

RUSKOVILLA®

Product Catalogue 2017-2018

*Everyone loves warmth*

# Ruskovilla - wherever You are

We are congratulating Finland on its 100th birthday! Ruskovilla has been a part of Finnishness for decades. We want to pass on the tradition of wellbeing to our children and grandchildren. It's easy to fall in love with our simple products - they are everyday design in the spirit of the time, with the materials themselves taking centre stage: organic wool, silk, silk wool, and organic cotton.

By choosing to dress in natural fibres, you promote not only your own wellbeing, but also nature conservation in Finland. Microscopically small textile fibres make their way into our waterways along with our laundry water. Natural fibres return to the natural cycle, whereas oil-based artificial fibres can persist for up to hundreds of years without breaking down, thereby increasing the amount of microscopic plastic waste in nature.

The popular material fleece can during washing shed a large amount of small artificial fibres. We want to do our part to provide an environmentally friendly alternative without compromising on comfort. That's why we rolled up our sleeves and created the men's and women's soft jacket from **organic wool fleece**. It is a pleasure to wear all year round, either on its own or underneath a coat. And our fleece doesn't contain a shred of artificial fibre. Wear and enjoy - the environment will thank you!

Take a look at our extensive range and find products that make you and your family feel good. Keep yourself and your loved ones warm!

# Natural fibres - luxury of feeling good

## Organic WOOL

### 100% Organic Wool

- the softest wool of all
- feels good on the skin
- pleasantly flexible
- warms comfortably
- breathes and does not make you sweat
- absorbs moisture without feeling wet
- keeps you warm even when moist
- neutralizes body odour
- airing helps to remove odours
- is fireproof

The explanation for the unique properties of wool is in its structure and its chemical composition. Thanks to its curly nature the wool fiber binds plenty of air. This air layer equalizes the temperature between the skin and the environment. The good feeling is increased by **the ability of the wool to absorb moisture**, up to 30% of its weight, as well as the ability to clean itself. Wool absorbs and neutralizes the skin secretions, so these do not form a breeding ground for bacteria. Wool clothes do not need to be washed often, as just airing helps them to freshen up and become clean. Wool is suitable for almost everyone, as the wool itself does not contain ingredients that cause allergies. Only the finest types of wool are suitable for underwear. Ruskovilla organic wool is very thin, long fibers and soft merino wool, which is seven times thinner than the wool of finnish sheep.

Colour options:  White  Blue  Red  Green  Black

## Natural SILK

### 100% Natural Silk

- light, soft, and breathable
- balances temperature: warm in cold and cool in hot
- its smooth and flat fibre suits even to the most sensitive skin
- absorbs moisture very well without feeling wet
- off-white and black

Silk clothing touches the skin gently, almost caressing. Silk texture is very close to the composition of human skin, and thanks to this, silk feels good to even the most sensitive skin. Silk absorbs moisture without feeling wet. Thanks to good thermal insulation properties the silk is **warm in cool weather and cool in hot weather**. Like wool, silk repels dirt and neutralizes odors. A person with sensitive skin can choose the silk layer, say, under a winter sports suit.

The precious natural fiber known for thousands of years is topically right today, its therapeutic properties can alleviate many of the ailments specific to our times such as skin allergies and rheumatism. The silk thread used by Ruskovilla has been granted the safe textile certificate Öko-Tex Standard 100.

Colour options:  White  Black

## Comfortable SILK WOOL

## 30/70% Comfortable Silk Wool

- a lovely combination of the softest merino wool and smooth and nurturing real silk
- feels good on the skin
- warms just enough
- comfortably thin
- breathes freely and does not make you sweat
- off-white and black

Silk wool has the wonderful warmth of wool and the sweet softness of silk. Soft merino wool and pure natural silk operate as a combination for summer and winter. As a material, silk wool is **thin, soft and elastic**, giving the skin a wonderful feeling of warmth. Silk wool helps you feel good.

Silk wool clothes are best suited under your everyday clothing as well at home as outdoors. Silk wool clothes are also suitable for the summer; on a camping trip, it is great "sleep underwear". People with holiday homes and boaters appreciate their silk wool underwear in Finland's cool summer and autumn weathers.

We do not recommend silk wool outfits for the actual sweat exercise, because the intense sweating, combined with mechanical stress can easily cause premature felting of the garment.

