Everyone loves warmth

From Frieze to Silk - the History of Finnish

This year we photographed our collection in Suomenlinna, a fortress island just off Helsinki. Construction of the fortress started in 1748, around the same time the Finnish textile industry was born. A cloth factory and wool spinning mill were established in Turku due to a decree ordering army equipment to be acquired from a Finnish manufacturer.

Thus for centuries the soldiers at Suomenlinna and wool were connected. Without frieze, a heavy woolen fabric, soldiers would have found it difficult to survive the harsh weather conditions. Even today cold conditions make

Finns exceptionally good dressers.

Wool, that irreplaceable product of nature, is still held in high regard by those who enjoy the outdoors. Clothes made from pure merino wool breath with your body, are environmentally friendly and form a cornerstone of your wellbeing.

Discerning customers are increasingly choosing undergarments made of natural fibres, because they feel comfortable, are like a second skin and eventually disintegrate as part of nature's own cycle.

Textile

Other natural fibres such as silk, silk wool and organic cotton also have an important role in our collection. Our aim is to provide comfortable garments for every season and all weather conditions.

Organic quality bed linen – blankets, pillows and mattress toppers – enhances your sense of wellbeing. Try it out and discover what a good night's sleep feels like.

Dive into our collection and find your own favourites.

NATURAL FIBRES **Luxury of feeling good**

Nature provides us with wonderful materials for supporting our wellbeing. Outfits made of organic wool, silk, silk wool and organic cotton simply feel so good that one would not have the heart to take them off at all.

Warming Organic Wool

The explanation for the unique properties of wool is in its structure and its chemical composition. Thanks to its curly nature the wool fiber binds plenty of air. This air layer equalizes the temperature between the skin and the environment. The good feeling is increased by the ability of the wool to absorb moisture, up to 30% of its weight, as well as the ability to clean itself. Wool absorbs and neutralizes the skin secretions, so these do not form a breeding ground for bacteria. Wool clothes do not need to be washed often, as just airing helps them to freshen up and become clean. Wool is suitable for almost everyone, as the wool itself does not contain ingredients that cause allergies. Only the finest types of wool are suitable for underwear. Ruskovilla organic wool is very thin, long fibers and soft merino wool, which is seven times thinner than the wool of finnish sheep.

Colour options:

White Blue Red Green Black

Lovely Natural Silk

Silk clothing touches the skin gently, almost caressing. Silk texture is very close to the composition of human skin, and thanks to this, silk feels good to even the most sensitive skin. Silk absorbs moisture without feeling wet. Thanks to good thermal insulation properties the silk is warm in cool weather and cool in hot weather. Like wool, silk repels dirt and neutralizes odors. A person with sensitive skin can choose the silk layer, say, under a winter sports suit.

The precious natural fiber known for thousands of years is topically right today, its therapeutic properties can alleviate many of the ailments specific to our times such as skin allergies and rheumatism. The silk thread used by Ruskovilla has been granted the safe textile certificate Öko-Tex Standard 100.

Comfortable Silk Wool

Sustainable Organic Cotton

30/70 silk wool has the wonderful warmth of wool and the sweet softness of silk. Soft merino wool and pure natural silk operate as a combination for summer and winter. As a material, silk wool is thin, soft and elastic, giving the skin a wonderful feeling of warmth. Silk wool helps you feel good.

Silk wool clothes are best suited under your everyday clothing as well at home as outdoors. Silk wool clothes are also suitable for the summer; on a camping trip, it is great "sleep underwear". People with holiday homes and boaters appreciate their silk wool underwear in Finland's cool summer and autumn weathers.

We do not recommend silk wool outfits for the actual sweat exercise, because the intense sweating, combined with mechanical stress can easily cause premature felting of the garment.

Colour options:

White

Black

Cotton is relatively durable and smooth-surfaced fiber. On the skin cotton clothing is comfortable and breathable, but it does not isolate heat like wool and silk. Cotton absorbs moisture well and its washability is very good. Cotton is ideal for itchy skin and so strongly allergic people can use clothes made of cotton. Undyed organic cotton can be recommended for underwear material especially for infants and children with sensitive skin.

The cotton used by Ruskovilla is organically farmed Indian cotton. In the cultivation of organic cotton is used a.o. biological pest control, organic fertilizer, crop rotation and hand-picking as well as social responsibility for the farmers and their families.

