

Filter Bag Cleaning

*Expert cleaning for customer-owned filter bags,
air duct socks and super sacks.*

 **AbsorbTech**®
Cleaner, safer solutions for industry

Filter Bag Cleaning

Fast Facts

- Most filter bags, air duct socks, and super sacks can be cleaned and reused
- Reusing filter bags assists with ISO 14001 and other waste reduction initiatives
- Our Genuine Service Excellence Team will assist with any of your processing or environmental questions
- We offer a complimentary trial so you can see how the process works

“After switching to ITU AbsorbTech’s program, I found that they did a good job of cleaning my bags without removing the singeing. Very important! I get good turnaround from Bob and he makes periodic calls to see if I’m happy and have any bags for cleaning.”

John Tramburg, Corporate Maintenance Manager, Glen Oak Lumber

■ State-of-the-art processing

- We professionally launder filter bags of all shapes and sizes.
- Unique process for each filter bag type effectively maintains filter bag shape, size, and structural integrity.
- Expert, specialized cleaning available for a wide variety of industries.

■ Managed program

- Flexible shipping and delivery options.
- Filter bags can be picked up and delivered with existing managed service program.
- Convenient change-out reminder service.
- Our Genuine Service Excellence team can assist with your processing and environmental questions.

■ Eliminate a waste stream

- Filter bags are laundered for reuse, not landfilled.
- Environmentally preferred processing with state-of-the-art, computer controlled equipment.
- Supports ISO 14001 objectives and reinforces corporate sustainability objectives.

■ Cost savings

- Typically reduces cost by 30-50% compared to purchasing and disposing of filter bags.
- Eliminates disposal fees for used filter bags.
- Reduces procurement, inventory and storage costs.
- StraightUp! billing is simple and easy to understand.

Typical Industries
