MAKE THIS KNIFE

Pattern 21

J2108 440C satin finished blade polished to a mirror finish, AD926 mosaic bolster blanks, two F5 pivot pins (used in the bolster), KI1402 Desert Camo Kirinite® handle material, four FF304 SS decorative screws with two AS754 threaded step bushings.

Pattern 22

G2231 Orange G10 Basket Weave texture preshaped handles, J2208 440C satin finished blade, K226 Stainless Steel Bolster and A461 1/4" Stainless Steel T6 Torx Fasteners.

Pattern 23

J2308 440C satin finish blade, K233 Brass Bolster and B660 1/4" Brass Corby Rivets Fasteners. Fitted with our D2325 Rosewood Dymondwood preshaped handle.

Pattern 25

J2508 440C satin finish blade, K256 Stainless Bolster and A461 1/4" Stainless Steel T6 Torx Fasteners, G2511 Black G10 with Basket Weave texture.

Pattern 31

J3148 154CM satin finish blade, K316 Stainless Bolster and A461 1/4" Stainless Steel Torx Screw Fasteners and M3131 Red Linen Micarta with Basket Weave texture.

Pattern 32

J3248 154CM satin finish blade, K323 Brass Bolster and 1/8" Brass Pins and D3251 Black Ink Walnut Dymondwood preshaped handle.

Pattern 33

J3308 440C satin finished blade, K333 Brass Guard, 1/8" Brass Pins and G3350 Olive Drab G10 Sand Storm textured handle.

Pattern 38

J3838 CPMS 30V satin finish blade, K383 Brass Bolster and 1/8" Brass Pins and D3853 Black Ink Rosewood Dymondwood preshaped handle.

Pattern 61

J6128 D2 satin finish blade, M6119 Ivory Paper Micarta preshaped handles, K614 Stainless Bolster and A061 Stainless Torx Fasteners.

Pattern 36

J3608 440C satin finish blade, K364 Stainless Bolster, 1/8" Stainless Pins, and G3650 Olive Drab G10 with Sand Storm texture preshaped handle.

Pattern 37

J3738 CPMS 30V satin finish blade, G3750 Olive Drab G10 Sand Storm texture preshaped handles, K374 Stainless Bolster and 1/8" Stainless Pins.

Pattern 39

J3908 440C satin finished blade with B760 1/4" Brass Corby Fasteners, D3949 Black Ink Cocobolo Dymondwood preshaped handle.

Pattern 40

J4008 440C satin finished blade, B051 1/4" Brass T6 Torx Screw Fasteners and G4054 Olive Drab G10 Pyramid texture handle.

Pattern 34

J3438 CPMS 30V satin finished blade, K343 Brass Guard, 3/32" Brass Pins, and G3460 Blue/Black G10 Sand Storm textured handle.

Pattern 41

J4189 Damascus blade. Braided with PC325 Imperial Red Reflective and PC106 Charcoal Paracord. SH201 Fang pewter Schmuckatelli® skull bead.

Pattern 42

J4289 Damascus blade. Braided with PC109 Midnight Blue and PC104 Coyote Brown Paracord. SH603 Grins antique copper Schmuckatelli® skull bead.

Pattern 44

J4407 440C peened finish blade braided with PC125 Imperial Red Paracord and LY103 Sterling Silver bead.

Pattern 45

J4508 440C satin finish blade braided with PC110 Foliage Paracord and LY103 Sterling Silver bead.

Northern Fillet

JD329 Damascus blade with giraffe bone handle. Six FF181 Windmill 5/16" decorative torx screws and three AS765 threaded bushings.

Tactical Fighter

J9268 CPM 3V satin finish blade, nickel silver guard included with KI1404 Lava Flow Kirinite handle material and six FF171 Solar Flare 5/16" decorative torx screws and three AS765 threaded bushings.

Otter

JD779 Damascus blade with NB901 Rams horn handle material and MP360 3/16" Copper Star mosaic pin.

Snowman

JD699 Damascus blade with Super Natural resin handle material and MP320 3/16" Speeding Bullet mosaic pin.

JANTZ CONTOURED HANDLES & BLADES

Pattern 21 Blades

Pattern 21 is a flat ground hunter blade. Makes a good general purpose hunting and skinning knife. Overall length 7 7/8", Blade Length 3 1/8", Blade Width 1 1/8", Blade Thickness 5/32". Bolster holes 1/8", Handle Holes 1/4", Thong Hole 1/4". Blades are cryogenically treated and razor sharpened. Available in 440C, D2 and Damascus steels. Offered in peened or satin finish. Available sheath KT210.

CAT.#	STEEL	FINISH	TEMPER	HRC	PRICE

RUSSELL® GREEN RIVER BLADES

Camp Blades

Russell Harrington has brought back, by popular demand, some of the old Russell Knife patterns (circa 1834). All of these patterns have a rugged handmade look and can boast the unsurpassed sharpness that earned Russell Green River knives their reputation around the campfires and chuckwagons of the Old West, as well as in the kitchens of our grandfathers and great grandmothers. Heavy gauge high carbon steel blades feature full tang construction and edges that are hand-ground and hand-honed to extreme sharpness. Available in Kits which include the blade, handle material and 5/16" cutlery rivets. Easy to make. These blades are sharpened to a fine edge which holds extremely well. Perfect for the kitchen as well as outdoor use.

Belt Blade

Create a good general purpose knife with this attractive belt blade. Practical for hunters, fishermen and campers. Overall 9", blade 5" x 1 1/8" x .094 thick. Available sheath KT102.

About Our VG-10 Locking Liner Blades

Sleek, curving lines of our Laminated VG-10 Core, Stainless drop point blade is a true work of art. The resilient layers of high quality stainless has been clad to each side of this awesome VG-10 high carbon, cobalt super steel. The properties of the two steels create an astonishing blade holding an incredibly super keen edge that only VG-10 offers. The brilliantly mirror polished outside layers protect the inner VG-10 core against elements and provide strength for heavy use. Hollow ground sharpened and etched to clearly mark a distinct line created by the meeting of the steels.

Moon Series VG-10 Locking Liner Kits

Classic in every way, easy to open, perfect size, and razor sharp. The VG-10 Locking Liner Series is the perfect everyday carry knife. Offered with blue titanium, silver titanium or stainless steel liners. Optional jeweled upgrade add elegance.

Harvest Moon

Silver Moon

Blue Moon

No Handle Material Provided.

Three different liner choices, all with stainless steel locking liner, belt clip and all necessary components (excluding handle material). The mirror polished stainless layer adds flexibility and strength to the VG-10 high carbon cobalt core. This combination attributes to its beauty and extreme sharpening capability. Overall length is 6 5/8", 3 7/8" closed with a cutting edge of 2 1/4".

The Pacific

So easy and quick to make. Use any handle material to complete this stainless letter opener. Edges are sharp for quick easy use. Composite stone, Buffalo horn or Kirinite all make beautiful handles. 3/32" pins or 3/16" stainless cutlery rivets look great with this mirror finished blade. 4 1/4" Blade overall 8 1/2" long x 7/8" wide 1/16" thick. Kit includes opener, handle material and pins.

LOP1	The Koval	10.95

1095 - A2 - O1 - CPM® S90V - CPMS® 110V®

1095 Hi-Carbon Steel

Our 1095 is cold rolled and annealed with a bright finish. This material is perfect for forging blades, tools and other parts. Very easy to work. Might have slight warp or bow. Typical chemistry C .90/1.04, Mn .60/.90.

Citgo Quenchol®

Citgo Quenchol 521 is a highly stable quench oils designed especially for use in steel heat treating operations. Formulated with premium high viscosity index base oils and additives to provide outstanding service life and performance.

- Excellent thermal stability and oxidation resistance.
- Premium wetting ability and cooling capability.
- Uniform heat dissipation for quality hardened steel production.
- Less viscosity change during the quenching operation compared to low viscosity index oils.

CAT.#	DESCRIPTION	PRICE
BS201	Quench Oil 1 gallon	49.95

CPM® S110V® Stainless Steel

CPM® S110V® is a high alloy martensitic stainless tool steel. Contains a high volume fraction of vanadium-rich and niobium-rich primary alloy carbides for exceptional wear resistance compared to other commercially PM tool steels. Offers better corrosion resistance than 440C or S90V. Aim hardness is 58/61. CPM® S110V® is a registered trademark of Crucible Industries LLC.

Typical chemistry C 2.8, Nb 3.0, Cr 15.25, V 9.00, Mo 2.25, Co 2.5.

CPM® S35VN™ - 154CM - 440C - REX® M4

All steel sold by JANTZ is made in USA unless specifically stated in description. Three different surface conditions are offered.

Mill Finish: Will have decarb on surface from hot rolling. Oversized .010"-.035".

Blanchard Ground: Better surface finish achieved by grinding decarb from both sides. Oversized .005"-.015".

Precision Ground: Best available finish achieved by surface grinding both sides. Tolerance +/- .001".

CPM® S35VN™ Stainless

Extreme edge retention. Will work and grind like D2 and give the hardness and toughness of CPM® S30V®. A cryo treatment may be added between tempers. Aim hardness is 58/61. CPM® S35VN™ is a registered trademark of Crucible Industries LLC. **Typical chemistry: C 1.40, Mn .40, Si .40, Cr 14.00, V 3.00, Mo 2.00, Nb .50.**

440-C Stainless Steel

440-C is a high-carbon chromium stainless that resists corrosion from fresh water, steam, crude oil, gasoline, stains from food acids and fruit. The excellent wear and resistant qualities of 440-C steel make it the natural choice of knifemakers. Hot rolled and annealed.

Typical chemistry C 1.00, Mn .45, Si .30, Cr 17.00, Mo .50.

CPM® REX® M4 High Speed Steel

CPM® REX® M4 HC(HS) is a high vanadium special purpose high speed steel exhibiting better wear resistance and toughness than M2 or M3 in cold work punches, die inserts and cutting applications involving high speed and light cuts. The high carbon (HC) modification to standard M4 is designed to provide optimum hardening response in larger cross-section tools or in vacuum or atmosphere heat treating. The high sulfur (HS) modification is standard for larger diameter bars, providing enhanced machinability and grindability. Aim hardness is 63/65. CPM® REX® M4 is a registered trademark of Crucible Industries LLC.

Typical chemistry: C 1.42, Mn .30, S .06, Cr 4.00, V 4.0, Mo 5.25, W 5.5.

CPM®154 Stainless Steel

CPM®154 has the same composition as 154CM with the exception that it is made from a powdered metal. Holds a super edge. (Higher rockwell hardness). It will polish to a mirror finish and is easier to grind than CPM®S30V®. Aim hardness is 58/60. CPM®154 is a registered trademark of Crucible Industries LLC. Typical chemistry: C 1.05, Mn .50, Si .30, Cr 14.00, Mo 4.00.

D-2 Carbon Steel

Considered by many to be the best carbon steel for knife blades. The combination of superior abrasion resistance and toughness in D-2 results from its high carbon and high chromium content.

Typical chemistry: C 1.50, Mn .40, Si .40, Cr 12.00, V .95, Mo .90.

CPM®3V® Tool Steel

High toughness, wear-resistant tool steel made to provide maximum resistance to breakage and chipping and offers great impact resistance than D2 and A2. Aim for hardness is 58-60Rc. CPM®3V® is a registered trademark of Crucible Industries LLC. Typical chemistry: C .80, Cr 7.5, V 2.75, Mo 1.30.

CPM® D2 - CPM® 4V® - CPM® 20CV - DAMASCUS

CPM® D2 Carbon Steel

CPM® D2 is an air-hardening, high carbon, high chromium tool steel, heat treatable to HRC 60-62. It offers excellent abrasion resistance. It is machinable in the annealed condition and, like other air-hardening tool steels, exhibits minimal distortion on hardening.