ADULTS

Warmth brings wellbeing and joy. You can always carry the warmth of wool and silk with you, close against your skin. Learn more about our products and choose your new favourite garment, which can affect your wellbeing and make a difference to how you feel.

MERINO WOOL

the softest wool of all

100 % ORGANIC MERINO WOOL

- feels good on the skin
- pleasantly flexible
- warms comfortably
- breathes and does not make you sweat
- absorbs moisture without feeling wet
- keeps you warm even when moist
- neutralizes body odour
- airing helps to remove odours
- is fireproof

Outdoor shirt

- No shoulder seams: backpack straps won't chafe.
- A protective reversible collar with a wind flap under the zipper.
- Long sleeves that reach the knuckles protect the wrists from frost and wind, wristbands have separate thumbholes.
- Extended rear hem keeps your lower back warm.

| OUTDOOR SHIRT 99 € | | |

MERINO WOOL warms from head to toe

ACCESSORIES

Complete your outfit with woollen mittens, socks, and headwear and avoid being caught by cold. It is important to protect the extremities of the body as they will cool down more quickly than the rest of the body. Nothing beats wool in winter conditions: the warmth it produces is pleasant, yet you do not feel sweaty.

Humans usually regulate heat through sweating from the head. A woollen cap warms even when damp and does not feel cold even when sweaty. A **woollen balaclava bonnet** or a **woollen neck warmer** offer good protection. For people with sensitive skin Ruskovilla collection also includes a real silk balaclava bonnet and mittens with silk lining.

A **full face bonnet** provides adequate basic protection for the face against strong cold wind.

In wintertime, toes can often feel cold; then it is the fully woollen **socks** that keep your feet warm and dry. Ruskovilla woollen socks can even be used all around the year as they fit in various types of shoes. When using Ruskovilla woollen socks in boots and hiking shoes, we recommend that you wear them under a thicker sock, as they will last longer this way. You can also acquire mending thread from us!

Tips: Warm woollen socks help you to fall asleep.

BABIES

Stunning smiles and mysterious expressions. It's a joy to watch a happy baby.

Ruskovilla keeps your baby warm and satisfied. So much that you might want to switch parts...

See the guidebook *Baby in Wool!*

The guidebook provides more details about the importance of natural fibres in baby's clothing and wellbeing, about swaddling and cloth nappies.

You can find this booklet as a flash brochure or download it from our website

www.ruskovilla.fi.

SILK

Nicely warm
and lovely

Silk bonnet protects gently

The silk bonnet protects the newborn's still-open crown area and also provides protection from the surrounding environment's noises, which can irritate the baby's sensitive hearing. The baby's head is relatively large compared to the rest of its body, which means that the heat loss through the head is significant. Head covered with a silk bonnet, the baby stays warm, and the bonnet can be worn around the clock. If the silk bonnet is too large for the newborn, the bonnet can be tied into a knot at the top of the head using a narrow silk or cotton ribbon.

Did you know that

A newborn's skin is just about one fifth as thick as an adult skin. Therefore, it is much more sensitive to any external irritants, such as dyes, bleaches and finishing substances, which pass easily into the body through the baby's thin skin. Natural white baby clothes of Ruskovilla are a safe choice, as they contain nothing redundant that could irritate the baby's sensitive skin.

100 % ORGANIC COTTON

- off-white
- the soft surface does not irritate even the most sensitive skin
- well suited for babies with allergies
- made from hand picked cotton
- unbleached and without any chemical residues

10. Flocky yarn
100 % wool
Product no. **1900** 100 g ball of yarn
€ 6,50

Flocky yarn is an untwisted pre-stage of normal knitting yarn, it is soft and absorbent and is suitable for handknitting of e.g. nappy pants.
You can also knit nappy pants for your baby from flock yarn. Smaller pants require approximately 70 grams of yarn and larger pants approximately 100 g. Instructions are included for knitting various different models of nappy pants, and a bonnet and booties.
(Instructions only in finnish and swedish).

CLOTH NAPPIES are comfortable for the baby

Ruskovilla is the classic of cloth nappies!

