Introduction

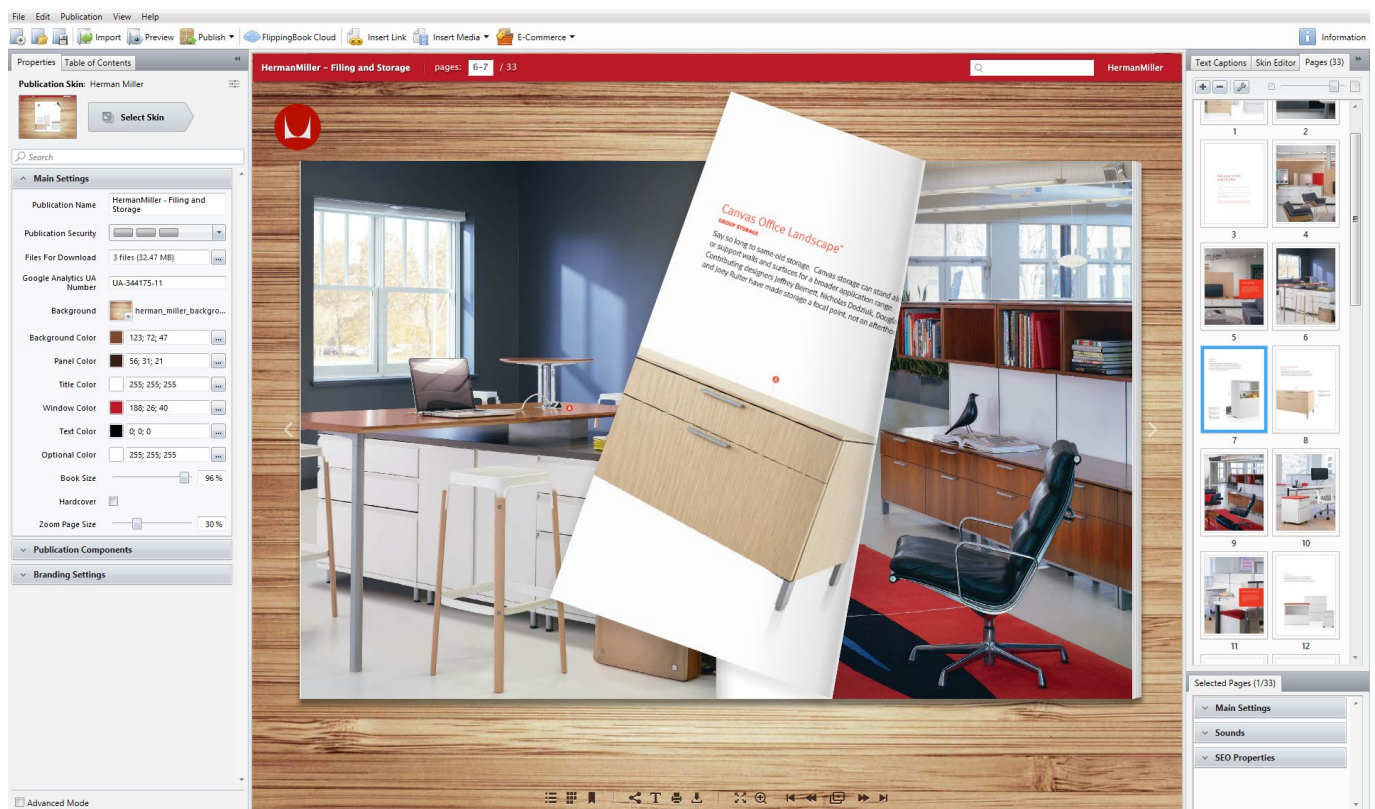

Publisher 2 is a Windows application, designed to create modern, user-friendly and attractive publications from traditional documents.

With the help of Publisher 2, you will be able to create online publications for websites, offline publications for CD, DVD and Flash-drives (for Windows and Mac OS X), as well as online publications for mobile devices (iPad, iPhone, and Android devices). PDFs and images (JPEG, PNG, BMP, TIFF and SWF) can be used as source files.