Typical chemistry: C 1.50, Mn .40, Si .40, Cr 12.00, V .95, Mo .90.

CPM® 4V® Tool Steel

CPM® 4V® has an outstanding combination of properties including high impact toughness and very good wear resistance. Considered for applications where a combination of strength, wear resistance, toughness and higher attainable hardness is required. Aim for hardness is 62-64Rc. CPM® 4V® is a registered trademark of Crucible Industries LLC.

Typical chemistry: C 1.35, Mn .40, Si .80, Cr 5.0, V 3.85, Mo 2.95.

CPM® S60V Tool Steel

NEW

Unique tool steel designed from a 440C stainless base analysis with added high carbon and vanadium for exceptionally good wear resistance. Due to its high vanadium carbide content, the machinability and grindability of S60V will be slightly more difficult than that of D2 or 440C. Aim hardness is HRC 56-58. A cryo treatment may be added between tempers. CPM® S60V is a registered trademark of Crucible Industries, LLC.

Typical chemistry: C 2.15, Mn .40, Si .40, Cr 17.00, Mo 1.00, V 5.50.

The forging process on our damascus billets starts out a mixture of 13 layers that include 5160, 203E, 15N20 and 52100 high nickel, high alloy steels and then folded 5 times to produce a high contrast 416 layer damascus billet. All sizes are approximate. Ferric Chloride acid #BS110 is used to etch your blades. Made in the USA.

Sizes are over sized in thickness up to .010".

STAINLESS & CARBON DAMASCUS

Mike Norris Stainless Damascus

Possibly the best Stainless Damascus made. Each piece is surface ground and surface etched. Made from 19C27 Swedish Stainless and 302 Stainless, with intermittently stacked D2 through the core of the billet, creating a zig-zag edge when steel is patterned. Heat Treat instructions are included. Call for special sizes.

SPACER MATERIAL

1/32" G10 Spacer Material

A woven fiberglass fabric impregnated with epoxy resin. Strong, durable, resistant to moisture. Light weight, easy to work. Creates a lined/dotted type pattern. Used to layer between the tang and handle material. Add one or more colored sections for contrast.

Always use a respirator when working.
Each piece is 5" x 10" x 1/32" thick.

The Ultimate Heat Treating Furnace for Knife Makers. Paragon has made kilns and furnaces since 1948, many of the originals are still in use today. The knifemaker series are developed especially for the custom knifemakers special needs. All are equipped with SENTRY 12 key electronic temperature controller, this simple to master controller displays messages to guide you through each step in entering correct, parameters for each job. A segment heats to a given temperature (max 2350°F) at a given rate, holds for as long as you need. You can enter as many as 18 segments. Control both heating and cooling with accuracy and repeatability. Store up to 4 programs in memory, one for each type of steel you regularly treat. The large display shows temp throughout heating and cooling process. A delay feature turns the furnace on after a specified period. The alarm sounds when a programmed temperature is reached.

Solidly constructed, insulated with refractory firebrick. The easy to replace elements are mounted in dropped, recessed grooves machined into the firebrick, protecting them for long life and low maintenance. The door is mounted with a heavy duty hinge, and opens downward with one-handed operation. A counterweight handle holds the door securely closed, a micro-switch shuts off power to the heating elements when the door is opened. A built in stand keeps the firing chamber safely off your work table, no extra stand is necessary. Each furnace comes with a One Year Factory Warranty, cord and plug is included for immediate installation, a wiring diagram, programming instructions and a heat treating manual written in plain English for the beginner includes instructions for D2, 440C, ATS34 and 154CM.

Available in 3 sizes KF514 is 120 volt, 16 amp, 1920 watts and 14.5" deep, KF524 is 240 volt, 11 amp, 2600 watts and 24" deep, the KF536 is 240 volt, 15 amp, 3600 watts and 36" deep. All are 5.5" wide and 4.5" high. All dimensions are inside chamber measurements.

Ships Freight - Actual shipping charges apply. Allow up to 3-4 weeks for delivery.

Heat Treat Accessories

This kit contains all of the handling equipment you need to get started. No matter what oven you choose, you will want to add this kit so everything will be ready for your first heat treating experience. Includes Hot Mill Gloves (withstands up to 500°F), heat treat fork, two knifeholders and four firebrick supports.

CAT.#	DESCRIPTION	PRICE
KF603	Heat Treat Accessory Kit	69.95
KF621	Heat Treat Fork	24.95
KF644	Hot Mill Gloves size 10	19.95

Firebrick Supports

Used to raise the knifeholders up in the kiln and to lay blades on after heat treating so you can slide the fork under holders. Each measures 3/4" x 3/4" x 4 1/2" long.

CAT.#	DESCRIPTION	PRICE
KF631	Firebrick support (each)	4.95

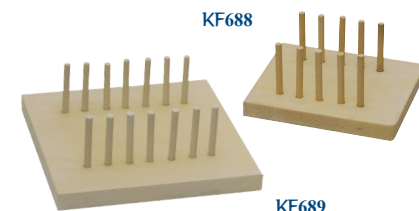

Knifeholders

A must to make sure the blade is treated evenly throughout. These have high temperature removable pins that fit into holes pressed into a ceramic base, the pins hold the foil wrapped blades on edge so heat can circulate freely around each blade.

CAT.#	DESCRIPTION	PRICE
KF632	Knifeholder (each)	9.95

Blade Fixtures

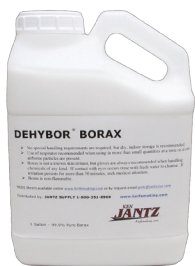

Evenheat Blade Fixtures are designed to hold your blades vertically and securely. They're well designed and provide ample space for foil inflation while being absolutely stable. The KF688-(5"x5"x2") is used in our KH Series (120vt) and the KF689-(7"x7"x2") is used in our KF Series (240vt).

CAT.#	DESCRIPTION	PRICE
KF688	MK1 Blade Fixtures	22.95
KF689	MK2 Blade Fixtures	29.95

HEAT TREAT OVENS AND FORGE

Dehybor®
Borax

The purest borax available (99.9%) to provide our knifemakers with the highest quality flux possible. Dehybor Anhydrous Borax contains none of the fillers and soaps found in standard Borax. This 30 mesh grain is hard and glassy in texture. Maintains consistency and will not rehydrate under ordinary storage conditions. Convenient EZ pour 1 gallon jug with big mouth opening is the perfect dispensing system for your shop.

CAT.#	DESCRIPTION	PRICE
UV101	1 gallon Dehybor Borax	27.95

Hamon Glop

Maker-
Jose Gpe. Ruiz Garcia

An outstanding material for differential hardening of your blade. Also known as APG #36 Refractory Cement, our Hamon Glop comes wet and ready to apply (just stir it up a bit first) in a convenient quart size container. 3200 degree temperature rating.

CAT.#	DESCRIPTION	PRICE
HW101	1 quart Hamon Glop	19.94

Heat Treating Foil

Simple to use; place blade or other part in the Tool Steep Wrap; fold over and crimp edges forming an air tight package; place package in oven and heat treat according to metal directions. Placing a small chip of wood inside the foil packet helps to burn up oxygen inside the wrap. Use only once. Cuts easily with scissors.

1900 Degree Type 321

Type 321, annealed stainless steel has a maximum temperature of 1900° Fahrenheit. Sold in box of .002" x 12" x 25'.

Heat Treating Tongs

Manufactured from special low carbon steel for lasting strength. Will not become brittle when quenched in water. The tongs are 15" overall.

CAT.#	DESCRIPTION	PRICE
KF901	Heat Treating Tongs	39.95

Forging Hammers

Hammers are perfectly balanced. One end round, crowned face, other is flat and beveled to reduce the possibility of chipping.

CAT.#	DESCRIPTION	PRICE
NC770	1 1/2 lb. Hammer	49.95
NC772	2 lb. Hammer	49.95

Aluminized Gloves

These gloves use a 22 oz Aluminized Thermonol coating to reflect 95% of the radiant heat from the back of the hand and arm. The palm material can withstand intermittent handling from 800 to 1000 degrees F. These 14" gloves are lined with 11 oz wool and use a Kevlar thread for the stitching. Made in the USA.

CAT.#	DESCRIPTION	PRICE
KF645	Aluminized Heat Resistant Gloves	79.95

Heat Protection Gloves

Keep the heat away with these 14" gloves. They are lined with 11 oz wool and have a specialized coating of 35 oz highly textured silica yarn treated to withstand temperatures up to 2000 degrees F. The outer material dissipates heat across the surface of the fabric. The fabric is made of inorganic materials, so it won't smolder or produce hazardous outgasses.

CAT.#	DESCRIPTION	PRICE
KF646	Heat Protection Gloves	79.95

NC Tool Knifemaker Forge

Special made for the knifemaker who forges blades or damascus. Equipped with insulated doors on both ends for easy entry and removal of long billets. Comes fitted for propane, but can be configured for natural gas. Regulator, hose, gauge and push-button ignition included. Operates off a standard 20lb propane tank, the same type used for barbecue grills. Uniform heat, reaches 2350°. Heats and reheats metal very quickly. Transportable, light weight and quick cooling. The heat Chamber is 4" x 4 1/2" x 13 1/2". Exhaust port on one door is 2" x 3". Ship weight is 48 lbs. **Actual shipping charges apply.**

Paw Prints™

Paw Prints™ Mosaic Pins™ on Tan G10 with scrimshaw design. Custom knife designed and built by Jose Gpe. Ruiz Garcia, Mexico using S30V steel for blade, brass bolster and 1/4" mosaic pins.

Jantz presents our line of Paw Prints™ Mosaic Pins™. The perfect pin to compliment any hunting knife or a special project for the dog lover in your life. Use as rivets or to pin guards. Or replace your thong hole with Paw Prints™ for stand out contrast. Position to match or alternate for a different effect. Mosaic pins add a touch of distinction to any knife. Lengths are approximate.

For outstanding results drill handle material to pin size, epoxy in place and sand smooth along with handle material.

F60	1-72 Set Screws	.85
F61	2-56 Set Screws	.54

Enhance Your Style

Our innovative drilled thumb openers allow you to enhance the style of your folder by adding a cabochon of your choice. Available for single or ambidextrous opening. Single openers install easily with one 3/32" allen wrench #HK105, one T5 head Torx Wrench #FX105 and your choice from our beautiful jeweled cabochons. Ambidextrous openers assemble easily with two 3/32" allen wrenches #HK105 and your choice of two cabochons (mix or match). Use our #RA600 Zero Flute Countersink to easily countersink the hole for a flat fit with the torx screw supplied. Glue the cabochon of your choice into the bezel.

Without Stud

Fits .089" blade hole (Use TD743 drill)

GTC BEARING SYSTEM

Bearing System
Developed and Patented by
Gustavo T Cecchini

GTC 440C stainless steel thrust ball bearings caged in stainless steel retainers developed and patented by Gustavo T. Cecchini's GTC Knives to reduce friction and failures, increase opening time, and easier cleaning. The 100% stainless steel construction eliminates the problems of other thrust bearings that are not 100% stainless. Install by cutting a pocket, with a counterbore, in both the blade and frame. Use one bearing in blade and one in the frame. Some prefer to cut the pocket in both frames, and not in the blade. This is a good solution when the blade is already hardened. Sold Each.

CAT.#	O.D.	I.D.	BALL	PRICE
GC101	.354"	.157"	.062"	1.29
GC106	.358"	.192"	.062"	1.29

GC121	.415"	.255"	.062"	1.29
GC102	.454"	.258"	.078"	1.29

Counterbore & Pilot

Pilot for Counterbores

Quality, high speed steel counterbores used to set your GTC bearing system. Select the counterbore for your chosen size (outside diameter of the bearing). Then choose the pilot to fit the shank diameter of your pivot pin. Proper cutting depths are .050" for all bearings except GC102 with a cutting depth of .066".

