

Workshop Solutions

One call for complete peace of mind

Garage Equipment, Tools,
Training & Technology

One call for complete peace of mind – Workshop Solutions

Your business is your livelihood. We understand that and we care. At Workshop Solutions we provide you with all the equipment, service, repair and maintenance programmes, assistance with health & safety procedures and project planning skills you need all in one place. We are the equipment and service provider of choice to many motor manufacturer groups, independent garages and bodyshops nationwide. From a new compressor to an MOT bay, comprehensive building works to aftersales servicing and maintenance, Workshop Solutions manages the whole process, ensuring a smooth, hassle-free, one-stop service that is delivered on time and on budget.

Our panel of finance houses can spread the cost tax-efficiently

From preventative maintenance plans to emergency call-outs

Waste Management – Keeping you fully compliant and stress free

THE LATEST TECHNOLOGY FROM THE BEST BRANDS

We aim to provide you with the tools, equipment and service that match both your personal expectations and your business requirements.

Health & Safety – Safeguarding your people and your business

Please contact our Equipment Service & Maintenance team on 01527 882 778 to arrange an initial free, no obligation consultation.

DO YOU PAY YOUR STAFF 5 YEARS IN ADVANCE? NO, SO WHY PAY FOR YOUR EQUIPMENT THAT WAY! **PAY FOR IT AS IT WORKS FOR YOU!**

NO HASSLE WARRANTY

BEST PRICE PROMISE

- Fixed payments (excluding VAT)
- Tax efficient – see table
- Preserves working capital
- 1–5 year terms available
- No deposit
- Why wait? Buy the equipment your business needs now!

0845 603 3636
OVER 200 BRANCHES NATIONWIDE

Welcome to the latest edition of Workshop Solutions magazine, which is packed with information on all the latest garage equipment from some of the UK's biggest equipment brands. But we're not just here to sell you Garage Equipment. As our name suggests, we're here to help provide solutions to some of the challenges facing your workshop.

Let's start with news about a new training initiative, Euro Academy, which is designed specifically to support you, our independent garage customers.

With IMI-certified training and a unique and innovative technical resource, this is a membership based initiative that includes a technical helpline plus an online diagnostics database incorporating a huge reference library of previous faults.

This resource is enhanced by Euro Academy training, which covers all areas of vehicle maintenance, including electrical, electronic, mechanical and diagnostic fault finding. For Master Technicians, courses take place at one of our IMI-approved training centres, which boast more than 30 cars fitted with electronic fault simulators, which are all able to replicate real-life vehicle issues.

Helping you to understand your own training requirements, the skills of new team members or the order in which courses are taken, is vital before you invest. Full access is also given to unlimited online technician assessments to enable you to decide which courses, who and when you train.

Cars continue to get more and more complicated and they're filled with highly advanced technology which requires specialist knowledge. Unqualified, untrained mechanics do not have a chance of competing against franchise dealers when working on modern cars. However, if you run a garage with all the right kit and with trained technicians that know how to use it, you've got a great future ahead of you.

TRAINING IS NOT A COST TO YOUR BUSINESS, IT'S AN INVESTMENT IN ITS FUTURE PROSPERITY.

- You'll increase productivity and decrease the need for supervision – If technicians know what they're doing and are properly trained, productivity will increase because they won't need constant supervision.
- You'll reduce employee turnover – Training your employees shows them you're keen to develop their skills; they'll stay with you longer and contribute more to your business.
- You'll gain the ability to work with new technologies – If your technicians are current with technology, they'll do their job better and ensure that your garage keeps ahead of the competition.
- You'll be able to attract better technicians to your business – If they know you're going to support their ongoing development you'll become the go-to business for top talent.
- You'll create increased job satisfaction, morale and motivation among employees – Training invariably reduces absenteeism, mistakes and stress. Providing technical training improves the reputation of your garage and the performance of technicians.

To become a Euro Academy member, just contact your local branch. Membership can be paid for in monthly instalments.

We are passionate about supporting the UK's independent garage network. Euro Academy is an example of our investment in the future of our trade customer, to ensure their businesses are well placed

to build on their strengths of quality and service through access to up-to-date technical information and training. Working in partnership with our members, we will continue to invest in and develop Euro Academy to ensure that the independent garage sector is always able to compete with franchise dealer networks.

*Finance example typically based on a 5 year lease purchase agreement. Finance subject to status, full terms and conditions available on request. Other finance options available. All prices exclude VAT at 20%. Price, availability and specification may change without prior notice. Warranty subject to manufacturers terms and conditions of use. Errors and omissions excluded. Offers valid until 31st March 2017. Prices correct at time of going to press: December 2016.

EURO ACADEMY

Today's vehicles are vastly more complex and advanced than their predecessors, and these developments will continue to happen at a rapid pace. With engine options now including petrol, diesel, electric or hybrid, modern cars typically have intricate computers controlling almost every aspect of their operation- from suspension, braking, fuel and air flow, to emissions, traction and parking assistance.

Now with main dealers having the insight and knowledge to effectively work on all the latest vehicles and components, are independent workshops at risk of being left behind?

Not if Workshop Solutions has anything to do with it. Workshop Solution's Euro Academy membership now offers you access to superb technical information and assistance in 3 different ways:

TECHNICAL HELPLINE

ONLINE FAULT LIBRARY

TRAINING FACILITY

TECHNICAL HELPLINE

The Euro Academy Technical helpline is like having another master technician standing next to you all the time. And, unlike some of our competitors, there's no limit to the amount of time you can spend on a call, or the amount of times you can call us. Our master technicians have years of practical experience along with access to the latest technical information on any vehicle, regardless of the manufacturer. So, whether you're looking for repair manuals, circuit diagrams, parts catalogues or component locations for any vehicle in your workshop, simply pick up the phone and let us help.

One simple call to our technical helpline could save you hours of searching for an elusive component failure.

ONLINE FAULT LIBRARY

With new vehicle designs, developments and technologies come new problems, issues and repair processes. And, if your diagnostics equipment isn't as up to date as these contemporary cars, then you could be left unequipped to carry out the repair.

However, this is where Euro Academy can help.

Our comprehensive online fault library offers access to over half a million technical queries. With an average of 600 repairs added to the database every day, last year alone saw over 100,000 issues fixed and recorded.

Not only do Euro Academy users get unlimited access to this online troubleshooting facility, they also have a wide range of data available to help them diagnose problems, and find the exact details of how to achieve a repair.

TRAINING

The ever-changing repair jobs that workshops have to manage mean that on-going learning is essential in the automotive industry. Currently, we have a purpose-built training centre in Avonmouth, and more due to open in Glasgow, Sunderland, Manchester, Tamworth, London and Norwich. Our academy courses cover all areas of vehicle repair including mechanical, electrical, electronic and diagnostics fault-finding and fixes.

With just a quick assessment, we are able to determine the knowledge levels of course attendees and grade them either:

- **A** (master technician)
- **B** (medium-level technician)
- **C** (entry-level technician)

This data not only helps workshop managers understand the knowledge levels of their employees, but enables us to provide the best courses and training solutions to suit their needs. In addition to expert tutors and advisers, the Euro Academy training is also provided in a blended format. This means that in order to minimise disruption for workshop operations, each subject is covered with 8 hours of e-learning at the student's home or workplace and blended with 8 hours of on-site training at a suitable venue – meaning less time spent away from the garage.

CALL YOUR LOCAL EURO CAR PARTS BRANCH MANAGER FOR FURTHER DETAILS, TO REGISTER YOUR INTEREST OR TO APPLY FOR MEMBERSHIP.

YOUR MEMBERSHIP

Becoming a Euro Academy member is an investment in your business, and one which will increase revenue and profits while saving time and money. Memberships are available by annual subscription paid monthly, and start from as little as £79.00 for level 1 subscribers.

	Full, unlimited use of helpline	Unlimited access to Euro Vehicle Troubleshooting	Unlimited Technician Assessments	Two-day training course for one technician each year	Three two-day training courses for technicians each year	
LEVEL 1 263 77 6050	•	•	•			£79.99
LEVEL 1 263 77 6060	•	•	•	•		£99.99
LEVEL 1 263 77 6070	•	•	•	•	•	£129.99

*Finance example typically based on a 5 year lease purchase agreement. Finance subject to status, full terms and conditions available on request. Other finance options available. All prices exclude VAT at 20%. Price, availability and specification may change without prior notice. Warranty subject to manufacturers terms and conditions of use. Errors and omissions excluded. Offers valid until 31st March 2017. Prices correct at time of going to press: December 2016.

EURO ACADEMY TRAINING COURSES – MEMBERS ONLY

Euro Academy training courses cover all areas of mechanical, electrical, electronic and diagnostics fault-finding and repair over the entire vehicle for members.

We offer a structured solution that spans all ability levels from Basic to Master Technician; in fact, it's all the training your business will ever need. Technicians achieve career development from Academy training, gaining qualifications that prove they are competent to repair your customers' vehicles.

Each subject is covered by eight hours of e-learning, accessed wherever and whenever it suits the technician, and eight hours of on-site practical training.

- On-site training takes place at a venue determined by the location of the trainees, and is restricted to no more than 10 technicians at a time.
- Course content is continually re-assessed and is aligned to the Euro Vehicle Troubleshooting online Helpline – as the database grows, these known faults and repairs are incorporated into the syllabus, to keep the training up to date and give technicians the information they need.
- Practical training can be held in Euro Academy's new IMI Approved Centre, where all training sessions are IMI Quality Assured.

COURSE DURATION: 2 DAYS BLENDED TRAINING

- **On-site:** 8 hours of practical training
- **E-learning:** 8 hours accessed wherever and whenever it suits the technician

ELECTRICITY AND ELECTRONICS

IMI ACCREDITED

Understanding the basic principles of electricity is a pre-cursor to any mechanic looking to up his game and move towards a diagnostic / fault finding career path. Without the basics, it is impossible to safely and effectively diagnose today's increasingly complex range of vehicles.

MULTIMETER AND OSCILLOSCOPE (HIGH LEVEL)

IMI ACCREDITED

Having grasped the basics of electricity, most mechanics will want to keep feeding their knowledge. This section takes a more detailed look at the procedures involved to be able to test and verify the many sensors and actuators found in modern vehicles. Also, as a result of more complex digital electronics, new high-speed networks (CAN, LIN, MOST) have had to be implemented.

