

seima

bathroom kitchen laundry

NEWS MAGAZINE ISSUE #4

A close-up photograph of a metal faucet with water spraying from it, set against a background of diagonal lines. The faucet is the central focus, with water spraying from its spout. The background consists of a grid of thin, parallel lines that create a textured, woven appearance. The overall color palette is warm, dominated by shades of orange and brown.

Flow.

Fluid lines and beautiful forms

At Seima, we source and design our own products to be manufactured to the specific needs of the Australian market. But more than that, we strive to make the everyday extraordinary. Porcelain bathroomware, elegant tapware and stylish modern stainless steel sinks don't just get the job done, they have been masterfully designed to add elegance and innovation.

From cost and quality flows value

Seima is committed to providing value. Our products will reach you with a competitive price because our business model and overhead structures support efficiency. Our pricing is stable which is why many major developers, builders and architects specify Seima. Products are developed within ranges. Some jobs only need an efficient and reliable entry level product, others require a higher level of luxury. Seima products offer the right value for money.

A supply chain that flows for you

Seima delivers products to you through leading bathroom-kitchen-laundry suppliers in Australia. The heart of Seima's logistics is our Distribution Management System. That enables us to pack and despatch within hours of receiving an order. Our National Distribution Centre is in Adelaide, but we operate from Distribution Centres in Darwin, Perth, Melbourne, Sydney and Brisbane.

Excellent service by design

Whether it's a simple towel rail or an advanced and innovative toilet suite, Seima's extensive warranty, comprehensive local support and expansive stock holding are the foundations of our reputation. Seima offers a design review service. We can make recommendations based on your plans.

Life should flow, choose Seima.

Flow.

*with greater
efficiency.*

A close-up photograph of a toilet rim, showing the smooth, curved edge. The background is a light-colored wall with a subtle pattern.

Finally someone sat down and thought about the toilet.

There is nothing that can't be improved with innovative thinking. Seima applied this theory to the most 'utility' object in the home. And the result flows with state-of-the-art function.

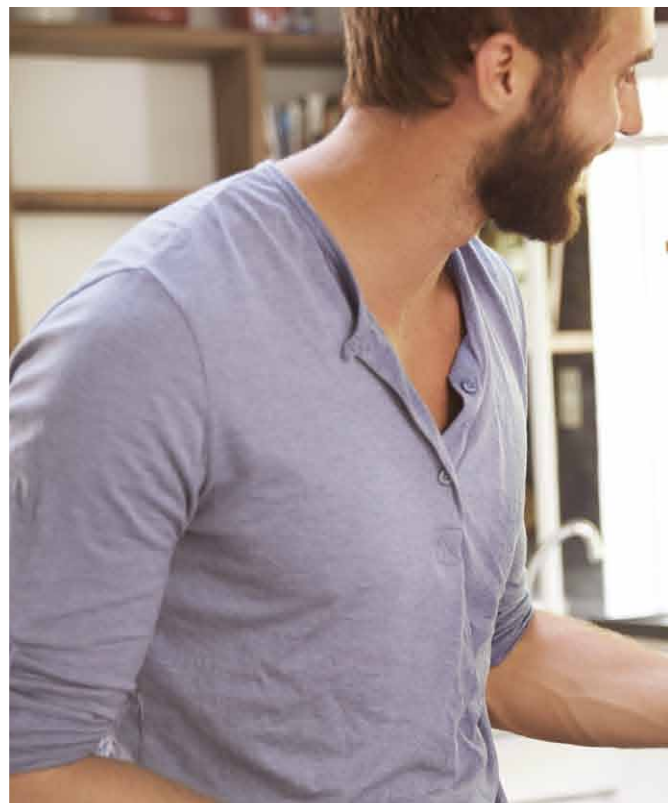

To begin with we removed the flushing edge, creating the Seima Rimless™ pan. Grime and bacteria have nowhere to hide. The more powerful flush is now precise and splash free. It efficiently washes the complete pan and uses less water.

Then we wrapped the whole thing in Seima NanoGlaze™ — a coating 6 times smoother than ordinary glaze. The toilet stays cleaner and is easier to clean. What's more, the coating contains a Silver/Zinc compound that actively reduces harmful bacteria such as Staphylococcus Aureus and Escherichia Coli (E Coli) by over 95%.