GC101 COUNTERBORE AND PILOT

CAT.#	DESCRIPTION	PRICE

RA2505	.2505"	1/4"	F96 & F98	15.95

Path Maker Information

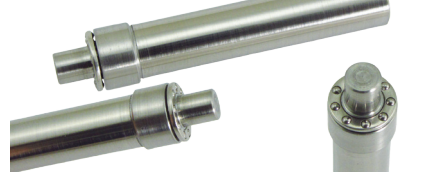

The Path Maker is used to provide a smooth raceway for the thrust bearing balls to slide along. The Path Maker is used in a drill press to mark the raceway into the blade and liners. This task is performed by setting your drill press at 500 RPM and applying a light down pressure for a few seconds. Check the surface for marking until a circular raceway is visible, then this task is complete. We recommend that you complete this task to the blade before and after heat treat to guarantee the elimination of all tooling marks. You will need a different Path Maker for each bearing size and each pivot size that you use. The final assembly should use new bearings only.

The illustration (above left) shows the pocket in the left liner once the procedure has been completed. The first bearing will fit in this pocket. The second pocket should be cut in the blade. In final assembly (see above right), the liner pocket and blade pocket should be facing up when the knife is in the proper position for assembly.

There should be a raceway path on each side of a thrust bearing. The illustration above shows the right liner with the raceway path completed. This raceway matches up to the blade pocket thrust bearing. This procedure should be completed on both sides of the blade. This will match up with the raceway needed in the liner pocket thrust bearing. When finished you will have made a raceway path on all four bearing surfaces and you should be ready for assembly.

Path Makers

A bearing will be included with each Path Maker.

F51A	.1875"	.245"	3.25

D-Lock Hinge Pins

Designed to keep hinge pins from turning during installation and fine adjusting. The locking liner usually has a D shaped hole for hinge pins, however, you can place the pin into the locking liner and interrupt the hole next to the flat by using an auto center punch to expand the metal, creating a protrusion to hold the pin in place. It does not take much stretching of the metal to keep the hinge pin from turning. Can be used in round holes.

D-Lock Hinge Pin

Designed for installation through the bolster. Complete installation using a T8 torx wrench to tighten the screw supplied. Overall length is .434", under the head is .373". 303 Stainless Steel

CAT.#	BODY	HEAD	PRICE
HP650	.195"	.247"	3.25

D-Lock Hidden Hinge Pin

Designed to be hidden under the bolsters. Use a T8 torx wrench to tighten. Overall length is .240", under the head is .205". 303 Stainless Steel.

CAT.#	BODY	HEAD	PRICE
HP660	.156"	.216"	3.25

Stainless Steel Detent Balls

Used for detent on custom folders to improve smooth action of liner and blade. Hardened 440C Stainless.

Corby Rivets

Our most popular screw together rivet. Precision machined for a perfect fit every time. Simply grind away the top when shaping your handle or leave heads for a unique look. Jantz rivet drills will drill and countersink your handle material perfectly in one operation. The length below indicates maximum recommended handle thickness when completed. Tang holes for 1/4" rivets must be 3/16" or larger, tang holes for 5/16" rivets must be 7/32" or larger.

At press time, these rivets were being redesigned with allen heads. Call if you have questions about the current status of design.

Brass

Precision machined from solid brass.

3 Pc Torx Fasteners

Designed for blades with 1/4" or 3/16" holes in the tang. Use with our G10 and Micarta contoured and textured handles. T6 Torx head provides a neat finished appearance without any further material removal from either the rivet or the handle. Simply use the RD6 rivet drill to drill and counterbore the handle 3/32" deep. Precision machined from 360 brass and 303 stainless steel. Each piece includes 2 screws and one barrel.

1/4" Tang Hole Fasteners

Brass and Stainless Steel screws have 1/4" diameter heads and 6-48 threads. 1/4" diameter, bushing is threaded 6-48 threads. 3/16" x .100" step on each side to secure handles in place.

Hidden Tang Size Chart

Listed are the hidden tang sizes to assist you in finding a proper guard or spacer for your blade.

If the blade has a step for the guard, the spacer size will be a different size and will be listed below the guard size for that particular blade in the fit column, if the space is blank, the slot size will be the same for both the guard and spacer.

Leather Handle Spacers

Maker - Ricardo Romano Bernardes, Brazil

Just what you need to make a "stacked leather" handle for your hidden tang blade. These spacers are held in place with your guard and pommel. Your handle can be finished naturally, use edge dye to darken if desired, or work with neatsfoot oil for a nice hand rubbed oil finish. Can be buffed and polished with rouge on a muslin wheel. Oval shaped, each measures approximately 1 1/2" x 1 1/4" x 1/8" thick the notch is .158" x .450" cut into the center making it very easy to slip onto the tang. Sold in packages of eight spacers to equal about 1" thickness.

CAT.#	DESCRIPTION	PRICE
KT200	Pack of 8	2.99

Fiber Spacer Material

A vulcanized fiber material used to cushion between the tang and handle material. Add one or more colored sections for contrast. This thin material will help you create an effect just right for the blade and handle material you choose.

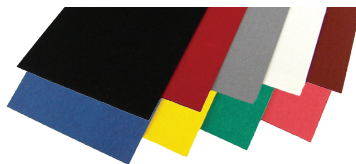

Each piece is 5" x 10" x .030" thick.

CAT.#	COLOR	PRICE

The perfect knife handle material. One of the hardest, rarest and most stable woods on earth. Will not shrink or move. This naturally stable wood is easy to work, bring to a brilliant finish with pink scratchless on a sewed muslin wheel. Ranges in color from light to deep red orange with contrasting deep brown-black figure. Scales are bookmatched for perfect mirror imaged sets. All sizes are approximate.

High Contrast Ironwood

Excellent Contrast and figure.

Kirinite® combines durability and usability in one of the most stylish resin materials on the market. This amazing handle material combines a smooth appearance with a solid grip to the hand at even the highest polish. Use standard wood working techniques at slow working speeds and low temperatures then polish with soft wheel or by hand.

1/8" Blue Cell

Resin infused aluminum honeycomb handle material. Reflects light beautifully for a unique appearance. Stunning when used as a whole handle like the blade pictured above - or use as an inlay combined with another material for a truly distinctive appearance. Transparent colors allow for the workings of a folder to show through or back with spacer material for a richer hue or color mix. Available in two thicknesses and two cell sizes.

Sold one piece 1 1/2" x 6".

Fabricated Mother of Pearl White

No ordinary imitation Mother of Pearl, ours is crushed and reconstituted with resins. This white iridescent material can be used over spacer material which will add tones of color.

CAT.#	QTY.	SIZE EACH PIECE	PRICE
GT701	2 pcs.	3/16" x 1 1/4" x 3"	9.95
GT702	2 pcs.	3/16" x 1 1/4" x 4"	12.95
GT703	2 pcs.	1/4" x 1 1/2" x 5"	19.95

Black

One of our best selling imitation handle materials. Contrasting iridescent pearls ranging from light to deep grey-black. Very beautiful.

CAT.#	QTY.	SIZE EACH PIECE	PRICE
GT721	2 pcs.	3/16" x 1 1/4" x 3"	9.95
GT722	2 pcs.	3/16" x 1 1/4" x 4"	12.95
GT723	2 pcs.	1/4" x 1 1/2" x 5"	19.95

Fabricated Ivory

Fabricated Ivory is an inexpensive alternative to genuine Ivory. The color and texture patterns look and feel like natural ivory. They can be shaped and sanded with files, sandpaper and buffed with white rouge for a lustrous finish. Care should be taken when drilling and pinning holes as this material is fragile until it is fixed to your blade.

White

Very white like a new tusk. Little veining, gives a good clean look.

CAT.#	QTY.	SIZE EACH PIECE	PRICE
GT704	2 pcs.	3/16" x 1 1/4" x 3"	9.95
GT705	2 pcs.	3/16" x 1 1/4" x 4"	12.95
GT706	2 pcs.	1/4" x 1 1/2" x 5"	19.95

Antique

Antique ivory shows grain and has contrasting white and cream colors like antiqued Ivory.

CAT.#	QTY.	SIZE EACH PIECE	PRICE
GT707	2 pcs.	3/16" x 1 1/4" x 3"	9.95
GT708	2 pcs.	3/16" x 1 1/4" x 4"	12.95
GT709	2 pcs.	1/4" x 1 1/2" x 5"	19.95

Mastodon

Contrasting colors of Orange, yellow, white and cream blended to look like aged and fossilized Mastodon or Mammoth Ivory.

CAT.#	QTY.	SIZE EACH PIECE	PRICE
GT710	2 pcs.	3/16" x 1 1/4" x 3"	9.95
GT711	2 pcs.	3/16" x 1 1/4" x 4"	12.95
GT712	2 pcs.	1/4" x 1 1/2" x 5"	19.95

Gemstone Composites

Our composite gemstone, manufactured from a mixture of the finest natural crushed stone and strong resin materials, preserving the color and beauty of natural grain. No two pieces are exactly alike. This material is strong enough to be used as a complete handle, requires no special lapidary equipment to cut and shape. Will grind, drill and polish with care, as all natural materials can break. The gold (#FPBG) fill kits can easily be used to fix any cracks, inclusions or breakage and will look like a natural vein, or add some stone "dust" to Zap a Gap to fill voids. Spacers of brass, micarta, wood, bone or contrasting stone materials allow you to create a true piece of art. Used for jewelry and inlay.

Composite Sample Pack

Consists of 8-10 different composite handle materials, in various shapes, sizes and thicknesses. A great way to try the composites for small knife handles, spacers, jewelry or inlays. No two packages are the same. Approximately 1/2 lb.

CAT.#	DESCRIPTION	PRICE
GT301	Composite Samples	29.95

Conch Shell

Crushed conch shell and other materials combined to offer a unique handle material. Pink, yellow, cream, and white streaks and swirls make a striking knife handle.

Axis Crowns & Rounds

Extremely solid, without pith, just a small vein hole in the center. Good color and texture. When worked down it gives a good solid white surface, the perfect choice for carving and scrimshaw. Length of Crowns are 5" to 6".

Length of Rounds are 4-1/2" to 5".

CAT.#	DESCRIPTION	PRICE
IS106	3/4" to 1" dia. Crown	24.95
IS107	1" to 1-1/8" dia. Crown	34.95
IS104	1-1/8" to 1-1/4" dia. Crown	39.95
IS119	3/4" to 1" dia. Round	24.95
IS118	1" to 1-1/8" dia. Round	34.95
IS115	1-1/8" to 1-1/4" dia. Round	39.95

Axis Tines

Works well for small to medium size hidden tang knives. The tines may have minor scratches from the axis deer rubbing his antlers on thorn bushes. Scratches can easily be removed by fine sanding and polishing.

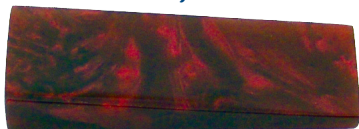

CAT.#	BASE DIA.	LENGTH	PRICE
IS121	1/2" to 5/8"	4 1/2" - 6"	4.95
IS123	5/8" to 3/4"	6" - 7"	7.95
IS127	3/4" to 1"	8" - 9"	14.95

Fantasy Marble

An artisans dream in the workshop, this marvelous material sands, saws and drills easily. Resins and mica powders combine to create a durable product that will offer a lifetime of service once properly fastened to your liners or blade. Deep iridescent, slightly translucent colors come alive when polished with pink scratchless compound at 4000 to 6000 sfm. Fiber spacers enhance the colors and add depth. Each piece has its own pattern, coloration and character, assuring that your project will be one of a kind. Available as listed in scales, slabs and cylinders.