To import MS Word, Excel and PowerPoint files you should convert it to the PDF format first. You can use MS Office integrated tools or any other converter.

Publisher's Business edition supports several integrated methods of protecting your publications from unauthorized access and unwanted copying of content.

The new version integrates with popular social networks, supports very large publications (up to several thousand pages), and allows the creation of publications that will be optimized for search engines (SEO) and special publications for the increasingly popular mobile devices.

Quick Start

This chapter describes how to quickly create a publication from a PDF file and upload it to FlippingBook Cloud.

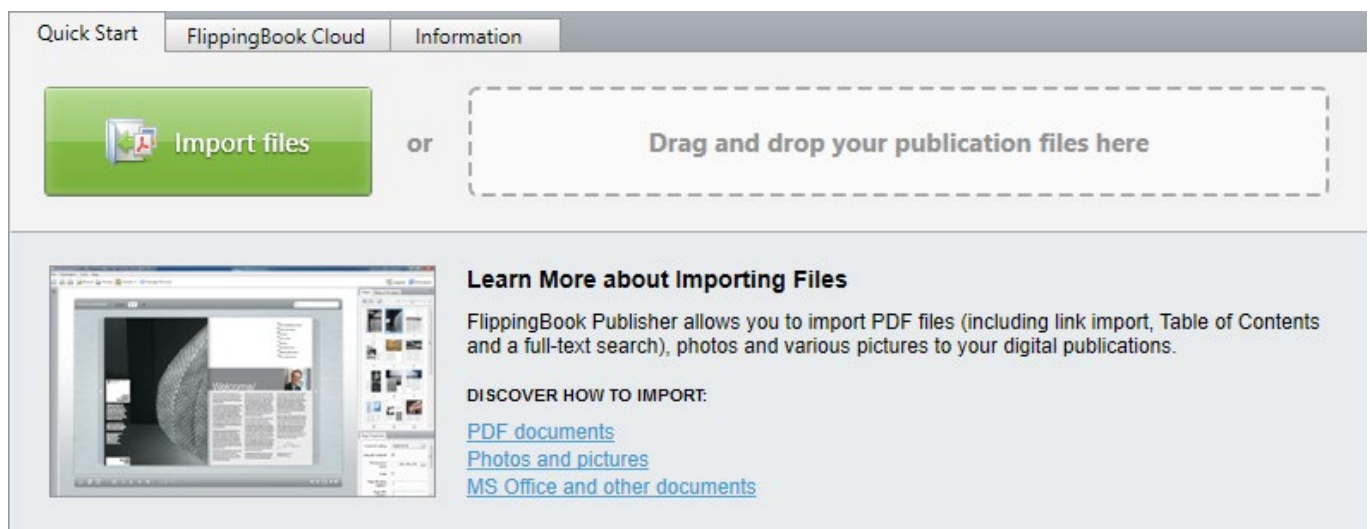

Let's assume that you have already installed and run your copy of Publisher 2.

IMPORTING PDF FILES

FlippingBook Publisher offers the greatest and most powerful options for the importing of PDF files in the whole world market of e-publishing. You can import documents of any type including magazines, books, catalogues, brochures, presentations. FlippingBook Publisher provides you with the best means of conversion so that all materials easily become great digital publications.

Choosing the source file

The easiest way to import PDF files is to use the "Import Files" button on the FlippingBook Publisher start page or drag and drop a file from a folder directly to the marked field.

The screenshot shows the top navigation bar with three tabs: "Quick Start" (selected), "FlippingBook Cloud", and "Information". Below the navigation bar, there is a green button labeled "Import files" with a document icon and a red arrow. To the right of the button is the word "or" and a dashed rectangular box containing the text "Drag and drop your publication files here". Below this, there is a section titled "Learn More about Importing Files" which includes a small image of a digital publication and a list of links: "PDF documents", "Photos and pictures", and "MS Office and other documents".

Learn More about Importing Files

FlippingBook Publisher allows you to import PDF files (including link import, Table of Contents and a full-text search), photos and various pictures to your digital publications.

