# SHOCKS & SPRINGS

## COIL SPRINGS Common fitting tips

- Use an appropriate spring compressor tool when replacing coil springs.
- Always fit coil springs in pairs, to ensure the vehicle doesn't pull to one side when braking.
- Check spring seats, and top mountings for damage before replacing broken or worn springs.
- After installation check that the springs are seated correctly, also check the wheel alignment
- Replace shock absorbers at the same time as springs.

## SHOCK ABSORBERS Common fitting tips

- Don't hold the piston rod with any tools as this will damage the surface of the piston rod and cause the oil seals to leak
- Don't put any water, oil or other liquid inside the strut housing as this may damage the cartridge.
- Don't use an impact wrench to tighten a nut onto a piston rod. This can make the torque higher than the recommended limit.
- Use only fitting parts (nuts, spacers, washers etc.) supplied with the shock absorber
- Shock absorbers should always be fitted in pairs.
- Ensure the vehicle is back on all 4 wheels before tightening upper mountings.

# TRIPLE QX

## HAVE YOU GOT YOUR COPY OF THE OIL APPLICATION GUIDE?

As with any part, accurate oil application is essential, and even though it might seem simple to pick an oil for the car, neither the engines nor the oils are all the same. Grades have diversified and emission regulations have become tighter causing vehicle manufacturers to constantly develop new specifications hence why it's essential to always have accurate information. Buying the cheapest oil does not mean it is correct unless you are sure that you've got the right product for your car. For every oil selection correct grade and specification are essential.

This is why it's so important to keep a copy of the TQX oil application guide and TQX wall chart on hand, so you can check it whenever you need. We have created both these great publications to save your time, money and give you complete peace of mind. TQX oil application data is updated regularly from the industries best sources to ensure it's always accurate.

Ask your local branch for a copy of our TQX Oil application Guide (997771051) and TQX Wall chart.

## Diesel Particulate Filters (DPF's)

From February 2014 the inspection of the exhaust system carried out during the MOT test will include a check for the presence of a Diesel Particulate Filter (DPF). A missing DPF, where one was fitted when the vehicle was built, will result in an MOT failure.

## Ceramex

**A high quality, professional DPF cleaning service. The winning alternative to high-cost main dealer parts.**

Ceramex unique inspection technologies provide vital evidence of the quality of cleaning and give reassurance that the cleaned DPF will perform as well as a new part and the customer will obtain following benefits:

- The Customer is getting the same unit back - No fitment issues
- It is cost effective – And an alternative to Main Dealer prices

- Patented 'XPurge' cleaning process removes 98% of Ash and Soot
- Every DPF is tested before and after the Cleaning process and comes with a Filter

- Condition report that highlights the Airflow and the amount Soot/Ash removed in grams.

# CLUTCH CLINIC

## Problem:

**Incorrect installation of Self Adjusting Clutches (SAC). Failure to use the SAC special fitting tool when fitting BMW SAC clutches.**

## Result:

**Having to complete the entire job again, which is very costly and time consuming.**

In recent years self-adjusting clutches have become the standard equipment fitted to many popular cars and vans, especially vehicles with high engine torque or with increased requirements for wear reserve. The principle is a simple one, a clutch system that is efficient and easy to use with a consistent feel and release point that previous clutch designs were unable to give. The SAC achieves a constant pedal load and a consistent bite point for on/off operation of the clutch throughout the entire lifespan of the clutch units.

To ensure correct installation of the SAC clutch it is essential to use the special Self-Adjusting Clutch fitting tool.

We still encounter far too many incidents where the SAC tool has not been used and the actuation system has been disturbed, a good number of these result in complete non operation of the clutch, normally only found after the installation has been completed.

**Using the tool in the correct manner will avoid having to complete the entire job for a second time, so it makes sense to use the tool for all clutch installations.**

## SAC Clutch Tool – Hire Scheme

- The tool is now available to hire from Euro Car Parts
- Kit includes 4 BMW fitment tools
- Included are full guidelines for use
- Complete the job once and be fully covered by the warranty
- ECP Part No 528 77 0420

## Centering procedure on BMW models – Included in the kit

In addition to the numerous possible combinations of the universal centering pin, the tool case also includes special pins to fit the latest BMW models, these will locate and align the drive plate thereby avoiding costly fitment errors and damage to the pre-clamped cover assembly.

No attempt should be made to remove the centre retaining plate (Spider/Death Star) from the BMW assemblies before correct installation and tightening of the cover assembly mounting bolts has taken place. This will release pressure on the plate enabling easy removal and disposal.

**For more information how to use the tool, contact Your local Euro Car Parts Branch.**

# THE TPMS SYSTEM IS NOW PART OF THE MOT TEST.

- Every new car homologated after **1<sup>st</sup> of November 2012** must be equipped with TPMS.
- Every new car produced after **1<sup>st</sup> of November 2014** must be equipped with TPMS

 **WARNING!** If the TPMS Fails a Warning Light will illuminate. This means that there has been a failure in the sensor or there has been pressure loss on one of the tyres and has become 25% under inflated.

All tyre pressures should be checked along with all of the sensors using the correct diagnostic tool to ensure they are operating correctly.