Care must be taken while creating your project as fantasy marble can shatter if dropped on a hard surface, or crack when pinning if you do not use proper techniques for fragile materials. The extra care is well worth the effort. **The manufacturer offers no warranty against breakage.**

Black Cherry

Swirls of black and cherry combined

MICARTA® MADE IN THE USA

Tough, durable, resistant to corrosion, acids, oils, heat, cold, moisture, compression and impact. Formed by a special high-pressure process, using layer upon layer of the finest materials available. Can be engraved, carved or scrimshawed. Easy to cut, shape and drill. To finish simply sand smooth then polish to a brilliant shine using white or pink rouge on a soft buffing wheel.

Natural Canvas

Our newest addition to our Micarta line. Natural Canvas Micarta can be finished by buffing or leave rough for a more textured look and feel.

MI700	1 1/8"	Block 1 1/2" x 5"	15.95
MI780	1 1/8"	Slab 5" x 10"	104.95

Black Linen

The linen weave can be polished to a nice shine with a 'grain' effect or hand finish for a 'zebra' effect of flat black and gray.

CAT #	THICKNESS	STYLE	PRICE
MI682	1/8"	Scale 1 1/2" x 10"	4.50
MI662	3/16"	Scale 1 1/2" x 10"	5.95
MI642	1/4"	Scale 1 1/2" x 10"	6.95

MI702	1 1/8"	Block 1 1/2" x 5"	14.95
MI782	1 1/8"	Slab 5" x 10"	87.95

Ivory Paper

Tiny pores in the Ivory Micarta may fill with a compound leaving tiny black specs. This is inevitable with this material and cannot be removed by further polishing. Color closely resembles real Ivory.

CAT #	THICKNESS	STYLE	PRICE
MI681	1/8"	Scale 1 1/2" x 10"	6.95
MI661	3/16"	Scale 1 1/2" x 10"	8.95

Birch Bark Spacers

Maker - Olamic Cutlery

These birch bark shingles make an especially unique handle for your hidden tang blade. Each set measures approximately 4.5" and is nicely matched for color and figure. Once handle is shaped can be sealed traditionally by soaking in Linseed Oil (LS101) for several weeks. For a faster seal, use Thin CA Glue (JE204) to set your material.

CAT.#	DESCRIPTION	PRICE
SL101	Stacked Birch Bark	18.95

Stabilized Corn on Cob

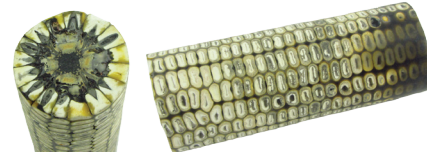

FRAGILE
HANDLE
WITH CARE

Stabilized Corn on the Cob is extremely fragile. Must use caution while handling and working with this. Coat with Zap A Gap CA+ to keep stable while working this handle material.

Maker - Larry Pridgen

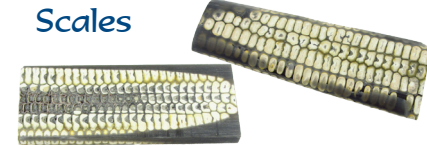

Whole

Stabilized Corn on the Cob. Use these pieces for hidden tang knives or to cut your slabs. 1 1/2" diameter x 4" long.

CAT.#	DESCRIPTION	PRICE
CW901	Whole Cob	34.95

Scales

Stabilized Corn on the cob. Scales for use on your flat tang knives. Center Scales are flat. 5/16" x 1 1/2" x 4 1/2". Outer scales have radius top. 1/4" x 1 1/4" x 4 1/4". Scales are a set of two. Sizes are approximate.

CAT.#	DESCRIPTION	PRICE

CW401	Outer Scales	29.95

Leather Handle Spacers

Maker - Ricardo Romano Bernardes

Just what you need to make a "stacked leather" handle for your hidden tang blade. These spacers are held in place with your guard and pommel. Your handle can be finished naturally, use edge dye to darken if desired, or work with neatsfoot oil for a nice hand rubbed oil finish. Can be buffed and polished with rouge on a muslin wheel. Oval shaped, each measures approximately 1 1/2" x 1 1/4" x 1/8" thick the notch is .158" x .450" cut into the center making it very easy to slip onto the tang. Sold in packages of eight spacers to equal about 1" thickness.

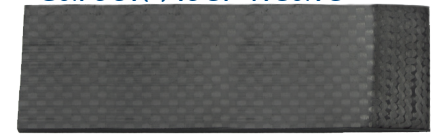

CAT.#	DESCRIPTION	PRICE
KT200	Pack of 8	2.99

CARBON FIBER

Very light weight and extremely strong. The woven carbon threads which are set in resin form a pattern. When reflected in light, the pattern is visually enhanced.

West System Adhesives 105/206 Epoxy

WEST SYSTEM epoxy cures to a high-strength plastic solid at room temperatures, by mixing 105 liquid epoxy resin and 206 hardener in a 5:1 ratio. Designed specifically to bond to a wide range of materials including fiberglass, many metals, wood fibers, reinforcing fabrics, foam and other composite materials. This highly moisture-resistant plastic is highly recommended when extended working and cure time are needed or to provide adequate working time at higher temperatures. The 206 slow-cure hardener has a working time of 90 to 110 minutes at 70°F with a minimum cure temperature of 60°F. Cure time for maximum strength is 1-4 days. West Epoxy is easy to sand and shape when cured and does not shrink after curing. **Can Not Ship Air.**

CAT.#	DESCRIPTION	PRICE
WE105A	1 qt #105 Resin	39.71
WE105B	.98 Gallon #105 Resin	99.73
WE206A	.44 pt #206 Slow Hardener	20.50
WE206B	.86 Quart #206 Slow Hardener	46.06

G/Flex® Epoxy

G/flex epoxies are toughened, resilient two-part epoxies engineered for superior grip to metals, plastics, glass, masonry, fiberglass, and difficult to bond woods. G/flex epoxies make bonds that absorb the stresses of expansion, contraction, shock and vibration. Easy-to-use 1:1 mix ratio gives you 46 minute pot life and a working time of 75 minutes at room temperature. Initial cure in 3-4 hours with workable cure in 7-10 hours.

CAT.#	DESCRIPTION	PRICE
WE6508	G/Flex Liquid 4 oz.	22.49
WE6558	G/Flex Pre-Thickened 4.5 oz.	24.65

5 Minute Adhesive

Easy-to-use, fast curing epoxy system for quick repairs, tooling and general bonding. Use for spot application to hold parts in place while standard epoxy bonds cure. Bonds to wood, fiberglass, and metal. 1:1 mixture. Cures in 3-5 minutes. 4 fl. oz resin and 4 fl. oz hardener.

CAT.#	DESCRIPTION	PRICE
WE8654	5 Minute Adhesive	21.48

West System Pump Set

Designed for convenient and accurate metering of #105 resin and #206 hardener. Calibrated to delivery approximately 0.8 fl oz of resin / hardener with one full stroke. Set contains one resin pump and two hardener pumps which mount directly on the containers eliminating mess and waste. Read and follow priming, ratio verification, and operating instructions included with pumps.

CAT.#	DESCRIPTION	PRICE
WE300	Pump Set	15.69

West System Color Pigments

Epoxy based liquid colorants used to tint epoxy mixture and provide an even color base for the final finish system. Add to mixed resin/hardener at a rate of approx. 1 tsp of pigment to 8 fluid oz epoxy. More pigment increases opaqueness and mixture viscosity. One 4 fl oz bottle will tint approximately 1-1/2 gallons of epoxy.

CAT.#	COLOR PIGMENT	PRICE
WE5018	White	17.95
WE5028	Black	17.95
WE5038	Gray	17.95

System Three Epoxy Paste Pigment

Pure, dry, colored pigments can be used alone or mixed to produce additional colors to suit any project where color is desired. Add the paste to the epoxy resin then measure that mixture in the proper ration with the hardener. Use a maximum of approximately 10% volume pigment paste to combined resin and hardener. To maintain the same color over several projects, mix a master batch of color with resin and store for later use - only add hardener when you are ready to use.

DEVCON Epoxy

Devcon Epoxy in the Dev-tube, gives you correct amounts of resin and hardener automatically, no measuring required. The high-strength 2-ton epoxy is waterproof, bonds wood, metals, micarta, stag, Dymondwood, virtually any knife part with a crystal clear finish that cures at room temperature in about 30 minutes. Made to withstand high impact and high-stress situations. Available in 1 oz. syringe or a box of two bottles each 4.25 oz. The five minute epoxy has the same features as the 2-ton, but sets up much faster with only slightly less strength and is water resistant.

Can Not Ship 2-Ton Epoxy Air.

Bedding Compounds

Acraglas and acraglas gel provide the professional or amateur with an easy to use superior bedding compound, specifically designed and manufactured to make your rifle shoot more accurately. Also great to use as a fill-in for stone material "inclusions" or cracks. Fills cracks and blemishes in wood knife handles, works as an epoxy to hold handles on. Brown and black dye is included in both kits.

Acraglas shrinks less than 1/10 of 1%, strengthens wood, simplifies inletting in semi inletted stocks, slow set-up allows ample time to seat barrel & action. Acid and water proof, seals inletting. Kit contains everything needed to bed 2 rifles or lots of knife handles.

Can Not Ship Air.

CAT.#	DESCRIPTION	PRICE
BWA	Acraglas Kit	18.99

ACRAGLAS Gel

Acraglas gel has all the features of Acraglas, plus it shrinks slightly less and the butter smooth consistency prevents runs and mess. Kit contains enough to bed 2 rifles.

Can Not Ship Air.

CAT.#	DESCRIPTION	PRICE
BWAG	Acraglas-Gel Kit	21.99

CA Glues & Fillers

Bond porous and non-porous materials including; wood, metal, carbon fiber, composites and plastics with this selection CA glues. Store unopened bottles in the freezer to extend shelf life. Opened bottles experience a shorter shelf life if they are continually taken in and out of cold storage.

HOT STUFF ORIGINAL is a thin CA glue with water-like viscosity (3cps). Will wick into tight-fitting joints of non-porous material. Fill and stop spread of splits and hairline cracks in wood & stone. Strengthen stone and porous wood by applying to entire surface, allow to soak into the pores and cracks. Use as a final finish for knife handles or pens. Cure time is three to five seconds between tightly fitting, non-porous parts.

SUPER T GAP FILLER is a medium gap filling glue with a viscosity similar to syrup (200-300 cps). Perfect for gluing somewhat porous materials and pieces which don't fit tightly. Cures within 10-25 seconds giving you additional positioning time. For best bond of two pieces, apply to one piece and accelerator to the other - push together and hold tightly for 30 seconds.

SPECIAL T GAP FILLER is a thick gap filling glue with a viscosity similar to honey (1150-1500 cps). Used to fill large gaps and glue parts that don't fit well together as well as fill cracks and gaps in handle materials to preserve structure integrity while sealing from moisture and contaminants.

SUPER SOLVENT used to debond and dissolve CA glue from your hands and other surfaces. A small amount usually does the trick. Safe to use with most paints and finishes but testing on an inconspicuous area is recommended.

NCF QUICK ACCELERATOR will decrease cure time with only a light mist applied from 8-12 inches away. Designed to flash off instantly so do not over-apply (you will see a wet look if you use too much). Over-application can discolor some surfaces - especially stone.

SPOUT, CAP AND PRO TIP EXTENSIONS Use Pro Tip Extensions with the spout for greater precision in glue application. Replacement spouts and caps may become necessary if glue drips on cap or clogs tip.

Above Items Can Not Ship By Air.