- [PDF documents](#)
- [Photos and pictures](#)
- [MS Office and other documents](#)

Preparing PDF files for importing

Choosing pages for importing

You can either import a whole file or select pages for importing by specifying their numbers in the corresponding field.

Choosing the publication type

Select the most suitable publication type using the "Publication Type" panel and FlippingBook Publisher will automatically adjust the look and behavior of the subsequent publication.

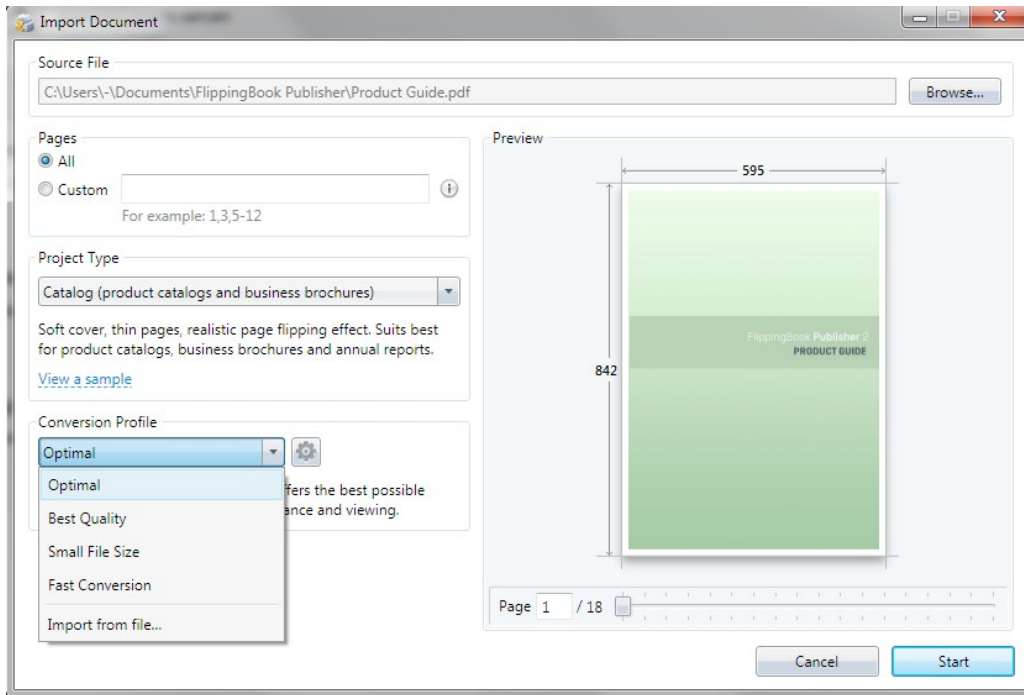

FlippingBook Publisher provides you with a short description and a preview option, available via the "View a Sample Publication" link, for each type.

Please note: choosing the publication type is only available whilst importing PDF files into a new project. If you wish to add pages to an existing project, there is no way to adjust the publication type settings. To change the publication type, creating a new project is required.

Settings of PDF file content extracting

FlippingBook Publisher offers you a really wide range of settings for content extracting. In order to allow you to set the extraction, we have created different import profiles, which contain an array of useful preset functions to allow different users to reach different goals. You can choose between the highest quality and the minimal size of a future publication. You can also select the maximal speed profile or use the optimal profile, which offers a perfect balance of quality, size and creation speed.

