Introduction

Publisher 2 is a Windows application, designed to create modern, user-friendly and attractive publications from traditional documents.

With the help of Publisher 2, you will be able to create online publications for websites, offline publications for CD, DVD and Flash-drives (for Windows and Mac OS X), as well as online publications for mobile devices (iPad, iPhone, and Android devices). PDFs and images (JPEG, PNG, BMP, TIFF and SWF) can be used as source files.

With the Professional and Business editions you can import any documents stored on your computer, including your MS Word, Excel and PowerPoint files, into your publications. Also Publisher's Business edition supports several integrated methods of protecting your publications from unauthorized access and unwanted copying of content.

The new version integrates with popular social networks, supports very large publications (up to several thousand pages), and allows the creation of publications that will be optimized for search engines (SEO) and special publications for the increasingly popular mobile devices.

Quick Start

This chapter describes how to quickly create a publication from a PDF file and upload it to FlippingBook Cloud.

Let's assume that you have already installed and run your copy of Publisher 2.

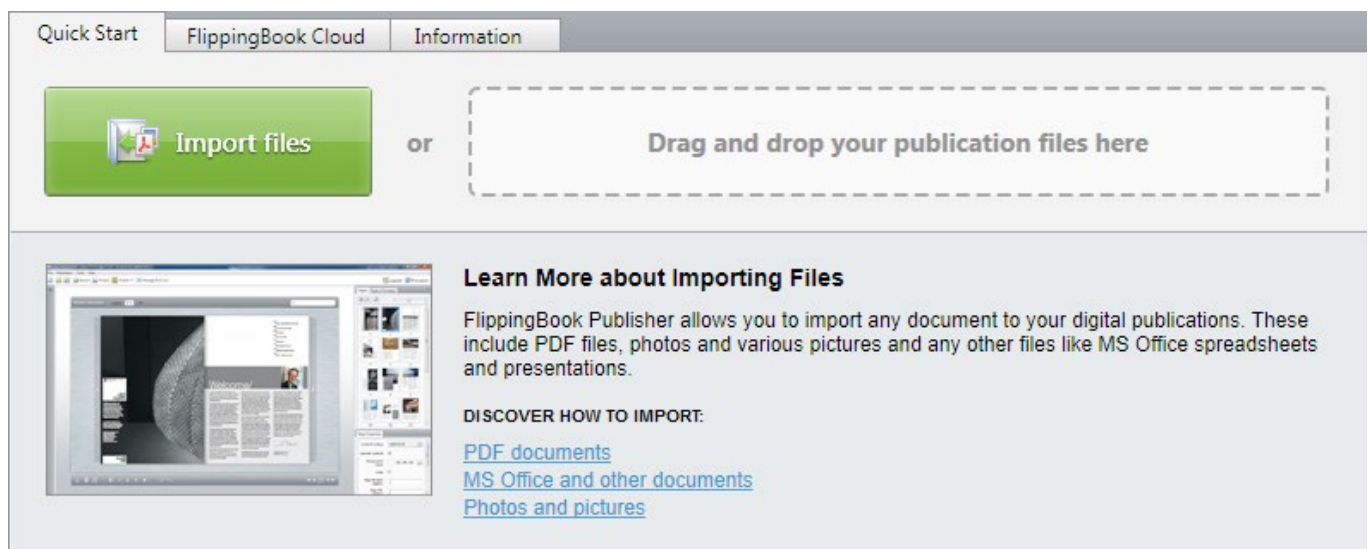

IMPORTING PDF FILES

FlippingBook Publisher offers users the greatest and most powerful options for the importing of PDF files in the whole world market of e-publishing. Users can import documents of any type including magazines, books, catalogues, brochures, presentations. FlippingBook Publisher provides users with the best means of conversion so that all materials easily become great digital publications.