JANTZ Knifemaker's Specialty
Knifemaking.com
 CA Glue for Knifemakers by Knifemakers

Made for knifemakers by knifemakers this CA Glue is triple distilled to assure the highest level of quality, performance and shelf-life. This is the CA glue we put our name on! 20 month shelf life obtained when stored unopened at 40° F. Can be refrigerated. 2oz bottles include one clog free nozzle stopper, 2 long nozzle caps and 8 extension applicator tip. 1 oz. glues sold with brush on applicator in cap.

• To enhance cure time use Knifemakers Specialty Accelerator

Standard CA Glue

Standard CA Glue works to fill gaps, cracks and hairline fissures that may occur as part of the knifemaking process. Bonds closely fitted parts for that perfect finish. Thin and Medium can be used as a finish by applying multiple coats, sanding and polishing to a high gloss. Thick is ideal for filling larger gaps and voids in materials. Clear in color.

DESC.	VICOSITY	GAP FILL	CURE RATE
Thin	2 mPa-s	0.002"	Instant
Medium	150 mPa-s	0.006"	10-20 sec.

Flexible CA Glue

Flexible CA Glue is the glue of choice when working with flexible materials or natural woods or other materials that swell and contract as this flexible glue moves with your project to help prevent cracking over time. Provides impact and shock absorbance for adhering moving parts. Available in clear, black and brown to best match the job at hand and provide the ultimate coverage for filling voids. Clear can be mixed with sawdust or colored ink or pigment to match your project. Black CA Glue is rubber toughened for added impact resistance. Brown CA Glue dries ash brown in color.

JANTZ Knifemaker's Specialty
Knifemaking.com
 For Knifemakers by Knifemakers
Accelerator & Debonder

Knifemakers Specialty Accelerator speeds up cure time of your CA glue with a quick spray or brush on application. In that hopefully rare instance you need to separate glued parts or even yourself from your project, apply debonder to break down the CA glue separate parts.

Aerosol-Can Not Ship Air.

3M Instant Adhesive

A high strength fast setting adhesive that cures at room temperature. Excellent bonding. 1/2 oz.

CAT.#	DESCRIPTION	PRICE
IR901	3M CA4 Instant Glue	4.95

ZAP A GAP Adhesives

ZAP-A-GAP the best instant glue in the world. The ability to bond virtually anything with consistency. A little goes a long way! Only apply enough glue to evenly coat the area to be bonded. ZAP CA is the thinnest superior penetrating glue. It bonds instantly. ZAP CA+ (PT01) is for gap filling. The penetrating ability allows it to go where most cannot and will harden soft areas and helps prevent cracks, cracks almost disappear, great for both stabilized and natural woods. 7-10 secs for positioning. Works on oily surfaces. Cures in about 20 sec. Use ZIP KICKER for a faster cure. Z-7 DEBONDER will soften CA glue prior to sanding. Removes any instant glue from skin, work surfaces, many other uses. ZAP GEL will not run nor flow. Super thick jelly like CA. The strongest CA glue available. Tube has tip to allow precise application. Great for stones, inlays, other small parts. Allows plenty of time for working before cures.

Can Not Ship PT15 or PT16 Air.

Renaissance Wax

Originally designed for fine art conservation, Renaissance Wax protects the surface of metals and woods from dust, fingerprints and liquids. Creates a thin layer that enhances shine while preventing damage. With its high moisture resistance, it forms a durable, lustrous protective coating, prevents tarnish, corrosion and remains completely waterproof. Non-staining, non-abrasive. Use on all parts of your knife, blade and handle.

Can Not Ship Air.

Wool Daubers

Apply inks to your scrimmed project for solid application in heavily scored areas. Also convenient for easy clean up. 5" handles.

CAT.#	DESCRIPTION	PRICE
WV1950	12 Wool Daubers	2.95

Scrimshaw & Art Inks

Performs like liquid watercolor with beautiful color concentration and movement. These inks are known for their extreme lightfast and non-fading qualities among a brilliant line of colors. Excellent for scrimshaw. All inks are in a 1oz eye dropper bottle.

Pigment Based Colors

Pigment inks are mixed from a dry, powdery substance. Pigment is not necessarily water soluble, but it may remain suspended in the liquid. Pigment particles tend to bond to edges within the chosen medium. Pigment inks tend to last longer and resist fading over time.

CAT.#	COLOR	PRICE
HI44635	Yellow	3.75

KYDEX Sheath Material

Kydex is a thermoplastic material used to make formed sheaths for your knives. It is cut to shape, formed by use of a heat gun then held firmly together with rivets, eyelets, or glue. With a little practice, you can make a protective sheath in minutes. Protect tools, kitchen cutlery, and many other items using this easily formed material. Also a great holster material. Basic instructions are included. Kydex is 12" x 12".

Versatile Knifemakers Vice

Here it is at last, the vise you have asked for. We now have a reproduction of the original Versa Vice. This unique vise swivels a full 360 degrees and then locks in place when the jaw is tightened. Mount sideways for versatility. Jaws measure 3 1/2" wide x 2 1/8" high and open to 9" capacity. This is the perfect knifemakers vise. Optional cushioned lined tilting jaws pivot to easily hold tapered material. Holes in jaws allow easy mounting of cushion faces. Standing 9" tall, 11" long and 3 1/2" wide, the base has a three hole pattern to bolt to work bench or pedestal. The Base foot print is approximately 5" x 6".

The Versatile Knifemakers Vise can also be mounted on side as shown above, then flipped over 180° to work from the other side. Can be mounted on corner of workbench to enable you to rotate a larger arc for long blades that go all the way below the top of the workbench.

Optional tilting jaws with cushioned pads shown above on the vise allow you to better grip tapered parts such as blades and guns. The protective rubber pads will help prevent slippage and marring of parts.

CAT.#	DESCRIPTION	PRICE
JS315	Versatile Knifemakers Vise	52.95
JS316	Optional tilting jaws (pr.)	13.95

Adjustable Clamping Vise

Mounts to any bench top up to 2" thick. Vise rotates 360, 0 to 45 swivel action in any position, 0 to 90 swivel position. Dense rubber jaw pads and bench pad. Vise capacity is 2". Jaws measure 3 1/8" wide.

PANAVISE®

THE PERFECT VISE

All Parts for PanaVise products are interchangeable. The heads, bases, etc., can be used to mix & match for several different styles. **Made in the USA.**

Standard PanaVise

The Standard PanaVise gives you a complete range of adjustments to suit your needs. With rotation through 360° and 180° tilt, PanaVise provides the perfect angle on any job. This vise opens to 2 1/4" with 15/16" throat. 2 1/2" nylon jaws can withstand continuous heat to 200°F. Head removes easily from base for additional use when grinding, polishing or drilling those hard to grip pieces.

CAT.#	DESCRIPTION	PRICE
PV301	Standard PanaVise	49.99

PanaVise Bench Mount Clamp

Clamp your standard base panavise to any table or bench up to 3 7/16" thick. Four neoprene pads are included to add "anti-mar", "anti-slip" to base without excessive tightening of the clamping screw. Includes screws for mounting the PanaVise base to clamp.

CAT.#	DESCRIPTION	PRICE
PV311	Bench Mount Clamp	44.99

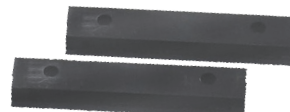

Vacuum Base PanaVise

The Vacuum PanaVise has all the features of the Standard PanaVise with the added portability of a vacuum base. The powerful suction pad allows rapid setup on any smooth, non-porous surface. Very useful on machinery.

CAT.#	DESCRIPTION	PRICE
PV381	Vacuum PanaVise	67.49

Vise Jaws

CAT.#	DESCRIPTION	PRICE
PV343	Nylon Jaws	2.49
PV352	Teflon Hi-Heat Jaws	11.49
PV354	Non-Mar Brass Jaws	11.49

PanaVise Jr. uses the famous PanaVise design that tilts, turns, twists and rotates. One quick turn of the control knob and you securely position your work exactly where you want it. Overall height is 6 3/4", weighs 1 lb. 4 oz., head rotates and swivels 360 degrees, pivots 210 degrees. Jaws are 1" wide and 2" high, opens 2 7/8" and are made of fiber reinforced thermal plastic alloy. Will stand continuous heat up to 350 degrees F (intermittently up to 400 degrees F.)

CAT.#	DESCRIPTION	PRICE
PV201	PanaVise Junior	26.99

PanaVise Multi-Purpose Holder

The double action jaws on the Self-Centering Extra Wide Opening Head allow fast opening and closing. The self centering feature permits holding heavier objects because weight is centered over the base. Featuring extra wide capacity, the jaws open to a full 9 inches (229mm). The jaw plates can be reversed to close together. Ribbed on one side and "V" grooved on the other, the reversible jaw pads firmly hold cylindrical or odd shaped items. Tray Base Mount is exceptionally stable and resists tipping. It has six non-marring, antiskid neoprene base pads.

CAT.#	DESCRIPTION	PRICE
PV350	Complete Work Center	89.99
PV376	Wide Head Only	53.99

PanaPress

The Precision PanaPress weighs less than 6 lbs. and stands 7" high. Featuring four nylon gibs for precision directional control of the reversible, vertical ram, this hand arbor press exerts pressure up to 1/4 ton. Ideal for compressing and straightening pins in your knifemaking projects.

CAT.#	DESCRIPTION	PRICE
PV502	Precision PanaPress	165.99

WORKHOLDING

Steel Hand Vise

Great for holding small objects when polishing. Spring action in handle keep jaws open. 1-1/4" wide serrated jaws open to 7/16". Overall length is 3-3/4".

CAT.#	DESCRIPTION	PRICE
GN815	Hand Vise	33.45

Knifemaker's Contour Vise Fully Adjustable!

Designed and built by an engraver and knifemaker. In just seconds you can hold knives securely for engraving and other detail work with this wonderful vise. Special chain-like linear jaws conform to unusual and compound shapes with ease. Lined with a special hard rubber ribbon, these jaws grip securely without high clamping force. The Knifemaker's Contour Vise is totally adjustable for a wide range of widths and depths of knives. It mounts in any vise including all known engraving blocks. If you work on knives, get one...it's a well-made bargain.

CAT.#	DESCRIPTION	PRICE
PV622	Contour Vise	89.95

Double End Pin Vise

Use to hold small pins, rods, wire, drills, taps, and other small tools. Nickel plated body made of tubing, permits use of long wire or rods. Each end has a double end collet that may be reversed to desired size. 3 3/4" length, 5/16" diameter.

CAT.#	CAPACITY	PRICE
GN90	.0 to .125" .0 to 3.2 mm	14.95

Adjustable Pin Vise

Holds small drills, burrs, wires, files, reamers and other small tools, 0 to 1/4". Three jaw hardened steel keyless chuck, sturdy plastic handle.

CAT.#	CAPACITY	PRICE
GN93	.0 to 1/4" .0 to 6.3 mm	13.95

Slide Lock Tweezers

A tool you can't do without. For inspection or holding parts. Slide lock holds parts firmly.

CAT.#	POINT STYLE	LENGTH	PRICE
GN401L	Serrated	5 3/4"	6.99

Kant Twist Clamp

These clamps are a must when gluing handles or soldering guards or bolsters to your blade. The round handle on the Kant Twist clamps provide the ability to finely adjust the clamp pressure to your project and makes it easy to position your work. Clamps are small and light weight. The free-floating jaws adjust to unparallel surfaces, will not walk or twist when pressure is applied. Outside measurements and nominal clamping pressure of each clamp is as follows: CL400 is 1 3/8" x 1 1/2" 200 lbs.; CL401 is 1 3/4" x 2" 350 lbs.; CL403 is 3" x 3 3/16" 600 lbs.; CL405 is 3 1/4 x 3 1/2" 800 lbs. The clamp opening determines the thickest material you can clamp, the clamp depth is the maximum distance you can clamp from the edge.