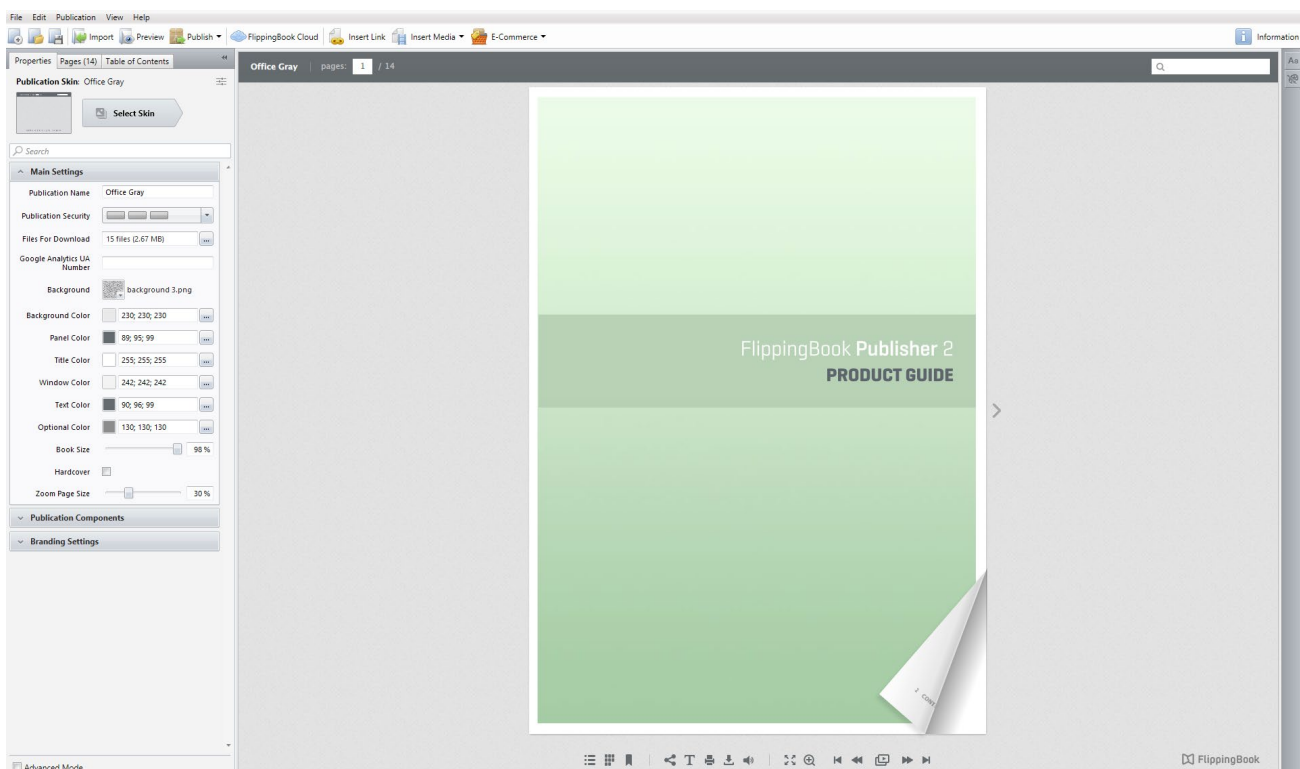

Importing

To start importing and converting files into a modern publication, press the start button. FlippingBook Publisher will start extracting and converting texts, images and other data. The look of the pages remains the same. FlippingBook Publisher parses the data and adds new interactive options, which differentiates a real e-publication from a traditional document.

While importing FlippingBook Publisher creates vector page copies optimized for quick online browsing, extracts text data for enabling full-text search, creates pages for viewing on mobile devices and HTML page versions for indexing in search engines.

When the importing process is complete, the content will appear inside the design mode window of FlippingBook Publisher. You can then adjust it and publish online or offline.

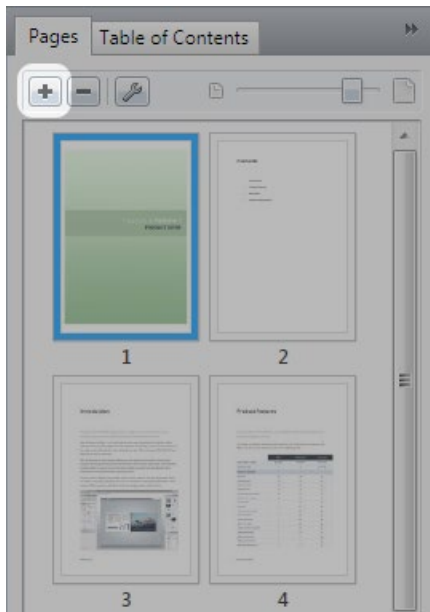

Possible ways of files import

PDF and other supported files can be imported using one of the following options:

- Using the “Import Files” button on the FlippingBook Publisher start page
- By dragging files to the start page
- Whilst creating a new project
- From the main menu (File / Import PDF File or Pictures...)