Euro Academy Members – call 0845 603 3636 or email training@eurocarparts.com to sign in to the course you need.

DIAGNOSIS

IMI ACCREDITED

A prudent and wise mechanic will retain their customers with a proper diagnostic process, by using the skills that they have learnt, to not only replace parts, but to ensure the part that they are replacing is the cause of the problem. In this section the student will be introduced to a methodology that they will use on a daily basis.

PETROL INJECTION

IMI ACCREDITED

Gain a thorough understanding of fuel systems and how emission control standards are met. Fuel, ignition and air intake systems work hand in hand with post-ignition treatment of exhaust gases to achieve or surpass these stringent regulations. The mechanic will gain an insight as to how these systems operate and begin to successfully test and diagnose petrol injection system faults.

DIESEL INJECTION

IMI ACCREDITED

With almost 50% of all UK car sales diesel engine vehicles, this training offers an invaluable insight and introduction to basic mechanical systems, and up-to-the minute common-rail high pressure systems including the necessary safety and cleanliness requirements.

**Need more courses than your membership entitlement?
Additional courses only £159.00 per day**

AIR CONDITIONING

IMI ACCREDITED

Understand the basic operating principles and the components involved in the air conditioning, in order to be able to safely diagnose operating defects. F-gas certificate is a prerequisite.

BRAKES – LEVEL 1 & BRAKES – LEVEL 2

IMI ACCREDITED

An introduction to hydraulic circuits and components to mechanical and electrically operated handbrake systems. Safety and awareness regarding the cleanliness and contamination of brake fluid and brake warning lamps is also paramount. An overview of ABS/ESP systems and the diagnosis of errors, using diagnostic tools is then introduced.

SUSPENSION

IMI ACCREDITED

Often the importance of a correctly operating and well maintained suspension system is disregarded. This can lead to premature tyre wear and dangerously increase stopping distances. The student will be introduced to the various elements that make up traditional and active suspension systems, and how they work in conjunction with each other, including how to spot common failure areas.

STEERING

IMI ACCREDITED

Power assisted steering is now commonplace on almost all vehicles. However, before repair, a thorough understanding as to the safety and operating principles of standard non-power assisted steering must be applied. Also included - hydraulic, electric and rear steer systems.

BOSCH TRAINING COURSES*

As the world's largest supplier of advanced electronic automotive systems, vehicle manufacturers from around the world rely on Bosch for innovation and technical expertise. You can also benefit from this expertise through the range of training courses offered by Bosch at our Euro Academy Training Centre, at Bosch's own Service Training Centre (STC) in Uxbridge, or on a regional basis across the UK and Ireland.

EURO ACADEMY AVONMOUTH BOSCH COURSES* PROGRAMME

COURSE CODE	COURSE TITLE	DESCRIPTION	START DATE	DURATION
VSE1	Essential Electrics	Gain a working knowledge of standard electrical test procedures and how they are applied correctly.	07/02/17	2 days
VSB8 (2 DATES)	Airbag and SRS	Gain knowledge of Airbag and SRS control systems and learn how to carry out accurate diagnosis on these safety critical systems	14/02/17 04/04/17	2 days
VSTD9 (2 DATES)	Oscilloscope Operation...	Competently operate an oscilloscope and use all its functions	21/02/17 26/04/17	2 days
VSG2	Spark Ignition...	Gain an in-depth understanding of the ignition process and analysis of ignition related faults	28/02/17	2 days
VSH24.1	Hybrid Routine Maintenance	Learn how to identify high-voltage components and how to safely carry out maintenance work in that environment*	14/03/17	2 days
VSC6	Braking – ABS and ESP	Gain essential knowledge about the operation, maintenance and testing of electronically controlled braking systems, covering both Bosch and non-Bosch variants	21/03/17	2 days
VSG5	Component Diagnosis	Acquire a sound working knowledge of all of the components within a typical engine management system and how to test them.	28/03/17	2 days
VSC28	Steering Geometry	Correctly diagnose alignment faults and propose the appropriate corrective action	06/04/17	1 day
VSG11	Petrol Direct Injection	For technicians already with a good understanding of fuel injection systems (civerevred in VSG2, VSG5, VSTD9). Advance your ability to diagnose and repair petrol system running faults and components	11/04/17	2 days

FULL COURSE DESCRIPTIONS AND NATIONWIDE SCHEDULES AVAILABLE AT THE BRANCH

PICOSCOPE OSCILLOSCOPE TRAINING COURSE*

COMING SOON

A 5-step training programme developed with Picoscope covering the full range of capabilities of the little blue box in your drawer. From the basics of "why do I need an Oscilloscope" and simply connecting and setting up, through using the maths channels, to expanding the 'scope to measure pressure, noise and vibration.

The steps covered are:

1. **Oscilloscope Diagnostics a Picoscope Guide:** Introduction to oscilloscopes
2. **Starting Scope Diagnostics:** Getting a new user comfortable using the Picoscope
3. **Advance Scope Diagnostics:** Looking at the more advanced features
4. **Pressure Testing:** using the WPS500X for all pressure applications
5. **Noise & Vibration Testing:** Analyzing Noise, Vibration and Harshness measurements.

*External courses are not included within the Euro Academy Membership entitlement and are charged separately.

*Finance example typically based on a 5 year lease purchase agreement. Finance subject to status, full terms and conditions available on request. Other finance options available. All prices exclude VAT at 20%. Price, availability and specification may change without prior notice. Warranty subject to manufacturers terms and conditions of use. Errors and omissions excluded. Offers valid until 31st March 2017. Prices correct at time of going to press: December 2016.

SETTING UP FOR MOT TESTING

Before you can carry out MOT testing you need an MOT Manager to run the test centre and an MOT Tester approved for the vehicle classes you want to test. Both the MOT Manager and MOT Tester must have passed their respective DVSA approved courses, which are available through the Euro Academy.

MOT NATIONAL TESTER TRAINING COURSE

Level 2 Award in MOT Testing

All new MOT testers are now required to complete the Level 2 Award in MOT Testing for their relevant vehicle class. This is a lifetime qualification. You will be considered professionally competent for the rest of your life, subject to completing an Annual Assessment to maintain your testing status.

There are two Awards in MOT Testing available depending on your vehicle class:

- Level 2 Award in MOT Testing (Classes 1 and 2)
- Level 2 Award in MOT Testing (Classes 4 and 7)

The Level 2 Award in MOT Testing includes:

- Safe working practices within Testing Centres
- Communicating with colleagues and customers
- How to manage professional development as an MOT tester
- How to carry out pre-test checks
- How to carry out the MOT test.

This 5-day course includes eight hours practical training. You will complete an entire simulated, uninterrupted MOT test for the relevant vehicle class in a training environment that meets the DVSA's requirements. There will be an externally set and marked examination which will test the knowledge you have gained.

ONLY **£895.00**

MOT SITE MANAGER TRAINING COURSE

Level 3 Award in MOT Test Centre Management

All new MOT Test Centre Managers are now required to complete a Level 3 Award in MOT Test Centre Management. This is a lifetime qualification, with no continuous professional development required.

The qualification will cover:

- Managing the legislative and compliance requirements of a Vehicle Testing Station
- Dealing with customer service problems and complaints
- Developing and supervising staff within a test centre
- Test centre quality systems and audits.

During the 2-day course you will receive practical training and will be assessed through an online multiple choice examination.

ONLY **£795.00**

**ASK YOUR LOCAL BRANCH
FOR A COURSE SCHEDULE**

MOT CPD ASSESSMENTS

Qualified MOT testers no longer need to attend a 5-year refresher course. Instead, they must complete the new MOT annual training and assessment to maintain their testing status. The Euro Academy/ IMI online learning module and assessment satisfies the DVSA requirements. Simply purchase your login and password to access a three-hour program and assessment – this is available for Motor Cycle class 1 and 2 testers as well as class 3,4,5 and 7 vehicle testers. All testers must complete their assessment by March 31st 2017 to remain qualified.

263 00 0010

ONLY **£56.99**

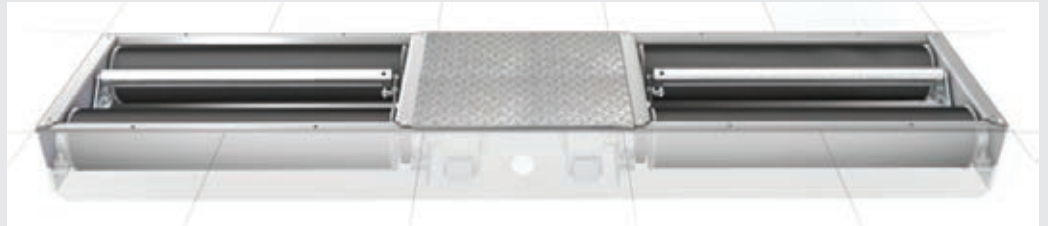

*Finance example typically based on a 5 year lease purchase agreement. Finance subject to status, full terms and conditions available on request. Other finance options available. All prices exclude VAT at 20%. Price, availability and specification may change without prior notice. Warranty subject to manufacturers terms and conditions of use. Errors and omissions excluded. Offers valid until 31st March 2017. Prices correct at time of going to press: December 2016.

MOT BRAKE TESTERS

CALL FOR A QUOTE

Replacing a worn-out brake tester that is continually letting you down or becoming increasingly expensive to repair will not just bring outgoings back under control. It will bring with it the opportunity to take advantage of technological advancements e.g. wireless tablet controls.

- MOT or ATL
- Class I&II (motorcycle), IV, VII, HGV
- Analogue or PC displays

FULL RANGE OF ALIGNMENT SYSTEMS AVAILABLE

*Finance example typically based on a 5 year lease purchase agreement. Finance subject to status, full terms and conditions available on request. Other finance options available. All prices exclude VAT at 20%. Price, availability and specification may change without prior notice. Warranty subject to manufacturers terms and conditions of use. Errors and omissions excluded. Offers valid until 31st March 2017. Prices correct at time of going to press: December 2016.

MOTORCYCLE MOT TESTING

RSW Equipment is the UK's most popular motorcycle MOT testing equipment. The Brake Tester has been designed to comfortably test the brakes of all motorcycles and scooters regardless of size. Readings are taken from a wall mounted remote console, ensuring complete freedom from obstruction in the testing area.

