You're all Heroes

Coming soon your 1st TV advert

ANY PART FOR ANY CAR
OVER 200 BRANCHES NATIONWIDE

Hero of the advert Stuart from Drivers Autocentre with co-star Emma Saunders.

Coming soon... to a TV near you!

The time has come. Euro Car Parts' first major TV advertising campaign hits your screens in November and we want you to be the first to hear about it!

Why TV? Well, TV is the most effective advertising medium - that's one point that every major study into advertising effectiveness agrees on. It generates the most profit, creates more sales and consistently outperforms everything else. TV stands head and shoulders above other media in driving business results and there is a mountain of research to prove it.

We've been kicking the idea around for some time now - should we, shouldn't we? How much will it cost? When's the best time to run an ad? Most importantly what's our message?

**Then it came to us,
like a bolt from the blue...**

We're not going to advertise Euro Car Parts, we're going to invest our money in a major TV Campaign that promotes **YOU**, our independent and key account customers. After all, we're all in this together in an ongoing battle against our competition and if we want to grow our business we're going to have to help you grow your business.

So, our aim is to help Britain's motorists understand what a fantastic service you provide; to recognise that your business is the first place to go for service and repair. Yes; our new TV campaign is going to shout loud and clear in praise of the service available from your local garage. And let's be honest; it's about time we celebrate and support the independent trade!

And we haven't cut any corners either. It was important we did this right, so we called in the big guns to produce this for us. The commercial has been directed by Jamie Delaney, a young star who is tipped for movie success, but interestingly comes from the highly rated Ridley Scott Associates who can count Gladiator, Alien, Black Hawk Down, Prometheus and Blade Runner among their successes - so you can see, they know how to do this properly.

**ANY PART FOR ANY CAR
OVER 200 BRANCHES NATIONWIDE**

Prices correct at time of going to press: October 2016. Prices exclude VAT, VAT will be applied at current rate. Errors & omissions excluded. All purchases and offers contained in this publication are subject to Euro Car Parts terms and conditions as found at www.eurocarparts.com.

The production company we used was FrameStore, who have been involved with Gravity, The Martian and Harry Potter among other massive films. It's a quality production to show our industry off the best way we can, and we are very proud to be working with them.

The story's a simple one, we only have 30 seconds after all...

A young lady is driving through the countryside; she hadn't been able to get her car serviced at the franchised dealer but Stuart at her local independent garage got the car in quickly and at the same time noticed the brakes needed changing. And a good job he did too! – Not that she is thinking about that until she rounds a corner and sees a road full of sheep!

One emergency stop later and all's well. The sheep pass by and the young lady can continue her journey unscathed – thanks to Stuart, her Hero.

It's a great safety message, which really brings the commercial to life – get your brakes checked; random sheep might be crossing the road at any time!

We were completely clear from the very start of this project, the true Heroes of this campaign are you guys, so we thought.....why you don't star in the ad yourself?!

The main Hero featured is in fact Stuart from Drivers Autocentre in Glasgow who was quite clearly selected for his good looks! As a business, the team at Drivers Autocentre kindly allowed the Director of the commercial, Jamie and his Ridley Scott Associates team, to take over the place for the day! And we are very grateful for his support.

You may have heard that we also asked you all to submit small videos of yourselves that we could use for the end scenes – again showing true local real-life heroes.

So where and when will we be running the commercial and how long for?

To begin with, we'll be on air for 3 weeks in November and the ad will be aired over 800 times in that short period, then we'll spend some time analysing the results of the campaign before deciding our next steps, but overall we are delighted to get this campaign off the ground!

This is a first for Euro Car Parts, and we are excited about your involvement. Be sure to keep an eye out over November, and see if any customers start calling you their Heroes! Or at least are singing the Bonnie Tyler classic!

Jamie Delanie talking to Director of Photography Euan McLoughlin.

No sheep were harmed in the making of this film.

On the set in Drivers Autocentre.

Director (centre) Jamie Delanie on the set in Drivers Autocentre.