In addition, you can add pages to existing publications using the “+” button in the Pages browser.

USING THE BUILT-IN SKINS

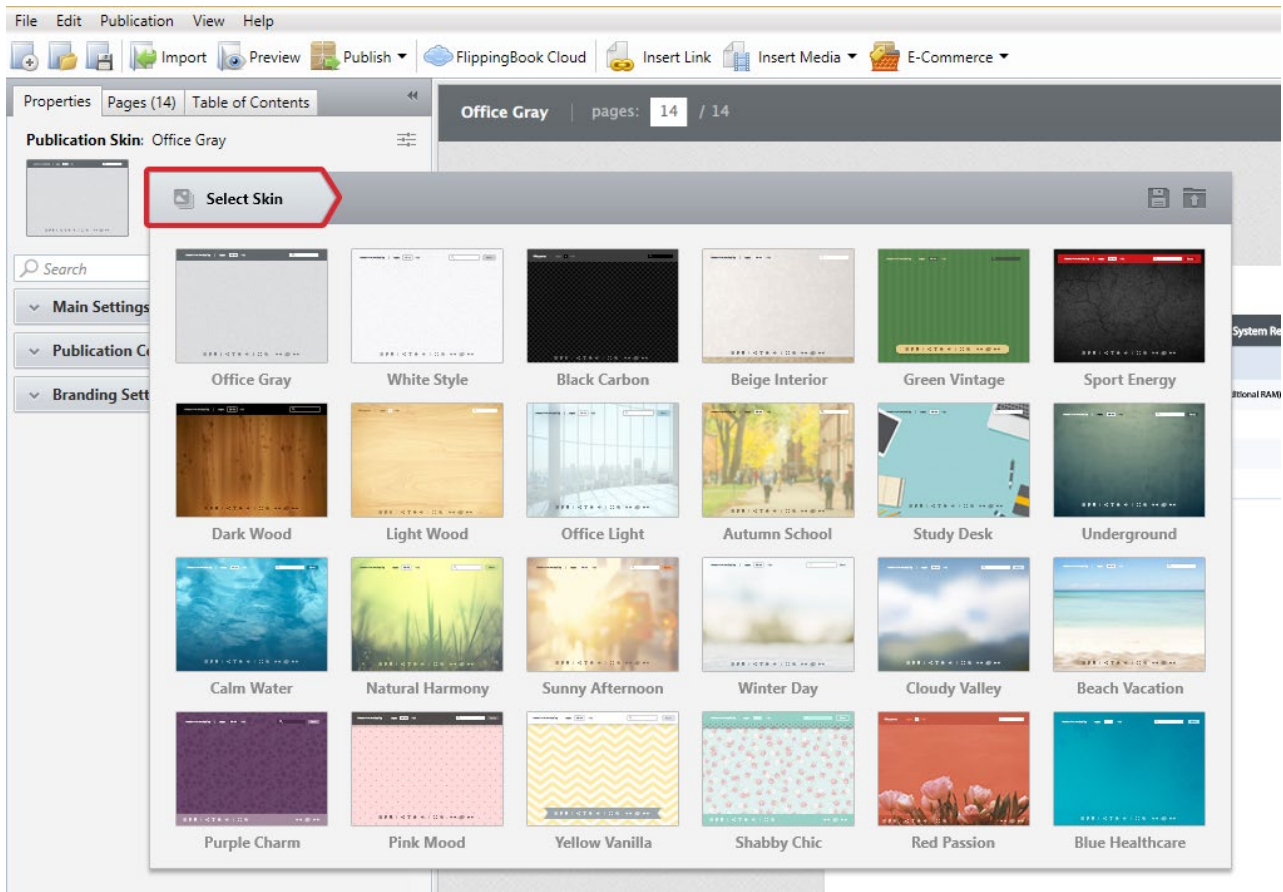

Choosing a skin

FlippingBook Publisher automatically provides you with a choice of several excellent skins (themes) for publication!