- Includes automatic weighing scale
- Supplied with user-friendly infra-red remote control handset to command the operation
- Combination of analogue and digital display provides valuable diagnostic information relevant to brake performance such as drum/disc run out.
- Full operator training provided on installation
- Operates on 1ph supply

Ideal as a standalone bay, or can be added on to an existing class IV or VII bay (all proposals and installations subject to approval by DVSA)

The Workshop Solutions Projects team are ready and able to handle anything and everything, from the installation of a single piece of kit, through to replacement of out-dated machines, up to a full installation of all Workshop Equipment into a new or existing building. Anything that's a little out of the ordinary and requires the coordination of numerous different services is food and drink to them. They can provide a full consultation, planning and installation service if that's what you need and their experience with MOT Testing stations is second to none.

In order to keep costs to a minimum while maintaining the highest possible installation standards, they employ a very carefully selected network of experienced sub-contractor engineers to carry out all their

installs and projects nationwide. But they stay in control; everything is managed by them, providing a streamlined, stress free process for our customers, ensuring everything is completed on time, on budget and to very high standards.

Right from the very start, when they begin talking through your idea, their vast experience will shine through. Using their knowledge of the state-of-the-art and most up-to-date practices, combined with experience of what actually works, they might just offer fresh suggestions and solutions to save you money and make your project more profitable.

So, if you think MOT testing might be for you, or you just want to review your existing facility, before you do anything else, give us a call.

PROJECT MANAGEMENT

Our Projects team will live and breathe your project

CIVIL WORKS

Encompassing all the reconfiguring or alterations that you might need on your way

WORKSHOP LIGHTING

Energy-efficient LED lighting systems which can be tailored to your specific requirements

FLOORS

Seamless finishes, dust-proof, anti-slip, high-chemical-resistance and heavy-duty wearing floors

EXTRACTION

Vehicle exhaust extraction for cars, trucks, fire trucks, ambulances, and other emergency vehicles

AIR PIPEWORK

Design and installation of a compressed air ring main which is in sync with the way you want to organise your workflow

OVER 200 BRANCHES NATIONWIDE

OUR SPECIALIST EQUIPMENT SERVICE AND MAINTENANCE TEAM PROVIDES ALL INSTALLATION, SERVICING AND MOT CALIBRATION REQUIREMENTS INCLUDING PLANNED MAINTENANCE AND SCHEDULING

SPECIAL OFFER – GET YOUR AIRCON MACHINE SERVICED AT THE SAME TIME AS YOUR BOSCH OR CRYPTON EMISSIONS CALIBRATION FOR ONLY £ 150 PLUS PARTS!*

*offer applies only to Bosch or Crypton emissions analysers

PLANNED MAINTENANCE

A preventative maintenance contract can provide a significant reduction in repair costs, ensuring total peace of mind for both the equipment owner and operator. Alternatively, services can be secured on 'as required' basis.

PLANNED MAINTENANCE		FROM
Vehicle Lift Maintenance & Repairs	Single Post, 2 Post, 4 Post, Scissor Lift Servicing and Repair	£45.00*
JACKING BEAM REPAIR		CALL
Air & Oil Pipework	Supply and installation including galvanised steel tube, Transair and John Guest aluminium	CALL
Spraybooth Servicing	Complete spraybooth service including certification and testing	£287.50
Compressor Servicing	Service support for compressed air systems excluding parts	£117.00*
Air Conditioning Machine Servicing	Service support and maintenance facility including repairs, training and F-gas assessments	£205.00
WELDING EQUIPMENT SERVICING		£30.00
Spray Gun Repairs	For a variety of spray guns regardless of manufacturer carried out in fast response time	CALL
Waste Collection	Variety of waste collections for various quantities	CALL

The above prices do not include any parts that may be needed.

BREAKDOWN RESPONSE

Regardless of whether or not we have been maintaining your equipment on a service contract, you can take advantage of our prompt breakdown repair service. We understand the urgency of the situation and will dispatch most efficiently.

BREAKDOWN RESPONSE		FROM
Vehicle Lifts call out and repair	2 Post, 4 Post, Scissor Lift	£120.00
Air Conditioning Machine call out and repair	All Makes call out and repair	£75.00
Welding Equipment repair	Spot and Mig Welders, Plasma Cutters, Induction Heaters, TKR Riveters, Oxy/Acet Equipment, Dent Pullers	£30.00
Compressors call out and repair	All Makes call out and repair	£102.50

The above prices do not include any parts that may be needed.

CALIBRATION SERVICES

Once you give us your calibration contract, our database tracks when your MOT equipment is due – so your calibration will always be timely. Using only suitably accredited engineers, we aim to minimise equipment down-time.

CALIBRATION SERVICES		FROM
MOT Equipment Calibration	For both Car and Motorcycle equipment	CALL
Wheel Alignment	Alignment Systems calibrations	£200.00
Emission Analyser Calibration	Scheduled calibrations	£330.00
Tools Calibration	For a wide variety of tools including tyre gauge, torque wrench, pressure gauge, paint thickness & tracking sticks	£12.50*
Paint Scales Calibration	All Makes Paint Scales calibration	£75.00

The above prices do not include any parts that may be needed. Minimum charge for tool calibrations, prices above don't include admin or travel fee. Yearly calibration (2 gas, 1 smoke).

CERTIFICATION & TESTING

We will carry out your required inspections and issue the necessary certificates.

CERTIFICATION & TESTING		FROM
LEV Exhaust Ventilation System Test & Certification		£75.00
Spraybooths Smoke Clearance Test & Certification		£56.25
Spraybooths Breathing Air Quality Test		£75.00

*Minimum quantity applies

The above prices do not include any parts that may be needed.

*Finance example typically based on a 5 year lease purchase agreement. Finance subject to status, full terms and conditions available on request. Other finance options available. All prices exclude VAT at 20%. Price, availability and specification may change without prior notice. Warranty subject to manufacturers terms and conditions of use. Errors and omissions excluded. Offers valid until 31st March 2017. Prices correct at time of going to press: December 2016.

Emission Analysers

NO HASSLE WARRANTY

BEST PRICE PROMISE

CRYPTON COMBINED GAS & SMOKE EMISSIONS ANALYSER

- Complies to the latest DVSA regulations
- Enter results on the DVSA online system
- Tests vehicle classes IV, V & VII (Petrol & Diesel)
- Operates the emissions test
- Operates the brake tester (when purchased)
- Housed in a quality mobile cabinet

Includes: 3 Year Parts & Labour Warranty, 23" Colour Screen, Printer, Mouse & Keyboard with Dust/Grease Protector, Oil Temperature Probe, Smoke Meter with automatic calibration, Battery RPM Measurement & Gas Analyser accurate to OIML 0 Class O

Upgrade to 5 Year Extended Care: Parts & Labour, MOT Updates, Calibrations & Routine Consumables

COMBI+ SAVE £200 WHEN YOU PURCHASE WITH A 10" TABLET

- Control the emissions via tablet
- Operate the brake tester from inside the vehicle
- Enter results (incl. MOT) onto the DVSA online system
- No need to return to the workstation
- Print results wirelessly
- Complete with tablet case, WiFi dongle, network cable & product support

Tablet: £149 when bought with Combi. **£399** when bought separately.

NO SPACE FOR A SEPARATE ALIGNMENT BAY?

Why not utilise your MOT bay when it's quiet with a 3D alignment upgrade. Generate more profit with a relatively small-scale add-on to the MOT lift, along with a 3D alignment system. Workshop Solutions can offer more lift and alignment options than anyone else. Talk to us to explore your options today.

Upgrade an existing lift to 3D Alignment using the equipment below or a similar combination. There is even a kit to support 3D alignment on a 2 Post lift!

PRODUCT	DESCRIPTION	PRICE
Pair of Mechanical Turnplates	For front or rear axle adjustment, or both. Sits on or within recesses on Lift platform.	£550
Portable Rear Slip Plates	For rear axle adjustment. Used in some systems rather than rear turnplates – 300mm square	£140
A Pair of Run up Ramps/Roll-back Kit	To allow the vehicle to roll on and off turnplates/slip plates if above the platform surface	£140
Pack 1 Kit for customers without alignment lift	Kit to convert a Service Lift to Alignment, consists of front 'housing' with drive-on ramps to accommodate turnplates, additional turplates for rear, and rear 'housing' with drive on/ drive off ramps	£1,295
Pack 2 Kit for customers without alignment lift	Kit to convert a Service Lift to Alignment, consists of front 'housing' with drive-on ramps to accommodate turnplates including extended platform for 'roll-back, and with drive on/ drive off ramps	£2,795
Pack 3 Kit for customers without alignment lift	Kit to convert a Service Lift to Alignment, consists of front 'housing' with drive-on ramps to accommodate turnplates	£895
Alignment Tables	Kit to allow 4 wheel alignment on a 2 post lift. Consists of 4 tables. Max weight 3000kg across 4 tables	£895

For guidance only. The upgrade required depends on the existing equipment and the intended Alignment system. Ask our Workshop Equipment Specialist for a quote. 3D Alignment System also required.

ALIGNMENT LIFTS

The advantage of a purpose-built alignment lift is all components matching and optimised to each other. Choose your aligner and lift combination from the below and the preceding pages. Workshop Solutions can offer more aligner-and-lift combinations than anyone else. Talk to us to explore your options

MODEL	DESCRIPTION	PART NUMBER	WEEKLY	PRICE

LITE ALIGN 450 WALL MOUNTED

587 77 0020

Wall mounted car and light commercial four wheel laser aligner kit. Includes two front laser heads, two rear flag units, brake pedal depressor, steering clamp, turn discs, wall mount rack and 100mm rim buttons

MEASURES:

- Front and rear individual and total toe, to ensure correct tracking and stability on the road
- Thrust Line, to make sure the rear wheels are pointing in the straight ahead position in relation to the centre line of the vehicle
- Set back, to check front and rear wheels to ensure correct alignment across the vehicle
- Corrects steering wheel alignment. Rear flags enable the end user to adjust the alignment to achieve perfect steering wheel alignment first time.