CAT.#	OPENING	DEPTH	PRICE
CL400	3/4"	3/8"	11.95
CL401	1"	1/2"	12.95
CL403	1 1/2"	1 1/8"	13.95
CL405	2"	1 1/8"	16.95

Pin Vises

Smooth section on handle allows vise to be held in machine chucks or collets. Handle has hole through entire length to accommodate stock up to the full size capacity so that long rods can be gripped close to the end. End of handle is knurled and has a smaller diameter than chuck which allows fast opening and closing and rapid rotation between the thumb and finger when filing or forming small work. Both vises have heavy nickel plated finish.

Made in the USA.

CAT.#	RANGE, ENGLISH	RANGE, METRIC	PRICE
ST240A	0 to .055"	0 to 1.4 mm	19.99
ST240C	.045 to .135"	1.2 to 3.4 mm	25.99

Surgical Tubing

Pure Gum Surgical Latex tubing makes the perfect clamping system for the custom knifemaker. The tighter you stretch it, the more gripping power it has. Use the 1/4" OD tubing for general use and the 5/16" OD when maximum clamping power is needed. Reusable, will not break or deform under normal conditions. Ideal for irregular shapes and repairing cracks and checks in wood handles. Apply epoxy and wrap the tubing around the knife pulling the wood back together. Tubing will hold tight while curing. After curing, remove the tubing and refinish the handle. Epoxy simply peels away, as it will not adhere to the tubing.

Sold in two pieces equalling 10ft. length. The shortest piece will be at least 2ft in length.

CAT.#	OD TUBING	ID TUBING	PRICE
SC702	1/4"	3/16"	8.95

Flat Files

Flat files are used by machinists, machinery builders, ship and engine builders, repair men and others who require rapid removal of metal. They are rectangular in cross section and taper slightly towards point in width. Double-cut on both sides, single-cut on both edges.

CAT.#	LENGTH	CUT	PRICE
CTN03566	8"	Bastard	10.95
CTN03599	8"	Second Cut	11.95
CTN03632	8"	Smooth	12.50

Magicut Files

Enlarged close-up shows the unique pattern of narrow chip breakers created by steep and angled serrations. This maximum cutting surface design gives rapid removal and smoother finish. "Magicut" is a machinist's all purpose file, which removes stock rapidly and leaves a smooth finish at the same time, thus eliminating the need for extra filing strokes.

CAT.#	LENGTH	PRICE
CTN07894	8"	11.95
CTN07917	10"	14.95
CTN07941	12"	18.95

Round Files

Principally used to file circular openings or concave surfaces. Tapered slightly towards point. This file is generally referred to as a rat-tail file.

Drill Stop Collar Set

Takes the guess work out of drilling! Just slip the collar over drill bit; measure desired depth; then tighten set screw. Will drill to uniform depth every time. Steel collars will not slip like plastic stops. Slotted screws tighten into flute. "Rust-Proof" plated finish. 7pc. set with one collar to fit these drill sizes: 1/8", 3/16", 1/4", 5/16", 3/8", 7/16", 1/2".

CAT.#	DESCRIPTION	PRICE
HADS7	7 pc. Drill Stop Set	6.95

Short Length Drills

Made in the USA

Our short length drills offer fast accurate centering, faster penetration. The short length makes them very stiff and less likely to walk or flex. 135° split point, black surface treatment, heavy duty.

Carbide Drills

Designed to drill through hard-to-drill materials such as hardened receivers and hardened knife blades. Fractional sizes are usually used for drilling pin, rivet and thong holes in blade tangs while the #28 and #31 are used for drilling receivers for scope mounts. For better results and longer drill life, run at speed specified for each size. Carbide drills are very brittle and must be used with great care. No warranty on this item. *Made in the USA.*

Center Drills

Center drills are used in a drill press, milling machine or lathe to start the hole to be drilled. The large body diameter and small drill size make them extremely rigid, thus eliminating any flex or 'walk' you will experience with other drills. Use to start the hole and to drill 'centers' on stock to be turned in a lathe.

CAT.#	SIZE	DRILL DIA.	BODY DIA.	PRICE

Metric Drills

Drill the proper size hole with these heavy duty, jobber length, 135° split point metric drills. Our metric tap section lists drill size for tapping and clearance. Decimal sizes are listed so you can choose the best "close slip" fit for both inch and metric size pins.

135° Split Point Cobalt Drills

Cobalt provides better wear resistance in hardness and toughness compared to HSS. Extended tool life and hole size accuracy in tough to drill materials such as titanium, annealed steel and G10. 135° Self-centering split point prevents "walking".

Pin Reamers

Pin reamers are turned by hand to taper a pin hole so the pin can be peined to expand to the tapered hole for a strong hold. Can also be used to enlarge undersize holes. The reamers are tapered .005" per 1/4". Must use Tap and Reamer Wrench #RA712 sold separately.

Zero Flute Countersink

The zero flute 82° countersink is the proper tool to countersink the flat head Torx screws used in folder kits. The single cutting edge cuts chatter free, also used to debur and chamfer predrilled holes.

CAT.#	DESCRIPTION	PRICE
RA600	Zero Flute Countersink	12.95

Counterbores

Pilots only for Counterbores

High speed steel counterbores are used in knifemaking to counterbore bolsters for pivot pins on folder blades and countersink the pivot pin screw heads. Counterbores are designed to cut steel, aluminum, titanium, and other metals. Can also be used on wood, Micarta, G10, and other handle materials to countersink the handle fastener. Counterbores and pilots are sold separately to mix and match for the pivot pin size needed for your project.

14" Metal/Wood Bandsaw

The JET Wood/Metal Vertical Bandsaw offers all the power and precision in a package that meets your individual specifications. Solid one piece steel base for extra stability. For added safety, the JM8201 follows strict guidelines and electrical requirements to be certified by CSA Group. JET has engineered a gear box that allows wood/metal model saws to be used for a wider variety of metal, wood, non-ferrous metal and plastic cutting applications, then backed it with the industry leading two year warranty.

Taurus 3 Ring Saw Blades

Standard Blade

For general use, Omni-directional. Blade gives you strength as well as versatility in all materials. Because the blade is round you have the ability to cut in any direction. The 360 degree diamond coating allows the blade to cut quickly while grinding the edge, leaving it smooth.

Mega Blade

For dense materials. Because of its "tear drop" shape, the Mega Blade is the strongest blade ever. This blade is used differently than the Omni-directional blades. It cuts mainly on the front and back, so to create a curve you will guide the material around the blade.

Slicer Blade

The Slicer blade is ideal when removing the least amount of material is desired. This blade gives you the ability to use more of your material. The Slicer blade is flat, giving it strength when cutting forward and backward, because of this, the cutting will only be from the front and back. Cutting from the sides will not only be very slow but will damage the grommets.

Speed Blade

Sometimes known as the inverted Mega blade. Taurus turned a mega inside out and made it thinner. The result is a tear dropped shaped blade that is almost unbreakable with the round part on the inside and the point on the outside. Its thinner profile makes it fast and aggressive. It comes with a "Flocked belt" to handle its aggressive nature. Omni-directional action in stained glass or soft wall tile and forward and backward for thicker or harder materials.

TYPE	BLADE SHAPE	GRIT	BLADE LIFE	MAX THICK
Standard	Round	Aggr.	40-60hrs	3/8"
Mega	Tear Drop	Aggr.	50-100hrs	3/4"
Slicer	Flat	Fine	50-100hrs	3/4"

Taurus 3 Ring Saw

Unlock speed and your imagination with this advanced shape cutting saw.

We believe that you will find the all new patented Taurus 3 "Ring Saw" the most important key to unlocking your imagination and speeding you on your way to creating new and wonderful shapes never before possible.

The Taurus 3 is easy and fun to work with. All cuts can be made by moving the material forward, backward, left and right so rotation is not necessary. Diagonal directions are the strongest.

The Taurus will cut all kinds of materials. These materials will not load the blade. They include but are not limited to: tile, gold (which can be refined out of the water bath), silver, brass, bronze, aluminum, stainless steel, copper plastics such as lucite, plexiglass, composites and all types of stone.

The Taurus can be used as a high speed coping saw and will greatly reduce your metal cutting time. Slight loading can occur with aluminum over a period of time. Periodic cutting on a piece of brick will remove it from the blade.

The Taurus 3 Becomes a Hand Saw!

Use this versatile saw as a hand saw and bring the tool to your material for larger jobs. Simply remove the saw portion from the unit and cut away.

Refer to the user manual and videos on our website for instructions on using your Taurus 3 Ring Saw and for more information.

SPECIFICATIONS

- 17 3/4" x 16" work surface.
- 5 5/8" throat depth.
- 1 1/2" throat height.
- 1/5 horse power motor.
- 110 volt or 220 volt (w/ internal transformer).
- capacity. 1.3-1.7 amps
- Weight. 16.5 lbs.
- 1 Slicer Ring Blade (included).
- Integrated spot light.
- Removable face shield.
- 1 Stabilizer Foot (use any time you use the Taurus as a hand saw!)
- Instructional DVD & A Written Manual.
- Bottom door (soak bottom door in water before using to lubricate blade).
- Thumb screw.
- Bottom door clip.

Jantz Hollow Grinding Fixture

Fixture and Elevator are now combined as one attachment.

Our newly redesigned and improved Jantz Hollow Grinding Fixture allows you to grind straight or recurved blades quickly and accurately with your 2" wide belt grinder (some adjustments may be necessary to fit your machinery). To use simply replace your work rest with the angle bracket, set your initial grinding increment and move your blade through the fixed part by hand. The elevator raises or lowers the grinding center line for greater versatility.

- Adjustable to any thickness blade stock from .090" to .250" and can grind blades of any length.
- Flat grind using your platen
- Hollow grind with a 8", 10", 12", or 14" contact wheel.
- Change belts without removing or adjusting the fixture with our innovative new design
- Adjust grinding depths in increments of .050" with a full turn of knob
- Stationary back jaw
- Knife edge guard constructed from tool steel for strength and designed for easy replacement when natural wearing occurs with use

All sales final. No returns.

Choose the adapter arm to fit your grinder to complete your fixture.

Replacement Universal Edge Guard. Hardened tool steel edge guard with screws as a replacement to fit JS260 hollow grinding attachment.

NORTON Three-Stone Sharpening System

The Three Stone Sharpening System is popular among professionals, convenient and easy-to-use. The sharpening system holds the stones in a heavy-duty plastic base unit that mounts into an oil bath. The oil reservoir keeps the stones that are not being used submerged in the oil so they're ready to use. Systems include 4.5 oz of quality Norton honing oil, wedge angle guide, three oil stones and instructions. The first stone is the fast cutting coarse Crystolon stone. The second stone is the medium grit Crystolon stone, and the last is the fine India stone for final honing.

NA200 dimensions are 1 1/2" x 2" x 8". NA313 dimensions are 1 1/2" x 2 1/2" x 11 1/2".

CAT.#	DESCRIPTION	PRICE
NA200	8" Multi-OilStone System	84.95

NORTON Crystolon Sharpening Steel

FRAGILE
HANDLE
WITH CARE

NEW

Meet the stone that will sharpen your steel! Norton's new Crystolon sharpening steel is easy to use and restores a blade's finish fast. This 280 grit silicon carbide rod enables you to create a sharper edge than any other sharpening steel. Norton's "steel" removes metal to impart an edge rather than traditional truing. Rod can be used without water or oil although it should be wiped clean after each use. The 10" rod is suited for most kitchen knives. Can be stored safely in a knife block or other location suitable for ceramic materials.

CAT.#	DESCRIPTION	PRICE
NA315	Norton Crystolon Steel	19.95

Tri-Hone Sharpener

The convenience of a coarse 220 grit Carborundum Stone, Washita Stone and Hard Arkansas to polish the edge. Comes with 1 oz. of high quality Honing Oil. Includes an angle guide for perfect sharpening.