EURO ACADEMY: INTELLIGENCE FOR YOUR BUSINESS

The Euro Academy offers you access to our teams of experts in three different ways: a technical helpline; an online diagnostics and repair database; and a training facility.

HELPLINE

The Technical Helpline provides troubleshooting, repair and diagnostics assistance and technical information on any vehicle, any manufacturer.

We have access to repair manuals, circuit diagrams, parts catalogues and component locations for any vehicle that comes into your workshop. Whatever you're looking for, we can find it – saving you time and money.

One call could save hours tracing an elusive component failure – whatever the problem you're tackling, chances are we've already heard about it. And know how to fix it.

ONLINE TROUBLESHOOTING

Euro Vehicle Troubleshooting is an online diagnostic database and reference library that gives access to a database of over half a million technical queries resolved over the last 10 years. With an average of 600 repairs added each day – over 100,000 issues were resolved last year – the database is constantly growing and becoming increasingly sophisticated, learning multiple root causes of problems, fault codes and failures.

Euro Vehicle Troubleshooting places all this knowledge at your fingertips, helping with troubleshooting, giving you the technical information you need and detailing exactly how to effect the repair.

It's like having another factory-trained master technician in your workshop, solving problems and guiding you through diagnostic and repair procedures – whatever brand of vehicle you're working on, and whatever make of test equipment you use.

EURO ACADEMY TRAINING

Euro Academy training courses cover all areas of mechanical, electrical, electronic and diagnostics fault-finding and repair over the entire vehicle.

We offer a structured solution that spans all ability levels from Basic to Master Technician; in fact, it's all the training your business will ever need. Technicians achieve career development from Academy training, gaining qualifications that prove they are competent to repair your customers' vehicles.

Online Technician Assessments

Preliminary online Technician Assessments help us to gauge every technician's current ability and level of understanding – we don't waste time going over ground that's already been covered.

The Assessment consists of a questionnaire divided into three subjects: Mechanical, Electrical and Electronics, and Diagnostics. Each subject is further divided into five sub-sections focusing on particular vehicle systems with five questions each, so the candidate has 75 questions to answer in 75 minutes. The results quickly and clearly indicate the technician's technical strengths and weaknesses.

Technician Assessments are a valuable tool for employers, allowing technicians to be graded according to ability, and can be used as part of a strategic recruitment and remuneration policy.

They also enable us to structure personal training plans, tailored to the individual needs of the technicians.

**ONE CALL

FIX YOUR PROBLEM**

**OVER 100,000
ISSUES RESOLVED
LAST YEAR**

**ANY PART FOR ANY CAR
OVER 200 BRANCHES NATIONWIDE**

It's a helpline when you need it

It's a diagnostics database and reference library when you need it

It's a training course when you need it

Tailored Training Plans

Depending upon ability, a personal plan will cover up to 18 different subjects at either Basic or Advanced Level, spanning either two years for Advanced or three years for Basic Level technicians. Each subject is covered by eight hours of e-learning, accessed wherever and whenever it suits the technician, and eight hours of on-site practical training. On-site training takes place at a venue determined by the location of the trainees, and is restricted to no more than 10 technicians at a time.

Personal training plans lead to Master Technician status, a degree of excellence that qualifies technicians for ongoing training on new technologies and systems implemented in the latest vehicles, allowing businesses to develop and diversify into new specialities and offer new services.

Master Technician Training

At this level, courses adopt a modular structure, split 30% theory and 70% practical. Every two-day module includes an introduction to the course and details of the car, the system and its various components. The rest of the module is hands-on in the workshop, with a Master Technician and one of our specially prepared vehicles.

We have 35 cars fitted with electronic fault simulators, programmed to reproduce up to 28 real technical faults. They are popular models that reflect the vehicles on the road today, the cars you will see in your workshops with

problems that you will face. You can learn how to diagnose and repair faults on DPFs, DSGs, CVTs, Haldex systems, CAN Bus, Driver Assistance and Start/ Stop technology, even electric and hybrid vehicles.

