Go Further

It's not about looks.

Titanium. Magnetic Metallic. Available equipment.

They're just the start...

Focus has been transformed with a new hood, trapezoidal front grille, laser-cut headlamps and slimline taillamps. The interior has been improved too, with a premium look and enhanced functionality, which makes Focus even better to own and drive.

LED (light-emitting diode) dedicated daytime running lamps¹ look great, and let other road users know you're there.

Bi-xenon HID (high-intensity discharge) headlamps¹ feature dynamic bending to better light the way ahead.

Active park assist¹ now includes reverse perpendicular parking and pull out assist to get you into – and out of – a space.

Active City Stop¹ automatically applies the brakes if you don't spot the vehicle in front slowing, and now works at up to 50 kph.

Ambiente. Race Red. Available equipment.

¹Available feature.

It's what's inside that really counts.

Focus has been designed and engineered to be as enjoyable to drive as it is economical to own.

You can choose from a 1.6L Ti-VCT 123-net horsepower manual or automatic, or a 2.0L GDI 168-net horsepower automatic. Each combines advanced fuel injection and emissions technology to extract the maximum amount of energy from every drop of fuel.

Electric power-assisted steering (EPAS)¹ constantly adjusts its level of assistance depending on whether you're driving at parking speeds or out on the road. It also helps save fuel and reduce emissions compared to a conventional hydraulic power-assistance system by reducing load on the engine.

Torque Vectoring Control enhances traction, grip and agility when cornering by precisely matching the level of torque fed to each of the front wheels with the amount of grip available to that wheel.

Sport. Caribou Metallic. Available equipment.

¹Not available with 1.6L Ti-VCT engine with PowerShift automatic transmission.

