# L4000 2 POST 4 TON HYDRAULIC LIFT

- Minimum pad height 110mm
- Drive-thru width 2486mm
- Maximum Lifting Height 1950mm
- Lifting time 40-50sec
- Lowering time 20-40sec

Save £696

This value lift has a lot to offer. Symmetric arms offer wide flexibility of chassis as well as being able to accommodate vehicles driving on or reversing on. Operates an ever-reliable manual safety lock release.

- Hydraulic hoses and balance cables are all fully concealed, providing a clean appearance.
- The double hydraulic cylinders and high strength chain drive provide smooth lifting and lowering.
- The two sets of arms always travel synchronously thanks to high strength balancing cables.
- An emergency lowering valve can be manually operated to lower the lift safely in the event of a power failure.
- Meanwhile, a flow-control valve prevents the possibility of a rapid uncontrolled descent
- Door rubbers on the posts protect the car doors from direct contact, and sill protector rubbers on the upper arms perform the same function protecting the undersides of longer chassis vehicles

# PROWAY ELITE 42

The Proway Elite 42 comes with some luxury features such as medium and high reach pads as standard fitment, and sill-protectors on the upper part of the lifting arms.
