

# REBORN

## GEARBOXES

High quality, fully guaranteed,  
very competitively priced,  
remanufactured gearboxes  
with free next-day delivery.

**EUKO** ★  
**CAR PARTS**

## RANGE AND AVAILABILITY

Our range comprises over 2000 gearbox part numbers, all of which are available for immediate delivery. For customers requiring a unit outside of our standard range, but whose old core is of acceptable condition, we offer a complete turnaround from collection to delivery of a remanufactured unit in 10 working days.

## DELIVERY

Our extensive supplier stocks mean that most orders can be delivered free next day throughout the UK mainland. Less common items may require slightly longer lead times. Where old core units are not available we can arrange to collect and remanufacture your customer's own gearbox to keep downtime to the absolute minimum.

## FITTING

All units are supplied with pre-installation instructions and model-specific instructions if required.

## WARRANTY

Our remanufactured gearboxes are backed with 12 months unlimited mileage, parts and labour warranty.

## QUALITY YOU CAN TRUST

We recognise the importance of consistently providing our customers with the highest standards of quality and reliability, exceeding your expectations. All remanufactured gearbox units supplied by Euro Car Parts are manufactured to ISO 9001:2008.

Our suppliers are members of the Federation of Engine Remanufacturers: they have comprehensive and certified quality management systems in place, and embrace a culture of continuous improvement backed by stringent quality testing.

## ENVIRONMENT

Remanufacturing is the ultimate form of recycling, helping to conserve energy and raw materials as well as reducing pollution and landfill space. Research has shown that, for example, remanufacturing an engine can save 55kg of steel and 8.3kg of aluminium along with reducing emissions of carbon dioxide by 565kg, carbon monoxide by 6.09kg, nitrogen dioxide by 1.01kg and sulphur dioxide by 3.985kg.