Course content is continually re-assessed and is aligned to the Euro Vehicle Troubleshooting online helpline – as the database grows, so these known faults and repairs are incorporated into the syllabus, to keep the training up to date and give technicians the information they need.

Practical training can, when convenient to those attending, be held in Euro Academy's new IMI Approved Centre, where all training sessions are IMI Quality Assured. Of course, we can hold sessions at any suitable location if logistically preferable.

ACADEMY MEMBERSHIP

The Euro Academy provides its members with fast, easy access to the technical information and training they need to stay at the forefront of technology and give them a competitive edge in the marketplace. Or, more simply, we put a team of master technicians in your workshop, whenever you need them.

IMI QUALITY ASSURED

There is a price to pay for such an advantage but it's a lot lower than you might think. Euro Academy Membership is available by annual subscription, paid monthly in instalments. There are three levels of Membership to choose from:

Level 1 – Full, unlimited use of the Helpline, unlimited access to Euro Vehicle Troubleshooting and unlimited online Technician Assessments

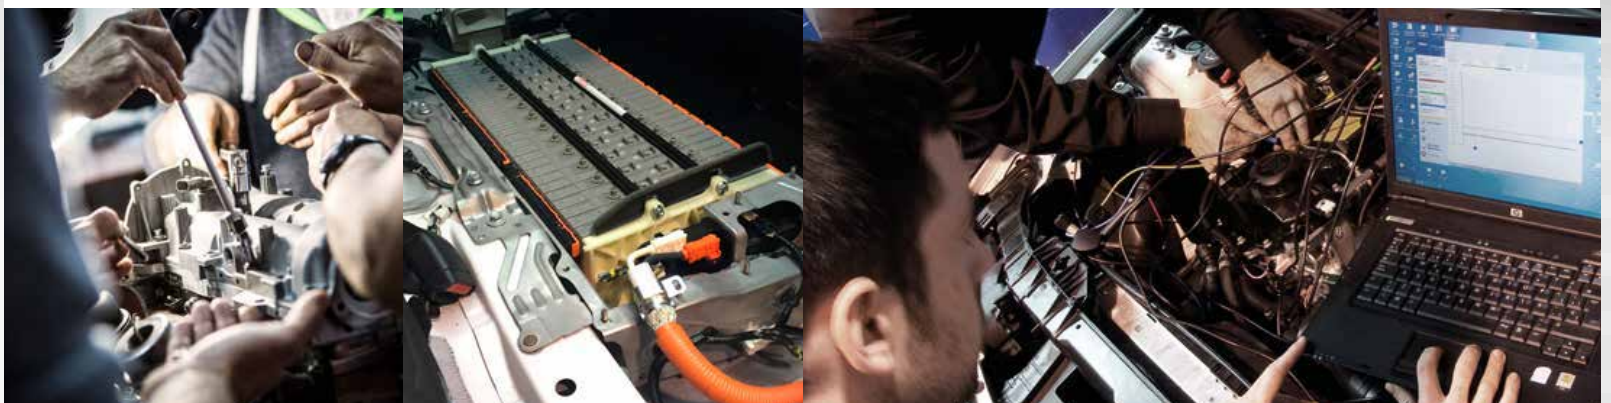

Level 2 – Full, unlimited use of the Helpline, Euro Vehicle Troubleshooting and online Technician Assessments as above, plus a two-day training course for one technician each year

Level 3 – Full, unlimited use of the Helpline, Euro Vehicle Troubleshooting and online Technician Assessments as above, plus three two-day training courses each year

INTERESTED?

Call your local ECP Branch Manager for further details, to register your interest or to apply for Membership.

IT'S LIKE PUTTING A TEAM OF MASTER TECHNICIANS IN YOUR WORKSHOP, WHENEVER YOU NEED THEM

Lucas

LUCAS DIESEL Innovation, Pedigree & Excellence

Euro Car Parts are proud to announce the launch of LUCAS Diesel in an exclusive UK distribution deal heralding a major shake-up of the UK Diesel repair market.