Materials

100 % organic wool
100 % organic cotton
off-white

Wool pants are the secret of the nicest cloth nappies

Cotton nappy and woollen nappy pants are a natural combination, in which a child feels comfortable - it efficiently absorbs moisture and still remains warm and feels dry. It does not make you sweat, cause diaper rash or tighten.

The baby wears bodypants and long-legged nappy pants

Wool makes Ruskovilla cloth diapers comfortable for your baby

- Wool absorbs moisture well without feeling wet
- Wool generates warmth even when damp
- Wool is self-cleaning, airing reduces the need for washing
- Wool breathes, woollen nappy pants can also be used in summer

Cloth nappies will bring many benefits for the baby, as well as for the family and the environment

- It is gentle option on baby's skin
- cloth diapers are always more economical than disposable diapers
- use of cloth nappies is a environmentally sustainable option
- potty training will become easier
- the same cloth nappies can be recycled for more children

Read more from the guidebook **Baby in Wool**.

These will get you started:

- 24 cotton nappies (folded in triangular form)
- 9 extra flannel or wool nappies for the night or outdoor use
- two sets of long-legged and two sets of short-legged nappy pants
- wool-washing agent, bile soap, wool conditioner

When your baby grows:

- the same cotton nappies (folded in rectangular form)
- 15 additional extra flannel or wool nappies (an extra nappy is always handy when the baby grows)
- 4 pairs of larger nappy pants
- underpants or bodysuits to keep the nappy in place.

Before use wash the nappy pants by hand. It is also recommended to wash new cotton nappies a couple of times by hand before use so that they reach the optimal absorption capability.

For breast protection, Ruskovilla has designed soft woollen and silk breast warmers and bra protectors made of ecological cotton, which help to take care of breasts. Milk-filled breasts are sensitive to cold, wind, and draft. Moist nipples should be protected throughout the entire time of nursing and kept warm to avoid painful breast infection.

Breast warmers

Classic Sheepskins Reliable quality from a responsible producer

Our sheepskins come from New Zealand, where sheep farming is the main industry of agriculture.

- The skins are supplied to us by Classic Sheepskins, a company founded by **Maurice Callaghan** in 1969.
- The skins used for babies are carefully selected with extreme care. Hair length and diameter are defined precisely. They are tanned according to the requirements of the New Zealand Wool Board and they must be treated to be permanently hygienic.
- The factory is ISO 9001 certified, which means that every step is under observation and the entire operation is transparent and certified.
- In the tanning process are used alum and chromium compounds. Chromium is mainly used to improve the skins wash-ability. The amount of chromium is very small compared to the amount used by most manufacturers,

less than 1 g/liter. In the process is used chrome 3 mined from nature, which is not toxic and which binds the fiber to the protein without leaving a trace. No formaldehyde is used at any stage of the process.

- The factory is a pioneer in developing new, alternative tanning procedures, such as natural air-drying in the sun of Hawkes Bay. (Figure)

Maurice Callaghan has over the years become our good friend; we meet every year and improve the world together. We in Ruskovilla have also visited New Zealand exploring the different phases of production. There are a surprising number of things in common between us, even though we live on different sides of the world. Our causes for concern are e.g., environmental issues, as well as the many producers who irresponsibly tan skins with questionable methods.

Wonderfully warm wool fleece for your baby

The high quality washable sheep's wool fleeces by Ruskovilla are made so that they are safe for your baby: they are treated to be constantly hygienic and contain no detrimental elements, they are also tanned to be machine-washable. Wonderfully warm and multipurpose fleece can be used in the baby's crib or bed, on the floor, in the pram, or in a car seat. Wool fleeces are excellent during trips as they make your baby feel just like at home.

BED LINEN

A close-up photograph of a rustic stone wall. The wall is constructed from irregular, dark grey and reddish-brown stones. In the bottom left corner, a white quilted blanket is draped over the wall. In the bottom right corner, there are several small yellow flowers with green stems growing from the base of the wall. The background is a soft-focus view of the stone wall.

A tip for a good night's sleep: make falling asleep easy by choosing bed linen that invites you to bed and makes you feel comfortable. Natural is the key word.

Wake up rested in the morning after a good night's sleep in Ruskovilla bed linen. We in particular recommend choosing a millet husk pillow for each member of your family. Once you've tried it it's hard to go back.

