

Follow Up Questions

1) Can you provide us a "sample" data analysis of our self-funded plan data that would result in either a plan design change, participant behavioral changes, wellness strategy changes etc. We would like to see how you would "take us to the next level" of using the self-funded data: medical visits, prescriptions etc. to lead us to optimizing costs and participant behavioral changes leading to their wellbeing.

Reporting

In addition to monthly financial reporting packages, we provide clients plan performance and comprehensive annual reporting packages outlining benchmark and detailed plan utilization data. Using this information and tracking it in an **executive** management scorecard, together we will identify opportunities and "levers" for change and more effective plan management.

Executive Reporting

Strategic Planning

So how do we put this and other

information into an actionable strategic plan? In addition to the NavMD reporting outlined below, your engagement team will utilize *BAS*, *Go365* (*fka Vitality*), *occupational health data and more* to develop a comprehensive scorecard and strategic planning tool known as the **executive** management scorecard. Your annual scorecard may include data from a variety of sources such as

- Health Risk Assessments
- EAP usage
- Biometric screenings
- Health plan performance report

- Prescription drug usage
- Cultural assessments
- Engagement surveys
- Workplace performance metrics

Collecting and analyzing data from multiple sources enables us to identify needs, risks, gaps in care, etc. that our customized strategic plan aims to address and allows us to measure its effectiveness.

2 EWING MARION KAUFFMAN FOUNDATION

Wellbeing Scenario

For example, if we discover preventative exam compliance is low, yet avoidable emergency room visits are high, we might implement a communication strategy around the value of establishing a relationship with a Primary Care Physician (PCP). We may go a step further, and recommend implementing an incentive strategy that rewards employees for completing an annual preventative exam with their PCP.

Our strategic plan always takes into account your organization's goals and objectives. If one of your goals is to decrease employee turnover rates for example, then our strategy may include cultural initiatives such as an employee recognition campaign, and/ or activities to support social connectedness.

Our goal is to understand your organization in order to co-develop a strategy that is aligned with your unique culture so that it is truly impactful to employees, their family members and your organization as a whole. Combining our experience and expertise with your understanding of culture and corporate objectives along with an effective tool for measurement leads to far more effective plan management.

Please see the Exhibit A for a sample scorecard. Make note of various sources and categories of measurement, as well as the thought-provoking year over year planning tool.

Data Analytics Tool - NavMD

CBIZ clients are provided access to our benchmark and forecasting tool, NavMD. Analytics from NavMD give a glimpse into predictive healthcare, delivering **actionable insight** to allow for better decisions for your population. Better decisions mean providing a higher quality of care at a lower cost with a focus on wellness.

NavMD Analytics generates information against actual claims data on monthly or quarterly updates. You have the power to monitor the progress of your healthcare objectives and manage your health plan, just as you would any other budget item. The system offers a wide range of claims analysis to determine areas of a health plan that can be addressed in order to mitigate claims expenditure, target cost savings and increase wellness within a workforce. Our tool allows wellness data to be imported into the system so that you can see the direct correlation between biometric screenings, health risk assessment data and medical claims.

NavMD Analytics consists of three main components.

1. Analytics & Reporting

NavMD Analytics' data structure allows for high level group and cohort analysis down to specific conditions for an individual member. Its capabilities also include determination of patient compliance levels based on best practice guidelines, standards of care and prevention screenings.

2. "What If" Plan Modeling

Several plan modeling tools provide comparative analyses on hypothetical plan strategies using actual claims experience for a given population. This tool enables organizations to forecast potential savings, predict changes in a proposed plan, and calculate shifts in cost and impacts of various plan design initiatives. Multiple additional capabilities are included such as Health Savings Account, Reinsurance Premium, and Wellness Investment Calculators. By quickly simulating plan modifications with real claims experience, these tools are designed to improve wellness, save money and increase efficiency.

3. Performance Tracking & Monitoring

Tracking and monitoring features measure userdefined data providing monthly alerts on cost, compliance and enrollment activity. Monitoring can be defined to continuously operate or narrowed to a specific period of time. Set alerts for changes in total plan members, track total employer costs in real time against goals and dynamically view member compliance level variation, among several others. Intervene when necessary and relevant.

Please see Exhibit B for a sample Strategic Health Plan Report.