Euro Car Parts can supply all of your TPMS parts, equipment and tool requirements. We stock all of the major TPMS brands including Schrader, Beru Huf and VDO.

## Why replace cabin filter regularly?

**FILTERS**  
**crosland**

**MANN**  
**FILTER**

- Replace cabin filter at least once a year or, if you drive a lot, twice a year.
- The air quality inside the vehicle has a major effect on the concentration and health of the occupants, new filter guarantees an effective filtration of fine dust, pollen etc. from the air.
- A regular filter replacement protects the motor of the fresh air fan, as the air stream can flow freely.
- Unfiltered or poorly filtered air can leave behind an unsightly film of dirt on the inside of the windshield.
- Minimized exposure to odours

**Pressure brake bleeding is the only method approved by brake manufacturers**

### Brake Bleeder 12v

**£549.99**

538 77 5021

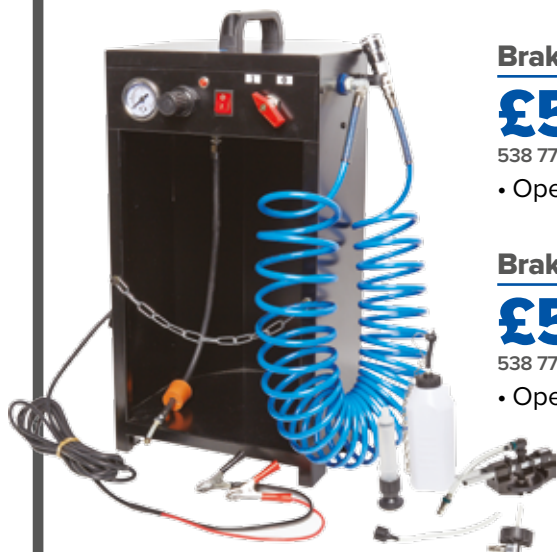

- Operates from 12V mains power supply

### Brake Bleeder 230v

**£599.99**

538 77 5031

- Operates from 230V mains power supply

PAGID

- Full fluid change can be completed by a single operator in approx. 15 minutes
- Fully adjustable digital pressure controller, 0 - 3.0 bar
- Draws fluid direct from 5L container
- Auto cut-off prevents air entering system if fluid supply is interrupted
- Portable unit with carry handle - only 9.0kg
- Heavy duty pump for long life
- Coiled brake fluid delivery hose for ease of use and storage
- Supplied complete with ALB30564B; multi-vehicle cap and European cap kit
- OEM approved

### Lambda Oxygen Sensor Socket Set 7pc 3/8 inch & 1/2 inch Sq Drive

MasterPro  
**£29.99**  
538 77 1571

masterPRO

- Designed to allow the use of an Air Hammer to loosen stuck 22mm Lambda sensors
- 200mm reach to give excellent Air Hammer access
- 3/8" D head which allows the use of a torque wrench when tightening sensors
- Use Air Hammer for extraction only, for fitting use tool without air hammer

### Master Pro Steering Rack Knuckle Tool

MasterPro  
**£34.99**  
538 77 4040

masterPRO

- Fast and easy removal and installation of the steering knuckle
- Fit over the steering shaft onto the steering rack
- Fits racks with hex drive, two flats and round ends with a diameter of 35-42 mm

### Coil Spring Compressor 1600kg

Laser  
**£899.00**  
LAS6050

A truly UNIVERSAL pneumatically operated coil spring compressor, for McPherson Strut type Suspension Systems. Fitted with safety locking valve and safety cage, which restricts use when cage is open.

Suitable for spring diameters from 80mm up to 310mm and for ALL types of springs inc. Tapered, Banana and LH wound springs. Adjustable spring clamps can be used directly on the spring, or on top and bottom suspension mounts.

(nb - triple spring clamp mechanisms are fitted for added safety.

Conveniently operated with foot controls, when the guard is up the pressure is limited which enables the spring to be positioned correctly to allow fitting of the spring securing hooks. Then drop the guard and full air pressure is delivered to the pneumatic ram which lets the spring be quickly and easily compressed.

A major feature is the ability to fit springs where the coils turn in the opposite direction – the Nissan Qashqai for example – as it makes no difference which way the coils are wound, the securing hooks are easily adjusted and positioned where required

# The **extra** reward programme.

**FREE Bosch  
OBD100!\***

**when you join extra**

## Be rewarded for your loyalty with **extra**.

- With the extra rewards programme, you can earn points when you return barcodes from Bosch automotive products\*\*
- Join today and when you send back 50 barcodes, receive the points **AND** a **FREE** Bosch OBD100, a handy workshop diagnostic tool, which reads, displays, deletes and resets emission-related trouble codes
- Points can be redeemed against a wide variety of rewards. To join extra visit [www.extra-rewards.co.uk](http://www.extra-rewards.co.uk)

\*Promotion begins 01/03/2016 and is open whilst stocks last. Open to extra participants only. To take part, register on [www.extra-rewards.co.uk](http://www.extra-rewards.co.uk). No cash alternative. Workshops already participating in the extra programme can also receive an OBD100 - go online to find out how, or check your monthly extra e-newsletter. \*\* Selected Bosch automotive products. See [www.extra-rewards.co.uk](http://www.extra-rewards.co.uk) for the qualifying products.