KEY FEATURES:

- Unique tyre/wheel mounting system, resulting in more accurate measurement, reduced risk of heads becoming detached during adjustments
- Rechargeable battery operation, no cables
- Fits 12 to 22 inch wheels, cars and light commercials, XL kit available for larger wheels
- Optional digital Camber/Caster/SAI gauge available

WEEKLY FROM ONLY **£7.79⁺**
ONLY **£1,545.00**

LITE ALIGN 450 WALL MOUNTED WITH MAGNETIC CASTER CAMBER GAUGE

587 77 0640

Wall mounted car and light commercial four wheel laser aligner with magnetic caster camber gauge. Includes two front laser heads, two rear flag units, brake pedal depressor, steering clamp, turn discs, wall mount rack and 100mm rim buttons.

WEEKLY FROM ONLY **£9.55⁺**
ONLY **£1,895.00**

*Finance example typically based on a 5 year lease purchase agreement. Finance subject to status, full terms and conditions available on request. Other finance options available. Offers valid until 31st March 2017. Prices correct at time of going to press: December 2016.

HOFMANN MEGAPLAN ECOLINE 58/88 – FULLY COMPUTERISED WHEEL ALIGNMENT WITH A4 PRINTER

Bridging the gap between laser alignment and fully computerised systems with printout, which traditionally made the jump too big for many workshops.

Ecoline 58 and 88 are supplied with a comprehensive vehicle database from the recognised industry name, Autodata, and offers a before and after printout. The Ecoline series – is the logical choice for anybody wanting to move into advanced vehicle geometry without the cost traditionally associated with computerised systems.

Only one alignment a week turns this investment into profit!

ECOLINE 58/88 FEATURES

- Simple to use – faster readings, saves time increasing your profit
- Supplied with PC, 19" monitor – clear impressive graphics with onscreen instructions
- Onsite training – your machine, your premises Hofmann Megaplan's specialists
- Comprehensive Vehicle Database by Autodata – over 17,000 models from 80 manufacturers
- A4 Printer – Provides before and after readings for customers
- Traditional 4-Point Clamps (58 only) – handles up to 23" rims as standard
- Front Cameras and Rear Sensors – increases accuracy and repeatability
- Zigbee® wireless communication – offers stronger and more reliable signal over Bluetooth®

ECOLINE 88 ONLY FEATURES

- 3 Point 'Grab Clamps' – even faster mounting, saves more time
- Front & Rear Cameras – ideal for advanced geometry when speed is needed

JOHN BEAN PRISM ELITE

The Visualiner Prism Elite allows you to add alignment to your garage services without needing to hire an experienced alignment technician.

Plus, not only will you be able to pinpoint alignment problems, it generates reports that can be shared with customers, which is why your alignment business will start growing from day one.

If you already own a John Bean Geogas 3000 or 5000 Emissions Analyser, you can add a Prism kit to this unit – saving you space in your workshop and allowing your MOT bay to carry out alignments.

Computerised wheel alignment with Pro 42 software.

- Accurate, flexible and easy to service
- Perform alignments quickly from virtually anywhere in the workshop
- Integrated help system
- Extensive manufacturers' specification database

JOHN BEAN ELS 3D ALIGNMENT SYSTEM WITH TILTING CAMERA

587 77 1730

The new John Bean 3D ELS alignment system has a tilted camera boom for flexible vehicle positioning, eliminating the need for a fixed position to carry out alignment checks and being able to position the camera at the touch of a button.

Running the Pro 32 software application, the ELS saves space in the workshop because everything is mounted on the support post.

The vehicle orientation directional indicator guides the technician when they are unable to see the screen, while interchangeable grippers on the wheel clamps assist work on different wheel types within a clamping range of 11" rims to 22" rims.

- AC 100 rim clamps, with a clamping range 11" – 22" rims
- Compact design everything mounted on the support post
- Tilting camera boom for working at different heights
- 3D technology for fast and accurate measurements
- Vehicle database included

SPACE SAVING DESIGN

NEW

WEEKLY FROM ONLY **£32.73⁺**
ONLY **£6,495.00**

JOHN BEAN V2200 & V2300

Offer advanced alignment service to your customers without needing specialised wheel alignment technicians.

Computerised 3D car wheel alignment with Pro 42 software for general repair shops. Liftable two-camera beam and 22" TFT flatscreen monitor. Cordless communication between targets and HD camera system.

V2200

- Comprehensive and up-to-date manufacturers' specifications
- Versatile wheel clamps provide a solid and worry-free attachment with a patented positioning procedure.
- Take a full four-wheel alignment reading in minutes.

V2300

Features as for V2200 plus

- Measurement of toe, camber, caster, maximum steering angle, rolling radius and cross diagonal

Auto Transmission Fluid Exchange

NO HASSLE WARRANTY

BEST PRICE PROMISE

With the high proportion of automatic transmission vehicles on the road, it makes sense to keep this capability in-house. Making simple work of scheduled service interval fluid changes, an automatic transmission fluid exchanger also offers a clean 'first option' for fixing problems including 'sealed for life' boxes. A simple flush and refill can often cure the problem and is an easy option to sell before going to the expense of a full strip-out at a specialist.

LAUNCH CAT501S 590 00 1060

DEMO AVAILABLE

The CAT-501S offers a range of automatic functions to exchange transmission fluid with minimal fuss and involvement. May also be used in a manual operation. The CAT-501S is supplied with a full set of connectors.

- 5" LCD display
- Oil exchange and level adjustment
- Print out the procedure and more vehicle data
- Monitoring of oil temperature
- Monitoring of oil pressure
- Empty fluid tank without disassembly
- Choose between 68 pieces universal adapters kit and bespoke UK adapters kit
- Online database access included
- 2 year warranty

The majority of manufacturers recommend changing the ATF fluid on automatic gearboxes every 30,000 to 40,000 miles.

Any of these symptoms below can be made better by a 100% ATF fluid flush and refill

- Rough gear change during acceleration
- Slow or delayed gearshifts
- Difficult to move from Park to Drive/Reverse
- Noisy gear changes or loud transmission running noise
- An increase in transmission vibrations felt inside the cabin

An ATF flush and refill produces the following benefits

- Smoother gear change
- Reduced transmission noise
- Easier gear selection
- Reduced transmission vibrations
- Faster up-shift during acceleration

BEST PRICE PROMISE

CARBON ZAPP ES3 DIESEL AND PETROL ENGINE TREATMENT UNIT

590 01 0220

An engine deep-clean is an obvious 'first option' to resolving high emissions or poor performance issues. Engine cleaning can also be offered within a standard menu of additional services available during routine service visits.

- One machine treats both petrol and diesel engines
- Adaptability to all makes and models
- Comes complete with a supply of detergent
- De-carbonisation of combustion chamber
- Maximum restoration of engine performance
- Exhaust emissions reduction by up to 70%
- High pressure pump conditioning
- Decarbonised valves and piston ring release
- Improved idle speed stability
- Fading of engine knocking
- Adaptors available for de-carbonisation of Intake Manifold and DPF (sold separately)

BEST PRICE
PROMISE

HOFMANN MEGAPLAN MEGAMOUNT EASY

583 77 0420

The Megamount Easy represents an alternative style of tyre changer, where manual effort is reduced to a minimum, and the emphasis is on larger rims fitted with low profile tyres.

An integral wheel lifter makes light work of the heaviest assemblies, and the centre post clamping with the simple and speedy 'Smart Lock' ensures there is no contact with the outer edge of the rim. The famous Hofmann Megaplan 'Evolution' leverless system is enhanced with the new 'Lever No Lever' design, which enables the operator to switch between leverless operation and traditional lever & demount head at the flick of a switch.

Unlike many other 'Next Generation' tyre changers on the market, the EASY was designed with one major focus; simplicity. In every element of the tyre fitting and removal process, the directive has been to ensure that operation remains simple, minimising the number of controls and functions – Easy by name, and Easy by nature.

- 10" to 30" Clamping Capability via Centre Post method with 'Smart Lock'
- Lever No Lever system enables dual leverless or traditional levered fitting as preferred
- Integral wheel lifter
- Dynamic bead breaking system via roller
- 'Next generation' tyre changer design

WEEKLY FROM ONLY **£29.21***
ONLY £5,795.00

HOFMANN MEGAPLAN MEGASPIN 420

584 77 0370

The most advanced technology the industry has seen in a wheel balancer. The combination of revolutionary new technology, incredible simplicity, and typical Hofmann Megaplan reliability makes this, in our opinion, the best value wheel balancer on the market today.

Boasting 'No Checkspin' technology and 6 o'clock weight positioning, the Megaspin 420 only requires the operator to select the weight position(s) and lower the hood – it's that simple! Two laser points guide the operator to the chosen weight position, and the rim locks into position at each inner and outer 6 o'clock placement position.

There is no possibility for error, no chance of the machine throwing up an extra 5 or 10gms, and absolutely No Checkspin Required!

- Worlds' first balancer with 'No Checkspin' technology
- Easier 6 o'clock weight position
- Super Automatic Data Input via sonar (touch-free)
- Laser Guided weight placement
- Handles rims up to 30" diameter
- The simplest, fastest wheel balancer ever produced

WEEKLY FROM ONLY **£16.10***
ONLY £3,195.00

HOFMANN MEGAPLAN MEGAMOUNT 503XL EVO

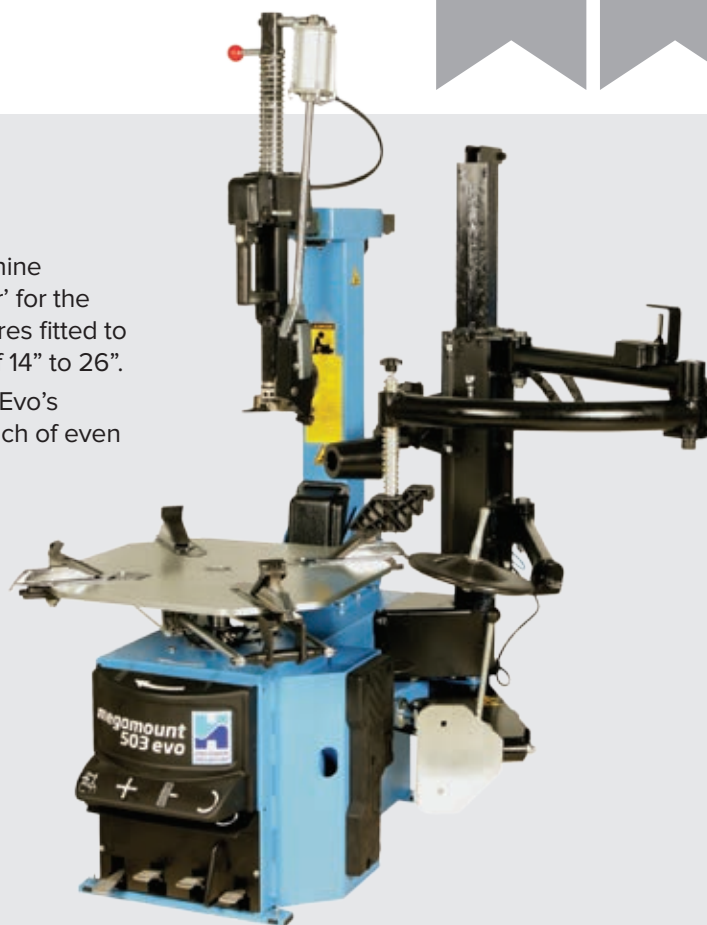

583 01 0210

Super-Automatic Operation and built-in 'Leverless' device makes this machine incredible value for money. It boasts luxury features such as 'Stroke Limiter' for the bead breaker to adjust the amount of travel when breaking the bead on tyres fitted to shallow-welled BMW rims, and it provides a future-proof clamping range of 14" to 26".

