

Comfort Care Products Tri-Gard Technology

Introducing Tri-Gard Technology in
Health Care Mattresses from Comfort Care Products!

Comfort Care Products Tri-Gard Technology offers a Unique Approach to Pressure Reduction Mattress design.....

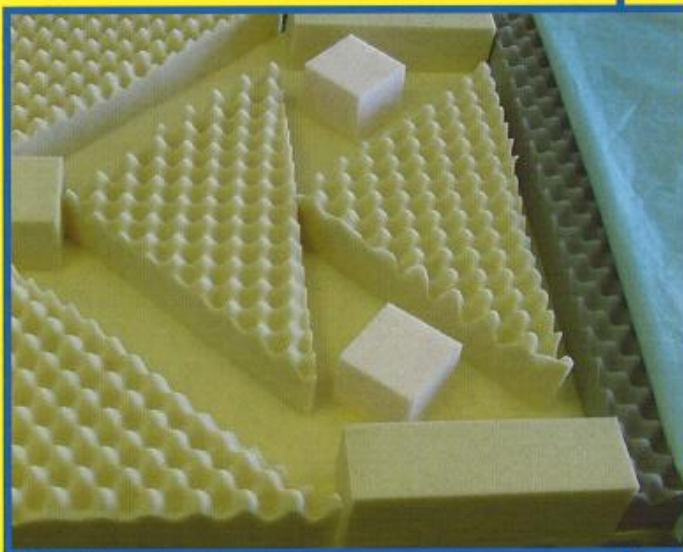

Tri-Gard Technology is an advancement in therapeutic mattress design using our Patent Pending design offering:

- 10 anatomically designed zones
- No-Pressure Heel zone
- Comfort/Cool sleep surface
- Unique No-Pressure Elbow zone
- Significantly reduced shearing effects

The Tri-Gard design creates a mattress design using triangles and air channels(TAAC) to significantly reduce surface pressure and shear. TAAC has been designed for pressure reduction in key areas of the head, foot, elbow sections to create unsurpassed patient comfort.

TAAC design as illustrated here shows how Triangles and Air Channels create zones with virtually no pressure! Heels are suspended via top surface over these Air Channels for extreme comfort and prevention.

Our exclusive TAAC design creates air flow within the mattress offering a cooler sleep surface, reducing heat and moisture build up. The TAAC design is made for head and foot rotation so there is no worries on orientation of patients, and creates a very comfortable mattress.

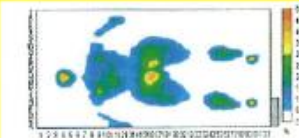

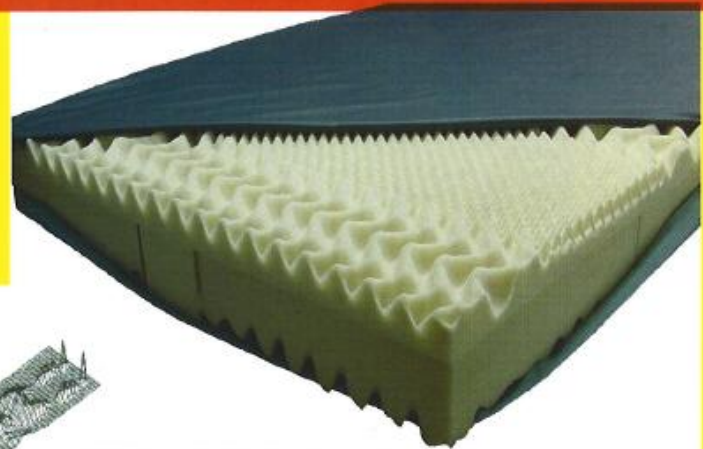

Standard Features of Tri-Gard Technology

Tri-Gard **Med-High Risk**

Tri-Gard with TAAC Technology provides outstanding pressure and shear relief. Tri-Gard mattresses are:

- Completely Anti-Microbial and meets Cal. TB#117.
- Comfort Nylon top and Vinyl bottom completely sealed.
- Multi-zoned High Density foam topper.
- Patent Pending design creates a significant reduction in heel and elbow pressure.

Pressure Readings after 15 mins. Male 260# 5'-11"

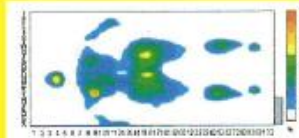

Sensors included: 300
 Variable coefficient: 10.0%
 Shear relief: 9.0%
 Average pressure: 12.1
 Maximum pressure: 87
 Center of pressure: 15.5 15.1

SKU#	TRIGARD75	6x36x75
SKU#	TRIGARD80	6x36x80
SKU#	TRIGARD84	6x36x84

Tri-Gard Plus **High Risk Stage I & II**

Tri-Gard Plus with TAAC Technology provides outstanding pressure and shear relief. Tri-Gard Plus mattresses are:

- Completely Anti-Microbial and meets Cal. TB#117.
- Comfort Nylon top and Vinyl bottom completely sealed.
- Multi-zoned High Resilient foam topper.
- Patent Pending design creates significant reduction in heel and elbow pressure. The HR foam also offers overall greater comfort.

Pressure Readings after 15 mins. Male 200# 5'-4"

Sensors included: 300
 Variable coefficient: 10.0%
 Shear relief: 9.0%
 Average pressure: 12.2
 Maximum pressure: 88
 Center of pressure: 15.5 14.8

SKU#	TRIGARDP75	6x36x75
SKU#	TRIGARDP80	6x36x80
SKU#	TRIGARDP84	6x36x84

Tri-Gard Supreme **Single Site Stage III**

Tri-Gard Supreme with TAAC Technology provides outstanding pressure and shear relief. Tri-Gard Supreme mattresses are:

- Completely Anti-Microbial and meets Cal. TB#117.
- Comfort Stretch top and Vinyl bottom completely sealed.
- Multi-zoned High Resilient foam topper.
- Patent Pending design creates significant reduction in heel and elbow pressure.
- Superior comfort and pressure reduction.

Pressure Readings after 15 mins. Female 185# 5'-6"

Sensors included: 300
 Variable coefficient: 12.0%
 Shear relief: 12.0%
 Average pressure: 12.5
 Maximum pressure: 100
 Center of pressure: 14.9 13.6

PATENT PENDING

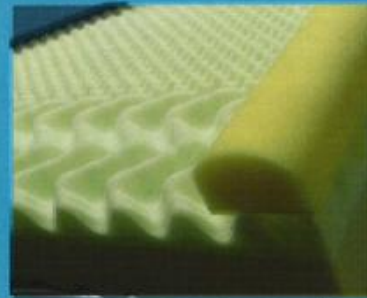

Comfort Care Products Tri-Gard Technology Options

Flame Resistant Barrier Fabric

All Tri-Gard Mattresses meets Cal. TB # 117. Certain states and regulations require meeting full scale fire testing such as 603, 129, BFDX-11, which can be met with this upgrade.

Defined Perimeter Raised Edge

All Tri-Gard Mattresses can be manufactured with a raised perimeter, with easy entry exit portals on each side of mattress. Raised Edge design is for use when bed side rails are not used.

Tri-Gard Selection Guide

Product	Risk Level*	Weight Cap.	Warranty
Tri-Gard Supreme	Single Site Stage III	250lbs.	5 Year
Tri-Gard Plus	High Risk Stage I & II	250lbs.	5 Year
Tri-Gard	Med/High	250lbs.	3 Year

*The risk level classifications are only guidelines to be used in assessment. A complete clinical assessment of each resident should be done before selecting any therapeutic support surface. Mattresses are only one small part in proper wound care prevention and therapy.
