# Infinity Rinse-Away™

## Feature | Function | Benefit

### Infinity Rinse-Away Support Material Print. Rinse. Repeat.

Infinity Rinse Away is a water-soluble support material available for the Cube and CubePro. Water-soluble material provides the capability to print beyond what is possible with breakaway supports.

	LIST	COST
<b>INFINITY- CUBE</b>		
TDS391602 .....	\$49.00	<del>.....</del> <b>\$36.75</b>
<b>INFINITY- CUBE PRO</b>		
TDS403255 .....	\$99.00	<del>.....</del> <b>\$74.25</b>

### CUSTOMER VALUE

#### DESKTOP ENGINEERS

Intricate pipe junctions with large overhangs, hydro valves, and other normally difficult prints are now all possible.

#### DESIGNERS

Print prototypes with difficult geometries or long unsupported overhangs such as 3D floor plans, a cage with a ball inside, and pendant chain.

#### CONSUMERS

Perfect for fun but difficult to print objects like springs, models of animals, and mobius rail balls.

#### STUDENTS

The possibilities for printing parts for homework or class projects has been expanded to include dinosaur skulls, DNA structures, and art projects.

### COMPETITIVE ADVANTAGES

- Print complex geometries that would have been impossible to do with break away supports.
- Parts with organic movements etc. are now all possible thanks to Infinity Rinse Away.
- Allows for a cleaner finished print than what you would get with breakaway supports. No more "support stubble".
- Easy to remove supports significantly reduces post processing times.