A 'bespoke' design to incorporate value with 'upmarket' features, the 503 Evo's incredible price/performance ratio puts leverless technology within the reach of even the modest garage or tyre shop.

- Leverless Operation
- 10" to 28" Clamping (26" External)
- 15" Rim Width Capability
- Includes 'megafit 2XL' assist arm
- BMW Run-Flat 'Stroke Limiter' as standard
- Double acting bead breaker

Leverless Operation:

WEEKLY FROM ONLY **£26.69⁺**
ONLY **£5,295.00**

HOFMANN MEGAPLAN NG 90 NITROGEN GENERATOR

592 01 0070

There is no doubt about it, Nitrogen inflation is becoming more common as customers demand the service and anybody dealing with tyres will need to consider meeting the demand. In addition, certain new vehicles are coming out of the factory with nitrogen in the tyres as standard, setting the tone for nitrogen filling to become the 'norm' in the future.

THE BENEFITS

Longer Tyre Life – Improved wear due to maintaining the correct pressure for up to four times longer than filled with air
Increased Fuel Efficiency – Correct tyre pressures lessens the rolling resistance and maximises consumption
Increased Safety – Under-inflated tyres are the main reason for blow outs. Nitrogen filled tyres maintain pressures – that's why it's used in racing and aviation.
Nitrogen is a safe inert gas, non-flammable, non-corrosive.

Nitrogen inflation is a great add on opportunity for customers who buy performance tyres or for those concerned with economy. Charge or give it away as promotion to attract customers. More stable tyre pressures means less queuing at the petrol station!

The fully-automatic NG90 provides fast, simpler operation. Simply connect the hose up to the valve and set the required pressure, and then walk away and get on with another job. The NG90 will automatically purge the tyre and the switch to refill with nitrogen to the pressure selected.

- No need to buy gas – NG90 produces its own Nitrogen through a filtration process
- Fully portable – Can be used anywhere with a 13amp plug
- Automatic Operation – Connect and walk away, saves time
- Adjustable Display – Read measurements in Bar Or Psi

WEEKLY FROM ONLY **£5.01⁺**
ONLY **£995.00**

PROMISE

HOFMANN MEGAPLAN MEGAMOUNT 503XL

583 77 0410

Fully Automatic and boasting a 'top end' specification, the Megamount 503XL is capable in any environment. The patented, adjustable turntable enables alloy rims up to 26" in diameter to be clamped from the outside, and the tall column and wide bead breaker opening ensures suitability for extra-wide rims up to 15". A bead breaker 'stroke limiter' for shallow-welled BMW rims and quick-release, interchangeable demount head system, with standard/run-flat, plastic and 'raised spoke' heads, completes the luxury specification.

- 10" to 28" Clamping (26" external)
- 15" Rim Width Capability
- Quick-Release Demount Head System for Standard/RFT, Plastic and 'Raised Spoke'
- Includes 'Megafit 2XL' assist arm
- BMW/Run-Flat 'Stroke Limiter' as standard
- Double-acting bead breaker
- Fully-Automatic Operation

HOFMANN MEGAPLAN MEGASPIN 200V

583 05 0510

The Megaspin 200V has to offer one of the best price/performance ratios of any wheel balancer on today's market. Fully-automatic (3D) data input is achieved using the inner measuring/weight placement arm and Hofmann Megaplan's revolutionary IWA (Intelligent Width Assessment) software.

Values are displayed live on the full colour TFT display. The displayed graphics will guide the operator to the designated weight placement position, as well as delivering what is probably the simplest, fastest method of 'split weight' (hiding the weights behind the spokes) ever.

- 3D Fully-Automatic Data Input via IWA
- Colour TFT Display
- Can handle rims up to 30" diameter
- Simple, speedy operation
- 4 years PCB Warranty

BEST PRICE PROMISE

L4000 M/E 2 POST 4 TON HYDRAULIC LIFT

This value lift has a lot to offer. Symmetric arms offer wide flexibility of chassis as well as being able to accommodate vehicles driving on or reversing on. Electro-magnetic safety locks conveniently release at the push of a button. (A manual lock release version of this lift is also available)

- Hydraulic hoses and balance cables are all fully concealed, providing a clean appearance.
- The double hydraulic cylinders and high strength chain drive provide smooth lifting and lowering.
- The two sets of arms always travel synchronously thanks to high strength balancing cables.
- An emergency lowering valve can be manually operated to lower the lift safely in the event of a power failure.
- Meanwhile, a flow-control valve prevents the possibility of a rapid uncontrolled descent
- Door rubbers on the posts protect the car doors from direct contact, and sill protector rubbers on the upper arms perform the same function protecting the undersides of longer chassis vehicles

- Minimum pad height 110mm
- Drive-thru width 2486mm
- Maximum Lifting Height 1950mm
- Lifting time 40-50sec
- Lowering time 20-40sec

BENDPAK XPR SERIES

NEW UPDATED MODELS

Low-profile, dropped-end frame c/w NEW screw contact pads

Squeeze under even the lowest compact and sport vehicles. The new adjustable screw pads ensure that the vehicle is lifted safely at all times

Triple-telescoping front arms and two-stage rear arms

Increases overall arm positioning for lifting a variety of different wheel base vehicles. Overall arm sweep and minimum arm reach are also extended to precisely lift vehicles that have unibody construction, OEM recommended pick-up points and wide and / or narrow wheelbase configurations.

Maintenance-free load bearings

Rather than using roller bearings that need to be constantly lubricated, every XPR-Series Lift carriage uses high-tech UHMW (ultra-high molecular weight polyethylene) load bearings that never need lubrication and are designed to last the entire life of the lift.

TECALEMIT SF/9207 – SENTINEL 4 TON HYDRAULIC 2 POST LIFT WITH BASE FRAME AND 3 STAGE ARMS

The SF 9207 is mounted on a heavy duty steel base frame which ensures a stable lifting platform and the minimum lifting pad height of only 100mm ensures that even vehicles with low ground clearance can be accommodated on the lift.

The lift has 3 stage arms enabling the lift to be used on a wider range of vehicles.

- Electro-hydraulic operation
- Asymmetric lifting arms 3 stages for lifting a wide range of vehicles
- Rapid lifting time
- Structural base frame
- Electronically controlled safety latches

INCLUDES FREE HIGH LIFT PADS

ALLDATA REPAIR®

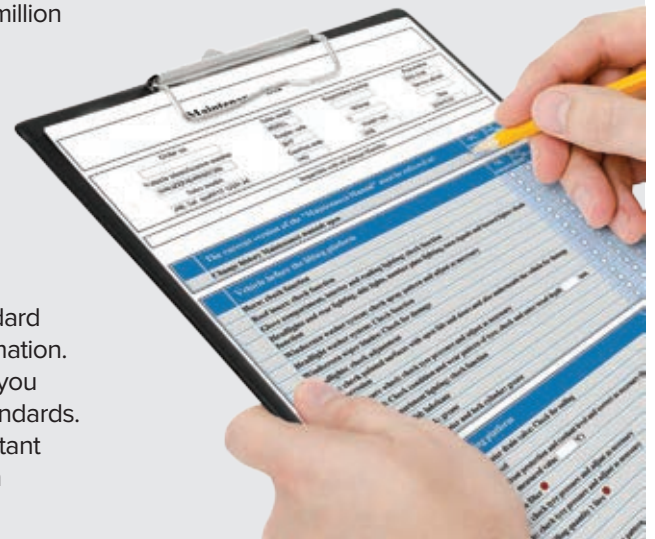

You pride yourself on doing the job, so start with the right information. ALLDATA doesn't alter the OEM data, so you get exactly what you need from each manufacturer – all in one easy-to-use portal.

ALLDATA Repair® is a comprehensive online OEM repair information solution including 22 vehicle brands and more than 24 million articles of unaltered and unedited factory- correct data.

Automotive repair shops using ALLDATA improve repair quality and accuracy, save time and money and meet manufacturer standards, improving customer satisfaction and business profitability.