The skin can be changed or modified using the “Select Skin” button on the left panel.

Depending on the project type you’ve chosen, one of the following skins is automatically applied:

- For Catalog the Office Gray skin is applied,
- the Dark Wood for Book projects,
- the Beige Interior for Magazines,
- the Office Light skin for Documents,
- and the Black Carbon for Photos.

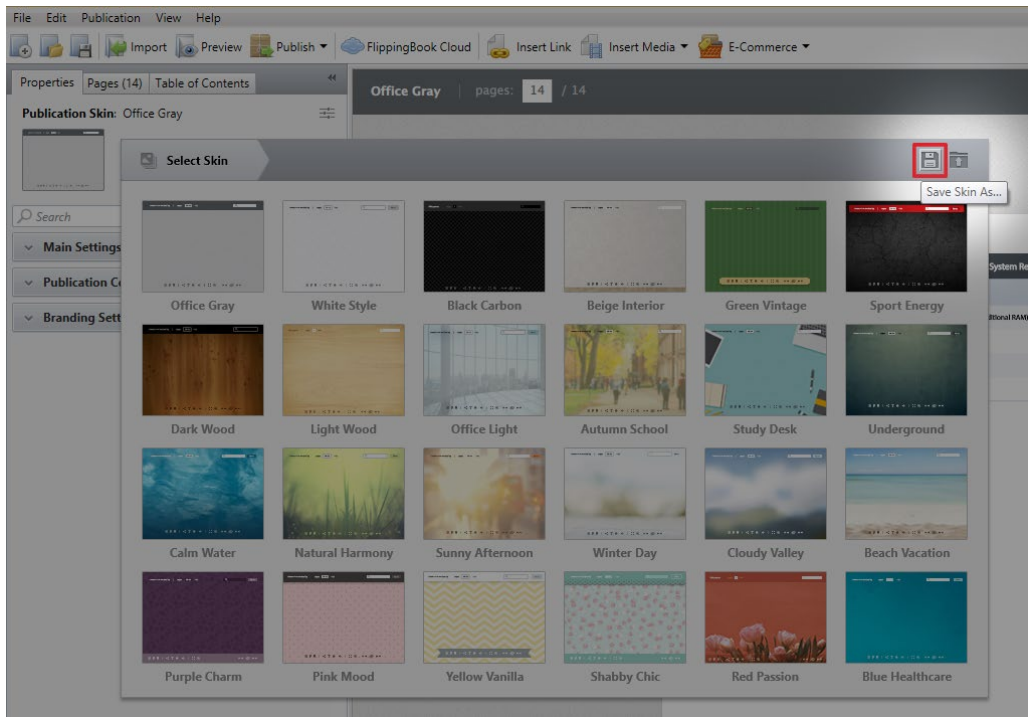

Please note: Skin settings not only include the skin parameters, but also other settings including panel positioning, bottom menu buttons (activating/deactivating) etc. However, if the skin is changed, these settings will be lost.

Editing a skin

If adjustments to a skin are required in order to match, for example, the image or style of a site, the [Skin Editor](#), located on a setting button next to the skin menu dropdown (available only in Professional and Business Editions), can be used.

In the skin editing panel you can see an overview of the elements of a publication. Each of these can be selected and adjusted as required. You can apply different background images, colours as well as windows and a bottom menu. You can also change the text color and style and modify the gradients for buttons. To save a modified skin for future projects, please save it as a separate file (see the picture below).