**These are the most efficient,
hygienic and easy-to-clean
toilets available.**

Life should flow, choose Seima.

Ceramic Basins

Choose a Ceramic Basin

Good Design for Everyone / It's Here.

Contemporary, funky, sculptural, minimalist, organic, square, round, classic. No matter what bathroom mood and style you wish to create, the ceramic basin that you choose will be a central design element.

Perhaps you want to create a minimalist, understated space using a linear undermount basin, or perhaps your design uses a gorgeous organic shaped basin as the centrepiece for the whole bathroom design. Whatever your inspiration, design brief and style preferences, there's a Seima ceramic basin to fulfil your design objectives and at the same time meet your practical ones.

All Seima basins are premium ceramic, also referred to as vitreous china. Most basins are white with a gloss finish. Three basin designs are also available with a sleek new matte black finish.

Seima ceramic basins are of the highest quality, backed by a 10 year warranty.

YOUR
BASIN IS
HERE

Abovemount Basins / Part or all of the basin sits above benchtop level.

Undermount Basins / The whole basin sits under a solid surface benchtop.

Semi Recessed Basins / The basin front protrudes from the edge of the benchtop by about 100-150mm.

Wall Basins / The basin is fitted directly onto the wall.

Abovemount

Black Ceramic / The New Black is Matte.

Introducing our sleek new matte black vitreous china basins. The same high quality as our gloss white basins but with a matte black finish.

These subtle forms, together with the matte black finish, are evocative of natural elements.

The strength and simplicity of matte black awaits your creativity.

Undermount Basins / Minimalist Style.

The minimalist and practical style of under counter basins provides a clean, sleek look that can enhance any bathroom space from contemporary to classic.

Undermount basins are positioned with the whole basin underneath the vanity top, giving a minimalist style that maximises the look and space of your benchtop.

Under counter basins are designed for use with solid surface benchtops such as stone and marble. Other solid benchtop materials such as wood may be suitable if sealed correctly.

Semi Recessed

Semi Recessed Basins / Maximise Space + Capacity.

Narrow vanity cabinets are often used to maximise space in the bathroom while providing valuable storage.

When space is at a premium, semi-recessed basins provide generous bowl capacity in a narrow vanity or benchtop and provide convenient access to the basin and tapware. The front of the semi-recessed basin protrudes from the edge of the benchtop by about 100-150mm.

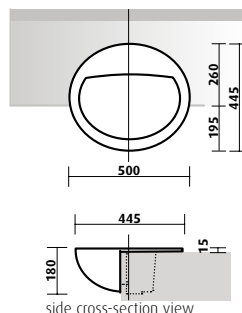

Chios / SBC-205

Classic oval semi-recessed basin

This classically styled semi-recessed basin offers generous bowl capacity and is ideal for narrow benchtops. The elegant design will complement a wide range of bathroom styles.

- 500W x 445D x 180H mm
- white vitreous china, gloss finish
- 0, 1 or 3 tapholes
- overflow, 32 mm waste

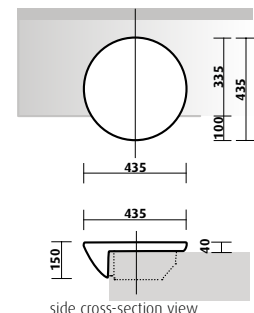

Ios / SBC-211

Round semi-recessed basin

- 435 diameter x 150H mm
- white vitreous china, gloss finish
- no taphole
- overflow, 40 mm waste

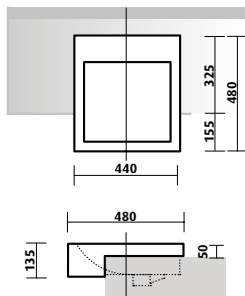

Kyra / SBC-210

Square semi-recessed basin

This minimalist square semi-recessed basin has contemporary architectural design features. Ideal for narrow benchtops, this basin has generous bowl capacity.

- 440W x 480D x 135H mm
- white vitreous china, gloss finish
- 0, 1 or 3 tapholes
- overflow, 40 mm waste

CERAMIC BASINS

Wall Basins

Wall Basins / Stylish and Independent.