Colour options:  White  Black

## Organic COTTON

## 100% Organic Cotton

- off-white
- the soft surface does not irritate even
- the most sensitive skin
- well suited for children with allergies
- made from hand picked cotton
- unbleached and without any chemical residues

Cotton is relatively durable and smooth-surfaced fiber. On the skin cotton clothing is comfortable and breathable, but it does not isolate heat like wool and silk. **Cotton absorbs moisture well and its washability is very good.**

Cotton is ideal for itchy skin and so strongly allergic people can use clothes made of cotton. Undyed organic cotton can be recommended for underwear material especially for infants and children with sensitive skin.

The cotton used by Ruskovilla is organically farmed Indian cotton. In the cultivation of organic cotton is used a.o. biological pest control, organic fertilizer, crop rotation and hand-picking as well as social responsibility for the farmers and their families.

Colour options:  White

ORGANIC  
MERINO WOOL

# Ruskovilla's new material

## ORGANIC WOOL FLEECE

Soft organic wool fleece is ideal for use as an intermediate garment either on its own or underneath another coat. It provides additional warmth in cold or damp conditions, whether you're boating, at a summer cabin, or simply spending time outdoors.

Its lightly brushed surface is soft and feels lovely also against bare skin. It contains no artificial fibres, and therefore does not release any harmful microplastics into the natural environment during washing, and is instead environmentally friendly throughout its lifetime.

# Favourite clothing outdoors

The highest status an item of clothing can reach is becoming its owner's favourite, something that can be worn anytime and protects you from the cold and damp or anything uncomfortable. At their best Ruskovilla garments become a part of our everyday life taken for granted.

ORGANIC  
MERINO WOOL

Outdoor shirt for children see p. 31

## FACT

The organic merino wool used by Ruskovilla is the finest merino wool suitable for underwear. It is produced in South America, Argentina and Uruguay.

Curious about organic wool? See p. 68.

## Outdoor shirt, unisex

- No shoulder seams: backpack straps won't chafe.
- A protective reversible collar with a wind flap under the zipper.
- Long sleeves that reach the knuckles protect the wrists from frost and wind, wristbands have separate thumbholes.
- Extended rear hem keeps your lower back warm.

### OUTDOOR SHIRT 99,50 €

MERINO WOOL

# *There's no better undergarment...*

In Finland we know how to dress right. In these conditions it's worth wearing a reliable set of undergarments with Ruskovilla's brand safely on the label.

## WHEN YOU BUY RUSKOVILLA, YOU CAN BE SURE OF WHAT YOU GET.

**QUALITY** Undergarments made of natural fibres are essential for your wellbeing. They can be worn all year round, even in the cool weather of the northlands.

**SAFETY** Our products, free of any finishing substances, are safe to be used directly on the skin. Our dyeing technology is of the highest quality, and only reactive dyes are used in the process.

**DOMESTIC ORIGIN** A Finnish Key-flag product made and designed for you.

**ECOLOGICAL PRODUCTION** We use only renewable natural resources for our raw materials; our production processes are completely ecological and at the end of their life span our products once again become a part of the nature's circulation.

**EASY TO MAINTAIN** Natural fibres are easy to maintain; airing reduces the need for washing, therefore, saving water and detergents too.

## FACT

Wool is also a safe fibre for hikers.

It doesn't catch fire easily, and requires a high temperature to ignite.

Wool consists of proteins which slow the spread of fire.

Wool's ability to bind steam also makes it poorly flammable.

If wool does catch fire, the flames are unable to grow, since the fibres simply char and the wool extinguishes itself.

ORGANIC  
MERINO WOOL

## Protect your head

Layered clothing is meant for the entire body, including the feet, hands and head. A head without a hat is like a chimney, allowing a large amount of body heat to be released into the air. So don't forget your cap!

## FACT

Wool fibre is curly, so the clothes it is made from are airy.

This airiness is what gives wool its unique insulative ability, which increases the feeling of wellbeing in both cold and warm environments. The curliness makes the fibre flexible and bouncy, which means that the wool garment's insulative properties are not lost even during long-term use.

WONDERFUL  
SILK WOOL

# *Is there anything more wonderful?*

Silk wool comes straight from nature's treasure chest: silk, whose beneficial properties have been known thousands of years, combined with the finest merino wool.

Choose only natural fibres for your undergarments. They are breathable, repel dirt, and do not create static electricity. Clothing covers 90% of your body and affects you 24 hours per day.

CHILDREN  
SILK WOOL

## *Popular also with teens*

Silk wool is also a wonderful material for children and young people. It is perfectly suited for changing seasons at a kindergarten or at school. It is comfortably thin but at the same time warm when worn under everyday clothing. In autumn and mild winter weather it is just warm enough and helps children and young people feel well.

