

# TIPS FOR SOURCING TOOLS

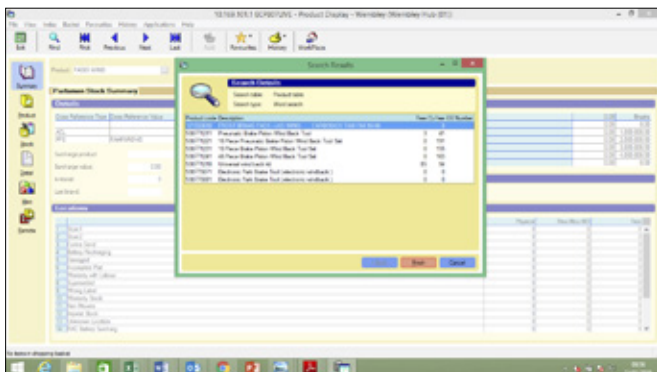

If you know which Brand of Tool you are looking for you can use any of the Suppliers websites listed below. Please familiarise yourself with them as they are easy to use and will no doubt help you increase your sales. There will always be supplier marketing material sent to your branch every quarter, some suppliers send their publication out monthly. Please ask your Ops Team to keep an eye out for these deliveries with your overnight stock.

When looking for popular tools and you are unsure of the supplier or manufacturer, try a word search in Kerridge. All MasterPro and Pagid tools start with 538 77 xxxx. You can use a combination of part numbers or words, or just words to search for the tool you require.

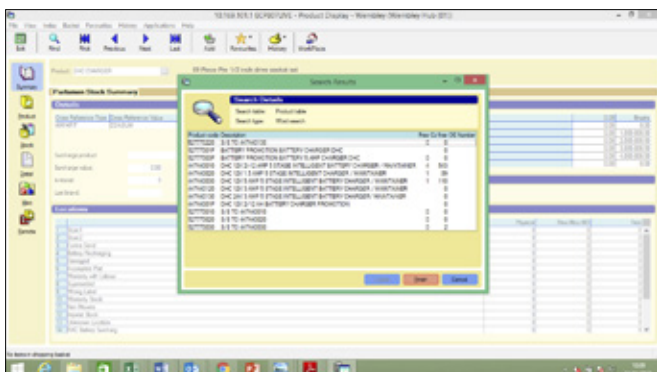

**EXAMPLE 1**

If you type in 53877 SOCKET SET – This will return a list of all of our own branded socket sets and related items such as Injector Sockets and TRX Sets.

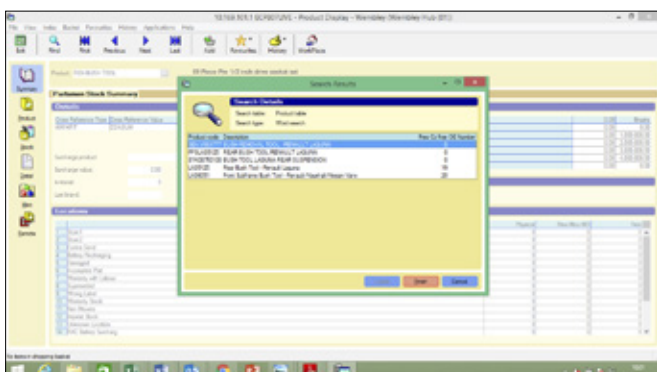

**EXAMPLE 2**

If you type in PAGID WIND – This will return all of the Pagid Wind Back Tools

**EXAMPLE 3**

If you type in DHC CHARGER – All of the DHC range of battery chargers will be returned.

**EXAMPLE 4**

If you type REN BUSH TOOL – This will return the Renault Laguna Rear Bush Tool.

This will obviously only help with general searches. Vehicle or Engine specific tools may need a more detailed search. For Timing Tools use Laser, their look up is clear, concise and accurate. This applies to searches after you have tried TopCat as we now have the Top 50 Laser timing tools linked to the INA Timing Kits. The more you use the Suppliers e-catalogues the easier you will find it to sell tools and add value to your day.

The links below will cover the majority of the inquiries that you will receive, from your customers.
