MULTI - PLATFORM

Many small businesses do not have a website. It's rather surprising but it is true! You would think that nowadays everyone would know how important it is to have a presence on the web. And the first reason is to **be found by others and to reach new potential clients.** Isn't it what we all want?!

These days most people will go online to research products and companies before

they make a purchase. They will type keywords into a search engine and, fingers crossed, they will find you on the first results page.

Remember that **WWW stands for World Wide Web.** A website is your global presence, providing opportunities to grow your business on a truly international scale. Any business that does not have a website is missing out!