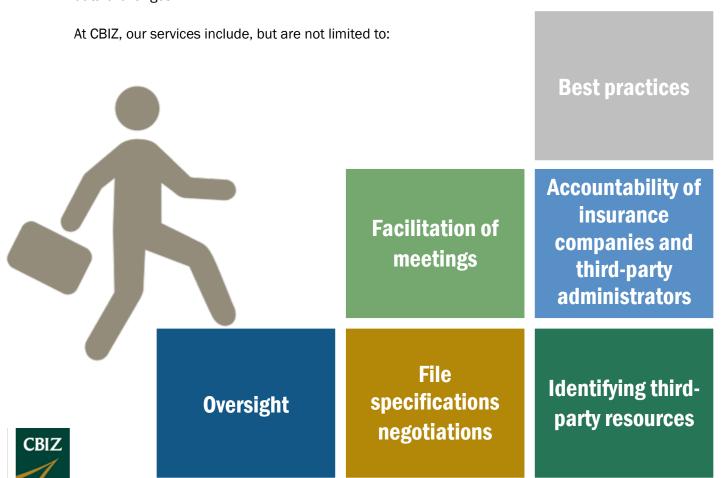

2) We would like to learn more about creating an EDI file that can transfer open enrollment data from EMKF/EMKS to BAS—for all related plans: med/dental/vision/life etc. What would that process look like, for example, would you be willing to take project management lead to help us through this process?

Electronic Data Interchange (EDI) is a standardized format of data exchange between an eligibility management system (Ultipro/Ultimate) and a third-party administrator and/or insurance company. CBIZ routinely provides consultative support for establishing EDI.

In short, connecting the Ultimate HRIS system to BAS and other third-party vendors eliminates steps for HR and payroll team members. Employee elections are sent electronically to the various parties on a pre-determined schedule (typically weekly) containing additions, terminations and qualifying life event information. Doing so means billing, claims and identification cards flow more smoothly an accurately for all parties involved.

Clients similar to the Foundation are typically challenged by a lack of internal resources to manipulate inbound and outbound files in system specific formats. Often employers utilizing the Ultimate platform may need to contract with a third-party for manipulate files and build automated data exchanges.

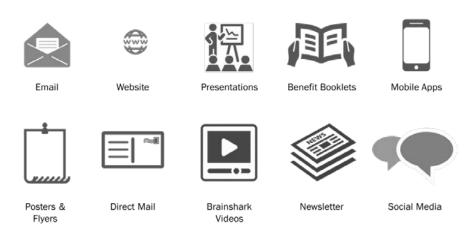

3) Do you have access to a mobile app that we could distribute to participants? Something that would allow them to have their medical card, plan documents, forms, wellness info etc. on their smartphone?

CBIZ provides practical benefits enrollment, communication and administration consulting advice followed by implementation and ongoing support. We recognize that there are many solutions designed to enhance the employee experience, as well as enable employee self-service. With billions of dollars spent by companies driving innovation for communication and education resources, it is more important than ever to work with a consultant possessing the necessary skills and resources to leverage this technology.

At CBIZ we believe that delivering a "one size fits all" solution to our clients conflicts with our consultative approach. In contrast, we have cultivated with relationships with dozens of vendors to provide a wide array of services for organizations the size of the Foundation. Below is a table of solutions for review:

Vendor	Description	Notes/Cost Estimate
BAS	No cost mobile application (more information located in the Exhibit C)	I.D. card, benefit and claim status information
Benefit Cloud	Low cost mobile application	Communication only, \$1 PEPM
Joshua & Company	Low cost benefit portal	Mobile enabled, communication only, \$8k
Maxwell Health	No cost benefit enrollment (with limited administration) platform	Mobile enabled, \$0 PEPM (future integration with Ultimate coming soon)
Oncore	Mid-priced benefit enrollment and administration platform	Mobile enabled, \$4 PEPM
PlanSource	Mid-priced benefit administration platform	Mobile enabled, \$5 PEPM
Zest Health	Low cost mobile application	Communication only, \$4 PEPM

Potential Engagement Channels

4) Please detail all of the open enrollment resources you could provide, e.g., if you led the meetings, what would that look like/what would you recommend? Access to videos that we could post to our intranet, help with collateral materials to distribute to participants?

Annual Enrollment Meetings

CBIZ understands employee education and utilization are crucial for maximizing your substantial investment in health and welfare benefits. CBIZ has made significant investments in tools and resources to ease the open enrollment process and has developed successful communication strategies leading employees to a better understanding. This in turn leads happier, healthier and more engaged employees. To help with the education process of open enrollment each year, CBIZ will provide the resources to coordinate and conduct group meetings, including meeting one-on-one with employees at scheduled annual enrollment meetings. We can prepare the presentation, invite carriers to attend and review each handout for content and accuracy. We highly recommend to have the carrier/vendor present their product and answer specific questions.

