REASON

Mircea Moldovan Felix formed this group. The basic idea is very diverse genres of music these talented young people are able to address them without any problem, even with great success. Variety of genres, people so different but united by **music, real life stories**, which only few and would take it, the instrument childhoods academic year, natural supra efforts of some parents who put their hopes in half heart, because everyone says: "... **how you will make a living out of music?**", decisions, indecisions, ambition, determination in many colors ... that means **Barbaross Samba Group**.
