One call for complete peace of mind

ENTRY LEVEL LIFTS

L4000 2 POST 4 TON HYDRAULIC LIFT

This great value lift has a lot to offer. Symmetric arms offer wide flexibility of chassis as well as being able to accommodate vehicles driving on or reversing on. Available with either manual or electronic release option.

- Hydraulic hoses and balance cables are all fully concealed, providing a clean appearance.
- The double hydraulic cylinders and high strength chain drive provide smooth lifting and lowering.
- The two sets of arms always travel synchronously thanks to high strength balancing cables.
- An emergency lowering valve can be manually operated to lower the lift safely in the event of a power failure.
- Meanwhile, a flow-control valve prevents the possibility of a rapid uncontrolled descent
- Door rubbers on the posts protect the car doors from direct contact, and sill protector rubbers on the upper arms perform the same function protecting the undersides of longer chassis vehicles

- Minimum pad height 110mm
- Drive-thru width 2486mm
- Maximum Lifting Height 1950mm
- Lifting time 40-50sec
- Lowering time 20-40sec

First year on-site parts and labour, second year parts only

WEEKLY
FROM ONLY **£10.58⁺**
ONLY **£2,100.00**

MEGALIFT 4000-2

577 77 0710

Building on the success of its hugely popular predecessor, the Megalift 4000, this new model includes additional luxury features such as automatic, electronic safety release, medium and high reach pads as standard fitment, and sill-protectors on the upper part of the lifting arms.

As the price-tag suggests, this model is manufactured in the Far East. However, unlike most of the lifts at this end of the market, this product is subjected to a European standard for quality control and specification. In basic terms, the Megalift 4000-2 cannot be compared to other budget 2 post lifts of dubious brand and origin!