ALLDATA Repair® is the industry standard for original licensed OEM repair information. ALLDATA does not edit or redraw, so you can repair exactly to manufacturer standards. Using ALLDATA Repair®, you have instant access to diagnostic trouble codes on

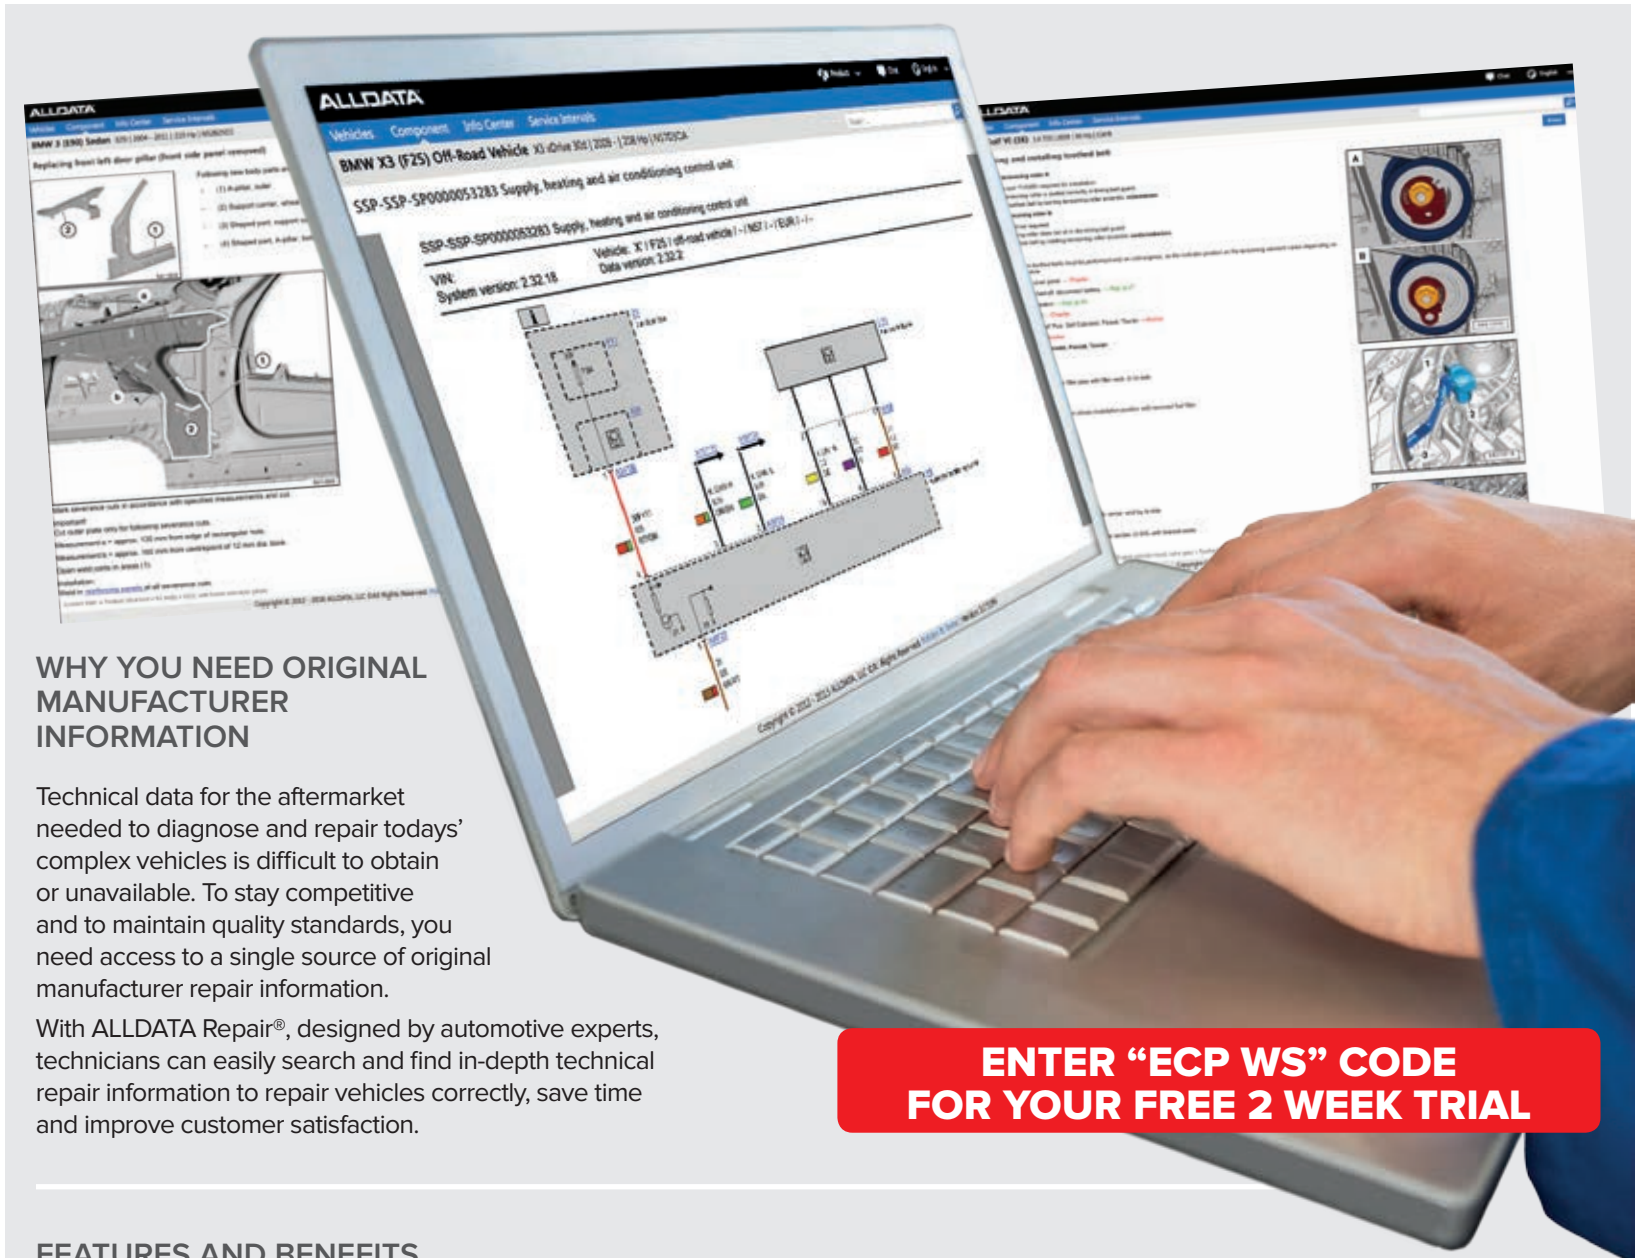

every vehicle and every type of fix for all the leading car manufacturers so you can quickly diagnose and complete quality, heavy diagnostic work on today's complex vehicle technology. ALLDATA Repair® is very simple to use, it has a single- source online portal available which is available 24/7.

- Electrical wiring diagrams
- Factory mechanical repair procedures
- Factory chassis repair instructions
- Trouble codes and diagnostic test charts
- Technical service bulletins (TSBs)
- Filling quantities
- Maintenance interval and service schedules
- Tightening torques

ALLDATA Repair® currently covers the following vehicle brands: AUDI, Alfa Romeo, BMW, Citroën, Dacia, Fiat, FORD, Lancia, MAZDA, MERCEDES, MINI, Nissan, OPEL, Peugeot, Renault, SEAT, Škoda, Smart, Vauxhall, VW and more.

*Finance example typically based on a 5 year lease purchase agreement. Finance subject to status, full terms and conditions available on request. Other finance options available. WHY YOU NEED ORIGINAL MANUFACTURER INFORMATION

Technical data for the aftermarket needed to diagnose and repair today's complex vehicles is difficult to obtain or unavailable. To stay competitive and to maintain quality standards, you need access to a single source of original manufacturer repair information.

With ALLDATA Repair®, designed by automotive experts, technicians can easily search and find in-depth technical repair information to repair vehicles correctly, save time and improve customer satisfaction.

FEATURES AND BENEFITS

- OEM repair information direct from the manufacturer including 22 brands and 24 million articles of unedited and original repair articles in a comprehensive online portal. Available in five languages, you have access to an easy-to-use navigation structure and search to save you time, increase efficiency, and improve overall profitability.
- Access to the industry's largest source of OEM information online 24/7.
- With original manufacturer maintenance, diagnostic and repair information, you save time and money, and can repair vehicles to quality standards, and drive repeat business.
- Access to the most current manufacturer information so you can repair the newest vehicles on the road and ensure every repair is profitable.
- Common navigation across all brands and advanced search capability make it easy to find the information you need quickly and efficiently.

HELLA DIAGNOSTICS AT A GLANCE

Communication

- Clear and concise Vehicle identification through number plate recognition, manual input or VIN search.

Interface

- Wireless and compact VCI, also Pass-Thru function using relevant OE Platforms and software, total flexibility.

Data Retrieval

- Up to 12 selectable channels of live data with graphing option, waveform save function for road test facility, freeze data function, this is also printable.

Data Interpretation

- Clear and detailed description of fault codes, including component function and possible causes of fault.
- Real-Time Repair Concept allowing technical support direct to the device and data to be directly sent to our technical team. Onboard technical data including ECU pin out data, wiring diagrams, component location and vehicle technical data, to assist with fast efficient fault diagnosis.

Coding and Special Functions

- Extensive activations covering most vehicle systems, enables quick identification of a failed component. In depth coverage of Basic settings and Adaptions, a must when components are replaced.

Job Recording

- Car history function; stores the last 500 vehicles tested and can be recalled simply by date or vehicle registration, full A4 printable vehicle report, with date and time stamp, business name and registration number for a professional customer report.

HELLA GUTMANN MEGA MACS PC

355 77 5520 + 356 77 6750

Turns any Windows PC into a powerful diagnostic device with the same capabilities as the popular mega macs 42 SE. In conjunction with your Windows netbook, PC or tablet it's a flexible, highly portable and user-friendly all-round diagnostic solution for professional workshops, packed with features including Pass Thru® technology and complete with detailed ECU and system data for over 38,000 vehicle models.

- Suitable for your Windows netbook, PC or Tablet
- Comprehensive in-depth vehicle coverage
- Equipped with PassThru® technology

WEEKLY FROM ONLY **£8.44⁺**
ONLY **£1,675.00**

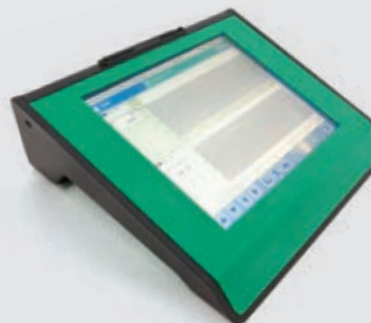

HELLA GUTMANN MEGA MACS 66

355 77 0000

Setting new standards in the field of diagnostics, the Mega Macs 66 includes several specialist features for faster, more accurate fault-finding and repair.