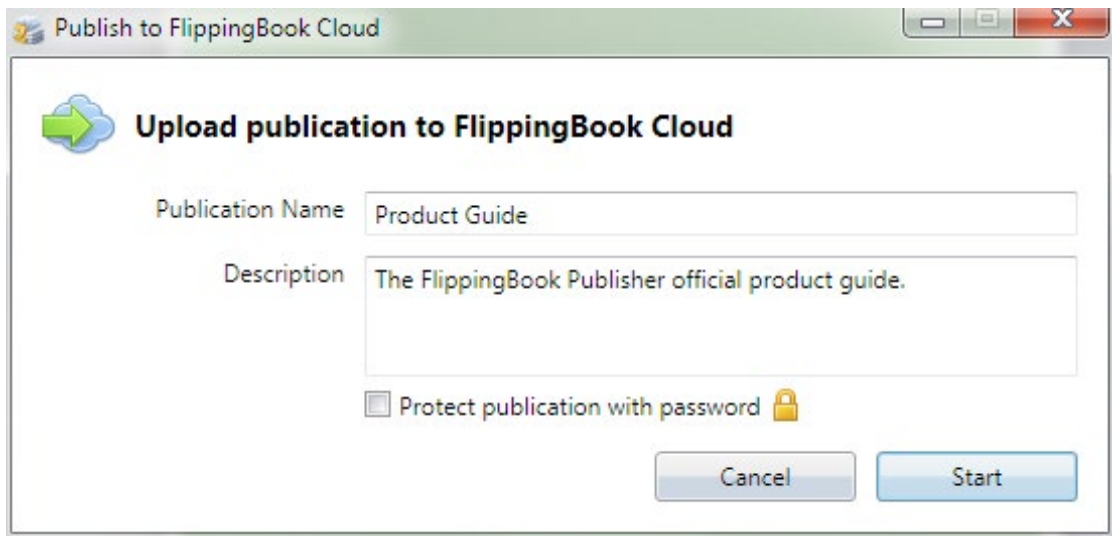

UPLOADING YOUR PUBLICATIONS TO FLIPPINGBOOK CLOUD

Upon purchasing the license for FlippingBook Publisher, you get a free 12-month Standard Subscription to FlippingBook Services which allows you to store up to 3 publications on FlippingBook Cloud. If you want to publish unlimited number of publications please purchase a [Premium Subscription](#).

A publication uploaded to FlippingBook Cloud can be easily shared with a web link or embedded into your website, blog or social network page as quickly as a YouTube video.

Publishing to FlippingBook Cloud

To upload a publication to FlippingBook Cloud, you just need to click the “Publish” button and select the “To FlippingBook Cloud...” option. Then you can specify simple settings for their online publication in the corresponding window and start uploading.

Immediately after the uploading process, you can open the publication in a web browser and share the publication link with colleagues, clients or business-partners. The link can be sent by e-mail, copied to the clipboard or the publication can be shared on Facebook or Twitter.

Managing publications on FlippingBook Cloud

To manage publications on FlippingBook Cloud, you can easily use the FlippingBook Cloud Manager window. It can be opened using the "FlippingBook Cloud" button or on the "Publication" menu.