CHILDREN  
ORGANIC COTTON

## A long-time favourite

Organic cotton is pleasant and breathable for the skin. It stands up well to washing, which makes it a suitable material for clothes that are washed often. Alongside silk, undyed organic cotton can be recommended as an undergarment material particularly for children with allergies.

Babies

ORGANIC  
MERINO WOOL

# Warmth and togetherness

are the building blocks of a baby's life. Ruskovilla is an expert in warmth, and its collection contains warm and breathable organic wool clothing for newborns for both indoor and outdoor use. By dressing your baby in soft organic wool, you will give him or her a good start in life; mum and the family will take care of the rest.

## See the guidebook **Baby in Wool!**

The guidebook provides more details about the importance of natural fibres in baby's clothing and wellbeing, about swaddling and cloth nappies. You can find this booklet as a flash brochure or download it from our website [www.ruskovilla.fi](http://www.ruskovilla.fi).

## FACT

The temperature regulation system of newborn babies is not fully developed, and their basic temperature drops easily. Keeping the small ones warm is vital for the development of their organs and thus is one of the most essential matters in baby care. Breathable woollen clothes keep your child conveniently warm.

## *Cute silk for little ones*

Silk clothing pampers a baby's sensitive skin, and even a little one enjoys the soft feel of a silk undershirt. A silk balaclava shields the head of a baby sleeping in a stroller in the summer.

## *The wonderful silk hat*

The baby's head is relatively large compared to the rest of its body, which means that the heat loss through the head is significant. Head covered with a silk bonnet, the baby stays warm, and the bonnet can be worn around the clock.

There are four colours and five sizes to choose from. Certainly you will find a hat especially for your baby.

## FACT

A newborn's skin is just about one fifth as thick as an adult's skin. Therefore it is much more sensitive to any external irritants, such as dyes, bleaches and finishing substances, which pass easily into the body through the baby's thin skin. Natural white baby clothes of Ruskovilla are a safe choice, as they contain nothing redundant that could irritate the baby's sensitive skin.

A baby with light hair and blue eyes is leaning on a white plastic chair. The baby is wearing a white, ribbed, long-sleeved onesie. The background is a bright, out-of-focus window.

## *Cloth nappies are comfortable for the baby*

### **Wool pants are the secret of the nicest cloth nappies**

Cotton nappy and woollen nappy pants are a natural combination, in which a child feels comfortable - it efficiently absorbs moisture and still remains warm and feels dry. It does not make you sweat, cause diaper rash or tighten.

### *Tip*

Coloured nappypants are available in our online store or Factory shop.

# Helping the nursing mother

## Wool makes Ruskovilla cloth diapers comfortable for your baby

- Wool absorbs moisture well without feeling wet
- Wool generates warmth even when damp
- Wool is self-cleaning, airing reduces the need for washing
- Wool breathes, woollen nappy pants can also be used in summer

## Cloth nappies will bring many benefits for the baby, as well as for the family and the environment

- It is gentle option on baby's skin
- cloth diapers are always more economical than disposable diapers
- use of cloth nappies is a environmentally sustainable option
- potty training will become easier
- the same cloth nappies can be recycled for more children

## Read more from the guidebook *Baby in Wool*.

### These will get you started:

- 24 cotton nappies (folded in triangular form)
- 9 extra flannel or wool nappies for the night or outdoor use
- two sets of long-legged and two sets of short-legged nappy pants
- wool-washing agent, bile soap, wool conditioner

### When your baby grows:

- the same cotton nappies (folded in rectangular form)
- 15 additional extra flannel or wool nappies (an extra nappy is always handy when the baby grows)
- 4 pairs of larger nappy pants
- underpants or bodysuits to keep the nappy in place.

Before use wash the nappy pants by hand. It is also recommended to wash new cotton nappies a couple of times in the washing machine before use so that they reach the optimal absorption capability.

For breast protection, Ruskovilla has designed soft woollen and silk breast warmers and bra protectors made of ecological cotton, which help to take care of breasts. Milk-filled breasts are sensitive to cold, wind, and draft. Moist nipples should be protected throughout the entire time of nursing and kept warm to avoid painful breast infection.