Centred around a large, full colour touch screen with an intuitive user interface, the Mega Macs 66 places interactive circuit diagrams, recommended procedures and error solutions directly on the screen

- Diagnostics of all components, with instructions
- Interactive coloured circuit diagrams with depiction of actual values and parameters in real-time.
- Vehicle-specific repair assistance, based on fault codes in real-time.
- Sets new standards in speed and accuracy of diagnosis

WEEKLY FROM ONLY **£23.94⁺**
ONLY **£4,750.00**

HELLA GUTMANN MEGA MACS 56

355 77 4720

The stakes have just been raised with the launch of the new Mega Macs 56 – an affordable, mid-range diagnostic tool with features normally found only on much pricier models.

- 800mhz processor – finds faults fast.
- 10.4" high-resolution full colour touchscreen enables on-screen information to be easily read in low light conditions.
- Wi-Fi and Bluetooth connectivity enable wireless printing. Downloads technical data quickly and easily even whilst in use.
- PassThru® ready
- HGS Technical Data technical data included
- Optional extra – measurements package comprising 2 channel oscilloscope and multimeter

LAUNCH DIAGNOSTICS AT A GLANCE

Communication

- Multi manufacturer American, Asian & European 12v passenger car & light commercial coverage
- OBDII diagnosis and O.E level manufacturer specific vehicle coverage
- Comes complete with full cables & connectors set; for pre-2000, JOBD & OBD1 vehicles
- Up to 10m wireless Bluetooth connection with handheld tablet & vehicle

Interface

User friendly Android operating system platform, as found on majority of phones & tablets. If you can use a smartphone, you will have no trouble finding your way around a Launch interface.

Data Retrieval

- Lightning quick loading up time and fast vehicle diagnosis speed
- VIN recognition and Auto-ID on majority of vehicle modules & systems; minimises the risk of misidentifying the vehicle.
- Sensor simulator replicates vehicle sensors to test component to ECU wiring

- View Engine, ABS, SRS, Transmission and many more vehicle module data in list or graph form.
- Graph live data with vehicle running or stationary, using single or multiple graphs per page & overlap combination function.

Data Interpretation

- Built in comparison data for some vehicle manufacturers, updated frequently
- Multimeter & 4 Channel Oscilloscope (separate purchase) to further interrogate electrical systems
- Sensor simulation technology (separate purchase) to replicate electrical waveforms and to reduce unnecessary component replacement.
- Built-in fault codes 'help database', with explanations of possible causes & solutions
- Built-in capability using internet browser to access any technical data website

Coding and Special Functions

- Bi-directional component testing supported across all manufacturers for majority of vehicle systems such as; Engine, ABS, Automatic transmission,

SRS, Instrument panel, Body computer, Air suspension and many more.

- O.E.M component activation options such as retrofit coding, daytime running lights, seatbelt reminders, key fob & alarm customisations, convenience locking/unlocking, and season change settings plus access to many more vehicle configurations.

Job Recording

- Record live data from any vehicle system for up to 20 minutes per clip
- Save & share vehicle health reports in PDF format which can be printed or emailed wirelessly
- Playback, pause & view recorded data in graph or list form
- Remote vehicle diagnosis data recording, playback & vehicle reports
- Easy to take screenshots & share wirelessly by email or print, saved in jpeg format
- Company letter headed vehicle reports with option to add your own logo & shop details.
- Print via wireless printer (separate printer purchase required).

LAUNCH X431 EUROPAD 2 V2 (2016) EUROPAD 2

355 77 4640

- Durable handheld tablet in protective silicone case. Easy to read & operate multi-touch capacitive 10" LCD screen
- Has IP65 protection against solid objects; totally protected against dust & liquids
- Operates 4 Channel Oscilloscope, Multi meter & Endoscope camera as accessories (accessories must be purchased separately)
- Capable of 24v Heavy goods vehicle diagnosis – optional HD Truck module required

WEEKLY FROM ONLY **£12.07***

LAUNCH X431 PRO AND PRO3

Based on the Android 5 operating system, the X431 Pro3S is the latest diagnostic tool from Launch.

With remote diagnostic features and a built-in social network, this tool encompasses the best in Launch technology and tablet computer usability.

Incorporating the best in already existing Launch diagnostic tools, the Pro3S can read and clear DTCs, read a car's data stream, perform actuation tests and much more, at lightning fast speeds.

Pro3S can perform diagnostics effectively on cars manufactured in Europe, America and Asia, and is compatible with all of their individual software; making the Pro3S one of the most reliable and all-encompassing diagnostic tools available on the market today.

Operates both wireless and bluetooth connectivity.

A built-in social network service enables users to connect to a community for help with diagnosis. Users also have access to a car database and repair tips, allowing for faster and more efficient performance.

- Full system diagnosis
- Data stream storage and re-display
- Service light resets
- Coding, reset and programming functions
- Diesel particulate filters regen/replacement
- Online technical support and advice
- Electronic parking brake reset
- Key/immobiliser coding
- VIN recognition, auto search
- Live data recording & multiple graphing
- Special functions for specific manufacturers
- Capable of 24v Heavy goods vehicle diagnosis – optional HD Truck module required

LAUNCH X431 PRO3S V2 (2016)

355 77 5150

Durable handheld tablet in protective silicone case.

Easy to read & operate multi-touch capacitive LCD 10" screen.

WEEKLY FROM ONLY **£8.54⁺**
ONLY **£1,695.00**

LAUNCH X431 PRO V2 (2016)

355 77 4860

Durable handheld tablets in protective silicone case.

Easy to read & operate multi-touch capacitive LCD 7" screen.

WEEKLY FROM ONLY **£6.02⁺**
ONLY **£1,195.00**

J-BOX 2 PASS THRU DEVICE

355 77 1450

J-Box 2, a thoroughly capable Pass Thru device that can be used for repairs and general maintenance on the majority of vehicle marques.

Easy to install on your PC, this device will help reprogramme control modules in-house, ensuring you can keep custom in your garage without needing to send them away to a dealership.

- support for over 36 OEM's
- how to videos included

WEEKLY FROM ONLY **£6.43⁺**
ONLY **£1,275.00**

HD TRUCK MODULE

355 77 5120

This Android powered heavy-duty truck module communicates wirelessly with the Pro 3 or Europad 2 host terminal to achieve fault diagnosis for various truck models. Provides a credible entry to truck diagnostics at a fraction of the cost of more specialist kits.

Coverage includes:

Man, Scania, Benz, Iveco, Daf, Hyundai, Volvo, Renault, Mitsubishi

- Includes full cable kit
- Works with Europad 2 only

WEEKLY FROM ONLY **£5.01⁺**
ONLY **£995.00**

*Finance example typically based on a 5 year lease purchase agreement. Finance subject to status, full terms and conditions available on request. Other finance options available. All prices exclude VAT at 20%. Price, availability and specification may change without prior notice. Warranty subject to manufacturers terms and conditions of use. Errors and omissions excluded. Offers valid until 31st March 2017. Prices correct at time of going to press: December 2016.

ESI[TRONIC] 2.0

ESI[tronic] 2.0 software is used in conjunction with the KTS range of diagnostic tools for vehicle fault diagnosis and service function procedures. The range of features available through the software is truly vast.

THE MAIN ESI PACKAGE ARE:

SD DIAGNOSTICS

Enables users to:

- Read Fault codes
- Erase Fault codes
- Collect Actual Data Values
- Actuate Components
- Carry out Function Tests
- Carry out service functions such as service lights, dpf, handbrakes, batteries and windscreens
- Carry out some coding

SIS TROUBLESHOOTING

Identifying a fault code is just the tip of the iceberg in a vehicle repair process. Troubleshooting is the solution to guide you to the root cause of the problem. It can guide the user from the fault code, real time data or symptoms through a number of tests to the root cause of the problem. It integrates the multimeter and scope (fitted to the KTS) to the guided diagnostics. SIS gives the user all of this in addition to the base SD package.

MP MASTER PACK

Troubleshooting takes users to the root cause, but users will need:

- Wiring diagrams for body electrics
- Technical bulletins
- Installation information
- Mechanical and service information
- Torque settings
- Locations and pin information on components

BOSCH DIAGNOSTICS AT A GLANCE

Communication

ESI[tronic] 2.0 information system can identify virtually any vehicle model and provide comprehensive data for workshops

- Capable of full multiplexing for all OEMs
- Diagnostics over internet protocol (DoIP)
- PassThru capability for all OEMs
- Parallel channel communication

Data Retrieval & Interpretation

Easy visual interpretation of results (green for right, red for wrong)

- Live comparative data with recordable graphical data for easy reference
- Fault code interpretation table
- ESI contains a vast library of OEM values
- Fully guided diagnostics connected to Bosch ESI[tronic] 2.0 data system giving wiring diagrams, component locations, component test plans, body circuit diagrams, common fixes, technical service bulletins etc.

Coding and Special Functions

Component actuation is available on most OEMs' ECMs where applicable

- Service functions such as component adding and actuation such as DPF resets, injector coding, calliper wind-back, SAS calibration are all available

Job Recording

- All usage sessions can be recorded
- Recording of live data
- Results can be printed
- Customer database can be created
- Customisation of data with garage details.

KTS560, KTS590

The new KTS stands alongside the new generation of OEM diagnostic tools capable of using parallel channels or diagnostics over the Internet to carry out diagnosis and software uploading. Offering much faster and efficient upload times, OEM's are increasingly using this type of communication. This will eventually become an industry standard.

Running the powerful Bosch ESI software in its own right, the new KTS is also capable of not only Pass Thru to an OEM software interface, but operating OEM software running from a separate laptop or pc. With verifications already in place with leading OEMs, the new KTS is a single hardware answer for operating one or more OEM software.

The new Bosch KTS560 and KTS590 have been proven to work on: Jaguar Land Rover, VAG, Vauxhall, Volvo & many others

- Works with any Windows-based PC that has a licensed version of the Bosch diagnostics software ESI[tronic]2.0 installed. Performs Pass Thru by working with OEM software*
- Operates OEM software with many approvals already in place
- Supports all of today's relevant diagnostic protocols including Diagnostics over Internet Protocol (DoIP) – and that means it's capable of all the latest OEM procedures

- USB2.0 and Bluetooth® connections means you can either stay tethered or not – your choice.
- Rugged design with high resistance to dust and water

DCU 220

355 77 4690

DCU 220 (Diagnostic Control Unit) combines the features of a notebook with those of a tablet PC for flexible and comfortable working, especially under workshop conditions. When used as a tablet PC, the touchscreen is fast and easy, when a keyboard

is needed, the DCU 220 lends itself to being used as a notebook for any kind of usual computer work, such as the quick and easy entry of customer data. DCU 220 controls Bosch test and diagnostic systems, e.g. FSA 500 or the modules from the KTS series.