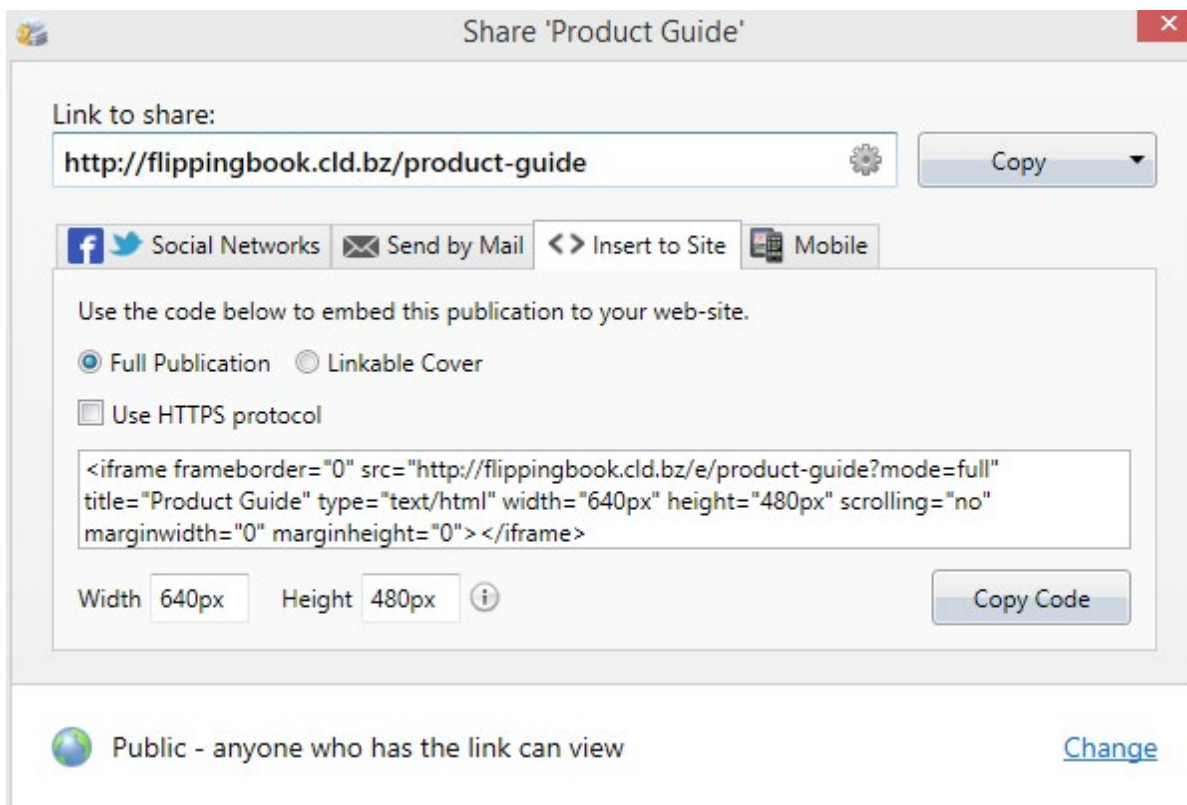

The FlippingBook Cloud Manager allows you to delete publications from the Cloud, adjust their settings, organize publications using collections and share links using e-mail or social networks.

Users of Professional and Business editions also have extended sharing options.

Embedding publication into your website or blog

To embed a publication into a website or blog, select the desired publication in the FlippingBook Cloud Manager and open the menu by right-clicking on it and selecting "Share". In the subsequent window, select the "Embed" tab, copy the publication code and insert it into the code of the HTML page for the site or blog.

System Requirements

This section describes the particular system requirements for users of Publisher 2 and its publications.

System Requirements	
PUBLISHER 2 EDITOR REQUIREMENTS	
Operating System	Windows 10, Windows 8.1, Windows 8, Windows 7, Windows Vista SP1 or later, Windows XP 32 bit SP3, Windows XP 64 bit SP2, Windows Server 2012 R2, Windows Server 2012, Windows Server 2008 R2, Windows Server 2008, Windows Server 2003 SP2
.NET	Microsoft .NET Framework 4.0 Client Profile
Adobe Flash Player	Adobe Flash Player: 10.3 or later
RAM	4 GB or more
Network	Internet connection
Disk Space	500 MB or more
CPU	Core 2 Duo or higher (recommended)
Display	1024x768 or higher
ONLINE FLASH PUBLICATION REQUIREMENTS	
Adobe Flash Player	Adobe Flash Player: 10.3 or later
Operating System	Any operating system with a supported browser and a Adobe Flash Player
RAM	512 MB or more
Network	Internet connection
HDD	Depending on the specific publication
CPU	Single Core CPU 2.0 GHz, or Dual Core CPU 1.5 GHz or higher
Display	1024x768 or higher
OFFLINE FLASH PUBLICATION REQUIREMENTS	
Operating System (Windows)	Microsoft Window XP or later
Operating System (Mac OS X)	Mac OS X 10.6 or later
SOURCE CONTENT REQUIREMENTS	
PDF Files	Any (larger files require additional RAM)
Number of Pages	Up to 2000-2400 pages
JPEG, TIFF, BMP and PNG Images	Up to 4000x4000 pixels.
SWF Files	ActionScript 3.0 SWFs