In addition to the in-person meetings, CBIZ provides a customized employee enrollment guide. This guide has all pertinent information on eligibility, carrier networks, plan designs/benefits offered, carrier extras, compliance requirements, and contact information. These booklets become a one-stop-shop for all benefits information and employee needs.

Online Communications

Brainshark

In addition to print communication, CBIZ can provide online and video materials. As such, we have partnered with Brainshark, a leading cloud-based platform for employer and employee education. Presentations can be viewed on-demand at the audience's convenience, "anytime, anywhere," including on mobile devices. Employees can review benefits communications as often as needed and easily share with others in their household.

CBIZ is able to script and produce these voice over benefits presentations to be given at large group meetings and posted on the Foundation's intranet for 24/7 access. This tool has been used by CBIZ clients for the following:

- Educate employees on understanding their benefits and becoming better consumers
- Teach the basics of HDHP and HSA programs
- Explain how to use new or existing benefit enrollment solutions
- Introduce new wellness programs
- Explain the benefit program to new and existing employees

7 | EWING MARION KAUFFMAN FOUNDATION

Your CBIZ team utilizes leading-edge employee communication strategies to make sure your employees understand and utilize their employee benefits, as well as appreciate your organization's investment in their health and wellness. This comprehensive method establishes the following objectives:

- Eliminate printing costs in year one and future years creating a recurring savings
- Allow the benefits guide content to be easily updated throughout the year and at time of renewal
- Allow CBIZ and the client to communicate and highlight important changes as needed
- Provide a simple way to allow users to link to other relevant content on carrier/vendor websites

Improved productivity: Employees receive training and communications on topics such as open enrollment, new hire onboarding, wellbeing, and important legislative updates, while minimizing non-productive time.

Uniform messaging: Consistency and clarity are critical when delivering an effective message. Employees will be able to view the same message and retrieve all the necessary forms to make informed decisions.

FlippingBook

CBIZ also has access to Flipping Book, an interactive online publishing site that transforms files into digital, interactive online publications and can be used for employee communication and education. Sample FlippingBook Projects include:

- Client Communication
- Employee Benefit Guide
- Benefit highlight brochure
- HR/New Hire Handbook

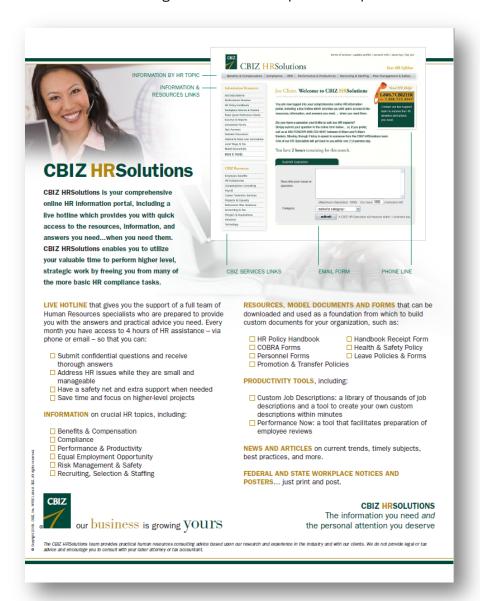

This tool allows for benefit guides to be accessible online with direct links to websites and integrated videos. This would enable the Foundation to communicate effectively to their multi-generational workforce and remove barriers to accessing information to facilitate year-round engagement.

5) Do you have access to an HR resource like ThinkHR that we could access for job description, comp data, sample policy/handbook forms/templates etc.

In addition to professional consulting services for human resources, compensation and executive placement, we provide our clients with access to a database of resources as requested above. Our scope of services includes access to CBIZ HR Solution, a comprehensive online HR information portal, providing information on crucial HR topics, including: Benefits and Compensation, Compliance, Equal Employment Opportunity, Risk Management & Safety; as well as resources, model documents and forms that can be downloaded and used as a foundation from which to build custom documents for your organization. Sample documents include; HR Policy Handbooks, COBRA Forms, Personnel Forms, Health & Safety Policies; and Productivity Tools, including: custom job descriptions. This tool serves as a great resource for topics that impact HR outside of benefits.

6) Do you have access to a wellbeing expert who could help us develop a 3-5 year strategy and help us look at/coordinate items in #1?