**Breast warmers**

*Wonderful warm wool fleece for your baby*

## Classic Sheepskins

Reliable quality from  
a responsible producer

The high quality washable sheep's wool fleeces by Ruskovilla are made so that they are safe for your baby: they are treated to be constantly hygienic and contain no detrimental elements, they are also tanned to be machine-washable. Wonderfully warm and multipurpose fleece can be used in the baby's crib or bed, on the floor, in the pram, or in a car seat. Wool fleeces are excellent during trips as they make your baby feel just like at home.

Baby's **sleeping sack**  
see p. 47

# A soft start for life

Babies spent most of their time sleeping: therefore it is particularly important to choose their bed clothes carefully. Natural fibres help the baby fall into a peaceful sleep; they breathe and keep the child's temperature suitable.

## A swaddling cloth / light summer blanket

Baby will feel warm and safe inside a swaddling cloth as it gives the same close feeling that the baby felt inside the womb. Swaddling cloths can be used at least during the two-three first months. It also is a splendid light summer blanket.

## Washable sheep's wool fleece for your baby

MILLET HUSK PILLOW  
PROVIDE NATURAL SUPPORT

### MILLET HUSK PILLOW

- Cover material 100 % organic cotton, zipper at the side
- Filling millet husks from ecologically sound farms

### The whole family's favourite pillow

The filling of millet husks pillows consists, according to its name, of millet husks or the inedible shells of grain. Small bowl shaped husks form the porous filling, which adapts to the smallest movements.

### Supports the head properly

Many of us have neck pain and tension caused by stress or incorrect work position. If the neck muscle groups get enough rest and support during the night, they recover and withstand more stress during the day. Many physiotherapists and massage therapists recommend millet husk pillows for their patients suffering from neck pains.

### Good properties of a millet husk pillow

- supports everybody in an individual way and always adapts to the sleeper
- the amount of filling can be increased or decreased to suit your desires
- inside of the pillow the air circulates and keeps you comfortable all night
- easy to maintain and long lasting

The weight of millet husks varies according to the harvest season.

Our pillows are nevertheless always filled to the same standard volume.

We supply loose husks by the kilo.

## CURIOUS ABOUT ORGANIC WOOL?

What could be more natural than wool? Many people think that wool is organic since it is a natural fibre, while others use the term in an everyday manner simply to express that the fibre has not been treated with strong chemicals.

There is however a deeper meaning to the word organic, which doesn't refer to where a product comes from, but instead to how the food and product was grown and processed using nature-friendly methods. Wool's journey from a grazing sheep to one of Ruskovilla's wool tops is a long one. The certification of wool as organic begins with the soil on which the sheep graze, continues on to the wellbeing of the sheep and then moves on to the processing, washing, spinning, dyeing and knitting, etc., of the wool.

Everything comes down to the wellbeing of the pasture and the sheep: attention is paid to the fertility of the soil, crop rotation, the nutrition and health of the sheep, and pest control. Synthetic pesticides, hormones, vaccinations, and genetic modification are prohibited. Good livestock practice and breed-specific treatment are a given.

**The principle behind organic production is to produce products whose manufacturing methods are not harmful to the environment or to the health and wellbeing of people, plants, and animals.**

Nothing beats wool when it comes to comfort, warmth, elasticity or versatility. And when you source your wool organically from Ruskovilla, you can be sure it's the best in the world.

More about organic wool at [www.naturtextil.com](http://www.naturtextil.com) and [www.imo.ch](http://www.imo.ch).

*Fall in love with Ruskovilla's organic wool!*

# Protect your woollen garments against clothes moths and fur beetles

All organic matter gradually returns to the circle of nature. Our environment is swarming with nature's tiny 'helpers', which are indispensable decomposers, pollinators and objects of nourishment from the aspect of nature. However, some of these are rather bothersome creatures when straying to human abodes, especially moths and fur beetles, the larva of which use the keratin protein in wool for their principal source of nutrition.

Ruskovilla woollen garments are not protected against moths, since moth repellents are harmful to the health of people.

## CLOTHES MOTH

The clothes moth is a small, one-colour, slightly golden yellowish brown butterfly with a head the colour of deep rust brown. Clothes moths have spread all over the world alongside humans. In cities they mostly live in the nests of domesticated doves and other animals bred in buildings, but can nest also in peoples' homes, especially if something they can feed on is available. They can breed several generations in a year. Flight is most numerous in spring and from the early summer when the sun starts to warm things up.