Wall basins offer practical simplicity with style and have the advantage of not requiring a vanity cabinet or benchtop — they are simply mounted directly onto the wall. A wall basin is a great choice if space is limited, as they combine excellent functionality with minimal clutter. A sleek chrome bottletrap adds yet another stylish dimension for a designer look.

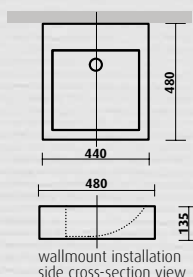

Kyra / SBC-010

Square wall basin (or above counter basin)

This square design basin has a minimalist architectural feel and features a platform that can be used for tapware.

Note: Back of basin is unglazed.

- 440W x 480D x 135H mm
- white vitreous china, gloss finish
- 0, 1 or 3 tapholes
- overflow, 40 mm waste

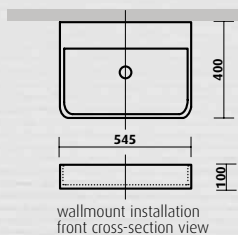

Plati / SBC-015

- 1 taphole
- overflow, 32 mm waste

Toilet Suites

Introducing **Seima Rimless™** Clean Flush

Seima is proud to introduce Seima Rimless™ – a world class innovation in toilet performance. We've removed the flushing edge, re-engineered the flushing process and wrapped the whole thing in Seima NanoGlaze™. The result is the Seima Rimless™ toilet, the most efficient, hygienic and easy-to-clean toilet available.

Powerful clean flush action

The more powerful flush washes the complete pan.

The flushing action is fast and efficient. Waste is propelled away in a single flush.

Even with the water-saving half-flush volume of only 3 litres, waste is flushed away efficiently.

Easy to clean, and green

Without the rim, grime and bacteria have nowhere to hide. Your toilet stays cleaner and is easier to clean.

The flow of water is precise and splash free, using less water and improving hygiene.

Seima NanoGlaze™ superior hygiene

The pan is wrapped in Seima NanoGlaze™ — a coating 6 times smoother than ordinary glaze, baked into the ceramic surface.

The coating resists grime and bacteria, keeping the toilet cleaner.

Seima NanoGlaze™ contains a Silver/Zinc compound that actively reduces harmful bacteria such as Staphylococcus Aureus and Escherichia Coli (E Coli) by over 95%.

InWall Toilet System Rimless

MINIMALIST
AESTHETIC

InWall System / Add Style. Maximise Space.

Seima's InWall toilets combine sleek style with efficient performance in a premium space-saving toilet system. The wall hung and floor mount pans feature Seima Rimless™ clean flush — the most efficient, hygienic and easy-to-clean toilet design available.

InWall toilet systems have a hidden cistern that can be installed either inwall or under counter. Seima's InWall system uses field-proven, durable components.

The innovative design allows the cistern to be serviced through the flush plate — no need to remove tiles or wall coverings, as all serviceable parts can be removed and replaced through the flush plate.

The extra-compact 80 mm thin cistern fits within a standard wall frame and is fully insulated against condensation.

The streamlined design and slimline pull-off seat with stainless steel pins make cleaning easy.

Baths

Freestanding Baths

*SOFT
ORGANIC
FORM*

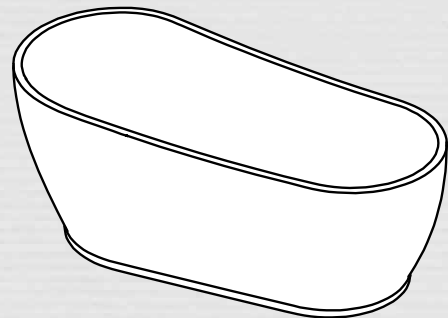

BATH BLISS

Freestanding Baths / Beautiful Forms.

A great bath can make all the difference. Sculptural, organic, geometric, timeless — a stylish freestanding bath will create a mood of comfort and luxury in your bathroom space. All Seima freestanding baths embody premier quality features:

- seamless construction, no joins
- white sanitary grade acrylic
- high gloss finish, easy to clean
- excellent heat retention properties
- adjustable support feet for levelling
- fits 40 mm waste
- built-in overflow in most designs

The built-in overflow with polished stainless steel exit is a special feature of most designs. The built-in overflow allows these bath designs to have thin walls while still having an overflow.