BEDCLOTHES Adults and children

Natural fibres for a good night's sleep

During sleep, our metabolism increases. Bedclothes filled with wool wadding are very good in regulating the warmth and moisture our bodies produce. Between the mattress and the duvet a layer of conveniently warm air is formed around the sleeper's body, which helps to reach a deep and peaceful sleep.

From patches into a blanket, ecologically

Bedclothes with wool wadding are part of our ecological production process. Our cutting room produces wool patches and we don't throw them away, instead they are shredded and scribbled into filling wool. Ruskovilla pillows, duvets and mattress overlays are covered with dense organic cotton cloth.

A soft start for life

Babies spent most of their time sleeping: therefore it is particularly important to choose their bed clothes carefully. Natural fibres help the baby fall into a peaceful sleep; they breathe and keep the child's temperature suitable.

A swaddling cloth / light summer blanket

Baby will feel warm and safe inside a swaddling cloth as it gives the same close feeling that the baby felt inside the womb. Swaddling cloths can be used at least during the two-three first months. It also is a splendid light summer blanket.

Washable sheep's wool fleece for your baby

Read more on CLASSIC Sheepskins on p. 56.

MILLET HUSK PILLOW provide natural support

The whole family's favourite pillow

The filling of millet husks pillows consists, according to its name, of millet husks or the inedible shells of grain. Small bowl shaped husks form the porous filling, which adapts to the smallest movements.

Supports the head properly

Many of us have neck pain and tension caused by stress or incorrect work position. If the neck muscle groups get enough rest and support during the night, they recover and withstand more stress during the day. Many physiotherapists and massage therapists recommend millet husk pillows for their patients suffering from neck pains.

Good properties of a millet husk pillow

- supports everybody in an individual way and always adapts to the sleeper
- the amount of filling can be increased or decreased to suit your desires
- inside of the pillow the air circulates and keeps you comfortable all night
- easy to maintain and long lasting

MILLET HUSK PILLOW

- Cover material 100 % organic cotton, zipper at the side
- Filling millet husks from ecologically sound farms

BLUE WOOLLEN GARMENTS FOR TALLER CUSTOMERS!

Our size tables are based on the average values of different body types and lengths. Therefore, most of our customers can find a suitable size from our product range.

However, people are becoming taller, and the likelihood of finding yourself outside the size table has increased recently.

The blue woollen garment set for adults – see p. 13 – is available in a longer version (legs + 10 cm, sleeves and hem + 5 cm).

Protect your woollen garments against clothes moths and fur beetles

All organic matter gradually returns to the circle of nature. Our environment is swarming with nature's tiny 'helpers', which are indispensable decomposers, pollinators and objects of nourishment from the aspect of nature. However, some of these are rather bothersome creatures when straying to human abodes, especially moths and fur beetles, the larva of which use the keratin protein in wool for their principal source of nutrition.

Ruskovilla woollen garments are not protected against moths, since moth repellents are harmful to the health of people.

CLOTHES MOTH

The clothes moth is a small, one-colour, slightly golden yellowish brown butterfly with a head the colour of deep rust brown. Clothes moths have spread all over the world alongside humans. In cities they mostly live in the nests of domesticated doves and other animals bred in buildings, but can nest also in peoples' homes, especially if something they can feed on is available. They can breed several generations in a year. Flight is most numerous in spring and from the early summer when the sun starts to warm things up.

FUR BEETLE

Adult fur beetles are smallish, almost hemispherical dark brown insects, whose bodies are covered by fine and thick hair. In Finland fur beetles occur only in heated premises, such as apartments and storerooms. An adult fur beetle eats nothing and can be encountered around the year. They fly well, which contributes to their spreading, for example, in apartment buildings. Adult beetles seek light, and can often be found on window-sills. Fur beetles breed three to four generations in a year. In woollen clothes the larvae eat irregular holes, which are often close together.

Source: publication Rohmut ja Riesat by the Finnish Museum Association, 2005.

NATURAL SUPPRESSION METHODS

Store in a plastic bag: When a woollen garment is no longer in continuous use, it would be good to store it in a tight plastic bag (such as the bag into which the product was initially packaged).

Freezing: Freezing (in summer) and placing into a cold environment (-20 °C) is an efficient deterrent, resulting in the death of all individuals from eggs to adults.