## FUR BEETLE

Adult fur beetles are smallish, almost hemispherical dark brown insects, whose bodies are covered by fine and thick hair. In Finland fur beetles occur only in heated premises, such as apartments and storerooms. An adult fur beetle eats nothing and can be encountered around the year. They fly well, which contributes to their spreading, for example, in apartment buildings. Adult beetles seek light, and can often be found on window-sills. Fur beetles breed three to four generations in a year. In woollen clothes the larvae eat irregular holes, which are often close together.

Source: publication Rohmut ja Riesat by the Finnish Museum Association, 2005.

## NATURAL SUPPRESSION METHODS

**Store in a plastic bag:** When a woollen garment is no longer in continuous use, it would be good to store it in a tight plastic bag (such as the bag into which the product was initially packaged).

**Freezing:** Freezing (in summer) and placing into a cold environment (-20 °C) is an efficient deterrent, resulting in the death of all individuals from eggs to adults.

## RED CEDARWOOD DISCS

Moths and beetles can be deterred successfully by placing cedarwood discs in the wardrobe. The wood's cedar oil, with its pleasant smell, functions as a natural non-toxic moth repellent. With its fresh smell red cedar also repels fur beetles, silver fish, cockroaches, fleas and ants.

## MOTH TRAP - GLUE TRAP FOR CLOTHES MOTHS

**Contains:** 1 glue pad with integrated attracting substance (pheromone)

**Effective duration:** 12 weeks from opening the protective package.

The attractant vaporises into the air, disperses in the environment and lures male moths who are seeking mates and are then caught in the glue trap. This prevents the fertilisation of female moths and the number of moths continuously decreases.

# MEASUREMENT TABLES

The measurements shown in the table are body measurements. Compare your own body measurements with those in the table, and select the appropriate size accordingly.

The blue woollen garment set for adults - see p. 15 - is available in a longer version: Legs + 10 cm, sleeves and hem + 5cm. Price information in the online store.

<b>BABIES</b>	50	60	70	80
<b>Approx. age</b>	0-2 mth	2-4 mth	6-8 mth	12 mth
Neck - wrist	24	27	31	35
Chest circumference	45	47	49	51
Inside leg	15	20	25	30

We manufacture undergarments from four different natural fibres, which differ from one another regarding e.g. give. It is barely noticeable in children's and babies' clothing, but in adults' silk wool garments you should feel more give compared to the wool and silk.

<b>CHILDREN</b>	90	100	110	120	130	140	150
<b>Approx. age yr</b>	2	3	4	6	8	10	12
Neck - wrist	39	43	47	51	56	60	64,5
Chest circumference	54	57	60	64	68	72	76
Waist circumference	53	55	57	59	61	63	66
Hip circumference	58	60	64	68	72	76	80
Inside leg (crotch - floor)	35	41	47	53	59	65	70

Ruskovilla's wool knits are not finished using any treatments, which means that the knitwear will shrink a little in the first wash. We have accounted for this in the pattern, and for that reason the sizing of new garments is generous. The clothes will shrink slightly, but they are flexible and will adapt comfortably to the shape of your body.

# Washing and care are part of the ecology of a garment

Treat the lovely natural fabrics correctly, so that they serve you better and longer.

Care instruction	Wool & Silk wool   Silk	 Organic cotton	
Washing	by hand or with a hand-wash program 30°C	by hand or with a hand-wash program 30°C	in a washing machine 40-60°C
Detergent	Sonett Washing liquid for Wool and Silk or Olive Oil Soap. Stains disappear with Sonett Gall Soap. Airing extends washing Intervals. It is recommended to treat woollens that need to be washed often with Sonett Wool Conditioner.	Sonett Washing liquid for Wool and Silk or Olive Oil Soap. Stains disappear with Sonett Gall Soap. Airing extends washing Intervals.	Preferably use a nature-friendly fast decomposing detergent. Stains disappear with Sonett Gall Soap.
Drying	<ul style="list-style-type: none"> <li>• Soft spin</li> <li>• Do not tumble dry</li> <li>• Shape clothing whilst damp</li> </ul>		
Storing	<ul style="list-style-type: none"> <li>• Protect wool from moths and beetles</li> <li>• When clothing is not being used, store it in a sealed plastic bag</li> </ul>		

## BEDCLOTHES

### Duvets and mattress overlays

- A sufficient care for these is light brushing and regular airing.
- Dry cleaning.
- Do not wash with water as wool wadding would get clumpy in water.
- Stains can be removed with gall soap. Rub the dry stain with dampened soap, let it affect for a moment, and rinse carefully under running water or with a soft dampened sponge.
- Fight house dust mites by keeping the bedclothes for an hour in a hot sauna (60°C) or outside in about minus twenty degrees for 24 hours.