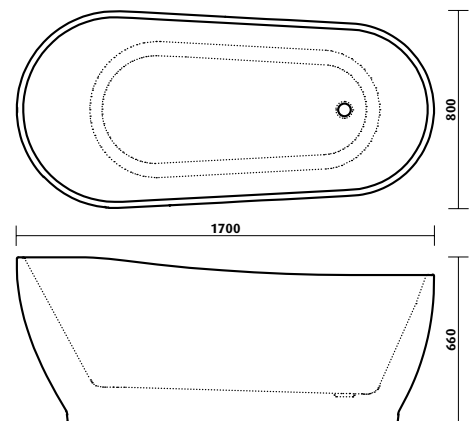

BUILT-IN OVERFLOW

Gyali / SBT-125 NEW

Freestanding Bath / Built-in Overflow

The soft organic form of this sleek, elegant bath is beautifully proportioned and will suit both contemporary and classic spaces. The generous size and subtle high back of the Gyali bath make it perfect for a luxurious bath experience.

Slider Vanity Series

*EVERYTHING
MATCHES
WHITE*

SLEEK THIN
CERAMIC
TOP

Two Cabinet Designs.

Choose the Slider Duo with double tier drawers or the Slider with single tier drawers.

Both designs have the same durable white high gloss painted finish.

Slider / The Perfect Shade of White. With Storage.

The Slider Series presents a beautifully elegant and simple wall hung vanity design with lots of storage space.

One-piece Ceramic Top. The perfectly white one-piece ceramic top is a sleek, thin design with a high gloss finish.

Wallmount. Innovative Kicker Option. While the Slider Series is principally designed for wallmount installation, the Slider vanities can also be teamed with one of Seima's innovative recessed kickers. A recessed kicker is sometimes used to cover floor exit pipes, but can also be an aesthetic choice.

- sleek, thin one-piece ceramic top, white vitreous china, gloss finish
- integrated basin in centre, 1 taphole, overflow
- two cabinet designs: Slider and Slider Duo
- cabinet: non-porous painted white high gloss finish
- smooth clean lines, no handles
- generous storage capacity
- durable surfaces, easy to clean
- premium soft-close drawer runners
- fits 40 mm waste
- designed for wallmount installation
- can be teamed with a recessed kicker

Slider Vanity Series

600, 750, 900 drawer interior

1200 drawer interior

What's Inside? There's lots of space to store your bathroom items. The easy-slide drawers feature premium soft-close drawer runners. The drawer interiors have channels designed to accommodate flexible plumbing options.

Slider / Single Tier Drawers

Slider 1200 /
SCV-SL1200-1

- 2 drawers, each 600 wide
- 1200W x 460D x 520H mm overall
- 1 taphole, overflow
- fits 40 mm waste

Slider 900 /
SCV-SL900-1

- 1 drawer, 900 wide
- 900W x 460D x 520H mm overall
- 1 taphole, overflow
- fits 40 mm waste

Slider 750 /
SCV-SL750-1

- 1 drawer, 750 wide
- 750W x 460D x 520H mm overall
- 1 taphole, overflow
- fits 40 mm waste

Slider 600 /
SCV-SL600-1

- 1 drawer, 600 wide
- 600W x 460D x 520H mm overall
- 1 taphole, overflow
- fits 40 mm waste

Slider Duo 750 with kicker 430 wide

**INNOVATIVE
KICKER
OPTION**

**Slider / Wallmount Design.
Optional Kicker.**

While the Slider Series vanities are principally designed for wallmount installation, they can also be teamed with a recessed kicker.

Kickers are often used to cover floor exit pipes, but can also be a design feature.

A kicker is a 3-panel structure that sits underneath the vanity cabinet against the wall. The kicker structure is recessed – set in from the front and sides of the cabinet, so that the cabinet retains the essence of its wall-hung appearance.

Recessed kickers come in five widths to enable you to achieve the look you want.

Kicker Dimensions

- Kickers are available in 5 widths: 430, 565, 715, 865, 1165mm.
- All Slider Series recessed kickers are: 310mm high x 250mm deep.
- Kickers are set back from the front of the cabinet by 200mm.
- The overall vanity height with kicker installed is 830mm.

