COMMUNICATION:
phone, Internet, TV

Imagine your home without power

While more families have chosen a Generac home standby generator more than any other brand, they didn't all do so for the same reasons. What would your family miss during a power outage?

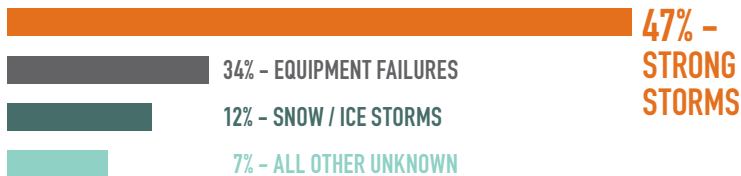

- Refrigeration/freezer: food spoilage
- Furnace: frozen pipes, heat
- Air conditioning: mold growth, comfort
- Sump pump: flooding
- Internet, cell phone chargers, TV: lose contact with the outside world
- Lighting: inside and outside
- Cooking, bathing and washing clothes
- Charging power tools for use during the emergency and post outage cleanup
- Keeping the kids occupied with TV, video games and Internet
- Monetary loss from hotel costs, eating out, personal property damage, unexpected expenses

Top causes for power outages

Permanent power protection is more important than ever as unexpected power outages have become more frequent and are lasting longer. Causes range from severe weather to an overtaxed power grid.

“4 out of 5 homeowners choose a Generac home standby generator.”

Source: Frost & Sullivan

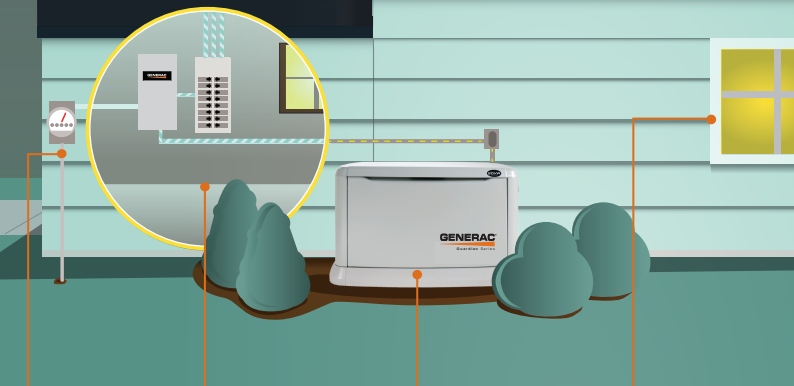

Rest easy knowing you're protected by the market leader

For over 50 years, Generac has focused primarily on power generation, and we now offer more generator solutions than any other manufacturer. This heritage has helped make us the number one choice in residential automatic standby power, chosen seven to one over the closest competition. When you choose Generac, you're not just choosing protection for your home, you're choosing peace of mind.

How it works.

If your power goes out, your generator comes on, automatically. It's really that simple.

The generator system consists of a generator and transfer switch. The generator sits outside of your home or business just like a central air conditioner, while the transfer switch is located next to the main breaker box, and in some cases replaces it entirely.

- 1** Utility power is lost.
- 2** Generator automatically detects a problem.
- 3** Generator automatically turns on.
- 4** Electricity is automatically restored.

The Home Depot can help select the right Generac home backup generator for you

No matter your needs or your budget, Generac has a home backup power solution for you. And our installation staff is specially trained to help you select the system that will work best for you.

Power it all, all the time

Most homeowners want the peace of mind that comes with whole-house coverage. Whenever there's an outage, you don't have to worry—because the power stays on at all times throughout your entire home.

Smart power where you need it

Whole-house coverage may not fit every budget. With a power management system, your generator can work smarter. It protects all your home's circuits by cycling power on and off as needed for different appliances. And you decide what gets priority.

Power just the basics

Some homeowners prefer a simple, economical approach. Essential coverage protects only your most important circuits—such as lights, furnace, water heater, refrigerator/freezer and sump pump.

Installation Steps

You've decided backup power is a necessity.
NOW WHAT?

1

Understand the Benefits of Home Depot's Install Program

If you are not sure whether or not you need a professional installer, consider:

- Your confidence that you've selected an adequately-sized system for your needs
- The weight of the generator, and equipment needed to transport it
- Local codes
- Your comfort level working with electrical wiring, grounding, voltage, amperage and gas line hookup

If you are unsure, call 1-800-HOMEDEPOT (466-3337) to discuss a free in-home consultation.

2

Call for a FREE In-Home Consultation

Call 1-800-HOMEDEPOT (466-3337) to schedule an appointment with a trained home backup power system consultant. They will assess your backup power needs, help you select the right system and schedule installation.

3**Prepare for Your In-Home Survey**

The most important aspect of your generator purchase is identifying the correct size. Take a moment to review the checklist below to determine what you will want to power in the event of an outage. This will help you prepare for your in-home survey and give your installer a starting point to determine how much backup you will need.

- ___ Central Air Conditioner
- ___ Window Air Conditioner
- ___ Electric Water Heater
- ___ Electric Dryer
- ___ Electric Range
- ___ Refrigerator
- ___ Kitchen Lights/Outlets
- ___ Freezer
- ___ Well Pump
- ___ Furnace
- ___ Garage Heater
- ___ Electric Heat
- ___ Sump Pump
- ___ Basement Lights/Outlets
- ___ Garage
- ___ Home Office
- ___ Family Room
- ___ Living Room
- ___ Master Bedroom
- ___ Bedroom 2
- ___ Bedroom 3
- ___ Bathroom 1
- ___ Bathroom 2
- ___ Other _____
- ___ Other _____

4 The in-home consultation

A qualified local installer will visit your home and:

- Assess your backup power needs
- Review important installation details, including sizing and site evaluation
- Identification of any non-typical issues that may arise

You will receive a system recommendation and installation estimate. Also noted are any additional installation services, custom electrical work and associated costs that you may incur.

5 Using the recommendation from your in-home consultation, you can now confidently purchase your system

Call 1-800-HomeDepot (466-3337)

6 Professional Installation

A team of courteous, trained installation specialists will install your Generac backup power system and:

- Review the work completed
- Clean up the installation site
- Perform a walk-thru demonstration
- Coordinate inspections to validate code compliance and obtain the necessary approvals

7 Enjoy Peace of Mind

Rest easy knowing your backup power comes from Generac, the market leader, with installation backed by The Home Depot.

for a FREE in-home consultation.