LANSKY[®]

SHARPENERS

Controlled Angle Sharpening System

Make knife sharpening as easy as 1-2-3!

Get a professional razor sharp edge on your blades quickly and easily using one of these safe and convenient sharpening systems. Two kits available, the Standard system and the Ultimate Diamond system. Each kit includes one each coarse, medium and fine hones, a multi angle flip over knife clamp, three guide rods and honing oil. All stored in a custom molded case.

Standard Sharpening System

The Standard system includes color coded alumina oxide (coarse, medium and fine) hones, honing oil, a multi angle clamp, and three guide rods. The Standard sharpening system is great for every day tasks. Upgrade your standard system by adding additional hones, sold separately.

CAT.#	DESCRIPTION	PRICE
LK103	Standard Sharpening System	24.95

Diamond Sharpening System

The durability and performance of top-quality diamonds Lansky uses provide the ultimate in sharpening technology. The sharpening capability of the diamond kit is valuable for the advanced ultra-hard blade steels. This sharpening system features color coded diamond hones in fine, medium, and coarse, a multi angle knife clamp, three guide rods and honing oil. Upgrade your system by adding additional hones, sold separately.

CAT.#	DESCRIPTION	PRICE
LK300	Diamond Sharpening System	59.95

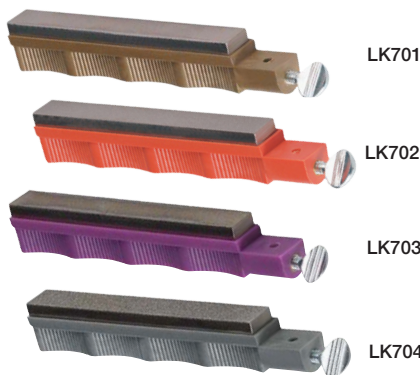

Sapphire Polishing Stone

Achieve the ultimate mirror finish with this Super Sapphire polishing hone.

CAT.#	DESCRIPTION	PRICE
LK420	Sapphire Polishing Stone	14.95

Diamond Hones

Color coded holders with slip resistant finger grooves for easy identification and handling.

CAT.#	DESCRIPTION	PRICE
LK701	Fine Diamond Hone Gold	18.95
LK702	Medium Diamond Hone Orange	19.95
LK703	Coarse Diamond Hone Purple	20.99
LK704	X-Coarse Diamond Hone Silver	21.99

Serrated Sharpening Hones

To sharpen all your serrated blades the medium is for reshaping but does not sharpen to a final edge. The fine produces a sharp edge and a final polish.

CAT.#	DESCRIPTION	PRICE
LK401	Fine Serrated Stone Red	8.20
LK402	Medium Serrated Stone Gray	8.20

Multi Angle Knife Clamp

Easy to use ambidexterous designed multi angle clamp holds your blade while using the sharpening hones. Simply assemble the hone on a guide rod insert into desired 17°, 20°, 25° or 30° angle holes. Sharpen one side then flip over for a perfect angle on the opposite side. Hold in your hand or place on an optional mount for easy one handed use. The bench mount is compact, light weight aluminum. The predrilled base can be screwed to your workbench (screws not included) and can be stored in your sharpening system case. The convertible Super C Mount has a unique 2 piece design that allows you to attach your system on vertical, horizontal or curved surfaces. Constructed of aircraft grade aluminum.

Deluxe Turnbox Crock Stick[®]

An innovative 2-stage sharpener. The hardwood maple base stores, 2 medium and 2 fine, 5" ceramic rods, for easy storage and carrying. Rod angles of 20° and 25° are preset for a precision edge on kitchen, folding or hunting knives.

CAT.#	DESCRIPTION	PRICE
LK501	Deluxe Turnbox Crock Stick	19.95

Knife Sharpening Wheel System

The best sharpening system ever developed for sharpening knives. Wheels are made from compressed fiberboard and bonded with silicon carbide grit on one wheel, a white rouge on the other. This 2 wheel system will allow the user to grind a fine edge then clean and polish to a razor sharp edge. Compound kit for the knife sharpening wheels includes white rouge, silicon carbide grit and lubricant. Just a little practice and you will be sharpening like the pros. We recommend the Baldor Buffer for use with these wheels, Baldor makes the finest buffer made in U.S.A. Most vibration free of any electric buffer we have tried. This will aid in your ability to polish and hone.

System includes: Baldor 1/4 hp 1800 rpm buffer, and a WKS800 sharpening wheel set.

Actual shipping charges apply.

Electro-Chem Etching

The best Electrochemical Etching Machines available to mark any unpainted metal surface. Using their own or professionally designed stencils, even beginners find the etching process fast and easy to learn while delivering a high quality, permanent mark on all your metal parts. Easy and quick. Create your own stencils using a standard typewriter, ball point pen, or scribe and our convenient stencil roll. Etch from 0.0002 to 0.010 inches deep. Both machines come with a supply of ECE01, ECE04 etching solutions, ECAMC cleaner and a 2' stencil roll.

The Personalizer has a constant maximum output power of 12 volts at 3 amps, or 36 watts. 115v. The Personalizer Plus offers a variable speed control of zero to a maximum output power of 24 volts at 3 amps, or 72 watts for faster etching. 115v. Etching Solutions allow for control of depth and work to scatter heat built up during the etching process. In addition, these solutions etch the part and develop the residue needed for contrast marks. The all purpose cleaner is for use on all metals to remove excess etching chemicals, salts, and oxides when the completed. 16 oz. bottle. Stencil Roll is 2 1/2" x 20', pin fed for dot matrix printer or typewriter.

Foredom Speed Controls

FTEC1 with a heavy plastic casing designed to give steady control. FTEM1 table top control allows adjustment with a dial control when constant speed is necessary, switch is used to turn on or off.

CAT.#	DESCRIPTION	PRICE
FTEC1	FCT1 Foot Control	37.95
FTEM1	Table Top Control	69.95

DREMEL[®] Dremel 3000

Kit includes the variable speed, 5,000-35,000 rpm Multi Pro Tool with an EZ TWIST nose cap, an attachment, a carrying case, an accessory case, project booklet and a 24 piece Accessory/Bit Assortment and EZ TWIST nose cap wrench for fast changes. 4 year warranty through manufacturer.

CAT.#	DESCRIPTION	PRICE
DT3955	Dremel 3000	99.95

Dremel[®] Workstation

Convert your Dremel tool into a table top drill press or holder for your tool while maneuvering your work while sanding or polishing. Storage shelf keeps accessories handy, stows cord safely, depth markings in metric/inches for consistent depth adjustment. Drill vertically or at 15 degree increment angles.

CAT.#	DESCRIPTION	PRICE
DT220	Workstation	51.95

Router Attachment

Shapes edges, chamfers, cuts rabbets, dadoes, etc. Adjustable edge guides can be easily removed for freehand routing. **Moto Tool not included.**

CAT.#	DESCRIPTION	PRICE
DT230	Router	31.85

Dremel[®] Shaper Table

Make your Dremel tool into a bench mounted wood shaper. Slot, edge trim, sand irregular shapes. Mounts with C-clamps or bolts to bench. 6" x 8" table, 3-way fence. Adjusts for wood thickness.

CAT.#	DESCRIPTION	PRICE
DT231	Shaper table	38.95

High Speed Router Bits

For routing, inlaying, mortising in wood and other soft materials, 1/8" shank. Use with Dremel router attachment.

CAT.#	DESCRIPTION	PRICE
DA612	3/32" Piloted Beading	7.95
DA650	1/8" Straight	6.95
DA652	3/16" Straight	6.95
DA654	1/4" Straight	6.95

EZ Lock[™] Accessories

Makes changing accessories easy as PULL-TWIST-RELEASE. Use with any rotary tool.

Cut-off Wheels

1 1/2" dia. wheels cut through almost any material. Use the EZ409 to make thin cuts in metal without compromising strength. The EZ456 for cutting metal, lasts 2 times longer than standard fiberglass reinforced wheels. The EZ476 for cutting plastic. Sold in pkg 5.

CAT.#	DESCRIPTION	PRICE/5
EZ409	Thin Cut-off Wheels for Metal	9.49
EZ456	Cut-off Wheels for Metal	9.84
EZ476	Cut-off Wheels for Plastic	9.84

Finishing Buffs

Excellent for light sanding and tarnish removal. The EZ511 includes one each 180 grit and 280 grit. The EZ512 includes two 320 grit buffs. Do not run in excess of 15,000 RPM. Mount these finishing buffs on the EZ402 mandrel

CAT.#	DESCRIPTION	PRICE
EZ511	One Ea./180 & 280 Grit Buffs	4.29
EZ512	Two/320 Grit Buffs	4.39

Carbide Wheel

The EZ Lock Carbide Cutting Wheel cuts through 1/2" wood and laminate quickly with little effort. 1-1/2" diameter wheel. Mount on the EZ402 mandrel (sold separately).

CAT.#	QTY	DESCRIPTION	PRICE
EZ544	1	EZ Lock Carbide Wheel	15.00

Diamond Wheel

The EZ Lock Diamond Wheel cuts metal. Works great for gemstone. Provides straight cuts with little dust. 1-1/2" diameter wheel. Mount on the EZ402 mandrel.

CAT.#	QTY	DESCRIPTION	PRICE
EZ545	1	EZ Lock Diamond Wheel	21.03

Polishing Wheel

The EZ Lock Polishing Wheel is great for polishing metal to a high luster. Mount on the EZ402 mandrel. 1" dia.

CAT.#	QTY	DESCRIPTION	PRICE
EZ423	1	EZ Lock Polishing Wheel	3.17

Mandrel

The EZ Lock Mandrel is a one-piece mandrel designed to eliminate the need for a screw. This 1/8" shank mandrel is compatible with all Dremel and Foredom rotary tools.

CAT.#	DESCRIPTION	PRICE
EZ402	EZ Lock Mandrel	9.37

Cartridge Roll Kit

These resin-bond rolls are 1" in length. Mandrel is available in 1/8" or 1/4" shank. Recommended safe speed is 15,000 rpm. Kit contains 60 resin bond cartridge rolls plus two 1/8" mandrels. Stored in a handy plastic box. For wood or metal, like sandpaper. Roll out to desired size.

CAT.#	DESCRIPTION	PRICE

Sisal Wheels

The unique capabilities of the sisal wheel increase production and decrease cost by doing the job in half the usual time. When used in conjunction with the cut and color bars, the sisal wheel will simply whisk away the polish marks, light pits and other minor surface defects leaving steel, stainless steel or brass a flat color with all scratches removed. This usually eliminates the need to use finer grits when going from polishing to coloring. It is often used as a "final" finish in itself when a satin look is desired. Our sisal wheels are 9 ply, 6" and 8" are 1/4" spiral sewed, 10" and 12" are 3/8" spiral sewed, cloth covers help hold the wheels solid.

WH216	Replacement rake only	6.95

Felt Wheels

Our accurately balanced felt wheels are made of 100% selected long fiber wool. They contain no resins, lacquers or synthetic fibers. Felt wheels are available in three densities: 1) **Soft** felt is recommended for rounded surfaces and jobs requiring little pressure or cutting action, such as coloring. 2) **Medium** felt is the most often used by both gun and knifemakers. It will readily adapt to flat or rounded surfaces and can be used in both buffing and coloring operations. 3) **Hard** felt is most often used on flat surfaces or where it is necessary to contour the wheel to the configuration of the work.