Slider Duo / Double Tier Drawers

**Slider Duo 1200 /
SCV-SD1200-1**

- 4 drawers, each 600 wide
- 1200W x 460D x 520H mm overall
- 1 taphole, overflow
- fits 40 mm waste

**Slider Duo 900 /
SCV-SD900-1**

- 2 drawers, each 900 wide
- 900W x 460D x 520H mm overall
- 1 taphole, overflow
- fits 40 mm waste

**Slider Duo 750 /
SCV-SD750-1**

- 2 drawers, each 750 wide
- 750W x 460D x 520H mm overall
- 1 taphole, overflow
- fits 40 mm waste

**Slider Duo 600 /
SCV-SD600-1**

- 2 drawers, each 600 wide
- 600W x 460D x 520H mm overall
- 1 taphole, overflow
- fits 40 mm waste

Kahlo Mirror Cabinets

Kahlo / Smart Space Makers.

Tapware

Paloma Series

Paloma / Simply Outstanding.

The Paloma Series has presence. The subtly sculptural tapering forms exude effortless style and sophistication yet also have an alluring organic quality.

- gorgeously subtle tapering stem and head
- tall and elegant, minimalist aesthetic
- gooseneck design, swivel arm
- elegant tapering pin lever
- pull-out version available
- premier quality, chrome finish

Exemplary refinement, taking style to the extreme.

Paloma / SMT-220K **NEW**

Swivel Kitchen Mixer

Extreme style with the flexibility of a pullout head nozzle.

- charcoal grey mesh pullout
- 35mm
- ceramic cartridge
- WELS 4 star 7.5L/minute

Megalo Series

Megalo / Get Professional.

The Megalo hand spray kitchen mixers are exceptionally useful and versatile sink tools, often associated with commercial kitchens. They provide a high level of control over water flow or spray. The spray option is extremely convenient and flexible for rinsing items like vegetables and plates. You can extend the nozzle beyond the sink area — great for filling large pots and vases, for example.

- flexible hand shower
- fully adjustable spray option
- round and square designs
- premier quality, chrome finish

A practical and versatile tool for your kitchen, pantry, laundry or alfresco space.

Stainless Steel Sinks

See the Entire Sink Range

For today and lots of tomorrows.

Whatever your design influence and preferred architectural style — whether it's a strong minimalist or sleek architectural aesthetic, or a classically comfortable modern style — there's a premium Seima stainless steel sink that will fit perfectly with your design brief and fulfil all your practical requirements as well.

All Seima sinks are premier quality, backed by a 25 year warranty.

Undermount or Above-mount?

Thinking about whether to undermount or topmount your sink? While the undermount look is often the first choice, above-mount installation is increasingly used in contemporary design, for its practical simplicity and raw aesthetic.

Sinks in the *TETRA PRO SERIES* and *KUBIC KU SERIES* have superior rim finish and a low edge profile, making them ideal for either above-mount or undermount installation. There are design considerations and advantages with both styles.

UNDERMOUNT

Undermount installation requires a solid surface benchtop like stone or granite. The sink rim is mounted below the benchtop, so the sink effectively hangs under the counter top. This creates a continuous smooth surface from the benchtop directly into the sink and maximises the benchtop.

If you are concerned that the edges of the benchtop cutout may be hit by hard objects and become damaged over time, you may wish to consider above-mounting your sink.

ABOVEMOUNT

As well as protecting the edges of your benchtop cutout, this style has an appeal of its own and allows more flexibility in the choice of benchtop material.

The sink simply drops into a benchtop cutout and the rim is visible on the benchtop.

Tetra Pro / Sink Art.

- minimalist bold design, refined industrial aesthetic
- highest quality individually handcrafted
- sleek brushed satin finish
- designed for above-mount or undermount installation
- premium 304 grade stainless steel 1.2 mm thick

**LOVE
YOUR
SINK**

Tetra Pro Series / Sink Art.

Create an atmosphere of design excellence with a Tetra Pro handcrafted stainless steel sink. Inspired by a strong reductive aesthetic, the Tetra Pro series perfectly complements minimalist and contemporary architectural design. Superior edge finish means that Tetra Pro sinks are suitable for abovement or undermount installation.

- minimalist bold design, refined industrial aesthetic
- beautiful lines and geometries
- highest quality individually handcrafted
- designed for abovement or undermount installation
- 1.2mm thick premium 304 grade stainless steel
- sleek brushed satin finish
- deep, large capacity bowls
- easy to clean corners, 10mm radii
- sound deadening
- distinctive square basket waste

A refined presence in your kitchen, pantry, laundry or alfresco space.

