ABOUT US

WHO WE ARE

Have you ever walked into an electronics store and just been overwhelmed with the choices, options and technical descriptions? If you have, you've certainly come to the right place.

Online Technology News is a small at-home blog designed to help you navigate the expansive world of electronics.

We want to educate and inform our readers with interesting anecdotes, reviews of a variety of products and hopefully share a little bit of what we've learned along the way.

We are not technical engineers, but instead we are consumers who want the best bang for our buck. Just like you.

We hope you'll see that we have a little bit of a different point of view. Instead of focusing on the technical jargon, we want our site to focus on what makes a particular product work for you.

Sincerely,

NEWS & INFO

KINDLE FIRE

I started listening to books on tape in 1994. I progressed to books on CD when it became harder to find books on tape. Recently, I noticed it was becoming a little more challenging to find the books I wanted on CD. Given I buy most of the books I want from Amazon, I started to notice that the formats that books were being offered on were kindle.

I had the opportunity to use a friend's Kindle and liked that I could stream or download a book but did not find how to listen to books. So I did not want to invest in a Kindle of my own at that time...