As pioneers of Diesel Fuel Injection products in the early 1970's and throughout the following 30 years, LUCAS became the premier Diesel brand suppliers and garages alike, as their products became renowned for efficiency, quality and durability. Now they have returned to reclaim their crown as the industry's leading remanufacturer of Diesel pumps and injectors.

With an unrivalled heritage in Diesel Fuel Injection, the LUCAS brand is synonymous with quality, innovation and class-leading customer care. LUCAS are celebrated for their innovative manufacturing methods and

processes; not only meeting OE specifications, but exceeding them.

The LUCAS Diesel range launches with an initial 629 lines of 'Premium Remanufactured' product, not to be confused or associated with lesser quality repaired or reconditioned products. With best in class components, ultrasonic cleaning systems, class leading test-benches and state-of-the-art manufacturing techniques, you can be sure that every LUCAS product will be consistently high quality, exceeding the original product specification. Absolutely all wearable parts are replaced with best-in-class components, reusable parts are ultrasonically cleaned and tested; you can be secure in the knowledge that the product you are fitting has gone through a complete and exhaustive quality control cycle.

Sceptical? Don't be. LUCAS now provide 'DNA Traceability' and all products are identified with an 'Original LUCAS' QR code, which is linked to their traceability system. You can check the original test results and refer to technical bulletins for 100% reassurance about the correct way to fit the product. Additionally, all LUCAS Diesel products from Euro Car Parts come with an unrivalled 2-year unlimited mileage warranty. Dedicated Technical Support lines are available to all Euro Car Parts customers, whether you're a Diesel veteran, or new to Diesel products.

Why Lucas?

- Initial range of 629 LUCAS Diesel Products and many more to follow
- Premium remanufacture – absolutely all wearable parts are replaced with best in class components, reusable parts are ultrasonically cleaned, and tested
- Best in class manufacturing – designed to exceed OE quality specifications
- All four major brands covered - Bosch, Delphi, Siemens/VDO & Denso
- Dedicated technical support for ECP customers
- LUCAS 'DNA Traceability'
- 2-year unlimited mileage warranty
- Reputation for excellence and a trusted name in the market place

Hidria

GLOW PLUGS

EXCLUSIVE TO EURO CAR PARTS

- Hidria glow plugs are now exclusively available in the UK from your local Euro Car Parts branch.
- While the brand may not be a familiar name to people in the UK Automotive Aftermarket just yet, these top quality plugs currently fire up a fifth of all new Diesel engines. They're sold in over 80 countries across the world and they're chosen by OE vehicle manufacturers including Ford, Citroen, Peugeot, Renault, Vauxhall, Mercedes, Land Rover Nissan, and VW/Audi for use in their vehicle build production lines across Europe.
- Hidria Glow Plugs are a premium quality product. In fact, many of the new PSG (Pressure Sensor Glow Plugs) are manufactured by Hidria and they own the patents, so they cannot be copied by anyone else.
- We're stocking the complete Hidria range of glow plugs for cars and light commercial vehicles offering 97% market coverage for all diesel applications in the UK. Not only that, we are also offering this premium quality product at highly competitive prices – considerably cheaper than other premium brands on the market.
- Hidria offer a 5-year warranty on all their glow plugs but vehicle manufacturers service intervals for glow plugs must be followed and not exceeded.

FITTING TIPS:

Always observe the correct tightening torques for glow plugs and power connection nuts

- Before removing plugs clean away dirt that could fall into the combustion chamber
- Use the correct size socket/wrench for the glow plug and terminal
- Remove the plug and inspect the threads and seating face for damage
- Screw the new plug in by hand until it contacts the cylinder head
- Do not use lubricants or anti-seize compounds
- Tighten plug to the correct torque
- Tighten power connection nuts to the correct torque

ENGINE MANAGEMENT

With autumn here and winter just around the corner this is the time of year when the vehicles electrical parts are under even more pressure to perform. Many electrical parts work under extreme conditions from high operating temperatures to cold start up temperatures, moisture and even dust and dirt. These conditions play a vital part on how your vehicle electrics operate within the manufacturer's parameters.