Choosing the source file

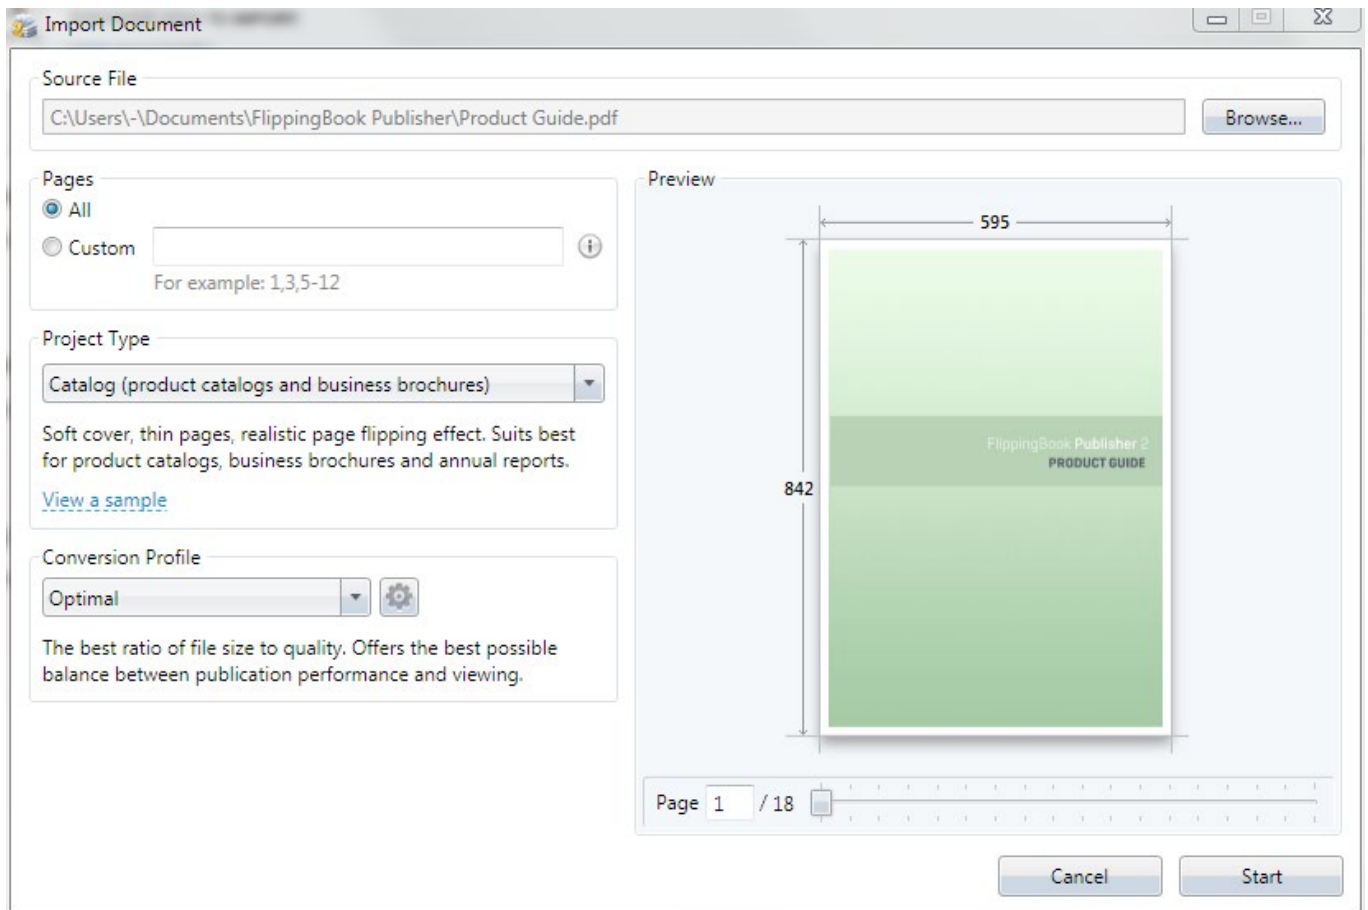

The easiest way to import PDF files is to use the "Import Files" button on the FlippingBook Publisher start page or drag and drop a file from a folder directly to the marked field.

For user convenience, there are alternative ways of importing MS Office and other non-PDF documents.

The screenshot shows the top navigation bar with tabs for 'Quick Start', 'FlippingBook Cloud', and 'Information'. Below the navigation bar, there is a green button labeled 'Import files' with a document icon, followed by the word 'or' and a dashed rectangular box containing the text 'Drag and drop your publication files here'. Below this, there is a preview window showing a digital magazine spread. To the right of the preview window, the text reads 'Learn More about Importing Files' followed by a paragraph: 'FlippingBook Publisher allows you to import any document to your digital publications. These include PDF files, photos and various pictures and any other files like MS Office spreadsheets and presentations.' Below this paragraph, it says 'DISCOVER HOW TO IMPORT:' followed by three blue hyperlinks: 'PDF documents', 'MS Office and other documents', and 'Photos and pictures'.

Preparing PDF files for importing

Simply specify a file and FlippingBook Publisher will offer users the most suitable publication type and other import settings.

Choosing pages for importing

Users can either import a whole file or select pages for importing by specifying their numbers in the corresponding field.

Choosing the publication type

Select the most suitable publication type using the "Publication Type" panel and FlippingBook Publisher will automatically adjust the look and behavior of the subsequent publication.

FlippingBook Publisher provides users with a short description and a preview option, available via the "View a Sample Publication" link, for each type.