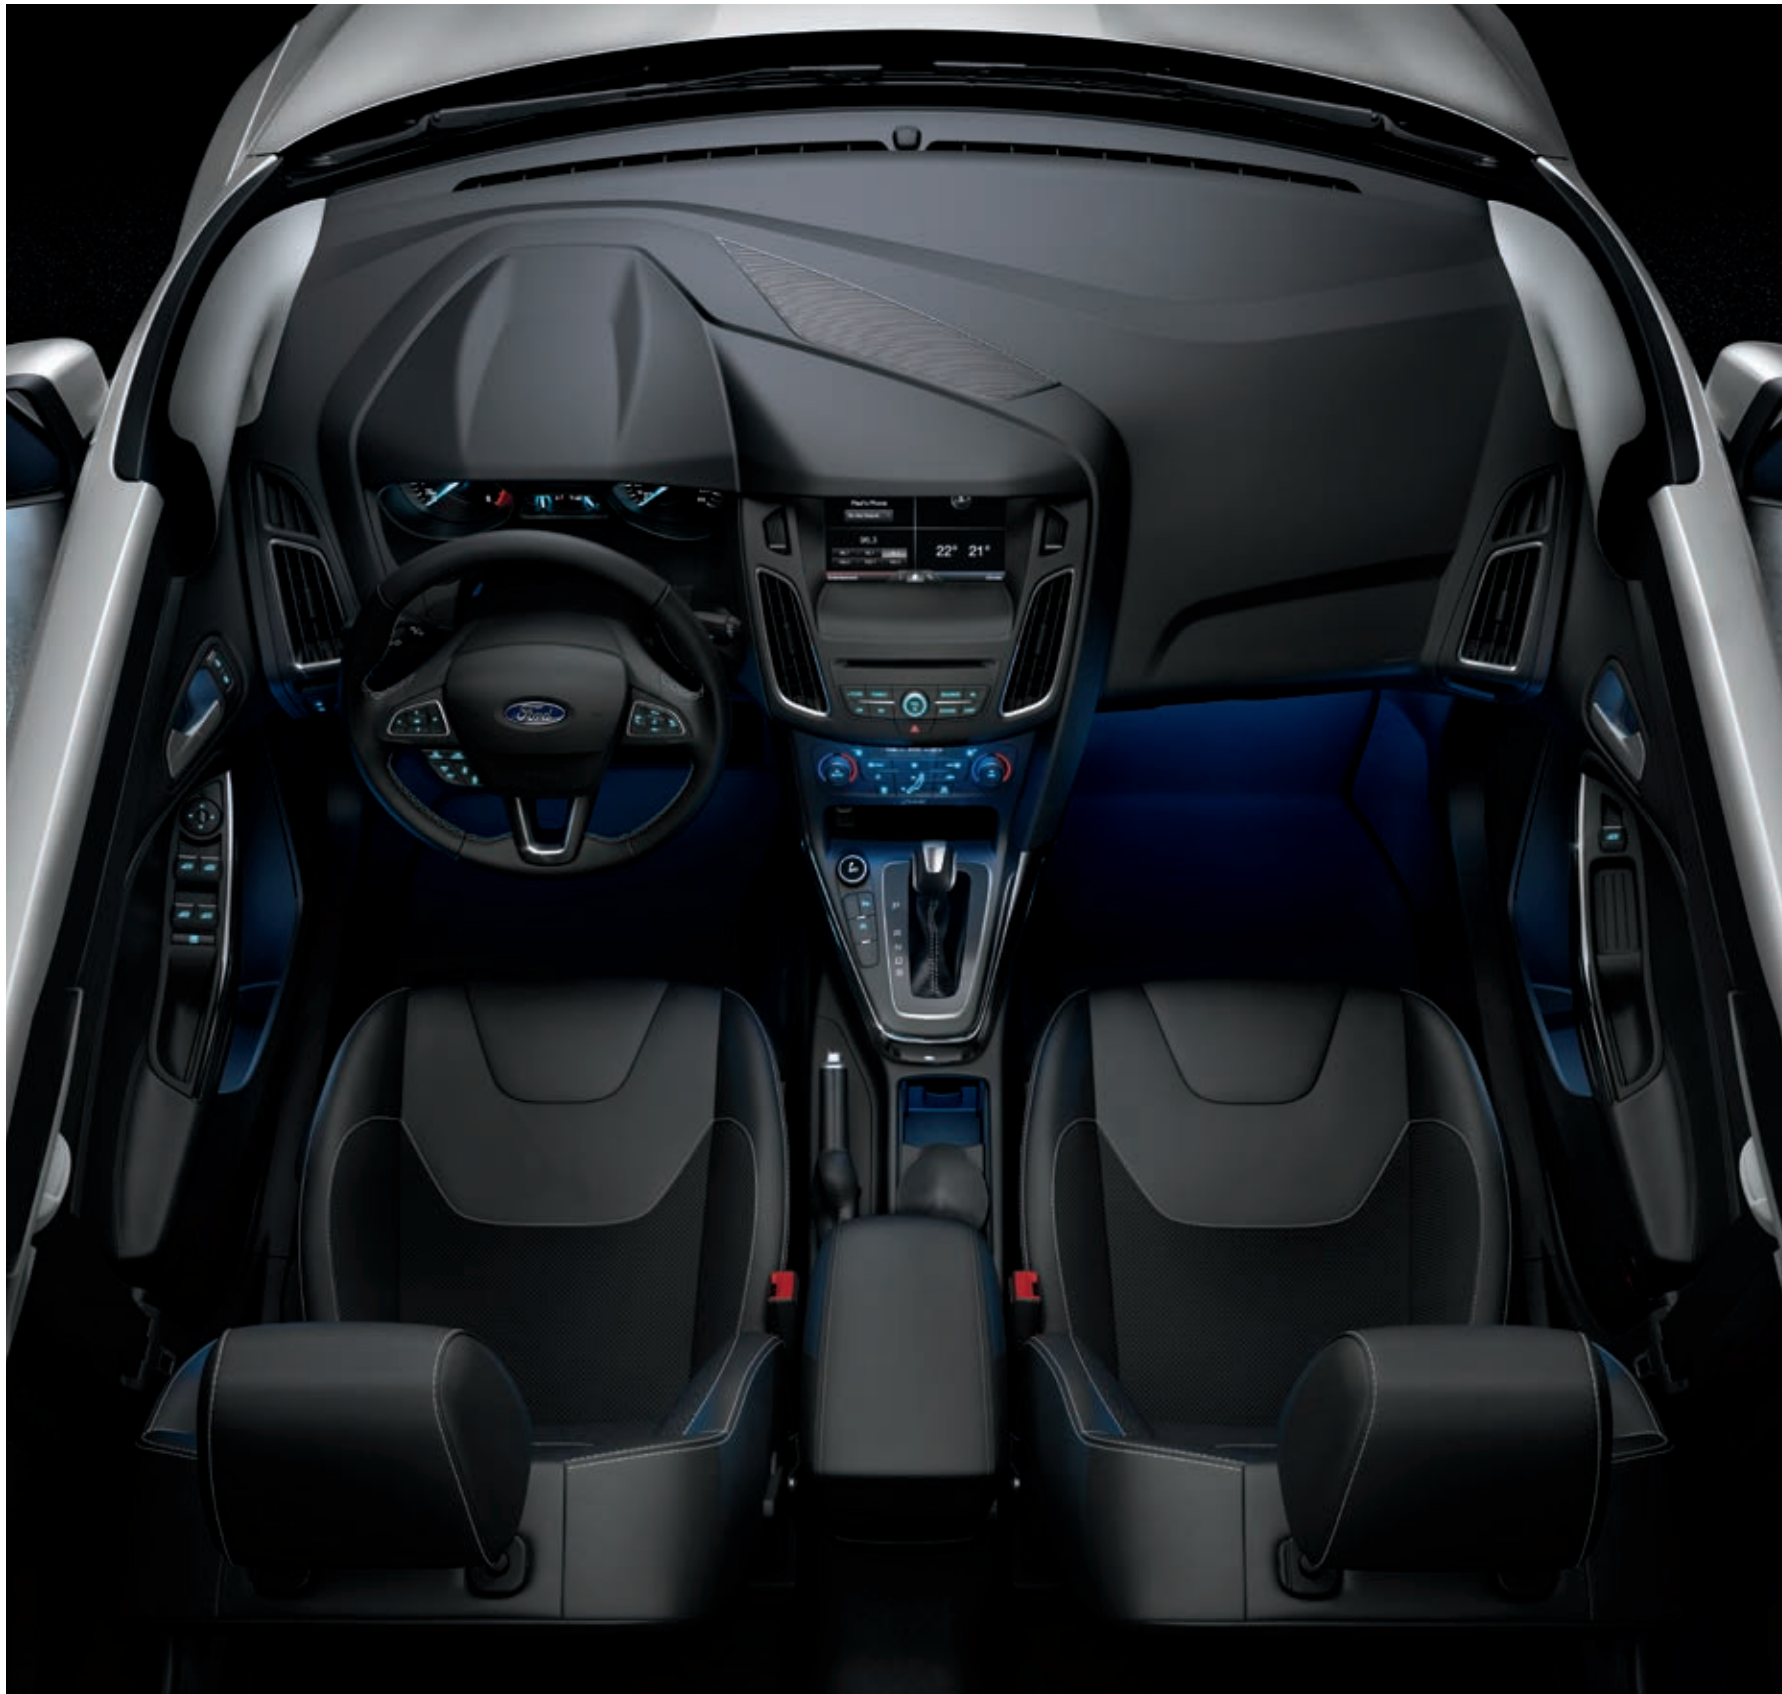

Because beauty is more than skin deep...

The premium look and feel of a luxury car; the space and versatility of a family car; the agility of a sports car: The new Focus is much more than much-better looking. The automatic transmission¹ is now available with paddle shifters,² so you can shift gears without taking your hands off the steering wheel. MyKey[®] owner controls let you program certain functions, such as maximum speed and maximum audio volume, for each key fob – great if you have a young driver or run a fleet.

Titanium. Charcoal Black leather. Available equipment.

¹Available feature.

... and it's designed around you.

Focus incorporates technology designed to keep you in touch with what's going on in your world – wherever your journey takes you. Voice-activated Ford SYNC®¹ makes it easy to stay connected. No more searching for your phone. No device on your ear. Once paired, SYNC recognizes your phone and automatically transfers your contacts to support voice calling. It also plays music from your phone, MP3 player or USB. Our latest SYNC Gen 2¹ has an 8" color touch screen, is available with 2 USB ports, and has enhanced phonebook calling and USB music selection.

Music to your ears. Good music can make a great drive even better. Focus is available with a choice of high-quality audio systems that are designed to provide crystal-clear sound when you're on the move. For example, the new ICE Pack 5 has SYNC Gen 2, steering wheel-mounted controls, MP3 capability, a USB port, an auxiliary input jack, an SD card reader and 9 speakers.

5-star safety. A standard Anti-Lock Brake System (ABS), available Electronic Stability Control (ESC)² and up to 6 airbags³ mean Focus is designed to help you steer clear of an accident or minimize its potential consequences. Reflecting its impressive safety features, Focus has earned Euro NCAP's maximum 5-star rating.

¹Available feature. Driving while distracted can result in loss of vehicle control. Only use mobile phones and other devices, even with voice commands, when it is safe to do so. Not all features are compatible with all phones. ²Remember that even advanced technology cannot overcome the laws of physics. It's always possible to lose control of a vehicle due to inappropriate driver input for the conditions. ³Available feature.