COMBINED TABLET / LAPTOP DIAGNOSTIC CENTRE:

CAREFULLY THOUGHT OUT DETAILS MAKE OPERATION EASIER

Easily switched from tablet to notebook mode – continue to work as you change

- Sturdy housing with 11.6" touchscreen monitor – view more data in one go
- Integrated camera: Document and use to show customers or order parts photographed

MOBILE WORK OVER EXTENDED PERIODS

- Inclusion of two identical lithium-ion batteries
- If required, batteries can be replaced without interruption (hot swap function)

MODULAR CONCEPT WITH THE DIAGNOSTIC CONTROL UNIT

For qualified diagnostics, professional repair and maintenance, Bosch offers the following modular system components: the DCU 220 convertible PC and the KTS 560, the KTS590 and the FSA 500. These can be freely combined to form a suitable solution for every workshop. Ask for more information.

WEEKLY FROM ONLY **£12.07⁺**

BEST PRICE PROMISE

PICO MASTER KIT EVERYTHING FOR THE AUTOMOTIVE DIAGNOSTIC EXPERT

PicoScope's most comprehensive test kit is designed to be a complete solution for the professional diagnostic expert. It includes everything in the advanced kit along with a CAN breakout box and a full set of both multi and professional breakout leads. Pico's award winning WPS500X pressure transducer is also included, opening the door to pressure signal evaluation.

- Eliminate guesswork and test individual components before they are replaced. Stop playing "parts darts" where more and more parts are replaced until the fault goes away.
- Find intermittent wiring and connector faults.
- Solve issues when a vehicle has a problem but no code has been set or when multiple / misleading codes have been set
- Solve charging and starting problems.
- Solve problems with actuators such as motors and injectors that are not monitored by the ECU.
- Identify mechanical problems such as compression and slipped / incorrectly fitted timing belts

G-SCAN 2 DIAGNOSTICS AT A GLANCE

Communication

The G-Scan2 is the market-leading diagnostic tool for Asian cars, vans and trucks, being the ONLY current diagnostic tool with 100% genuine OEM developed software for Hyundai and Kia models, and near OEM coverage for all other Asian marques. It also provides competitive coverage for many European and American vehicles – an area which is constantly being developed.

The sales and popularity of hybrid and electric vehicles has increased significantly over the last decade, with Asian manufacturers at the forefront. From the Toyota Prius and Nissan Leaf, to the latest Mitsubishi Outlander PHEV, plus new hybrid models due to arrive from Hyundai and Kia – the G-Scan2 has them covered.

With super-fast triple processors, a rapid boot-up time, a bright/clear HD touchscreen, built-in Wi-Fi.

Data Retrieval

The G-Scan2 Lite and Asian models include a built-in 4-channel oscilloscope with multi-meter and lead kit. The scope also has a floating-ground on 2-channel mode allowing voltage differentials with different grounds to be displayed – perfect for sensor testing.

Data Interpretation

The oscilloscope software has pre-sets and sample waveforms with guides and explanations to aid component fault-checking and diagnosis, as well as a signal simulator function which allows the technician to substitute sensor signals.

Coding and Special Functions

Whether you need to code/re-code a component, carry out a DPF regen or calibrate a new sensor, you know you're covered with the G-Scan2.

Job Recording

Data logging and record function allows the G-Scan2 to record up to 1 hour of live data for later playback and analysis. This can be reviewed as waveforms or as numerical figures and viewed on the G-Scan screen or on a PC using the PC Utility program. The PC utility is a very user-friendly interface which gives you access to the regular downloadable software updates, as well as saved screenshots and files from your G-Scan. It also allows you to create vehicle diagnostic reports which can be customised, saved or printed and given to the vehicle owner.

Selecting the right compressor

When selecting the right air compressor, the tank size is important. A small tank will overwork the motor. It is equally if not more important to select an air compressor that provides enough cubic feet per minute (cfm) of airflow. CFM is going to determine how many tools you can run, and whether each tool will function at its best.

PREVOST ALUMINIUM/PLASTIC PIPEWORK

If your air pipework is not a ringmain design, some of your compressor's best work is probably being lost to pressure drops between the compressor and the workstation. You may also be losing valuable air through leaks. Galvanised pipework inevitably corrodes, and air under pressure will always find the weak spots.

With our free design service, Workshop Solutions can supply and install a Prevost 'ringmain' aluminium and plastic pipework system which will deliver consistent pressure throughout the workshop, and never corrode.

- Leak-free networks
- Optimum flow rate – no pressure drop
- Lasting installations using corrosion-free aluminium
- Quick and easy maintenance
- Networks extendable as needed

SAVE ENERGY, GET MAXIMUM EFFICIENCY FROM YOUR COMPRESSOR

ECOBBOX OIL WATER SEPARATOR

595 77 0250

The ECOBOX is an affordable condensate cleaning solution for piston or screw compressors with an output up to 60 cfm. It is designed to remove the oil traces from compressor condensate in line with Water Resources Act (1991) Chapter II, para 85, referring to an offence of knowingly polluting waters, by the disposal of poisonous, noxious or polluting matter.

- Economic
- Compact
- Environmentally friendly
- Quick and easy installation

ONLY **£76.00**

Do you have unwanted water and particulates within your compressed air system?

- Is water effecting your application at point of use?
- Are your tools failing and rusting due to water ingress?
- Are you tired of replacing filter elements?

The Original Dropout® is a unique, scientifically engineered, patent protected multi-stage Compressed Air Filter that removes 99.9999% of Water and 99% solid particulates down to 1 Micron. This unique multi-stage compressed air filter performance is constant regardless of the flow rate.

JUST DRAIN PERIODICALLY AND CONTINUE USING AT THE SAME HIGH EFFICIENCY

- Dropout provides a low maintenance, robust solution for unwanted water and particulates within your compressed air system
- Dropout requires no mains power to operate and can accommodate for pulsed flows or stop/start with instantaneous recovery
- Install Dropout at point of use to guarantee water free, clean air
- ISO 12500 accredited so you can be confident Dropout is as good as advertised

Match your Dropout to your compressed air output – start enjoying the benefits

SUSPENDED WARM AIR OR RADIANT UNITS

Suspended unit heaters producing warm air or radiant heat. Suitable for showrooms, workshops, and bodysshops, and storage facilities. Off-floor mounting provides an ideal solution where floor space is at a premium.

- Ambi-Rad Gas Radiant Heaters - deliver exceptional efficiency and the potential to reduce energy costs.
- Ambi-Rad Ultra-Gas Warm Air Heaters – The ULTRA exceeds European norms for efficiency and the lowest NO_x and CO₂ emissions.
- RST Gas Heaters – available with heat outputs ranging from 41,000 Btu – 490,000 Btu for use on natural gas, or propane.
- OUH Oil Heaters – available in six heat outputs ranging from 105,000 Btu – 334,000 Btu, for use on Diesel oil. Alternatively, units may be specified for use with Kerosene.

CALL FOR A QUOTE

We need an idea of the workshop size (height (eaves and apex), length and width) and how well insulated the building is. From that we can calculate the heat loss of the building and what heater output will be needed. If we also know where the services are and how the building is laid out so that the heating system will be sited in the right place, we can provide a detailed budget which will be verified by a site visit by one of our experienced team.

THERMOBILE PROHEAT OIL-FIRED CABINET HEATERS

For use with Diesel Heating Oil or Kerosene with Built-in Fuel Tank-perfect solution where there is no room for a bulk tank.

- Foursided adjustable outlet opening guarantees equal air distribution and connection for air duct
- Combustion chamber and heat exchanger of heat resistant steel
- Control panel fitted with switches and warning lights
- Standard equipped with summer/winter circuit for heating or ventilation

SUPPLIED WITH STANDARD FLUE KIT

Heating – Oil Cabinets

NO HASSLE WARRANTY

BEST PRICE PROMISE

THERMOBILE SB RANGE UNIVERSAL OIL HEATERS

Free standing, auto ignition, virtually soot-free oil-burning* heaters, providing warm air heating suitable for automotive workshops.

Supplied complete with a flue kit and setup instructions, these heaters do not require specialist engineer installation. However, a qualified electrician will be required to make the final connection to a 3 Phase supply.

A built-in room thermostat enables automatic operation of the heater in order to obtain the desired room temperature and on a low position is extremely useful for overnight frost protection. An optional digital thermostat/timer control is also available.

THERMOBILE UNIVERSAL OIL HEATERS

Floorstanding, manual ignition, virtually soot-free oil-burning* heaters. Suitable for general automotive workshops, the AT307 produces radiant heat, whilst the other models, being fan assisted, produce warm air heating.

Supplied complete with a flue kit and setup instructions, these heaters do not require specialist engineer installation. Enclosed-flame setup (not available on AT306 and AT307 Thermo) ensures odour-free and efficient combustion.

The high efficiency of the AT400 and AT500 is achieved by a built-in, large surface heat exchanger, through which all the gases have to pass before entering the flue.

SUPPLIED WITH STANDARD FLUE KIT

SAFE SOLVENTS VIPER BRAKE AND CLUTCH WASHER

590 01 0250

The Viper is a break through parts washing machine designed to replace traditional brake and clutch cleaning equipment currently supplied on contract by the UK's major parts washing and waste collection businesses. Fully wireless and designed to easily glide around the workshop floor, without any cables/air lines to cause trip hazards. An inbuilt compressor and the pumping system allows you to wash and dry the brake assembly on a vehicle with ease. To make life even easier, the Viper height adjusts up and down by up to 40cms to suit your perfect working height.

- Easy to fill
- Self-draining.
- Uses Safe Solvents advanced cleaning liquid which is non-flammable, non-toxic and easy to dispose of.

WEEKLY FROM ONLY **£8.31***
ONLY **£1,649.00**

ADVANCED BRAKE 7 CLUTCH CLEANING FLUID 25L
