

# Brush Dispensing Tips

Solvents Gels Activators Grease Primers Adhesives Inks Oils Coatings More...

These tips are industrial grade and so can be used at high pressures. They are silicone-free materials so will not contaminate materials dispensed from them.

Brush tips are ideal for spreading, coating & bonding applications. They attach to syringes, bottles & valves to deliver a controlled deposit of material without mess or material waste.

A luer lock hub provides a leak-free attachment when used manually or on a pneumatic dispensing system.

All tips are colour coded for gauge size. Available with either soft or hard bristle brushes. With brush style of round, flat or pointed.

Brush tips are available as singles or in packs of 10. We offer the widest selection of brush tips for our customers to choose from.

## Slim Round Bristle Tips 2mm Wide Brush