Euro car parts has the range and brands to help you beat the winter and keep your car in perfect working order to ensure you get to where you need to go! We have a market leading range of engine management, emission control and fuel management products.

Air Flow Meters

An air flow meter is a component that measures air flow. It does not measure the volume of the air passing through the tube, it measures the mass of air flowing through the device per unit time. This information is then sent back to the ECU so it can calculate the correct fuel and air mixture to ensure the vehicle runs as efficiently as possible.

ENGINE MANAGEMENT

Crankshaft position sensor

A crank sensor is an electronic component used in an internal combustion engine to monitor the position or rotational speed of the crankshaft. This information is used by ECU to control the fuel injection or the ignition system timing and other engine parameters.

MAP Sensor

The manifold absolute pressure sensor is a sensor used in a vehicles engine management system. The manifold absolute pressure sensor provides manifold pressure information to the ECU. This information is used to calculate the air density and determine the engine's air mass flow rate. A typical naturally aspirated engine will use either a MAF sensor or a MAP sensor however a turbo engine typically uses both.

DENSO's Stop/Start Technology

DENSO's Stop/Start Experience

DENSO's been working on stop/start technology since the 1980s. This experience, paired with their in-depth knowledge of powertrain and thermal management systems, gives them a unique advantage to provide carmakers with an overall systems approach. The company understands how to seamlessly integrate stop/start components into the vehicle and can offer superior technical support that comes from decades of integration experience. DENSO can also offer carmakers different technology solutions depending on their specific needs and requirements.

Starter Technology Overview

Advanced Engagement (AE) Starter

Already implemented in Europe and Asia, this longer-life starter technology allows carmakers to achieve approximately 3 to 5 percent (depending on engine size) in fuel savings.

In terms of starter motor-based solutions for stop/start, AE is the easiest to integrate, requiring no unique controls or engine modifications.

Tandem Solenoid (TS) Starter

Also implemented in Europe and Japan, this starter technology allows automakers to achieve faster restart times than the AE, and potentially more fuel savings if combined with expanded areas of fuel cut, for example, engine shut-off during vehicle coasting. Compared to AE, the TS is Change of Mind Capable, which means it is able to re-engage into a moving ring gear/flywheel.

The TS includes all the same long-life features of the AE, and only requires engine control unit software modifications to control the dual solenoid design.

Permanently Engaged (PE) Starter

Jointly developed with Toyota Motor Corp., this starter is used in Toyota models, such as the Auris and Yaris models sold in Europe since January 2009.

The PE is also Change of Mind Capable and delivers the quickest and quietest restart times of all starter motor-based systems, while bumping-up the overall fuel-saving potential depending on the overall system approach.

In this system, the starter and flywheel gears are permanently connected, so there are no concerns with the dynamics of gear engagement and disengagement.

OSRAM

The automotive bulb sales cabinet from OSRAM – a clear boost for your sales

A clearly and individually arranged selection of bulbs. Precisely what is needed to sell automotive bulbs. The automotive bulb sales cabinet is an ideal bulb depot for retail outlets and car workshops and salesrooms. It provides a clear overview of the 12V automotive bulbs from OSRAM.

Ideal for retail outlets and car workshops

Its robust construction and attractive design make this the perfect addition to any store or car workshop.