### Sheep wool fleeces

- Air and shake outdoors weekly.
- Brush now and then, so that wool fibres remain elastic. Use a coarse steel comb or brush.
- Stains can be rinsed away under running water.
- If washing of the entire fleece is necessary, it can be machine-washed with a wool-wash programme (30°C) and with Sonett washing liquid. Light spin.
- You can stretch the fleece into shape after wash.
- Hang the fleece to dry from two edges, preferably outdoors.
- Do not hang close to a heat source or into sunlight.
- As the fleece's hair is wool, it will slightly curl when washed.

### Millet husk pillow

- Use covered with a pillowcase.
- When the cotton cover needs washing, open the fastener and shake the husks out into a suitable container.
- Wash the cover in a washing machine (40-60°C).
- Refill the clean cover with the husks.
- The husks don't need to be washed as they don't accumulate moisture or odours.
- The millet husks should be replaced with new ones in around every 3-5 years.
- The old husks should be put to a biological waste centre.
- You can acquire new husks from Ruskovilla.

# SONETT Product Family

Sonett uses tensides only from renewable raw materials that can be broken down in five to seven days. Ecological olive or rape oil and volatile oils are used as rawmaterial for soap. Sonett products do not contain petrochemical products, enzymes that cause allergic reactions, chlorine compounds, phosphates, synthetic perfumes, or colorants.

## SONETT – WASHING LIQUID FOR WOOL AND SILK, neutral

**Ingredients:** Olive oil soap, sugar surfactant, rapeseed oil soap, vegetable alcohol (ethanol), citrate, water. Due to the fat in the olive oil soap, protein fibres like wool and silk maintain their elasticity.

Suitable for hand- and machine-washing at temperatures up to 40°C

Product no. **S-4725** Size: 500 ml € **9,80**

Product no. **S-4724** Size: 120 ml € **3,20**

## SONETT - GALL SOAP for stain removal

**Ingredients:** soap boiled from palm and coconut fat, bovine gall, chlorophyll. An incredibly effective stain remover, suitable for removing grease, blood, berry, fruit, wine, ink, or chlorophyll stains. Use for pre-treating shirt collars and sleeves before placing them in the washing machine. Will not harm fibres, will not leave a white ring, will not cause colours to fade, will not cover stains.

Product no. **S-4701** Bar of soap 100 g € **4,-**

Product no. **S-4702** Liquid 120 ml € **4,50**

## SONETT - WOOL CARE AGENT

**Ingredients:** wool grease, olive soap, sugar tenside, lecithin, plant-derived starch, genuine volatile lavender oil, balsam. The wool care agent softens wool garments whose wool grease has disappeared (e.g. frequently washed nappy pants) and protects the wool fibres from premature wear. Wool will thus maintain its original properties, such as softness and the ability to draw in moisture.

Product no. **S-4721** Size 120 ml € **5,80**

## RUSKOVILLA - OLIVE OIL SOAP

Olive oil content > 81 %.

For handwashing of wool and silk wear. Suitable for cleaning of leather and felting. Excellent for handwashing and shower.

Product no. **S-4730** bar of soap 100 g € **2,60**

## MOTH TRAP - GLUE TRAP for clothes moths

Product information on p. 69.

Product no. **S-8703** 1 pc € **9,80**

## CEDAR RINGS

Product information on p. 69.

Product no. **S-8701** 5 rings / package € **6,90**

## FACTORY SHOP

Welcome to visit Artjärvi

## WELCOME TO RUSKOVILLA FACTORY SHOP

Open Mon-Fri 9-16, Sat 10-14.

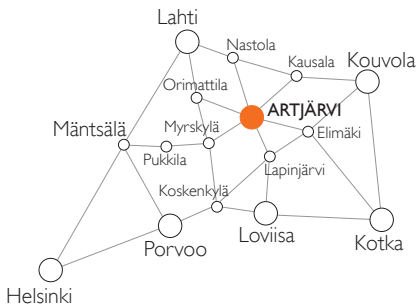

In the spacious store you can find all our products, think about them and fiddle and fit before you buy.

- On display are all the products of our catalog, RRP -10%
- In addition there are smaller batches of special products, which are available only in our store and in our online shop
- Products second choice, RRP -30%
- Toys and gifts

Our store has unrestricted access, and the elevator will bring you (baby carriages, walkers) conveniently to the second floor.

Good parking facilities and a convenient guest toilet with a baby changing table.