3M Scotch Brite® Wheels

Made from a non-woven synthetic fiber mesh impregnated with abrasive grain. Open structure prevents loading. Will not rust or contaminate metal. Waterproof, washable, use wet or dry. General Purpose, medium density-5A (Red), blends belt marks, removes rust and surface oxidation, finishes and deburrs. Produces a clean uniform surface, blends surface scratches and produces a satin finish. Light Deburring, fine density-7S (Gray), tough and aggressive, durable yet resilient and fast cutting. Produces a bright finish on hard surfaces, such as stainless and titanium. Flap Wheels, fine density, for final sanding/finishing on wood or metal. May require arbor adapters to reduce. Size and adapters shown in description. Maximum rpm 4500.

LA377	White Diamond	1 3/4 lb.	11.50

Zam

This well known popular compound is used on all metals ferrous and non ferrous gleam to a brilliant shine. Composite stone will sparkle. Will not scratch even the softest materials. Leaves a protective coat to help prevent tarnishing.

CAT.#	DESCRIPTION	PRICE
LA602	ZAM Polish 1 lb.	10.50

Fabulustre

Produces a high luster finish on all types of precious and decorative metals, as well as composite stone, horn, Dymondwood, stabilized wood and more. Special formulation removes light surface scratches and produces a fast, mirror bright finish with no discoloration to the material. Contains no grease, therefore easily cleans up with little or no residue.

CAT.#	DESCRIPTION	PRICE
DX47313	1 lb. Fabulustre	9.95

Jewelers Rouges

Red rouges are formulated for precious metals, gold, silver, platinum, etc. Very fine, removal, yet will still clean and shine to a fine bright finish. Red jewelers rouge is very greasy and may discolor wood or other porous products. The Red velvet rouge is very dry to produce a final luster on non ferrous metals. The black rouge produces a rich dark color on precious metals and wood. It is great for final finish on Dymondwood handles.

CAT.#	DESCRIPTION	SIZE	PRICE
LM3	Red Jewelers	4 oz.	2.95
LA566	Red Velvet	1 lb.	7.95
LA522	Black Jewelers	4 oz.	3.95

Greaseless Bars

The finest greaseless compounds available anywhere. Builds up a good head and remains on the wheel. The aluminum oxide grit is of uniform size, therefore cutting clean and sharp. These compounds work well on all muslin and felt wheels. Keep tightly sealed, refrigerate if possible. Shelf life six - eight months. Approximately 2 lbs. each.

Discs for Angle Grinders

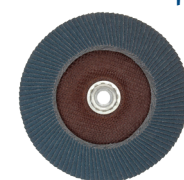

TYPE 27 Grinding Discs

4 1/2" discs to fit your angle grinder, used for heavy duty stock removal. Use to grind the bevels on your blades, can also be used for any other ferrous metal grinding application. Each disc is equipped with quick change 5/8"-11 threads and are 1/4" thick for heavy grinding applications. Always wear proper safety equipment when grinding.

CAT.#	DESCRIPTION	PRICE
NA224	24A Flat Disc	2.49

Norton Flap Discs

Norton 20X High Performance Zirconia Type 27 flap discs are suitable for blending and smooth finishing on flat surfaces on a variety of metals. Designed for right-angle, handheld, grinding machines for heavy stock removal and surface blending. Zirconia is a self-sharpening abrasive that allows for a faster cut rate and longer life than Aluminum Oxide, due to its ability to fracture and refracture, creating new cutting edges. Used for fast stock removal on both woods and metals.

J-Flex

Gold Belts

MADE IN GERMANY

Our J-Flex belts are flexible, aluminum oxide material. Great on contoured workpieces. Use on your stainless and high alloy steels as well as on all ferrous and non-ferrous metals. The semi-open coated material is resin bonded with a special gold colored top coating to aid in cooling and to resist loading.

Graphite Platen Backing

Use behind sanding belts to reduce heat and friction, increase speed and provide longer abrasive belt wear. Coated canvas is recommended for use in applications of extreme heat and pressure. Made with a special graphite coating for the toughest applications. Use with disc and belt adhesive IR951. Each piece is 2" x 12".

CAT.#	DESCRIPTION	PRICE
SG212	Graphite Backing 2" x 12"	2.98

ABRASIVES

The next generation of Ceramic belts for metal removal. Lasts 200% longer on hard-to-grind materials and alloys. Cuts faster and cooler, with less pressure, than any other ceramic belt.

Sandsticks

Perfect for hand finishing knife blades, actions and other flat surfaces, it stays flat and 'ripple' free. Detailed, hard to reach areas are a snap. The easy to use tapered plastic stick holds a replaceable sanding belt. The patented spring loaded mechanism allows belt to rotate 360° guaranteeing use of entire belt. Two sizes, 1/4" x 6" long or 1/2" x 8" long. Each comes with 5 belts (1 each grit). Replacement belts are sold in packages of 5 all one grit.

1-580-369-3082

EMAIL:
jantz@jantzusa.com

WEBSITE:
www.knifemaking.com

MAIL:
309 W Main, Davis, OK 73030

At Jantz, we believe having incredible products and excellent customer service is a priority. We work hard to demonstrate our commitment to quality service every day. To help us best serve you, here are a few important things to know.

CUSTOMER SERVICE

Our skilled team is happy to help you with questions concerning our products. We want you to have all the information necessary to make a great buying choice. If we do not know the answer we may be able to tell you where the information can be found. Check our selection of books & dvds for great information. **The ultimate decision in product suitability is up to the customer. We cannot be responsible for the choice you make when determining if a product meets your requirements.**

LAWS AND REGULATIONS

All government laws, rules, policies, prohibitions, etc. concerning any and all products are the sole responsibility of the customer. While we try to be informed, we cannot and will not be responsible for any fees, duties, currency exchange, damage, loss or confiscation by private or government agencies for any reason. It is your responsibility to obtain this information from your local, state, federal and other agencies before ordering. All orders will be processed and labeled for shipping with accurate product information as required by the transporter and U.S. law. **NO EXCEPTIONS.**

PRICING

We make every effort to maintain prices until the next catalog is published, however all **prices are subject to change without notice.** We cannot be responsible for typographical errors. If in doubt, call or email to confirm. If you find an error, please let us know – it is always appreciated.

WARRANTIES

All tools and accessories are warranted to perform as advertised. Many items carry a manufacturer's warranty. If any item is received defective, contact the manufacturer and they will instruct you on returning the item for repair or replacement. We will offer assistance if necessary, we cannot change the policy of the manufacturer. Jantz offers no other warranty expressed or implied. **NOTE – please understand the wiring and voltage requirements of all equipment prior to purchase. Warranty may be void if international customers use adaptors on equipment built for U.S. electric standards.**

PAYMENT

We accept only U.S. funds through money orders, major credit and debit cards and PayPal. Checks held to clear. A \$50 fee will be charged for returned items. COD available by UPS ground only. COD fee is added to invoice and must be paid by money order. No checks or cash. Do not send cash through the mail.

CHANGES TO PRODUCT

The Jantz Team is constantly working to improve our products and processes to provide you with the absolute best for your knifemaking needs. We reserve the right to make changes that we believe will improve the function or suit customer needs based on your feedback. We make every effort to communicate any product design changes at the time orders are placed.

SHIPPING FEES

To destinations in the 48 contiguous United States Jantz will ship for only \$12.95 for most products. Orders containing steel ship for only \$17.95. Both rates are our choice of carrier. **Orders shipping to Hawaii and Alaska as well as orders of machinery and equipment weighing 25lbs. or more will be charged actual shipping fees.**

Customers may choose their preferred delivery method from UPS, USPS or freight. Actual shipping charges apply.

INSURANCE: For all orders add \$1.00 for each \$100 in product to insure your package against loss or damage.

International Destinations

Are subject to additional shipping charges. **PLEASE** call or email for current shipping rates. International orders where insurance is not available are sent at customer's risk. **We cannot guarantee** delivery times on international orders. While we will do everything in our power to help we have no control over customs holds or lost packages.

WHEN WE - OR YOU - MAKE A MISTAKE (OOPS!)

Things happen and no matter how hard we try, sometimes we all make mistakes. Please check your order immediately upon receipt. If a discrepancy is noted contact us immediately. We will investigate to see what happened. Often, customers find the missing item "stuck" in the packing materials. If you find you ordered an item by mistake and cannot use it, call us. Chat with one of our friendly team members and we will help you out. **We cannot be responsible for disputes regarding phone orders when sent as invoiced. Always have your order read back.**

RETURNS

Please inspect your order within 10 days of receipt. If not satisfied, **call for a return authorization.** We will exchange or provide store credit. Customers must pay any shipping costs. Restocking fees may apply. Each returned item must be unused, unaltered and resalable. Used merchandise will not be accepted. Books, dvds, machinery, and parts are sold on a non-returnable basis. **Returns without the original invoice and a return authorization number printed on the box may be refused.**

DAMAGE OR LOSS

Our goal is for your package to be delivered in perfect condition. What happens when it leaves Jantz is sometimes unfortunate. Please inspect all deliveries for visible damage before accepting. **DO NOT ACCEPT PACKAGES WITH VISIBLE DAMAGES** unless opened and inspected in the presence of the delivery driver. If you find damage **PLEASE** follow these steps:

1. TAKE PHOTOS OF THE DAMAGE
2. KEEP ALL BOXES AND PACKAGING
3. REPORT DAMAGE TO CARRIER
4. CONTACT US FOR INSTRUCTIONS

Insured orders that are lost or damaged can not be replaced until the claim has been paid by the carrier.

All contents herein Text and Photos are the exclusive property of Jantz Supply, Inc., unless contributed by the manufacturer, and may NOT be reproduced in ANY form for any purpose without the express written permission of Jantz Supply.

MAKE YOUR KNIFE EXOTIC

Springbok
By Ricardo Romano Bernardes

Nguni Horn
By Jantz Supply

Mammoth Ivory
By James Bullard

JANTZ SOURCES NATURAL ANIMAL PRODUCTS OF THE HIGHEST QUALITY AND MOST UNIQUE TO HELP YOU MAKE YOUR KNIFE STAND OUT.

WHEN YOU NEED SOMETHING SPECIFIC NO SUBSTITUTION WILL DO.
GO TO WWW.KNIFEMAKING.COM TO CHOOSE THE PERFECT PIECE FOR YOUR PROJECT. SEE PHOTOS OF EACH INDIVIDUAL PIECE, LETTING YOU CHOOSE YOUR OWN COLOR, PATTERN AND SIZE.

SAVE TIME & MONEY BY LETTING US SELECT COLOR & PATTERN FOR YOU!

Bone

Bone makes an excellent natural handle material for any knife. Easy to shape and work, bone is durable and attractive. **Jantz** procures a variety of bone from naturally deceased animals including giraffe, zebra, impala, wildebeest, kudu and more.

Bone Scales

Sold in sets of 2 pieces. Scales are matched to coordinate but each piece is unique in color.

CAT.#	ANIMAL	APPROX. SIZE	PRICE
NBU102	Giraffe	Less Than 0.59" x 4"	16.00
NBU103	Giraffe	1" x 4 1/2"	24.30
NBU104	Giraffe	1.18" x 4 1/2"	32.40
NBU105	Giraffe	1.37" x 4 1/2"	40.50
NBU108	Giraffe	1.57" x 4 1/2"	48.60

Whole Bones

Sold individually, each piece is uniquely dyed for a beautiful effect. Whole bone includes the joint ends. Round is center cut. Spacers are individual rounds set with a center pin.

CAT.#	ANIMAL	TYPE	PRICE
NBU801	Impala	Whole	16.20
NBU701	Zebra	Whole	20.25
NBU601	Wildebeest	Whole	20.25
NBU501	Kudu	Whole	20.25
NBU204	Cape Buffalo	Whole	20.25

Super Natural

Dyed acrylic resin infused with natural animal products creates a singular look for any knife.

Sold in sets of 2 scales. Each piece measures approximately 4 1/2" x 1 1/2" x 3/8".

CAT.#	DESCRIPTION	PRICE
NBU1201	Giraffe Bone	45.60