Tetra Pro / SKS-T1160

Abovement or undermount

- abovement, can also be used undermount
- 2 bowls + 1 drainer right or left
- deep, large capacity bowls
- generous drainer, gently sloping
- stylish wide outer rim
- ultra low edge profile
- square basket waste
- tapholes: 0, 1LD, 1RD

WHAT'S
NEW

INNOVATIVE
BLADE
DESIGN

Tetra Pro Blade / Sleek Design meets Practicality.

There's more to the *Tetra Pro Blade's* sleek design than its exceptional appearance.

Apart from the stunning look of the *Blade* sink — you look and then look again — there are practical advantages to the two bowls virtually butting up to each other. (In reality there are two distinct bowls separated by an almost invisible 2 mm bridge of stainless steel.)

PRACTICAL EVERY DAY

Because the *Blade's* two bowls are so close together you can move your running tap from bowl to bowl without splashing, which has clear advantages!

BENCHTOP SIMPLICITY

The *Blade* requires only a single cutout that leaves the rest of your benchtop sleek and intact. The *Blade's* minimalist lines enhance the sleek look of your benchtop.

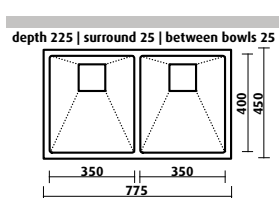

Many traditional double bowl sinks have a 60-80mm bridge between the two bowls, leaving you with two choices: either leave the wide metal bridge between the bowls visible, or have two holes cut in your benchtop, with 60-80mm of stone running between the bowls. Neither of these choices is the best solution for maximising your benchtop or for everyday usage.

Tetra Pro / SKS-T775

- includes rinse bypass kit
- reversible door
- height adjustable feet

Be different. A sleek, special sink in your laundry adds value in every sense without compromising practicality.

There is no correct size. Choose a sink that fits your specific needs and space. Large sinks can serve many purposes. Compact sinks can free up valuable benchtop room.

Streamline your benchtop. Choose a sink that integrates with your benchtop for a sophisticated look that functions brilliantly.

Eva Ceramic Laundry

**SLEEK
LAUNDRY
STYLE**

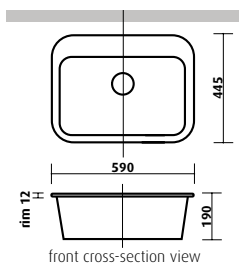

Eva / Ceramic Style.

Bring a sleek new aesthetic to your laundry with a versatile and super-smooth, fresh white ceramic sink.

Eva ceramic sinks have a Seima NanoGlaze™ surface which is extremely smooth and glass-like, dramatically reducing the ability of grime and bacteria to cling to the surface. Seima NanoGlaze™ also contains antibacterial elements baked into the glaze to actively resist bacteria. This makes cleaning easier and the sink has a beautiful sheen.

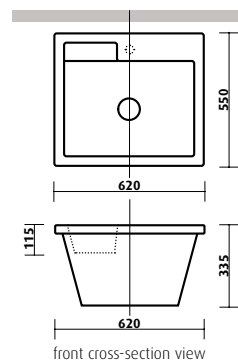

- white vitreous china, gloss finish
- hygienic Seima NanoGlaze™ surface
- 45 litre and 23 litre sizes
- stainless steel designer basket waste

An attractive and versatile sink for your laundry space. Easily doubles as a wash basin for guests and great to use as a baby bath.

Eva 23 litre / SBC-600

- 590W x 445D mm
- 23 litre capacity
- white vitreous china, gloss finish
- Seima NanoGlaze™ surface

Flow.

with no splash.

More razor-edge thinking from Seima.

The trouble with the traditional double bowl sink is that the bridge between the two bowls is too narrow to cover with stone benchtop and too wide to be inconspicuous. At 30 to 40mm wide it creates splashing when a running tap changes sides.

Introducing the Tetra Pro Blade that addresses these problems with one simple and stylish idea — we've butted the two bowls together. Not only does it look stunning, it simplifies and minimises the cut out.

The simple ideas are often the sharpest.

Life should flow, choose Seima.