Your CBIZ team will work with you to devise an effective wellbeing strategy that incorporates components such as benefit plan design, incentive/engagement plan, health promotion, risk prevention, healthcare consumerism, disease management, etc with the goal to support employees and their families in living their best most vibrant life, while increasing employee engagement and workplace productivity. As a first step, we will inventory your current benefits, resources and tools, and identify opportunities for maximizing engagement. For example, we can host an Annual Wellbeing Summit to collaboratively engage partners around the program's vision, mission, strategic plan and metrics.

As we identify gaps in care or areas that need enhancements we will market, evaluate and facilitate selection of wellness partners, capable of delivering high impact wellness portal and services, effectively integrating with your existing programs and resources, and providing robust data reporting and incentive administration. CBIZ has vetted more than 80 wellness providers and through that process we have established a preferred partner network of best in class wellness vendors and negotiated competitive pricing on behalf of our clients. Lacey McCourt is part of your team of experts that will help develop and implement an engaging strategic plan to reduce costs for Kauffman. Lacey's biography can be found on the following page.

Lacey McCourt, MSW

Wellbeing Consultant
CBIZ Employee Services
Organization
A division of CBIZ Benefits &
Insurance Services, Inc

(913) 375-6454 Imccourt@cbiz.com

Business Experience

Lacey McCourt serves as a Wellbeing Account Executive with CBIZ, a national leader in developing and implementing health and productivity strategies and wellness programs. In her role, Lacey helps clients develop and implement strategies to build and maintain a culture of total wellbeing. Lacey works collaboratively with clients and vendor partners to develop effective and sustainable wellbeing solutions with the goal of helping individuals live healthier, more productive lives. Lacey plays a significant role in educating clients and key partners about the value of worksite wellbeing programs and the strategies to achieve high levels of employee engagement.

Before joining CBIZ, Lacey lead the Wellness and Employee Assistance Program team with a health care system in Rockville, MD. Lacey spent nearly 6 years with her previous employer in various roles including account management, business development and operational leadership.

Education

Lacey holds a Bachelor's degree in Social Work from the University of Maryland, Baltimore County, and a Master's degree from the University of Maryland School of Social Work, specializing in Employee Assistance Programs.

	Year Two	Client Lead	CBIZ Lead	Time Frame
	Establish senior leadership and manager "champions". Senior Management team must committed to improving the overall health of the workforce. Senior Leadership sets the tone for a culture of health, and employees are much more likely to participate when they know that CEOs, executives and senior managers are actively engaged. The senior leadership must also be accountable for ensuring that managers throughout the organization recognize their own responsibilities in creating the culture of health, including implementing and supporting programs and policies that have been put in place.			
•	Create and publish Quarterly Executive Communications Announcement setting expectations for participation and active			
	engagement for the year and annoucing incentive and recognition awards			
	Year Two	Client Lead	CBIZ Lead	Time Frame
	Designate an on-site, internal wellness coordinator. The wellness coordinator will be responsible for implementing Client's Wellness Strategic Plan, executing the Annual Calendar of interventions, programming and events; communication coordination, maintaining the Wellness Scorecard			
	Identify and establish employee 'Wellbeing Champions" in each department/office of Client. Develop a training and certification process and and visible recognition within Client to build their affinity to the program and gain their support for becoming an active advocate.			
	Identify employee barriers to accessing program elements (physicial, social, timing, weather, location, administrative) and create action plans and timeline for addressing Establish and implement healthy food guidelines for meetings or events			
	and vending Indentify/designate physical space for activity in all locations			
	Promote use of stairs Provide time during the work day for wellness event attendance			
	Provide time during the work day for weilless event attendance

Exhibit C: BAS Mobile Application

Welcome to BAS and our new online tools!

The *BAShealth.com* website was recently updated to provide a fresh look and easier access to the information you need to manage your benefits.

Whether you are looking for general information about BAS or you need to login to access detailed information in our secure portal, our new website has all the information you need.

The *BAS portal* provides members access to their benefits in a secure environment. Members log in to see claims history, deductibles, out-of-pocket amounts met, and can navigate to other benefit management tools, such as flex administration. Everything is laid out in a simple to use format.

The *BAShealth app* connects members to key information regarding their benefits through their smartphone. Similar to the information in the BAS portal, members also have access to their personal ID card, and can email the card directly from their phone. Anytime a member has a question, they can click *Contact Us* to be connected to BAS.

The **BAShealth app** and **MyFlex app** are **FREE** and available to download at the App Store or Google play.

The new *MyFlex app* allows members to check their flexible spending account balance, take pictures of receipts and file claims - all on their smartphone. No more time wasted on mailing or faxing receipts. The MyFlex app makes it simple and easy to maintain your flex account.