RED CEDARWOOD DISCS

Moths and beetles can be deterred successfully by placing cedarwood discs in the wardrobe. The wood's cedar oil, with its pleasant smell, functions as a natural non-toxic moth repellent. With its fresh smell red cedar also repels fur beetles, silver fish, cockroaches, fleas and ants.

MOTH TRAP - GLUE TRAP FOR CLOTHES MOTHS

Contains: 1 glue pad with integrated attracting substance (pheromone)

Effective duration: 12 weeks from opening the protective package.

The attractant vaporises into the air, disperses in the environment and lures male moths who are seeking mates and are then caught in the glue trap. This prevents the fertilisation of female moths and the number of moths continuously decreases.

Washing and care are part of the ecology of a garment

Treat the lovely natural fabrics correctly, so that they serve you better and longer.

| Care instruction | Wool & Silk wool   Silk |  Organic cotton | |

BEDCLOTHES

Duvets and mattress overlays

- A sufficient care for these is light brushing and regular airing.
- Dry cleaning.
- Do not wash with water as wool wadding would get clumpy in water.
- Stains can be removed with gall soap. Rub the dry stain with dampened soap, let it affect for a moment, and rinse carefully under running water or with a soft dampened sponge.
- Fight house dust mites by keeping the bedclothes for an hour in a hot sauna (60°C) or outside in about minus twenty degrees for 24 hours.

Sheep wool fleeces

- Air and shake outdoors weekly.
- Brush now and then, so that wool fibres remain elastic. Use a coarse steel comb or brush.
- Stains can be rinsed away under running water.
- If washing of the entire fleece is necessary, it can be machine-washed with a wool-wash programme (30°C) and with Sonett washing liquid. Light spin.
- You can stretch the fleece into shape after wash.
- Hang the fleece to dry from two edges, preferably outdoors.
- Do not hang close to a heat source or into sunlight.
- As the fleece's hair is wool, it will slightly curl when washed.

Millet husk pillow

- Use covered with a pillowcase.
- When the cotton cover needs washing, open the fastener and shake the husks out into a suitable container.
- Wash the cover in a washing machine (40-60°C).
- Refill the clean cover with the husks.
- The husks don't need to be washed as they don't accumulate moisture or odours.
- The millet husks should be replaced with new ones in around every 3-5 years.
- The old husks should be put to a biological waste centre.
- You can acquire new husks from Ruskovilla.

SONETT Product Family

Sonett uses tensides only from renewable raw materials that can be broken down in five to seven days. Ecological olive or rape oil and volatile oils are used as rawmaterial for soap. Sonett products do not contain petrochemical products, enzymes that cause allergic reactions, chlorine compounds, phosphates, synthetic perfumes, or colorants.

SONETT – WASHING LIQUID FOR WOOL AND SILK, neutral

Ingredients: Olive oil soap, sugar surfactant, rapeseed oil soap, vegetable alcohol (ethanol), citrate, water. Due to the fat in the olive oil soap, protein fibres like wool and silk maintain their elasticity.

Suitable for hand- and machine-washing at temperatures up to 40°C

Product no. **S-4725** Size: 500 ml € 9,50

Product no. **S-4724** Size: 120 ml € 3,20

SONETT - GALL SOAP for stain removal

Ingredients: soap boiled from palm and coconut fat, bovine gall, chlorophyll. An incredibly effective stain remover, suitable for removing grease, blood, berry, fruit, wine, ink, or chlorophyll stains. Use for pre-treating shirt collars and sleeves before placing them in the washing machine. Will not harm fibres, will not leave a white ring, will not cause colours to fade, will not cover stains.

Product no. **S-4701** Bar of soap 100 g € 3,90

Product no. **S-4702** Liquid 120 ml € 4,50

SONETT - WOOL CARE AGENT

Ingredients: wool grease, olive soap, sugar tenside, lecithin, plant-derived starch, genuine volatile lavender oil, balsam. The wool care agent softens wool garments whose wool grease has disappeared (e.g. frequently washed nappy pants) and protects the wool fibres from premature wear. Wool will thus maintain its original properties, such as softness and the ability to draw in moisture.

Product no. **S-4721** Size 120 ml € 5,70

RUSKOVILLA - OLIVE OIL SOAP

Olive oil content > 81 %.

For handwashing of wool and silk wear. Suitable for cleaning of leather and felting. Excellent for handwashing and shower.