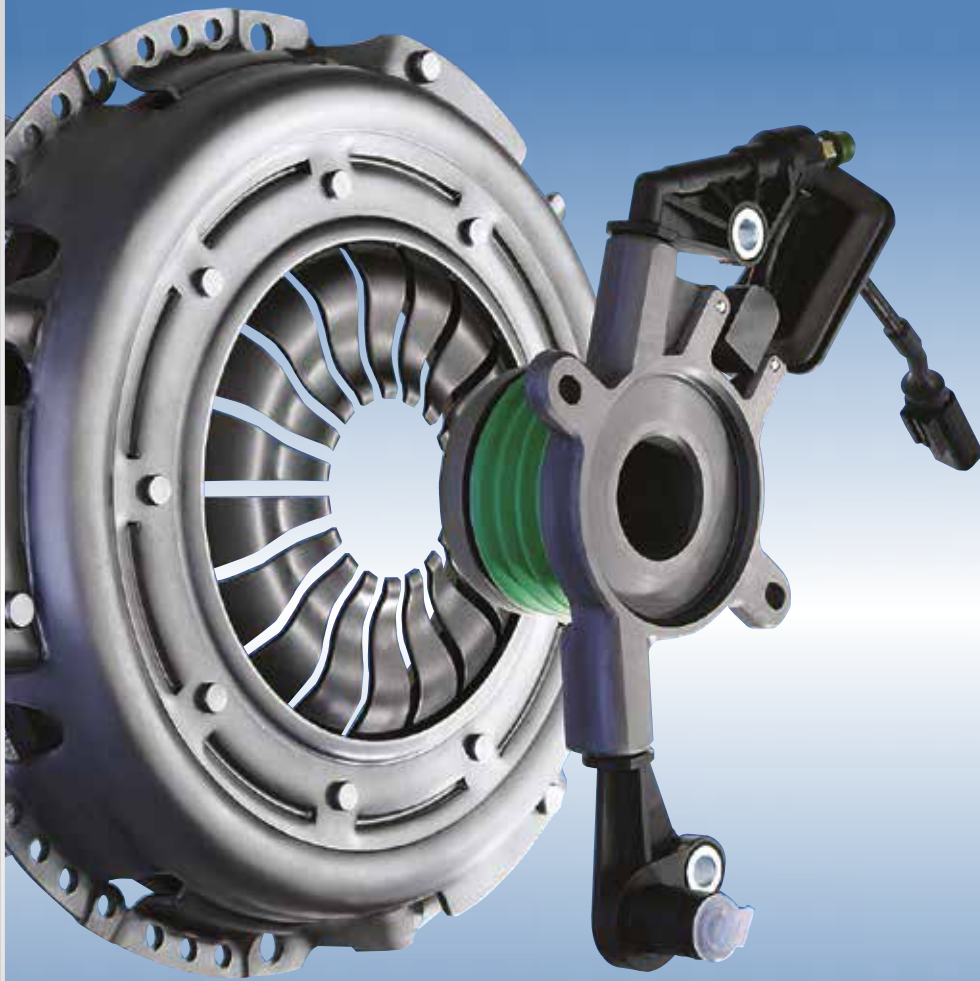

ALL THIS FOR...
£125.00

Spend £125 on Osram bulbs and get a **FREE** locking case and bulb tester.

With this combination of 170 12v bulbs you can't go wrong.

CLUTCH CLINIC

Problem:

The Concentric Slave Cylinder (CSC) rubber washer (TOP HAT) trapped inside the T piece with the bleed nipple.

Result:

Burst/Broken CSC, fluid leaks, non-working clutch.

When completing a clutch/CSC change on any vehicle it is good practice to adopt the procedure listed below.

When you remove the U clip to detach the bleed nipple union from the CSC pipe, (this is the pipe that protrudes from the gearbox), you must check to ensure that the old seal is not still inside the bleed nipple T piece – if the old seal is still inside it must be removed - check the end of the old pipe, if the seal is not on the end of the pipe then it is trapped inside the union. Get a torch. Get a pick and get it out.

Failure to remove this will result in the old seal getting squashed into the union when you fit the bleed nipple unit back on. This will restrict the fluid return flow which in turn means the CSC cannot return correctly. This normally results in over stroke (CSC overthrowing its maximum operating distance) due to the over pressurisation of the hydraulic system, leading to a hard or solid clutch pedal. Many instances of this have been observed where the CSC has burst, cracked or completely exploded, when this happens the “hard pedal” will obviously become soft/non-existent with the resulting leakage. Installers have in some cases fitted 3 or more concentric slaves and destroyed all of these before identifying the cause – which is simply the old top hat washer still trapped inside the union. Check the end of the old pipe, if the seal is not on the end of the pipe then it is trapped inside the union. Get a torch. Get a pick and get it out.
