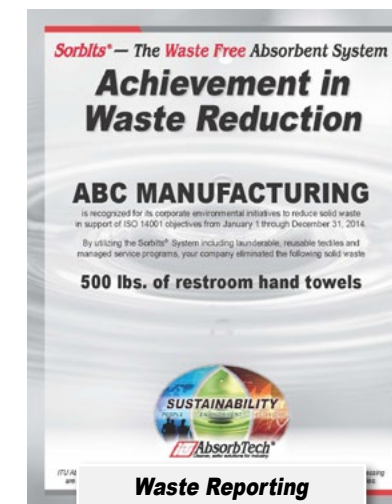

- Removes more than twice the bacteria on your hands than paper. **Warm air dryers often add bacteria.**
- Washed at over 180°F and dried at temperatures over 260°F to ensure a clean, more hygienic towel for hands, arms and face.
- Eliminates messy, overflowing trash cans.

Soft & absorbent

- Within the home environment, a soft cotton towel is used naturally. Outside the home, Cotton Roll Towels can provide a ‘comfort like home’ sense of well-being.
- Cotton is four times more absorbent than paper.

Smart environmental choice

- Can be laundered again and again-up to 100 times. After that, it can be repurposed. This cannot be said of recycled paper towels which, because of added chemicals, cannot be recycled after use.
- Uses 48% less greenhouse gas, 63% less energy and 79% less solid waste than paper throughout the Cotton Roll Towel life cycle.*
- Supports ISO 14001 objectives and reinforces corporate sustainability objectives.

Waste Reporting
Customers receive an annual certificate showing pounds of solid waste diverted from landfill.

Managed program

- Cabinets offer a unique, modern and compact design with a highly robust rolling mechanism and easy loading.
- We install and maintain cabinets - no costly maintenance fees or hassle.
- We pick up soiled towels, deliver clean towels and manage your inventory with regular, scheduled visits.
- We deliver ongoing usage, cost and environmental reports.

*Independent Life Cycle Analysis conducted by the Oko-Institut, Germany

Cost savings

In addition to being the superior choice in hygiene, comfort and for the environment, Cotton Roll Towels can also save you money.

Better value than hot air

- No capital investment
- Reduces energy costs
- Reduces employee time spent drying hands

Better value than paper

- Reduces storage and shipping/receiving costs
- No plumbing costs from stopped up toilets and sinks
- Reduces slip hazards from wet paper on floors
- Reduces custodial costs with less trash to empty
- No disposal costs
